Critical Facilities Solutions

MEET THEIR FLEET:
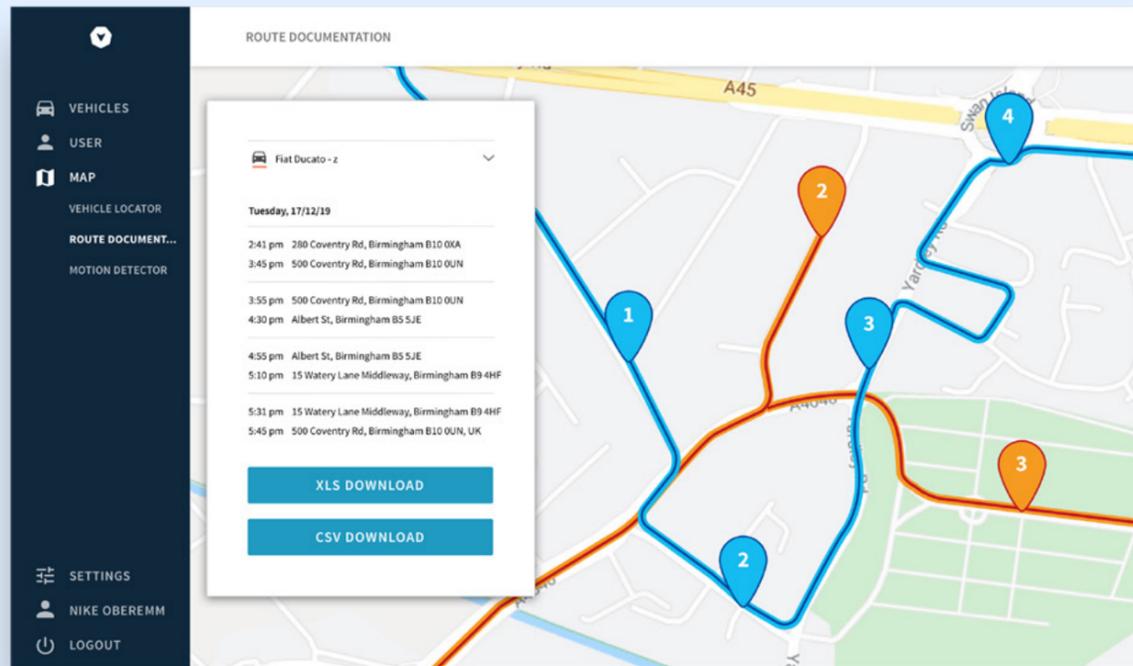

Fleet size
5 vehicles

Fleet type
Company vans

Interview with fleet representative
**Mike Meyer,
Managing Director**

CFS's fleet travels all across the country to service 'data centers', ensuring they are safer and more efficient.

The company's mission is to provide a reliable and quality service. So, running their fleet needs to be done efficiently and without any high costs that could be passed onto their customers.

Vimcar solutions to real problems
Cutting costs

"*We use Fleet Geo data to help us with our costs.*
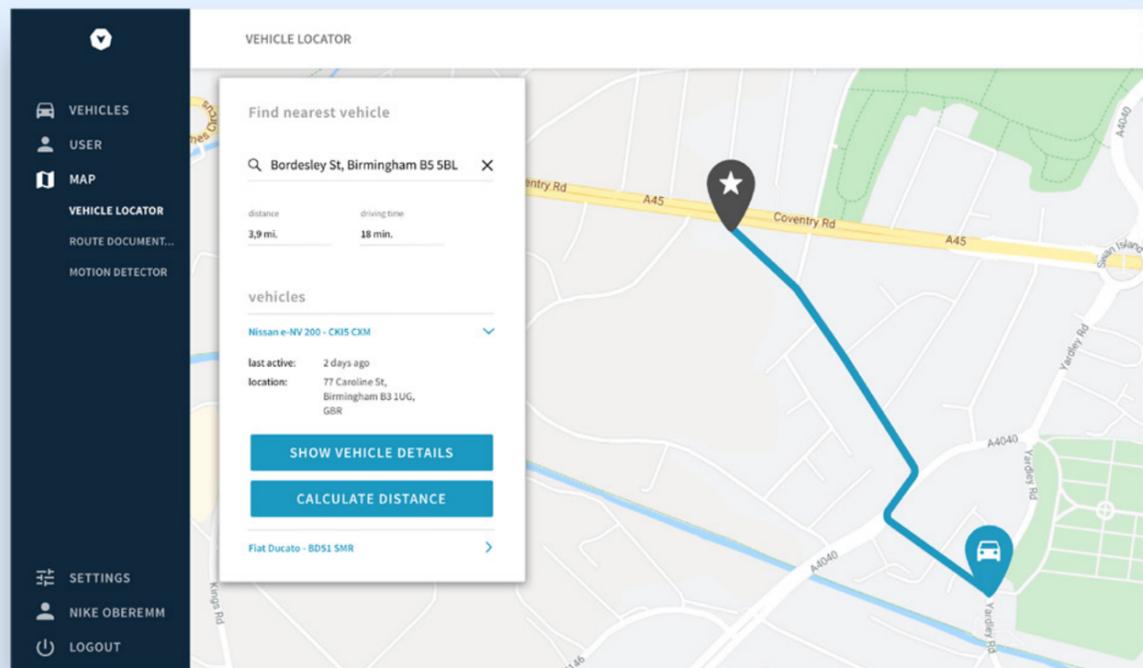

How can Route History help your business?

For multi-day jobs - on the other side of the UK - Mike can now see if it's cheaper for an engineer to drive back home or stay in a hotel overnight.

He can also find out which driver is **closest to a particular appointment** or if multiple drivers are servicing the same areas at the same time. Fleet Geo excels at **identifying money-wasting** issues in your fleet.

"Fleet Geo does what it says: it's an easy-to-use tool. Simple to install and there are no ongoing costs."

Vimcar solutions to real problems
Boosting customer service

> *"What's great is having a helicopter view of our vehicles at all times, providing customers with accurate ETAs and ascertaining when a driver has arrived and left a site."*

How can Live Tracking help your business?
Find out more →

Fleet Geo's customisable alerts notify Mike when a driver is about to **arrive at an appointment** and when a driver is leaving (and is therefore available for a new job).

Our live map also allows Mike to give customers **accurate ETAs** and find out which driver is closest to an appointment request, meaning more customers can be served in one day.

VIMCAR
FLEET GEO

"From the Account Manager and initial interaction to payment flexibility, everything is dead-easy and simple."
