

Marek Derroitte

Resume

I started classical dance as soon as possible in Belgium at the age of 7 at the small academy of Marche-en-Famenne (Belgium) in the bi weekly class of Mrs Lydia Terf. I was the only boy in the academy but it didn't scare me. To learn ballet reinforced my intuitive conviction of wanting to be a professional dancer. And it never decreased.

So with this project in mind I integrated different school to satisfy national compulsory education where in parallel to academic courses I benefited from a serious training in classical and contemporary dance. After official school I also took vocational classes in the Brussels Conservatory of Dance Maison Béjart during 3 years.

I also attended various winter and summer training classes with professional dancers. That's how I could enter the ESB in Amsterdam just one year before Covid pandemic.

Back to Belgium because of pandemic I entered straight away the professionn program in Brussels International Ballet School.

From the age of 13 I dance intensively and more than 30h/ week. I met a lot of professional dancers, ballet or contemporary dance teachers, in different countries and with different ways to transmit their passion. I learned a lot from all of them, from the most humble to the best known of them.
