

Together, we're creating a new way to think about insurance: digitally and easy.

## This is your chance as:

# Senior UX Designer / Design Lead (m/f/d)

in Stuttgart

Adam Riese is changing the way we think about insurance, by making it quick, easy and delightful to use. Our vision is to make insurance transparent and affordable, by radically rethinking the insurance experience. As part of a new breed of Insurtech disruptors, we champion a user-centric approach and agile process, to bring insurance in to the digital age.

We are looking for an enthusiastic self-starter who is a highly motivated problem solver to lead our design team. You see challenges as opportunities to crafting exceptional user experience, and you are a motivated problem-solver. The original Adam Riese would be proud.

### You will

- create highly functional, intuitive and accessible user experience, for a growing selection of insurance products
- research, identify and articulate customer needs, and align these with business goals
- collect and analyse data, using your insights to create useful user-experience to tackle complex tasks
- conduct user research, usability testing, A/B testing, rapid prototyping, and show knowledge and flexibility of how and when to use these
- create user-journeys, personas, sketches, wireframes, and prototypes
- be a team player – and a motivating leader – with a professional presence, working as part of a cross-functional team in an agile environment
- help the Product Owner define both long and short-term vision and roadmap for digital products, and lead and motivate a team of designers in structuring design workload
- clearly articulate design needs and key decisions to business stakeholders across markets and brands collaborating closely with the Product Owner
- be excited about the future and bring new trends and technology into our services

### Requirements

- 6-8 years strong experience in web and mobile UX design and development
- a well-rounded, user-centered design portfolio that spans a combination of responsive web and mobile
- demonstrated use of a diverse set of software such as Sketch, Adobe suite, OmniGraffle, Balsamiq, Azure, Invision, Principle, other tools for UX and visual design
- experience with insurance products a plus
- you are a strong facilitator, communicator and presenter
- German fluency is preferred, with strong English skills a plus

**About us**

We're an Insurtech company, that is standing on the shoulder of a giant. As the sister company of W&W Insurance, we're pulling on our wealth of knowledge, and mixing this with a radical new approach to insurance. We celebrate unique, creative and engaged people who take pride in what they do, and value/support their team members. Also, we keep a healthy stock of snacks and drinks, and excellent coffee. Furthermore, we encourage professional development, and want to see you grow in your role, offering you opportunities for training and attending design conferences.

**You are interested?**

Then we're looking forward to hearing from you! The only things we need is your CV and a short but informative email, telling us what type of person you are.
