# Supported Printers with Nextimage Software

Document number
WP13529

About this document.
This document contains a list of printers that are fully compatible with Nextimage software. The printers are compatible with the applications through predefined printer profiles. Using the Printer Profiles that are listed in this document you achieve optimal printing results by setting the application to the profile that matches your printer model. If you do not find your relevant printer in the list, you can create your own Printer Profile for the printer through the software or by printing to a hot folder.
