MEET THEIR FLEET:

Fleet size
6 vehicles

Fleet type
Pool cars

Interview with fleet representative
**Doniert Macfarlane,
Owner & Director**

Doniert's company, Talk to a Doctor, is at the forefront of the modern healthcare industry. A large part of the business involves making sure paramedics get to their patients on time.

In most emergency cases, therefore, an efficient fleet is critical to their patients' health.

Vimcar solutions to real problems Finding the nearest vehicle

“We had a need for formal logistic software to distribute paramedics in London and North England: Vimcar was the solution!”

How can Live Tracking help your business?

[Find out more →](#)

When sending health workers to patients across the UK, it is absolutely vital for Talk to a Doctor to do so as swiftly as possible.

The Live Tracking and Address Search functions can be used to quickly locate and **send out the nearest available** paramedics to a patient's home.

Fleet Geo has, therefore, been great for Doniert's business and patients alike.

“Vimcar was the exact solution we were looking for - and was really easy to install!”

Vimcar solutions to real problems Improving Fleet Security

*“It’s really improved our vehicle security.
We use Geofences to ensure vehicles are
not moving out of hours and create remote
vehicle storage locations.”*

How can Geofencing help your business?

With Live Tracking Doniert can check that every vehicle is where it should be. He also uses customisable alerts (or ‘Time and Geofences’) that **notify him when a car leaves** the premises outside of business hours.

He’s set up Geofences around London and created virtual ‘drop-off points’ as well. Now, his team can leave vehicles in several parts of the city and Doniert knows that he’ll be **alerted of any suspicious activity.**

“It’s cost-effective and easy to use - it can really help with Fleet management on a plug and play basis.”

Find out how Vimcar can be tailored to help your business as well.
