ENGINEERING & TECHNICAL SUPPORT /CCC TRAINING*

**CHINA CERTIFICATION & INSPECTION GROUP
EUROPE-TESTING S.L.**

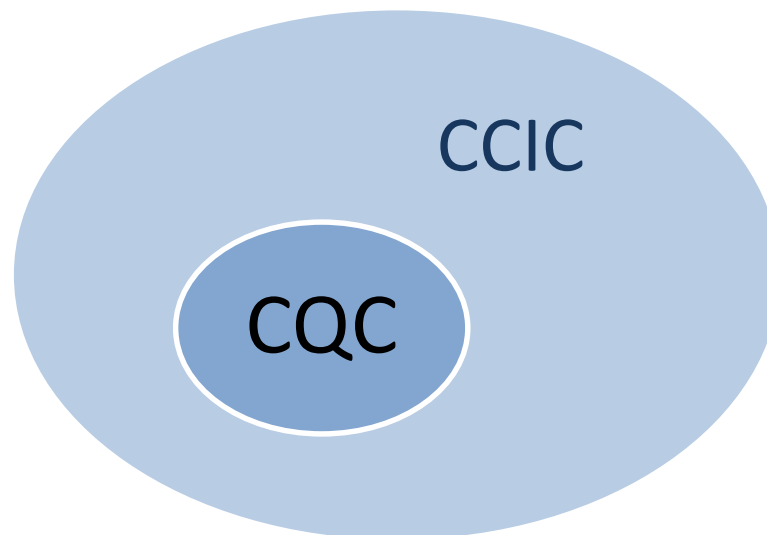

中国质量认证中心
CHINA QUALITY CERTIFICATION CENTRE

CCIC Europe-Testing S.L. (CCIC EUT) is the first laboratory founded by **China Certification & Inspection Group (CCIC)** and **China Quality Certification Centre (CQC)** out of China mainland. As an independent third party who provides testing services of vehicles parts and components, our main goal is to help the automotive industries to enter Chinese Market.

CQC is the largest professional certification body under **CCIC**. Its principal business involves product certification, including China Compulsory Certification (CCC), voluntary certification, management system certification and certification training services.

China Compulsory Certification (CCC) is a compulsory homologation of products which are ready to be commercialized in China. Its scope of application covers most products in the market from wire and cable to automobiles.

CCIC EUT provides all service related to CCC. The service embraces from application to the supervision after approval.

- Testing service.
- Factory inspection.
- Engineering & technical support.
- Training.

CCIC EUT is the coordination centre of certification procedure between customers and CQC. And also is the only **CQC European Training Branch** for motor vehicles and components.

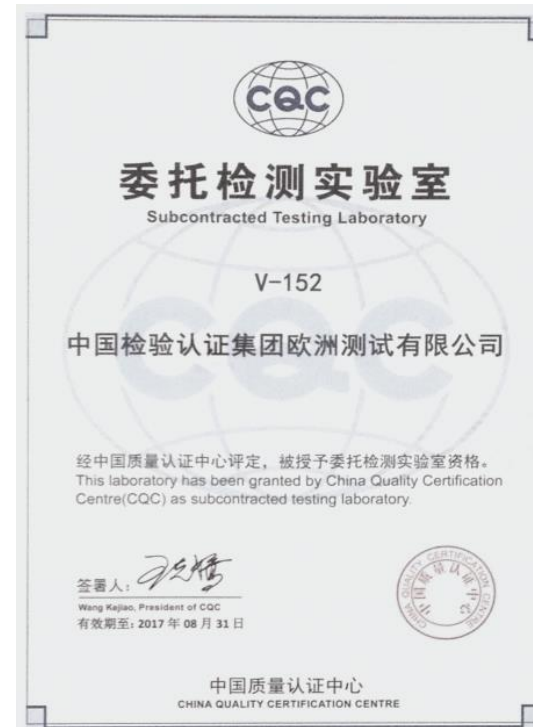

Our fundamental advantages:

- Technical support from more than 20.000 employees around the world.
- High technology testing equipment.
- Research + Development + Innovation.
- Gather a long experience over years.

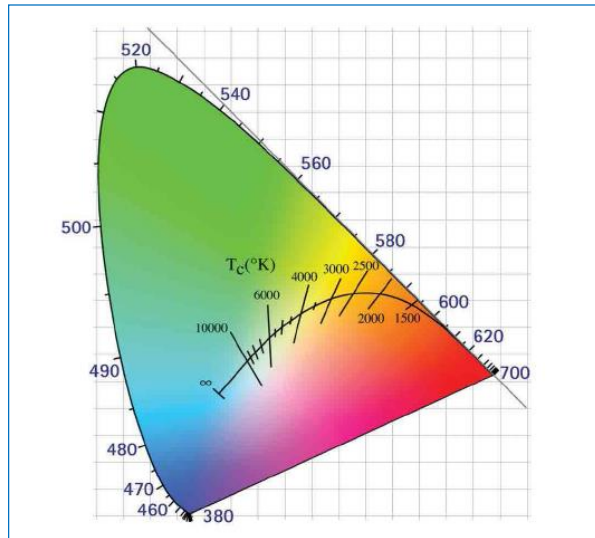

CCIC EUT is an expert on the motor vehicles components and parts.

Our product testing focuses on the following automotive parts:

- Motor vehicle external lighting, light signalling devices and retro reflector devices, as well as motorcycle lighting components.
- Automotive interior trimming material.
- Door locks and door retention components.
- Devices for indirect vision.

CCIC EUT also works with **Textile products, Non-Metallic materials** and is devoted to **environmental endurance** tests.

Photometry testing of motor vehicles lighting signalling and retro reflector devices:

- Light projection.
- Uniformity.
- Colorimetry.
- Illuminance.
- Luminance.
- Luminous energy.

Combustibility and flammability analysis of vehicles' interior trim materials:

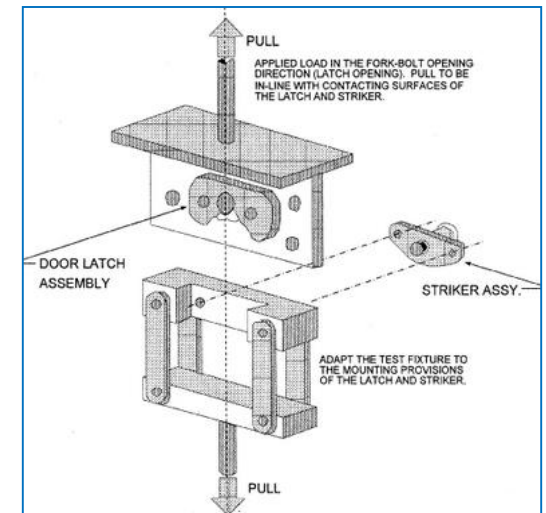

- Non-combustibility and flame propagation of the material:
Horizontal flammability characteristic.
Vertical flammability characteristic.
- Oxygen index classification.
- Smoke density classification.

Validating motor vehicles' door locks and retention components.

Behaviour of vehicles hinges and locks in most adverse conditions simulated.

Viability of vehicle indirect vision system.

- Rear view mirror physical properties: Curvature radius and reflectivity.
- Verification of mirror's geometrical shapes.
- Behaviour of the set in front of mechanical stress.

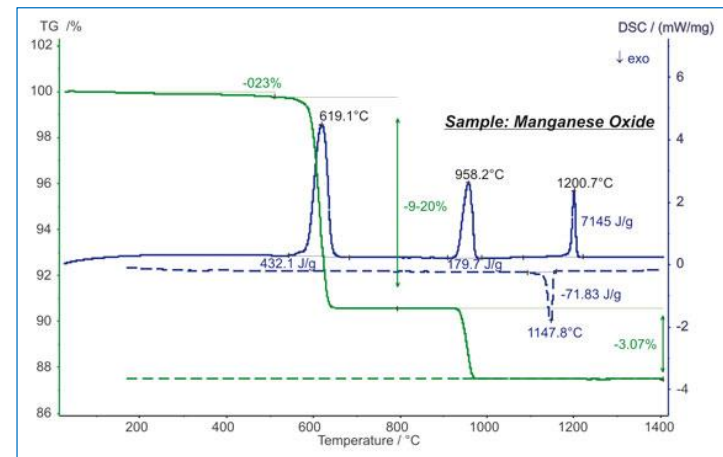

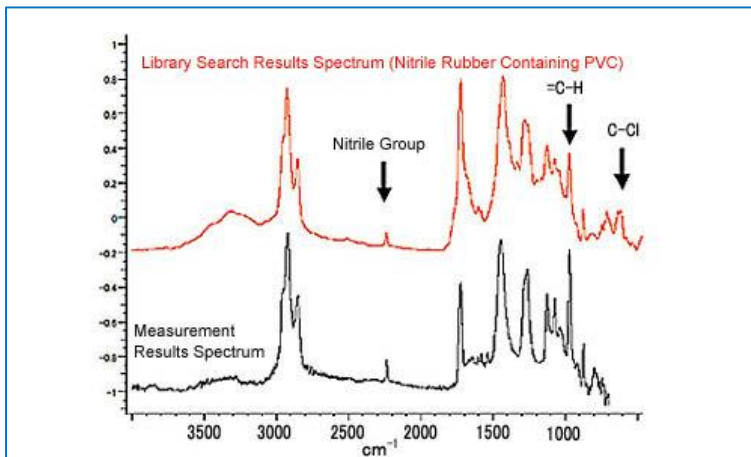

Environment endurance of product in simulated conditions:

- Deformation of product in extremes temperatures and moisture attack.
- Tightness of enclosure to moisture and solid particles.
- Solar radiation exposure.
- Corrosion attack resistance.

Non-metallic material testing.

- Material density.
- Components identification.
- Resistance of material to heat and deformation.
- Material fire hazard properties.

Textile Materials

- Identification of textile fibres
- Textile fibres quantitative analysis
- Colour fastness to perspiration
- The banned azo colourants
- pH of aqueous extract
- 4-aminoazobenzene

CCIC EUT also provides local factory inspection service.

Our ability covers the most products of CCC catalogue, such as wire and cables, small power motors, motor-operated electric tools, electrical household appliances, IT equipment, motor vehicles and components, and safety accessories.

CCIC EUT Provides CQC training courses, regarding to the latest regulation policies and technical issues related with motor vehicles and components, delivers State Certified Auditor training programs in various fields, and offers senior management training programs for quality manager.

How to reach us?
