Wright's K9 Security Services

MEET THEIR FLEET:

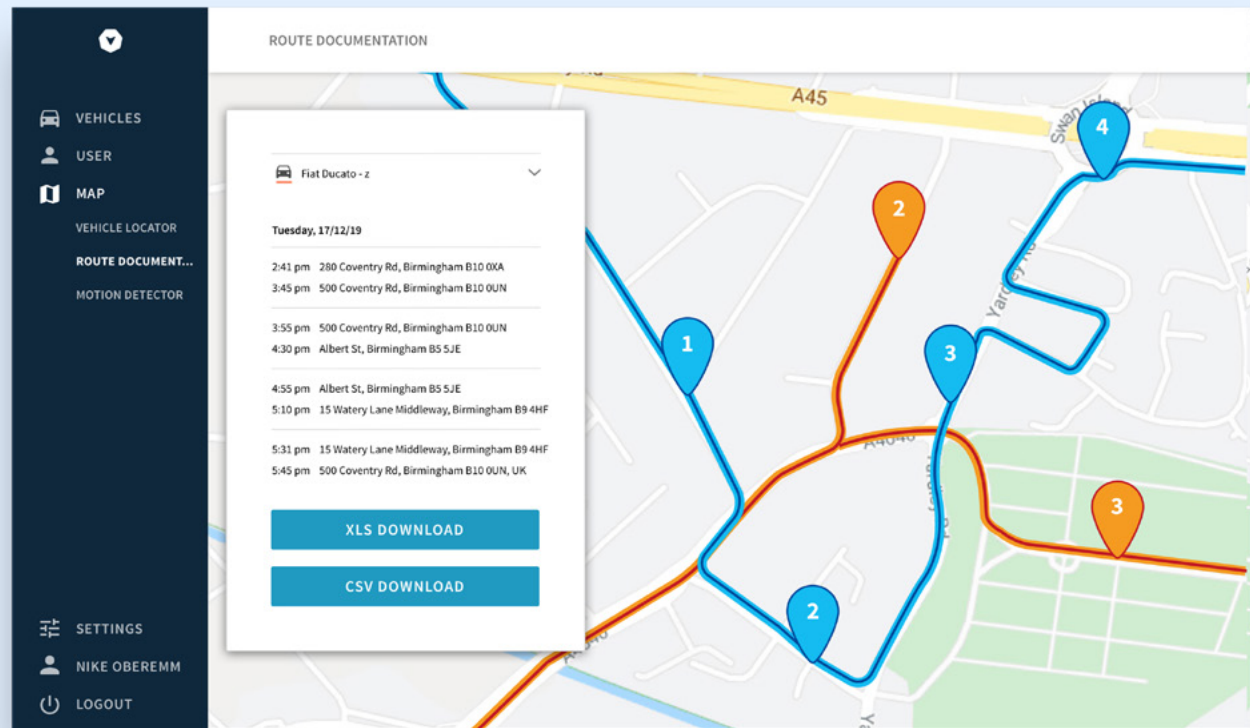

Fleet size
5 vehicles

Fleet type
Company vans

Interview with fleet representative
**Allun Wright,
Company Founder**

Wright's K9 Security Services provides clients with high-threat protection and specially-trained canines. Their fleet transports its precious canine cargo and sends out security personnel in emergency security situations.

They installed Fleet Geo to ensure all vehicles are used fairly and appropriately.

Vimcar solutions to real problems Minimising vehicle misuse

“We were dealing with vehicle misuse within our fleet. That’s now been solved! Fleet Geo allowed me to monitor drivers’ speeds and distances: I can see if there have been any discrepancies with employees logging in their working times.”

Having paid for the fuel and fleet vehicles himself, Allun wanted to put a stop to unpermitted vehicle use.

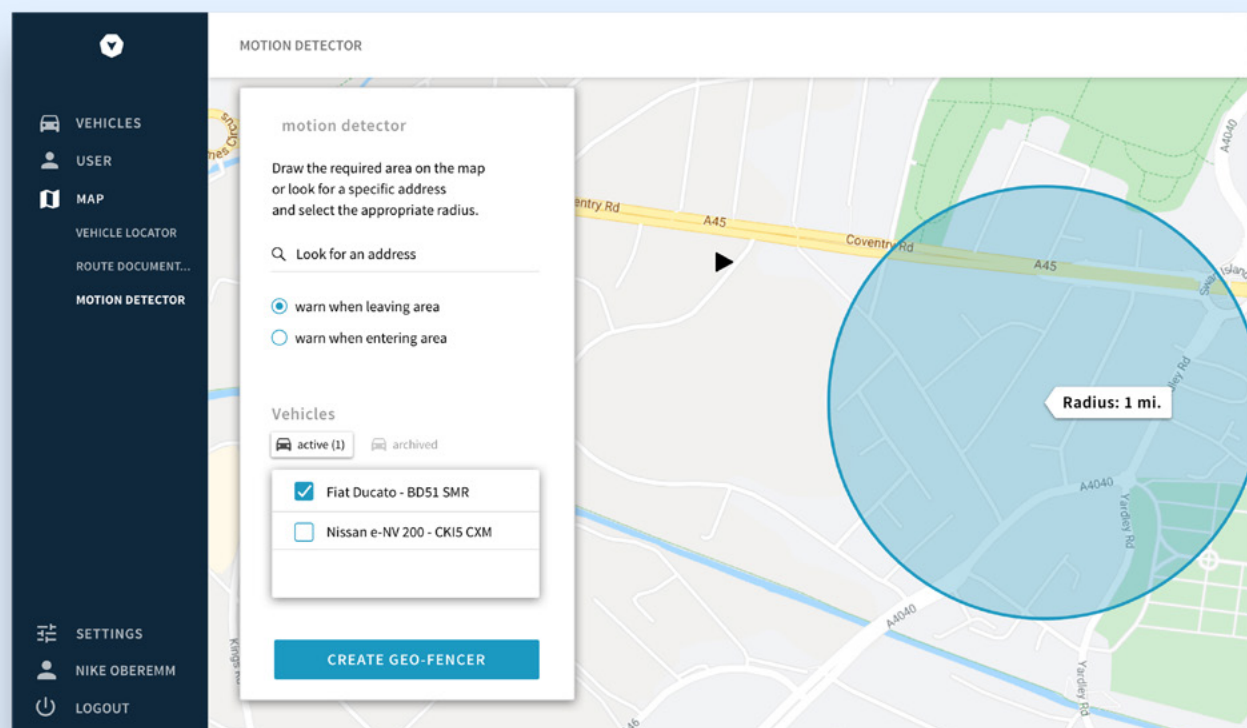

He can now **analyse vehicles’ live location and route history** and is notified when a vehicle leaves the premises outside of business hours.

How can Route History help your business?

“After contacting Quartix and receiving no response, we decided to go with Vimcar, who responded within 24 hours.”

Vimcar solutions to real problems Gain a greater overview

“It is really important to me that I can see where my fleet is at any given time. I have set up my Geofences, for example, to find out when my employees are arriving and leaving an area.”

How can Geofencing help your business?

Allun is notified whenever a driver leaves the depot, so he can **warn a customer to expect** a delivery.

He can also easily see vehicles' routes and optimise them to ensure they **deliver to more customers in one day.**

**“Issues were sorted straight away.
They’ve been really helpful and polite!”**
