Wide Format Scanning and Copying Software

[Installation](#)
[Version Changes](#)
[Supported Printers](#)

Installation

This software can be run on the following operating systems:

- Windows XP (Pro), 32-bit
- Windows XP (Pro), 64-bit
- Windows 2003 Server (Standard Edition), 32-bit
- Windows Vista (Business) 32-bit
- Windows Vista (Business) 64-bit
- Windows 7 (Professional) 32-bit
- Windows 7 (Professional) 64-bit
- Windows Server 2008 (Standard Edition), 64-bit
- Windows 8 (Enterprise) 32-bit
- Windows 8 (Enterprise) 64-bit

At first start-up you are required to specify a Product Key. The Product Key is located on the DVD cover or distributed as a printed or electronic document.

Version Changes

Changes in 4.1.1

28069 28458	New	Support for Canon iPF680/685/780/785, iPF 6400SE/6410SE/8400SE/8410SE
28566	New	Allow image adjustments when using Indexed Color.
28507 28567	New	Support for HP DesignjetT795/T795ps, Designjet Z6600/Z6600ps/Z6800/Z6800ps
27721	New	Startup in TWAIN mode after Windows reboot if Nextimage was last used in TWAIN mode.
28461	New	Support for Oce Plotwave 750
28568	New	Support for Epson SC-T3200/T5200/T5200D/T7200/T7200D
27575	Fix	Using ‘Reset all Settings’ caused paper frame to disappear from current scan.
27620	Fix	Using ‘Auto Length’, but not ‘Auto Width’, on iFlex scanner resulted in wrong scan area.
28236	Fix	Sometimes unable to use scanner after Nextimage restored from Notification Area.
28332	Fix	Cancelling ‘No Media’ dialog caused Nextimage to become unresponsive.
28500	Fix	Scans with rotation sometimes resulted in error.
28518	Fix	Making Indexed Color preview in TWAIN caused Nextimage to become unresponsive.
28598	Fix	Making Indexed Color Copy sometimes caused Nextimage to become unresponsive.
28624	Fix	Not possible to select printers using Windows drivers. Only printers using application

Changes in 4.1

27267	New	Performance and memory usage improved.
22490	New	Supported Canon media for different medias merged into common list, to avoid the need for specifying region in printer settings.
25868	New	Sharpen and Smoothen Image Adjustments added to B&W Threshold Image Type.
26496	New	Search for scanner during application start-up now continues until one is found or user cancel search.
27315	New	Added ’From name’ to ’Email Setup’
27389	New	Display of Help now integrated in application instead of using default web browser.
27417	New	Default compression for CALS file format changed to Type 1.
27455	New	Bi-directional communication to HP Designjet T920, T1500, T2500 for reading installed media etc.
27924	New	Default of ‘Auto size to’ changed to ‘Any size’.
27392	Fix	Some predefined presets did not include the state for ‘Auto’ option of B&W Points.
27466	Fix	It was not possible to remove a created ‘Output ICC profile’.
27553	Fix	Using ‘Align to Measure Line’ in the Rotate/Mirror panel with a vertical measure line caused image to be rotated 90°.
28160	Fix	Printing to HP T610 did not work.
28162	Fix	Pressing the (green) Start button on the iFlex scanner while the application was not running caused an error.
28183	Fix	Colors in auto palette could be bad dependent on setup in 24 bit Color.
28221	Fix	Starting application from Notification Area with a scanner in sleep caused an error.
28226	Fix	Indexed color gave 24 bit file if using Manual Palette and ‘Apply palette in view’ was not checked.
28260	Fix	Exceeding maximum length or width of 200 inches when writing PDF files did not show a message.
28277	Fix	Selecting a very small area in the image viewer while using Sharpen could cause a crash.
28303	Fix	If scanning to a multipage file after scanning to certain single page formats resulted in the first scan being saved to a single page file.
28354	Fix	It was not possible to use the application from multiple logged in users on the same PC.

28361	Fix	Pressing Scan button quickly after changing a setting could cause an error.
		Several user interface corrections.

Changes in 4.0.3

27885	New	Advanced dimensional corrections (Accuracy Lens Enhancement and Enhance Horizontal Accuracy) are now disabled by default.
27752	Fix	After use of auto size, subsequent scans would be missing the top edge of the image.
27762	Fix	Scanning using B&W Adaptive in high resolution could cause an application error.
27811 27827	Fix	Waking scanner after sleep could cause an application error.
27862	Fix	Scanning on a monochrome scanner caused an application error.
27898	Fix	Saving multipage files in the File task caused an application error.

Changes in 4.0.2

27314	New	Allow preview when scanning to email or TWAIN.
27386	New	Support for HP Designjet Z5400.
27533	New	Warn users during install if new license key will be needed.
27586	New	Individual set of predefined presets for CIS and CCD scanners.
27617	Fix	Opening a multipage file could change file type for subsequent scans.
27678	Fix	Partial image remained in viewer if scan was cancelled.
27672	Fix	Using Autosize in the TWAIN driver could cause an application error.
27707	Fix	Starting TWAIN driver could fail.
27737	Fix	Sharpen, Smoothen and B&W Adaptive was not always applied correctly to image during scan to file (introduced in 4.0.1).

Changes in 4.0.1

27400	New	Support for Epson SC-T3050/5050/7050, SC-T3070/5070/7070, SC-T3080/5080/7080.
27558	New	30 days trial period when installed on PCs with older versions.
27488	Fix	The Product Improvement Program dialog could be displayed before Nextimage was visible.
27494	Fix	Auto size selection was not remembered after a Windows reboot.
27505	Fix	Compensate for printer margins did not always have the desired effect.
27520	Fix	Accounting statistics did not include oversize scans (scans larger than A2/C-size) on flatbed scanner.
27522	Fix	Improved display quality of Sharpen, Smoothen and B&W Adaptive when zoomed out in image view.
	Fix	Miscellaneous user interface corrections.

Changes in 4.0

26694	New	Support for new Contex HD iFLEX scanners.
26895	New	SnapScan workflow for improved performance.
26903	New	Support for HP Designjet T2500.
26956	New	Scan up to A1/D-size document on an A2/C-size flatbed scanner.
26959	New	Improved startup speed by minimizing application to Windows Notification Area.
26960	New	Integrated email functionality using SMTP. Note that to send emails larger than 3 MB Microsoft .NET Hotfix KB2183292 is required.
27032	New	Support for Canon iPF64x0S, iPF84x0S.
27149	New	Redesigned application help, and translation added for Dutch, Italian and Korean.
27174	New	Support for Mutoh RJ-900X, RJ-901X.
27266	New	Improved speed when saving to TIF files using LZW compression.
27426	New	Improved speed when saving to file.
26079	Fix	Missing warning when closing application with edited image in the File Task.
26689	Fix	No media in Canon iPF820 caused an application error.
26796	Fix	Printing on a Canon iPF750 using USB could cause an application error.
27119	Fix	Descreening and Turbo resolution modes could generate files with wrong resolution.
27175	Fix	Media list contained invalid medias for Océ ColorWave and PlotWave printers.
27215	Fix	Mixing color and monochrome pages in PDF/A multipage files caused an application error.
		Several user interface corrections.

Changes in 3.1.5

26908	New	Support for HP Designjet T920 and T1500.

Changes in 3.1.4

26792	New	Support for Canon iPF6400, 6450, 8400, 9400 and 9400S.
26861	New	New medias supported for Canon printers: CAD Tracing Paper and CAD Translucent Matte Film.
26156	Fix	Printing of the ICC sheet without media in printer could cause an application error.
26626	Fix	Missing translations of Canon media names.
26684	Fix	When printing on multi-roll Canon printers the media width was not considered.

26701	Fix	Switching between presets using different Smoothen values could cause an application error.
26805	Fix	Japanese localization corrected for Print button.

Changes in 3.1.3

26562	Fix	When scanning CLC sheet error messages was missing translation.
26572	Fix	Printing on a Canon printer sometimes caused an application error.
26575	Fix	Selecting a Canon printer sometimes caused an application error.

Changes in 3.1.2

26545	Fix	When combining auto size and resize no file/copy was created.
26563	Fix	Missing translations of media names and some error messages.

Changes in 3.1.1

26497	Fix	Preview scan of Adaptive Threshold did not match the end result.

Changes in 3.1

21640	New	Improved multi roll selection on Canon printers.
24931 26327	New	Support for Epson SC-T3000/5000/7000
25749 25750 25751 25752 25756	New	Support for: Océ ColorWave 300/550/600/650 Océ PlotWave 300/350/900 Océ TCS300/400/500 Océ TDS300/320/400/450/600/700/750/800/860
24627	New	The ‘File name’ option is now displayed without file extension to ease entry and modification.
25784 26268	New	Improved automatic paper size detection. The Auto Size Scan Length option has been removed as part of this.
26037	New	Support for 64 bit TWAIN clients.
26081 26265	New	Improved Adaptive Threshold image type with revised presets. Available for 2012 scanners only.
26281	New	Support for Canon iPF760/765.
26283 26292	New	Added bi-directional communication with Canon printers via LAN. This limit the media list to those medias currently loaded in the printer and automatically selects the proper media source.
26328	New	Added ‘Compensate for margins’ option under Print panel. This allows print to stay same size as original.
21086	Fix	When opening TIF files in planar format the program crashes.
21329	Fix	Revised Canon iPF755 media list to match printer.
23060	Fix	The ‘Scan speed limit’ option was incorrectly displayed with decimals.
26080	Fix	In the ‘Product Upgrade’ dialog the button texts were confusing.
21105	Fix	When trying to scan with the scanner’s lid opened a wrong error message was shown.
24285	Fix	Start-up time and general GUI responsiveness was very slow on some systems.
24619	Fix	If no printers were installed in Windows then several error messages were shown during start-up.
24684	Fix	If the ‘Optimize for Speed’ option was used, the ‘Raw file duplicate’ was not disabled.
24802	Fix	When exceeding length limit for JPG/PDF the error message was not informative.
24819 24888 25142 25276	Fix	The numbering field in the ‘File name’ option could generate wrong numbers.
24912	Fix	Context sensitive help was missing in some dialogs.
25000 25358 25528	Fix	Dialogs in ICC wizard were shown behind the main window.
25020	Fix	When having multiple rolls of same media in HP printers, the media appeared multiple times in the media selection list.
25295	Fix	When resetting the threshold value for Fixed Threshold images, the value was not properly reset when using the Negative original option.
25315 25563 25808 25721 26080 26082 26135 26159 26168 26186	Fix	Several user interface corrections.
25325	Fix	Color space and ICC profile selection were shown for monochrome scanners.
25333	Fix	The ’search for scanners’ option during application start-up did not work.
25337	Fix	When writing an image to a PDF file and using Resizing this could sometimes result in an error.
25554	Fix	T7100 Monochrome model was incorrectly considered as a color printer.

25723	Fix	File Browse option opened in wrong location when using the <MYPICTURES> field.
25837	Fix	If JPG/PDF width limit was exceeded the application crashed.
25985	Fix	A Reset option for the Accounting panel was missing.
26047	Fix	Color picker for B/W points were very slow.
26068	Fix	The application did not detect if Windows printer drives were uninstalled.
26087	Fix	When using a dual monitor setup, some pop-up lists could appear on the wrong monitor.
26134	Fix	When cancelling a scan to a JP2 file using auto length an error occurred.
26140	Fix	The Smoothen option set to 3 or 5 gave image artifacts.
26164	Fix	The CLC wizard sometimes failed while scanning the sheet.
26171	Fix	The default printer quality has been changed from Best to Fast.
26181	Fix	When saving an opened single-page file to a multipage format an error occurred.
26195	Fix	When automatically creating new folders, the user is no longer prompted for permission.
26231	Fix	'Auto size to' now also snaps the scan in the length direction to selected standard series.
26262	Fix	'Auto size to' now available for all scanner models. For ISO A series multiples of A4 lengths are also supported.
26287	Fix	When manually adjusting image alignment in a preview the application could freeze.
26311	Fix	When opening corrupt TIF files the program crashed.
26371	Fix	One-Touch buttons on the scanner did not react if a file was opened in the File task.

Changes in 3.0

25603	New	Windows 8 (Enterprise) support.
25580	New	Support for HP Designjet T120 and T520.
16579 20972	New	Grayscale adjustments added to the Adaptive Threshold image type. This includes black/white point, gamma, sharpen, soften and display of histogram.
25959	New	The B&W Line preset has been replaced by B&W Fine Line, B&W Old Drawing and B&W Blueprint.
25895	New	The Color Photo preset no longer adds sharpen.
25866	New	New Auto Black/White Point option for Color, Grayscale, and Adaptive Threshold image types.
25888	New	Folder and File name now defaults to <MYPICTURES>\scan <001>.tif.
25261 25958 25889	New	ICC profiles are now listed by their description instead of their file name.
24935 25892	Fix	Zoom buttons could become disabled in some situations.
24998	Fix	The installation could wrongly request the user to manually install .NET 2.0 under Windows 64 bit.
25831	Fix	Missing message when opening a third party PDF file and the GhostScript utility was not installed.
25835	Fix	Scanning in grayscale to a PDF file after having scanned in color could gave an error.
25854	Fix	Copying to Canon printers using auto length could output too much media.
25862	Fix	Improved CLC sheet recognition by adding extra top margin to the output. Only added when printing in landscape orientation, A4/Letter printers are still supported by printing in portrait orientation.
25954	Fix	When saving a preset, some parameter sections could not be excluded.
25848	Fix	Application could pause if panning image outside the image borders.
25893	Fix	Speed improvements to selection frame used for Detail scan and color picker.
25980	Fix	Application could crash on slow PCs when finalizing a scan.

Changes in 2.2.2

25535	Fix	Printing problems for Canon iPF760/765 (only in grayscale and B&W) and HP Designjet T1300.
25553	Fix	Problem reading printer status on USB-connected newer HP printers on some PCs.
25557	Fix	Some error messages from newer HP printers were wrongly displayed as 'disk full'.

Changes in 2.2.1

25241	Fix	Opening PDF files sometimes gave error

Changes in 2.2

24898	New	Support for Canon iPF 760 and 765
25080 25081	New	New color spaces: Adobe RGB, Device RGB and Raw RGB (48 bit)
25233	New	Improved colors when printing to all newer HP printers supporting Device RGB mode
25319	New	Improved colors when printing using CLC
25267	Fix	ICC was not embedded in PDF files

Changes in 2.1

24329	New	File extension in "file exist dialog" removed in edit box to ease renaming of file
22512 23524	Fix	Problems starting application if Windows had no printers installed
24748	Fix	Crash if selected printer had been removed in Windows
23753	Fix	Some application dialogs were shown in front when switching to other applications

24455	Fix	Preset star (* shown when a preset is modified) was shown after using One Touch buttons on the scanner
24476	Fix	Yellow sticker in the corner of the image area (shown when doing batch and multi-page scanning) was sometimes shown when doing single-page scanning
24612	Fix	Problem restoring application window size when leaving full screen mode using Alt+Enter
24677	Fix	Image artifact with older CCD scanners when scanning above physical resolution
24697 24784	Fix	When using counter field in file names, a single digit field (<0>) did not support more than 10 files.
24826 24874	Fix	Application crashed when only using counter field in file names
24715	Fix	A fast cancel of a copy could give an error (1-261)
24908	Fix	When creating or editing a Printer Preset in Printer Setup, a number of parameters could not be changed
24911	Fix	Rotating very large B&W images (1 bit) gave error
	Fix	Several corrections to translations

Changes in 2.1 Beta

24233 22010	New	File name counter field now supports removal of files during a batch session
24049	New	PDF file format version is now 1.7. PDF/A remains at version 1.4 (as required by PDF/A standard)
22015	New	Opening PDF files no longer requires Ghostscript PDF library to be installed for a selected range of PDF formats
22015	New	General multipage performance improved
24013	New	Reversing of thick originals in scanner supported (requires firmware update to CCD-scanner models released fall 2011)
23836 24093	New	Some scanner related settings under the Scan-Option panel was stored in the scanner. All such settings now stored locally in the application to better support multiple users on a network scanner
23529	Fix	Missing One-Touch presets for B&W scanners
23631 21344	Fix	Missing updates to histogram in File Task
23666	Fix	Error scanning 1200dpi to PDF
23758 24226 24258 24289	Fix	In the Printer setup dialog, it was not possible to create custom presets, and some presets were listed twice
23762	Fix	HP Print Queue; 'Submit time' displayed incorrectly
23802	Fix	Missing predefined printer settings for: HP DJ T610ps,620ps,770ps and imagio MP W3600, imagio MP W2400
23877	Fix	In ICC Color Management, 'rendering intent' was blank by default (corrected to 'Perceptual')
23879 24202	Fix	Selected Color Management was not saved when exiting the application
21679 23950	Fix	Improved PDF support for opening indexed color images, resulting in better colors
24039	Fix	Print to a hot folder was not listed as an option
24098	Fix	Opening a multipage file reset printer selection to Windows default printer
24102	Fix	Some One-Touch presets were not shown if multiple scanners were connected
24118	Fix	Despeckle option performed hole filling
24236	Fix	When opening B&W files, a black line/band could be visible on the right side for certain image sizes
21484 23863	Fix	Improved auto palette for indexed color scans, improving quality as well as file sizes
24097	Fix	Application required printer to be configured as Windows Default printer in the MFP edition
23629 23646	Fix	Improved handling of network scanners in use by other clients
23632 23667	Fix	Several corrections to Output File panel in the Scan and File Task in relation to working with multipage files
23633	Fix	Rotation and cropping of pages was not illustrated in the multipage page selection dialog
23719	Fix	Improved handling during installation of missing Windows and .NET components
24259	Fix	Canon printer job name showed 'test1'. Now shows application name and file name
23757	Fix	Saving multipage files in the File Task multiple times did not always update the file
23763	Fix	The 'Auto size to' list is now limited to the enabled paper series
23906	Fix	Selected network printer was not remembered after restart, when running in other languages than English
23940	Fix	Application froze if refreshing scanner list after turning off scanner
23931	Fix	Application could freeze when opening unsupported variants of TIFF files
24047	Fix	Using 'reset all settings' option incorrectly displayed color 'Image Adjustment'-sub-panels while viewing a B&W image
24073	Fix	Printer's media selection when using CLC was reset to topmost media in list after printing
24205	Fix	Improved support for B&W TIFF files with BitsPerSampleTag specified
		Several corrections to error messages
		Several corrections to translations
		Several corrections to user interface graphics

Changes in 2.0.3

24331	Fix	Designjet T620; crash during startup caused by improved queue management on sibling models.
24332	Fix	Canon printers; media selection was not correctly sent to the printer.

24333	Fix	TIFF group 3 and packbit options generated bad files.
24390	Fix	Unable to open certain types of TIFF B&W (1 bit) files.

Changes in 2.0.2

24218	New	Localized help in Chinese (Simplified), French, German, Japanese, Polish, Russian, Spanish

Changes in 2.0.1

23803	Fix	30-day trial runs with REPRO edition feature set
23835	Fix	Indexed color PDF files can be opened
23744	Fix	In the action bar, the Batch button is visible for all supported languages
23742	Fix	In the action bar, the icon labels are visible for all supported languages

Changes in 2.0

23063	New	MFP, SCAN+ARCHIVE and REPRO editions. Old editions are discontinued.
23055	New	Multipage TIFF and PDF support
22249	New	New Accounting feature
22769	New	Programmable One-Touch buttons
	New	Support for new scanner models
	New	Support for switching between scanners
23502	New	User interface for file format properties
	New	‘Option’ section inside the ‘Scan’ panel
22642	New	Improved data compression when using TIFF LZW
21861	New	Support for user defined medias on relevant HP printers
22939	New	New ‘Auto size to’ function for scanners with paper size sensors
22706	New	New ‘Optimize for quality/speed’ toggle for scanners with AccuColor
22190	New	PDF/A toggle
23327	New	‘First Time Setup’ dialog; ‘Paper series’ setting also controls ‘Units of measure’ and ‘Auto size to’.
22831	New	Improved support for connecting to network printers
22161	New	Improved handling when writing very large files

Changes from 1.6.9 to 1.7.0

22640	New	Support for HP DesignJet 111
	New	Support for HP DesignJet T1300 and T790

22729		
21418	New	Embedding of ICC profiles in files is now only done when set explicitly by the user.
20204	Fix	TIFF indexed color; white came out slightly gray. White was coded as 65280 instead of 65535
22163	Fix	Sometimes you don't get bidirectional contact to HP printers.
21879	Fix	Submitted time in print queue shows garbled characters.
22225	Fix	Nextimage could crash during startup if settings file was defect

Changes from 1.6.8 to 1.6.9

22673	Fix	Installation problems on some systems

Changes from 1.6.7 to 1.6.8

22454	New	Support for Canon iPF6300S and iPF8300S
22292	Fix	Flatbed scanners: Application crash if scanning full size originals using auto size.
22270	Fix	CIS scanners: Potential crash when scanning using auto size.
22231	Fix	Unable to use Japanese characters in PDF file names.
22201	Fix	Rotation not applied when using TWAIN
22261	Fix	Printer Info was not shown for HP DesignJet 4000/4020/4500/4520
22427	Fix	Epson Stylus Pro 7700/9700 scaling and media size problems on certain medias.
22358	Fix	Flatbed scanners: Horizontal cropping does not work
22316	Fix	Unable to save input size / crop size

Changes from 1.6.6 to 1.6.7

22125	New	Help added in German, Spanish, French and Polish.
22159	Fix	Unable to print to HP printers connected via USB.

Changes from 1.6.5 to 1.6.6

21875	New	Support for HP DesignJet T2300(ps), T7100(ps), T770(ps) 24", Z2110, Z5200(ps), Z6200(ps)
21090	New	Support for HP DJ T1200ps
21878	New	Support for "Custom Papers" on HP printers having this feature.
21321	New	Generated PDF files now comply with the PDF archival definition (PDF/A).
22053	New	Scaling extended to 1 to 10.000%. Number of copies extended to 9999.
21896	New	Mutoh RJ-90x printing speed improved for fast and normal quality.

21836	New	Support for Canon iPF6300, iPF6350, iPF8300, iPF8310
21881	New	Support for Canon iPF815, iPF825
21689	Fix	The “Document Name” in windows printer spooler for HP DJ T1200 showed invalid document name.
21925	Fix	Mutoh RJ-90x application driver did not support printing indexed color images.
21880	Fix	Print Queue in Printer Information did not show any jobs
21948	Fix	Size detect error on Flex50i fixed
21931	Fix	CCD scanners: Auto paper size detection improvements introduced in v1.6.5 further refined.
21992	Fix	CIS scanners: Auto paper size detection improvements introduced in v1.6.5 further refined.
20085	Fix	Unable to copy to HP DJ Z2100 and Z3100 with auto length
19516	Fix	“Cancel All Documents” in Print Queue had no effect.
21981	Fix	CCD scanners: TWAIN timeout problem on flatbed models when terminating scans made through/via TWAIN.
22046	Fix	Using ICC on T7100 results in dark copies
22049	Fix	Scan using (auto)align/rotate result in aliasing artifacts
22087	Fix	Printer Info panel; improved update speed when printer is turned off
22089	Fix	Media name selection (under Color Management panel) not available when using 1 bit Image types (i.e. Adaptive Threshold and Fixed Threshold).

Changes from 1.6.4 to 1.6.5

21629	New	Support for Epson Stylus Pro 7700/9700
21409	Fix	CIS scanners: Improved auto paper size detection.
21704	Fix	CCD scanners: Improved auto paper size detection.
21760	Fix	User interface missing features for Korean language
21327	Fix	Added single sheet feed option on Canon iPF75x
19843	Fix	CIS scanners: Improved descreening option.
21813	Fix	In Options settings; Auto scan length was not updated when changing unit of measure.
21370	Fix	In Copy task; maximum number of copies increased from 9 to 999.

Changes from 1.6.3 to 1.6.4

21091	New	Chinese help added.
20995	Fix	Printing on HP DesignJet T770 and T1200 did not start before the scan was finished.

20989	Fix	Some error messages during start of scanning did not show correct text.

Changes from 1.6.2 to 1.6.3

20553	New	Added Polish program translation
20697	New	Support for HP DesignJet Z3100ps/Z3200/Z3200ps
20796	New	Support for HP DesignJet T610ps/Z2110/T620ps/T770ps
20794	New	Support for imagio MP W3600 and imagio MP W2400
20694	New	Support for HP DesignJet 110
20582	Fix	When copying to HP DesignJet Z6100 error “Disk is Full” occurred
20174	Fix	When an installed printer is in error Nextimage reports 61-22 “Could not create instance of CtxPrinter”.
20802	Fix	Some error messages during scanning did not show correct text

Changes from 1.6.2 to 1.6.2

	New	Added Polish program translation
20509	New	Error logging now complies with official company support standards

Changes from 1.6.1 to 1.6.2

20503	Fix	With Batch mode enabled, changing the “Image type” setting did not always take effect.
20443	Fix	Crash during file open of very large b/w files
19996	Fix	Image distortion occurring when the scanner pauses during the scan – scanning 600dpi or higher using Adaptive Threshold or Indexed Color mode on CCD scanners.

Changes from 1.6 to 1.6.1

	New	Windows 7 (Professional) support. For both 32 and 64 bit platforms.
	New	Translations into supported languages
20244	New	Support for Canon iPF 6200
20169	New	Support for HP T620
20133	New	Now supporting left offset adjustment for CIS scanner models also
19987	New	The email one-touch event (scanner one-touch button) now starts a scan to email operation
19983	New	Support for HP T1200
19982	New	Support for HP T770
19800	New	Support for HP DJ510 and DJ510 PS

19744	New	Licenses for 24” scanner models versions introduced
19711	New	Memory resident version of TWAIN driver specifically designed for low end target PC’s
18770	New	Allow batch scanning in TWAIN driver
20283	Fix	Copying with auto length did not work correctly on some printer model (eg HP z6100)
20062	Fix	Some controls in the panels could experience bad layout on 64 bit Windows
19994	Fix	When viewing a 1 bit image in the File task some strange 'ghosting' could occur after zooming and panning a bit
19592	Fix	Fixed application error when printing grayscale on Ricoh Aficio MP W2400
19580	Fix	Detail scans were lost when resetting some individual settings
19574	Fix	Fixed application error when detail number 2 were delete in Adaptive Threshold mode
19573	Fix	Purple line were created when printing color patch sheet on Canon iPF 755 and 820
19561	Fix	Change of settings did not always get applied to details immediately when set
19555	Fix	Long Save-as path were truncated in the bottom status line when in Full screen
19515	Fix	When deleting a numeric value in a control using the backspace key, the value is now set to the default instead of an arbitrary value
16558	Fix	Some drop-down menus were shown on secondary monitor when two monitors were connected
16121	Fix	When using Large Size DPI settings in Windows the UI had visual artefacts

Changes from 1.5.2 to 1.6

	New	Touch screen enabled user interface
19461	New	Support for HP 4520mfp and 1120mfp
19288	New	Support for Canon iPF605, iPF650, iPF655, iPF750 and iPF755 added (qualified with Plain Paper and Coated Paper only)
19003	New	Preset name now remembered between starts
18931	New	Added support for Canon iPF6000S
18723	New	Now supports PDF v1.4
18253	New	Limit media source selection based on individual model capabilities for Canon printers
18143	New	Added support for HP T1120, 4020 and 4520
17905	New	Added printer profile for T610
17847	New	Now allowing higher preview scan dpi
17834	New	Added support for Canon iPF720, 810 and 820

17195	New	Added default ICC choice
17170	New	Now the measure tool also reports distance in pixels
16826	New	Selected preset is not remembered between startups
16692	New	Drag and drop support
16345	New	Added new file naming fields <USER> and <DOMAIN>
15753	New	Allow double-click to insert field
15646	New	New right-click menu entry in detail pop-up menus for selecting current detail
14746	New	The measure tool now also shows length in pixels and absolute and relative angle
14739	New	Now possible to align using the measure tool
14064	New	Application now starts up in the last active Task
13652	New	Support for PNG added
11670	New	Customer experience program introduced
18717	Change	Rotate/Mirror panel changed
18707	Change	Reduced memory footprint significantly
18517	Change	Enhance gray algorithm made more aggressive to make better gray results always
18513	Change	Solved issue with some external viewers not being able to view our lzw compressed files
18512	Change	No longer allows unsupported media choices on HP DJ 1120
15200	Change	Now scan frames are reset to only one when new prescan is made or if a new original is loaded
14730	Change	Now only scanner related ICC profiles are shown in the input list.
19350	Fix	Fixed exception when opening files that are very wide and short
18989	Fix	Printer driver setting no longer stored if cancel is pressed
18808	Fix	Sometimes extra white was printed on an Canon iPF820
18754	Fix	Autolength from empty scan in TWAIN mode does not work
18610	Fix	A exception could occur during file save due to an uninitialized variable
18559	Fix	A blank filename in a preset was not applied correctly when preset was choosen
18558	Fix	Changing presets did not always set the file type correctly if image types were different
18522	Fix	Resize now works correct under SCAN task
18515	Fix	Issue with cyan lines in prints solved

18511	Fix	Fixed problem scanning to DWF
18499	Fix	Error during write of Jpeg files with more than 4GB data fixed
18440	Fix	Improved print quality of thin lines
18196	Fix	A JPEG only preset applied in BW image type caused an error
18168	Fix	Better cancel of print/copy jobs already started.
17905	Fix	Choosing “Fast” mode caused the image to be printed at double scale on HP T610 printer
17113	Fix	Better error handling when specific rare camera related scanner error occurs
16561	Fix	One-touch scanning now support more than one scanner installed
15913	Fix	Exception failure was generated when JPX file had corrupt header
15787	Fix	Consistent range behaviour for integer combo's with edit
15410	Fix	Numeric file format parameters are now validated

Changes from 1.5.1 to 1.5.2

18581	Fix	Resizing more that 100% caused a cropped output image

Changes from 1.5 to 1.5.1

18834	New	Support for Canon iPF720, 810 and 820
18064	New	Introduced new option for Enhancement of horizontal accuracy for CIS scanner models
17902	New	Support for HP T610
17714	New	Russian translation introduced
17321	New	Japanese help included
18506	Fix	TWAIN data source did not work if old version common library was installed in WINDOWS folder
18257	Fix	Minor correction in the English help
18185	Fix	TWAIN data source did not respond properly to close command
18138	Fix	Fixed problem when selecting HP DesignJet 4000, 4000ps, 4500, 4500mfp, 4500ps printer models
18077	Fix	Vertical correction factor was not applied correctly.
18069	Fix	Sometimes CALS files where invalid
18032	Fix	Corrected wrong defaults in BW adaptive on some models.
17904	Fix	Choosing Fast mode on T610 printer caused double size print output

Changes from 1.0.2 to 1.5

17417	New	Shortcut Ctrl+Insert used for Frame+ tool.
17333	New	Now the resolution type is shown in the panel title bar if it differs from normal.
17332	New	Optimized performance in the BW line preset.
17194	New	Now show the same dialog that is shown when pressing the Save As -> Browse button if the file name is invalid when Scan is pressed
17180	New	Added support for Canon iPF 8000S, 8100, 9000S and 9100 printers.
16980	New	Now it is possible to scan more scans in a single TWAIN acquisition session.
16828	New	High quality scaling of image in viewer. This gives a smoother and more correct representation of the image when zoomed out.
16800	New	Support for writing DWF files
16786	New	Revised layout of index color palette panel. See also change 13483 below.
16780	New	Scan to email support added
16691	New	Color CAD and map preset threshold value is now set to 5
16343	New	Folder TextBox, allowing folder setup, added to dialog shown when ‘if file exists ‘ option is set to ‘Ask’.
16262	New	When scanning auto length you can now see the width on the sub panel title bar
16577	New	Added TWAIN driver capability
16518	New	Now able to edit filename when using Browse under File Already Exists dialog
16416	New	File name field are no longer case sensitive
16383	New	New image viewing during final scanning/copying that allows for better inspecting of image details.
16264	New	New Check Scan feature for easy opening the last scanned file.
15915	New	Now the preview and all detail scans are cleared when another scanner is selected
13483	New	Automatic creation of indexed color palettes and possibility of changing the palette colors.
17429	Change	Some image adjustment settings in predefined presets changed.
17363	Change	No longer including setting not relevant to the image quality as part of the predefined presets
17405	Fix	The white point slider curser key increment step set to 1.
17388	Fix	Fixed behaviour when user is asked to re-insert media.
17366	Fix	Gray balance button is no longer disabled after opening a 24 bit color file.
17350	Fix	For BW fixed threshold the Detail scans did not represent the effect of negative original correct.

17210	Fix	Solved problem with bad match between preview scan and final scan in BW threshold on some scanner models.
17095	Fix	Fixed application error when browsing and saving to CALS
17047	Fix	Clicking panel header text field now causes panel expand/collapse + Dropdown expand/collapse.
16957	Fix	Auto enhance B/W was not always consistently calculated
16937	Fix	In some situations an old auto size could be used for a new original
16927	Fix	Saturation did not have the same effect in the scanned file (or print) as in the did in the preview
16896	Fix	Fixed Bad error/warning message when some scanners were on standby.
16820	Fix	Insert field button state now set properly after pressing panel title
16765	Fix	The enhanced resolution type for BWA was not remembered between start-ups
16717	Fix	Sometimes an error message occurred when using the black/white point picker
16716	Fix	The final scan was much too short when using both auto size and auto enhance BW
16691	Fix	Corrected the default value for Sharpen threshold in a preset
16679	Fix	The level of detail in BWA image type was not the same in the detail scans as in the final scan
16657	Fix	The application could crash if an attempt to close it during start-up was made
16615	Fix	Now show correct title of installed version in about box
16613	Fix	The scan process could become very slow for very narrow scans
16604	Fix	Gray Balance picking was slow in some cases
16603	Fix	An error could occur if placing the paper frame just outside the image data border
16580	Fix	The file extension could get lost in the browse dialog
16576	Fix	Spurious “rainbow”-effects in the preview eliminated
16573	Fix	Black/white point picker got the wrong value when rotation is set
16571	Fix	Could now run CLC wizard on second scanner connected
16559	Fix	Viewer could get corrupted behaviour after cancelling a print in File task
16554	Fix	Now the patch sheet is ejected properly after making CLC
16534	Fix	Error message was shown if a BW only scanner was connected at the same time as a Color scanner
16524	Fix	Filename was empty during Browse under File Already Exists
16519	Fix	There was no file filter in Browse under File Already Exists
16518	Fix	Now using save as dialog, instead of open file dialog, when “if file exists is set” and file exists.

16505	Fix	Clearer detail thumbs.
16473	Fix	It was not possible to select a media with color management set to none
16433	Fix	Auto size handling on flatbed scanners models as not correct in situations with fixed output size
16417	Fix	Zoom area changes strangely when changing image type
16416	Fix	File name fields are no longer case sensitive
16415	Fix	Some zoom tools got disabled temporarily after a print
16279	Fix	Old details scans was not always cleared when changing resolution
16260	Fix	No longer automatically zooms to all when changing image types
16221	Fix	Improved TAB behaviour in panels
16218	Fix	Sometimes the File type changed when using Browse dialog
16180	Fix	CLC wizard failed on non-color scanner
16144	Fix	RLE compression is not allowed for top down direction for BMP format
16125	Fix	Do not allow user to select non-output icc profile during Output ICC Wizard
16085	Fix	Sometimes Indexed Color Palette must be selected twice to be active
16068	Fix	Cancelling save in file task could make the viewer corrupt
16061	Fix	Sometimes the file dimensions was off by 1 pixel in input file panel
15992	Fix	The histogram stopped updating after a cancelled scan

Changes from 1.0.1 to 1.0.2

17017	Fix	Auto-size could become unstable if application have been run in demo mode.
17016	Fix	Auto-size made were not robust for some scanner models.

Changes from 1.0 to 1.0.1

16741	Fix	Spurious crash could occur if a HP printer was selected but not online.

Supported Printers

The application supports the below range of printers. If you do not find the relevant printer in the list, many other printers are indirectly supported by creating your own Printer Profile, or by printing to a hot-folder.
