0. Foreword

Based on the safety risk and certification risk of automotive and trailer products, this Rule specifies the basic principles and requirements of implementation of compulsory certification of all the automobile applied, to ensure certification product continually conform with legislation, regulations and standards.

This Rules is supplementary to general implementation rules announced by the Certification and Accreditation Administration of People's Republic of China (Hereafter "CNCA"), including Implementation Rules for Compulsory Products Certification——Factory Classification, Selection and Determination of Certification Mode, Implementation Rules for Compulsory Products Certification——Utilization of Testing Resources of Factory and Other Certification Results, Implementation Rules for Compulsory Products Certification——General Rules for Factory Inspection.

Accredited certification body should draft implementation specifications according to general implementation rules and this Rules, combining the management of Factory Classification and implement them accordingly at the same time.

A factory should guarantee that its certificated products can continually meet the requirements of certification and applicable standards.

1. Scope

This Rule is applicable to category M, N vehicles and category O trailers(including complete and incomplete), which are allowed to run on Chinese roads and city streets.

This Rule is not applicable to low speed vehicles (three-wheeled vehicles and low speed trucks), vehicles which run on rails and wheel-specific machinery vehicles designed for working on blocked roads or places not for running on roads, agriculture and forestry tractors, various engineering and machinery and non-cabchassis.

Any modification of scope due to changes of legislation regulation, product standard, and technology and industry policies is subject to the announcements by CNCA.

The application free of certification due to scientific research, testing and other special reasons is subject to the provisions by CNCA.

2. Terms and Definitions

The Definitions of vehicles refers to GB/T 3730.1 Motor vehicles and trailers-Types-Terms and Definitions; GB/T 17350 Terms and marks in special automobiles and semi-trailers, GB 7258 Technical conditions for safety driving of motor vehicles; the classification of vehicles are in GB/T 15089 Classifications of power-driven vehicles and trailers. For example:
