Installation

This software can be run on Windows 2003 Server (Standard Edition) as well as on 32 and 64 bit versions of Windows XP (Pro), Windows Vista (Business), Windows 7 (Professional) and Windows 8 (Enterprise).

At first start-up you are required to specify a Product Key. The Product Key is located on the CD cover or distributed as printed or electronic document.

Version Changes

Changes in 3.0

25603	New	Windows 8 (Enterprise) support.
25580	New	Support for HP Designjet T120 and T520.
16579 20972	New	Grayscale adjustments added to the Adaptive Threshold image type. This includes black/white point, gamma, sharpen, soften and display of histogram.
25959	New	The B&W Line preset has been replaced by B&W Fine Line, B&W Old Drawing and B&W Blueprint.
25895	New	The Color Photo preset no longer adds sharpen.
25866	New	New Auto Black/White Point option for Color, Grayscale, and Adaptive Threshold image types.
25888	New	Folder and File name now defaults to \scan <001>.tif.
25261 25958 25889	New	ICC profiles are now listed by their description instead of their file name.
24935 25892	Fix	Zoom buttons could become disabled in some situations.
24998	Fix	The installation could wrongly request the user to manually install .NET 2.0 under Windows 64 bit.
25831	Fix	Missing message when opening a third party PDF file and the GhostScript utility was not installed.
25835	Fix	Scanning in grayscale to a PDF file after having scanned in color could gave an error.
25854	Fix	Copying to Canon printers using auto length could output too much media.
25862	Fix	Improved CLC sheet recognition by adding extra top margin to the output. Only added when printing in landscape orientation, A4/Letter printers are still supported by printing in portrait orientation.
25954	Fix	When saving a preset, some parameter sections could not be excluded.
25848	Fix	Application could pause if panning image outside the image borders.
25893	Fix	Speed improvements to selection frame used for Detail scan and color picker.
25980	Fix	Application could crash on slow PCs when finalizing a scan.

Changes in 2.2.2

25535	Fix	Printing problems for Canon iPF760/765 (only in grayscale and B&W) and HP Designjet T1300.
25553	Fix	Problem reading printer status on USB-connected newer HP printers on some PCs.
25557	Fix	Some error messages from newer HP printers were wrongly displayed as 'disk full'.

Changes in 2.2.1

25241	Fix	Opening PDF files sometimes gave error
24898	New	Support for Canon iPF 760 and 765
25080 25081	New	New color spaces: Adobe RGB, Device RGB and Raw RGB (48 bit)
25233	New	Improved colors when printing to all newer HP printers supporting Device RGB mode
25319	New	Improved colors when printing using CLC
25267	Fix	ICC was not embedded in PDF files

Changes in 2.1.0

24329	New	File extension in "file exist dialog" removed in edit box to ease renaming of file
22512 23524	Fix	Problems starting application if Windows had no printers installed
24748	Fix	Crash if selected printer had been removed in Windows
23753	Fix	Some application dialogs were shown in front when switching to other applications
24455	Fix	Preset star (* shown when a preset is modified) was shown after using One Touch buttons on the scanner
24476	Fix	Yellow sticker in the corner of the image area (shown when doing batch and multi-page scanning) was sometimes shown when doing single-page scanning
24612	Fix	Problem restoring application window size when leaving full screen mode using Alt+Enter
24677	Fix	Image artifact with older CCD scanners when scanning above physical resolution
24697 24784	Fix	When using counter field in file names, a single digit field (<0>) did not support more than 10 files.
24826 24874	Fix	Application crashed when only using counter field in file names
24715	Fix	A fast cancel of a copy could give an error (1-261)
24908	Fix	When creating or editing a Printer Preset in Printer Setup, a number of parameters could not be changed
24911	Fix	Rotating very large B&W images (1 bit) gave error
	Fix	Several corrections to translations
24233 22010	New	File name counter field now supports removal of files during a batch session
24049	New	PDF file format version is now 1.7. PDF/A remains at version 1.4 (as required by PDF/A standard)
22015	New	Opening PDF files no longer requires Ghostscript PDF library to be installed for a selected range of PDF formats

22015	New	General multipage performance improved
24013	New	Reversing of thick originals in scanner supported (requires firmware update to CCD-scanner models released fall 2011)
23836 24093	New	Some scanner related settings under the Scan-Option panel was stored in the scanner. All such settings now stored locally in the application to better support multiple users on a network scanner
23529	Fix	Missing One-Touch presets for B&W scanners
23631 21344	Fix	Missing updates to histogram in File Task
23666	Fix	Error scanning 1200dpi to PDF
23758 24226 24258 24289	Fix	In the Printer setup dialog, it was not possible to create custom presets, and some presets were listed twice
23762	Fix	HP Print Queue; 'Submit time' displayed incorrectly
23802	Fix	Missing predefined printer settings for: HP DJ T610ps,620ps,770ps and imagio MP W3600, imagio MP W2400
23877	Fix	In ICC Color Management, 'rendering intent' was blank by default (corrected to 'Perceptual')
23879 24202	Fix	Selected Color Management was not saved when exiting the application
21679 23950	Fix	Improved PDF support for opening indexed color images, resulting in better colors
24039	Fix	Print to a hot folder was not listed as an option
24098	Fix	Opening a multipage file reset printer selection to Windows default printer
24102	Fix	Some One-Touch presets were not shown if multiple scanners were connected
24118	Fix	Despeckle option performed hole filling
24236	Fix	When opening B&W files, a black line/band could be visible on the right side for certain image sizes
21484 23863	Fix	Improved auto palette for indexed color scans, improving quality as well as file sizes
24097	Fix	Application required printer to be configured as Windows Default printer in the MFP edition
23629 23646	Fix	Improved handling of network scanners in use by other clients
23632 23667	Fix	Several corrections to Output File panel in the Scan and File Task in relation to working with multipage files
23633	Fix	Rotation and cropping of pages was not illustrated in the multipage page selection dialog
23719	Fix	Improved handling during installation of missing Windows and .NET components
24259	Fix	Canon printer job name showed 'test1'. Now shows application name and file name
23757	Fix	Saving multipage files in the File Task multiple times did not always update the file
23763	Fix	The 'Auto size to' list is now limited to the enabled paper series
23906	Fix	Selected network printer was not remembered after restart, when running in other languages than English
23940	Fix	Application froze if refreshing scanner list after turning off scanner
23931	Fix	Application could freeze when opening unsupported variants of TIFF files
24047	Fix	Using 'reset all settings' option incorrectly displayed color 'Image Adjustment'-sub-panels while viewing a B&W image
24073	Fix	Printer's media selection when using CLC was reset to topmost media in list after printing
24205	Fix	Improved support for B&W TIFF files with BitsPerSampleTag specified
		Several corrections to error messages
		Several corrections to translations
		Several corrections to user interface graphics

Changes in 2.0.3

24331	Fix	Designjet T620; crash during startup caused by improved queue management on sibling models.
24332	Fix	Canon printers; media selection was not correctly sent to the printer.
24333	Fix	TIFF group 3 and packbit options generated bad files.
24390	Fix	Unable to open certain types of TIFF B&W (1 bit) files.

Changes in 2.0.2

24218	New	Localized help in Chinese (Simplified), French, German, Japanese, Polish, Russian, Spanish
-------	-----	--

Changes in 2.0.1

23803	Fix	30-day trial runs with REPRO edition feature set
23835	Fix	Indexed color PDF files can be opened
23744	Fix	In the action bar, the Batch button is visible for all supported languages
23742	Fix	In the action bar, the icon labels are visible for all supported languages

Changes in 2.0

--	--	--

23063	New	MFP, SCAN+ARCHIVE and REPRO editions. Old editions are discontinued.
23055	New	Multipage TIFF and PDF support
22249	New	New Accounting feature
22769	New	Programmable One-Touch buttons
