

## Explanation of the type descriptions of the oboe gouger

Related products : Oboe gouger.

This document explains the different type descriptions found on the oboe gouger. Unless otherwise specified, dimensions are in millimeters.

### Bed set

Example: D11/L76/T0,6

- D stands for the cane diameter.
- L stands for the cane length.
- T stands for the thickness in the middle of the gouged cane when the pointer on the bed set is at "0". Due to tolerances in the parts of the gouger, this may vary a little bit

### Carriage set

Example: D11

- D stands for the gouge diameter.

### Guillotine and cutting plate

Example: D10,5/12

- D stands for the cane diameter range that can be cut with the guillotine or cutting plate.

### Shear knife

Example: D6

- D stands for the diameter of the point of the shear knife.
