BIZNIS VODIČ
DANILOVGRADA
BUSINESS GUIDEBOOK
OF DANILOVGRAD

DOPUNJENO IZDANJE/REVISED EDITION

DANILOVGRAD, 2017

UMJESTO UVODA

Biznis vodič je specifično oruđe za, prije svega ekonomsko, a i svako drugo unaprjeđenje prostora, u konkretnom slučaju Opštine Danilovgrad.

Stečena iskustva tokom vremena i raspoloživi materijalni i nematerijalni resursi opredijelili su autora i urednika Domazetović Svetozara, da zajedno sa timom mladih stručnjaka raznih profila, na originalan način svijetu predstavi dostignuća i mogućnosti ovog prostora, koji predstavlja nezaobilaznu destinaciju u crnogorskim i regionalnim okvirima.

Raspoloživi prirodni uslovi, izraženi u obradivom zemljištu, šumama i šumskom zemljištu, rudnom bogatstvu, bogatstvu vodama, klimatskim uslovima i raznovrsnom biodiverzitetu, te sam geostrateški položaj, učinili su ovaj prostor vrlo atraktivnim, kako za življenje, tako i za bavljenje biznisom. Dodatni razlozi su u vrlo bogatom kulturno-istorijskom nasleđu i vrlo visokom intelektualnom nivou raspoloživih ljudskih resursa.

Rezultati koji su ostvareni u poslednjih jedanajest godina, a koji su predstavljeni kroz riječ i sliku, sigurno će biti podstrek za nova ulaganja domaćih i stranih investitora, a sve na dobrobit svih građana ove opštine. Na ovaj način Opština želi da pruži snažan doprinos razvoju Crne Gore na njenom evroatlanskom putu u budućnost.

Zbog značajnih pozitivnih promjena u razvoju opštine u periodu od izdavanja ovog vodiča i velike potražnje za istim, odnosno ovom vrstom publikacije, odlučili smo se da uradimo dopunjeno izdanje.

UREDNIK EDITOR

PREFACE

Business guidebook is a specific tool for economic as well as any other promotion of area, in this particular case of the Danilovgrad Municipality. Due to experiences gained through years and the available material and non-material resources, the author and editor Svetozar Domazetović, in collaboration with a team of young professionals of various profiles, has determined to originally present to the world achievements and opportunities in this area, which is a must-see destination in Montenegro and region.

Available natural conditions, in terms of arable lands, forests and forest lands, mineral and water resources, climatic conditions and varied biodiversity, then geostrategic position itself, made this area very attractive for both living and doing business. The additional reasons lie in very rich cultural and historical heritage and very high intellectual level of available human resources.

The results achieved over the past eleven years, presented through words and pictures, will certainly be an incentive for new investments by domestic and foreign investors, for the benefit of its residents. This way the Municipality wants to provide a strong contribution to the development of Montenegro on its Euro-Atlantic path.

Due to the significant positive changes in the development of the municipality in the period from the issuance of this guide and the high demand for this type of publication, we decided to make a revised edition.

NASTANAK DANILOVGRADA

Petar II Petrović Njegoš u svojim državnimk razmišljanjima začeo je ideju da se formira jedan novi grad na području Bjelopavličke ravnice, gdje bi se doselila i razvijala prijestonica Crne Gore. Njegoš je vjerovatno za ovu ideju bio motivisan bogatstvom Bjelopavličke ravnice, kao i povoljnom klimom i saobraćajnim komunikacijama. Ideju o izgradnji prijestonice na području Bjelopavličke ravnice prihvatio je i Njegošev nasljednik na svetovnom prijestolu knjaz Danilo. Posle pogibije knjaza Danila, njegov nasljednik knjaz Nikola sprovodi aktivne pripreme za izgradnju crnogorske prijestonice. U navedenom cilju, za izradu urbanističkog plana za novi grad, angažovan je Dragiša Milutinović, sin Sima Milutinovića Sarajlije. Urbanistički plan je završen 1869. godine i po njemu je predviđen grad kapaciteta 15.000 stanovnika. Knez Nikola je novonastaloj varoši dao ime po svom stricu i prethodniku knjazu Danilu.

Povoljan položaj i veliki poljoprivredni i drugi potencijali Bjelopavličke ravnice, u odnosu na druga područja u ondašnjoj Crnoj Gori, učinili su da razvoj Danilovgrada u prvim godinama bude vrlo intenzivan. Ratni uspjesi Crnogoraca, povoljne istorijske prilike i mudra politika knjaza Nikole krajem XIX vijeka obezbijedili su značajno teritorijalno proširenje Crne Gore, zbog čega Danilovgrad gubi dio svojih prestižnih prioriteta, koji su ga do tada činili pogodnim za prijestonicu Crne Gore, tako da se od te ideje odustaje, ali Danilovgrad nastavlja da se razvija, otvaraju se Učiteljska škola, Poljoprivredna škola, razvija se zdravstvena služba itd.

Posle II svjetskog rata Danilovgrad je doživio procvat kroz razvoj privrede: industrije ukrasnog kamena, drvoprerađivačke industrije, proizvodnje radijatora, obuće, ljekovitog bilja i drugih djelatnosti.

Međutim, privreda sada doživljava novi oporavak, oživljavanjem ranijih i aktiviranjem novih djelatnosti. U opštini Danilovgrad intenzivirani su radovi niskogradnje – rekonstrukcije putne infrastrukture, radovi na uređenju energetskog sistema, boljem vodosnabdijevanju, razvoju industrije građevinskog materijala, razvoju mlinske industrije. Unaprijeđeni su proizvodnja hrane, drvna industrija, prosvjeta, zdravstvo, kultura i sport.

THE FOUNDATION OF DANILOVGRAD

During his governance, Petar II Petrović Njegos was considering an idea to found a new town in the area of Bjelopavlici plain, where the historic royal capital of Montenegro would be settled and developed.

The richness of Bjelopavlici plain as well as the favourable climate and traffic communications probably motivated Njegos to develop this idea. The idea of building the historic royal capital in the area of Bjelopavlici plain was also accepted by his successor to the secular throne Prince Danilo. After prince Danilo's death, his successor Prince Nikola carried out active preparations for developing Montenegrin historic royal capital. In the following goal, Dragisa Milutinovic, the son of Simo Milutinovic Sarajlija was involved in drawing up a new town plan. The plan was made in 1869 and it provided the new town with 15000 inhabitants. Prince Nikola named the new town after his uncle and predecessor Prince Danilo.

In relation to the other areas in former Montenegro, favourable position and great agricultural and other potentials of Bjelopavlici plain contributed to the intensive development of Danilovgrad in the first couple of years. War successes of Montenegrins, favourable historical opportunities and wise policy of Prince Nikola by the end of XIX century provided considerable territorial expansion of Montenegro, due to which Danilovgrad lost a part of its prestigious priorities which had made it favourable for historic royal capital of Montenegro in that period. The idea was abandoned, but Danilovgrad continued to develop. The Teacher's and Agricultural school were established, the health service was developed etc.

After the Second World War, Danilovgrad boomed through development of economy: industry of ornamental stone, wood-processing industry, the production of radiators, shoes, herbs and other activities.

However, the economy has made a new revival now by recovering former activities and establishing the new ones. In Danilovgrad, structural engineering works have been intensified – reconstruction of road infrastructure, the works on energy system management, better water

U Danilovgradu su otvorene policijska škola i Policijska akademija, a formira se i Vojni centar Crne Gore, Regionalna škola za javnu upravu – ReSPA, Forenzički centar, ZIKS, Dom za azilante, Centar za izbjeglice i dr. Na području opštine nalaze se i dva velika hrišćanska svetišta – manastir Ostrog i manastir Ždrebaonik, zbog kojih su hodočašće i vjerski turizam veoma razvijeni.

supply, development of industry construction materials and mill industry. The production of food, wood industry, education, health, culture and sport have been promoted. The Police School and Academy, Regional School of Public Administration- RESPA, Forensic Centre, Institution for Enforcement of Criminal Sanctions, Asylum Seekers Centre and Refugee Centre etc have been established in Danilovgrad, while the Military Centre of Montenegro is being formed.

There are two Christian shrines in the municipality – Ostrog Monastery and Ždrebaonik Monastery, due to which pilgrimage and religious tourism have been well developed.

POLOŽAJ

- **Nalazi se u središnjem dijelu Crne Gore.**
- **Zahvata prostor od 501 km²**, što čini 3,6 % teritorije Crne Gore, na istočnoj geografskoj dužini 18°56' i 19°18' i sjevernoj geografskoj širini 42°28' i 42°45'. Vazдушna udaljenost krajnjih tačaka sjever-jug 33 km, a istok-zapad 29 km. Nadmorska visina od 30 do 2100 mnv. Klima je zastupljena od mediteransko-kontinentalne do planinske.
- **Strukturu prostora čine:**
 - Ravničarski dio do 200 mnv – 140,5 km²
Karakterističan po okruženju rijeke Zete i njenih pritoka Sušice, Gračanice, Morave, Rimanić potoka, kao i Kulendrije i Matice, i po brdima: Kurilo, Kujava, Glavica, Maljat, Visočica, Spuška Glavica i Komunica.
 - Brdsko područje od 600 - 650 mnv - 81 km²
Bandići, Zagarač, Zagreda, Pješivci, Vražegrmci, Pavkovići, Slatina, Glizica i obodom prema jugu do Pipera.
 - Planinska područja iznad 600 - 650 mnv - 275 km²
Velji i Mali Garač, Ponikvica i Prekornica.
Najveći vrhovi: Garač (Vrh Bobija) 1436 mnv, Ponikvica (Vrh Kula) 1927 mnv i Maganik (Petrov vrh) 2127 mnv.
- **Ukupna dužina** granica je 155 km i to: sa Podgoricom 60 km, Cetinjem 14 km, Nikšićem 64 km i Kolašinom 15 km.
- **Saobraćajno** je povezan putevima raznih kategorija, koji prolaze preko ovog prostora (magistralni put Podgorica - Nikšić 22,5 km, regionalni put Danilovgrad-Cetinje 14 km, željeznička pruga Podgorica - Nikšić 31,3 km, lokalni putevi oko 100 km i nekategorisani putevi preko 250 km).

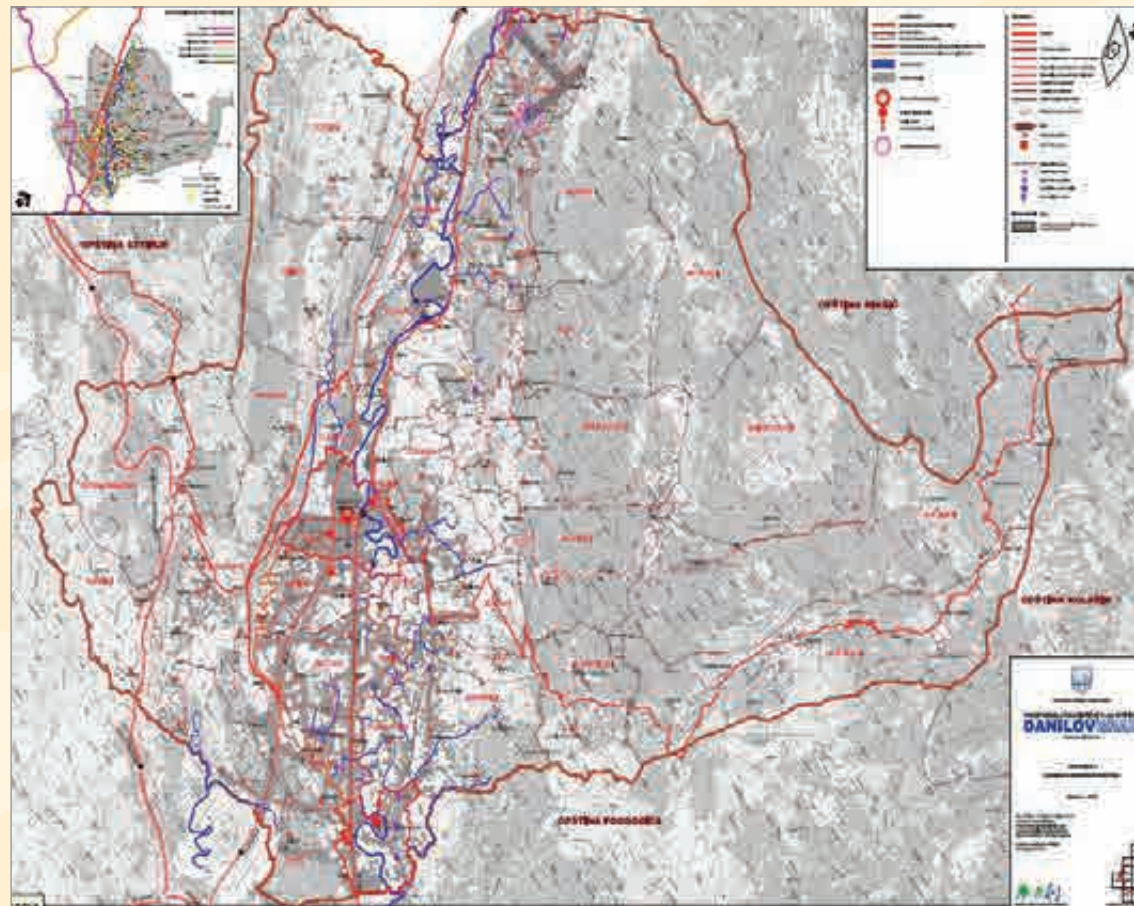

POSITION

- **It is situated in the central part of Montenegro.**
- **It covers the area of 501 km²**, which makes up 3,6 % of the territory of Montenegro at longitude 18°56' and 19°18' east and latitude 42°28' and 42°45' north. The air distance of the extreme points north-south is 33km and east-west - 29 km. The altitude is 30 to 2100 m above sea level. The town has Mediterranean, continental and mountain climate.
- **The structure of the area include:**
 - plains up to 200 m above sea level - 140.5 km²
It is characterized by the surroundings of River Zeta and its tributaries Susice, Gračanica, Morava, Rimanić stream, as well as Kulendrija and Matica, and the hills: Kurilo, Kujava, Glavica, Maljat, Visocica, Spuška Glavica and Komunica.
 - hills of 600-650 m above sea level - 81 km²
Bandići, Zagarač, Zagreda, Pješivci, Vražegrmci, Pavkovići, Slatina, Glizica and along the edge to the south to Piperi.
 - mountains above 600 to 650 m above sea level - 275 km²
Velji and Mali Garač, Ponikvica and Prekornica.
The highest peaks: Garač (Peak Bobija) 1436 m above sea level, Ponikvica (Peak Kula) 1927 m above sea level and Maganik (Petrov Peak) 2127 m above sea level.
- **The total length of borders** is 155 km: 60 km with Podgorica, 14 km with Cetinje, with Nikšić 64 km and with Kolašin 15 km.
- **When it comes to transport**, it is connected by roads of various categories, which goes through this area (main road Podgorica - Nikšić 22,5 km, regional road Danilovgrad-Cetinje 14 km, railroad Podgorica - Nikšić 31,3 km, local roads cca 100 km and unclassified roads more than 250 km).

DRŽAVNE INSTITUCIJE

Sticanjem nezavisnosti Crne Gore 21. maja 2006. godine, država Crna Gora se opredijelila da jedan broj vrlo značajnih državnih i regionalnih institucija locira na prostoru opštine Danilovgrad. To su:

Vojni centar Kasarna „Milovan Šaranović“
Military Centre "Milovan Šaranović"

Policijska akademija
Police Academy

Zavod za izvršenje krivičnih sankcija Spuž
Institution for Enforcement of Criminal
Sanctions in Spuž

Regionalna škola za kadrove – ReSPA
Regional School for Public Administration –
ReSPA Branelovica

Dom za azilante i centar za izbjeglice – Spuž
Centre for Asylum Seekers and Refugees Spuž

Forenzički centar Crne Gore
Forensic Centre of Montenegro

GOVERNMENT INSTITUTIONS

Following the achievement of independence on 21st May 2006, the state of Montenegro decided to locate a number of very important government and regional institutions in Danilovgrad, such as:

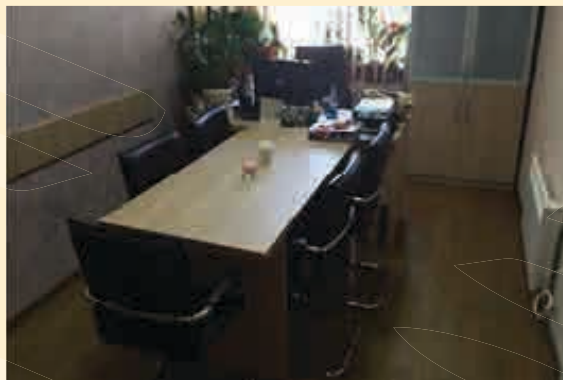

JU Centar za socijalni rad Danilovgrad

JU Centar za socijalni rad za opštinu Danilovgrad, otvorena je 2015. godine. U okviru Centra organizovani su sledeći sadržaji: Dnevni boravak za stara lica u Danilovgradu, Dnevni boravak za stara lica u Spužu, Gradski vešeraj Danilovgrad i stanovanje uz podršku.

Centar za dnevni boravak djece sa smetnjama u razvoju i odraslih lica sa invaliditetom

Skupština opštine Danilovgrad donijela je odluku o osnivanju javne ustanove **Centar za dnevni boravak djece sa smetnjama u razvoju i odraslih lica sa invaliditetom**, sa sjedištem u ulici Jefta Šćepanovića Čaja u Danilovgradu, čija je djelatnost od posebnog javnog interesa.

Djelatnost JU Centra za dnevni boravak je da vrši održavanje i podizanje nivoa sposobnosti djece sa smetnjama u razvoju i odraslih lica sa invaliditetom u razvoju kroz stručni tretman, programe i aktivnosti, podstičući senzibilniji odnos sredine prema potrebi za njihovim uključivanjem u zajednici.

Day care center for children with disabilities and dissabled adults

Municipal Assembly of Danilovgrad adopted the Decision on the establishment of a public institution **Day care center for children with disabilities and dissabled adults**, whose activity is of special public interest, with its headquarters in Jefta Šćepanovića Čaja street in Danilovgrad.

The activity of the JU Day Care Center is to maintain and raise the level of abilities of children with disabilities and disabled adults through professional treatment, programs and activities, encouraging more sensible relations with the surrounding and better inclusion in the community.

RASPOLOŽIVI PRIVREDNI KAPACITETI

Nakon izvršene tranzicije privrednih subjekata na području opštine formirana je sledeća privredna struktura, koju u 2017-oj godini karakteriše sledeće:

Registrovani aktivni subjekti:

Broj registrovanih preduzeća (AD, DOO)	463
Broj registrovanih preduzetnika	78
Broj javnih preduzeća i ustanova	29
Broj ortačkih društava, NVO i udruženja	47
Ukupno.....	617

Ukupan broj registrovanih aktivnih i pasivnih subjekata je 1011 (centralni registar CRPS)

Struktura privrednih društava (AD, DOO) je:

Proizvodnja	68
Trgovina	177
Ugostiteljstvo	27
Usluge	192
Ukupno	463

Struktura preduzetnika je:

Proizvodnja	7
Trgovina	27
Ugostiteljstvo	19
Usluge	25
Ukupno	78

Ukupan broj zaposlenih je 4.473 (avgust 2017. god.), i to:

Privredna društva	2355
Neprivreda	2118
Ukupno	4473

BUSINESS CAPACITIES

After completing of transition of business entities in the municipality, the following economic structure was created, which in 2017 was characterized by:

Registered active entities:

Trade	177
Restaurants & Cafes	27
Services	192
Total.....	463

Structure of entrepreneurs:

Production	7
Trade	27
Restaurants & Cafes	19
Services	25
Total.....	78

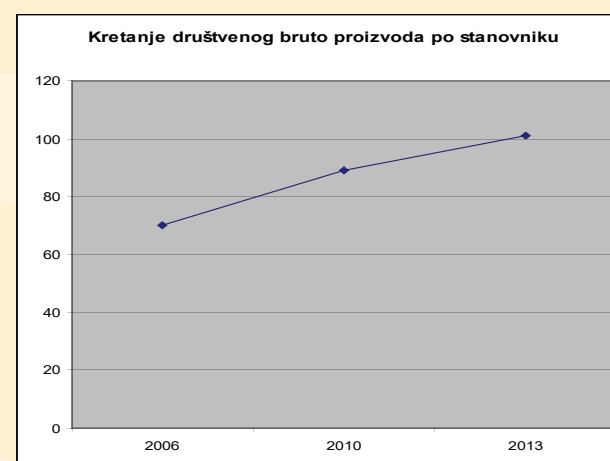

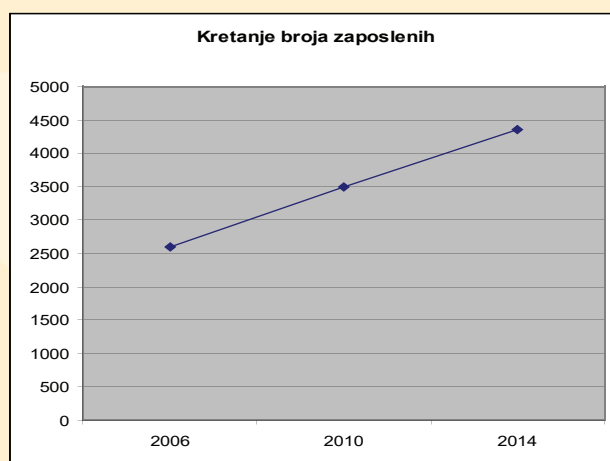

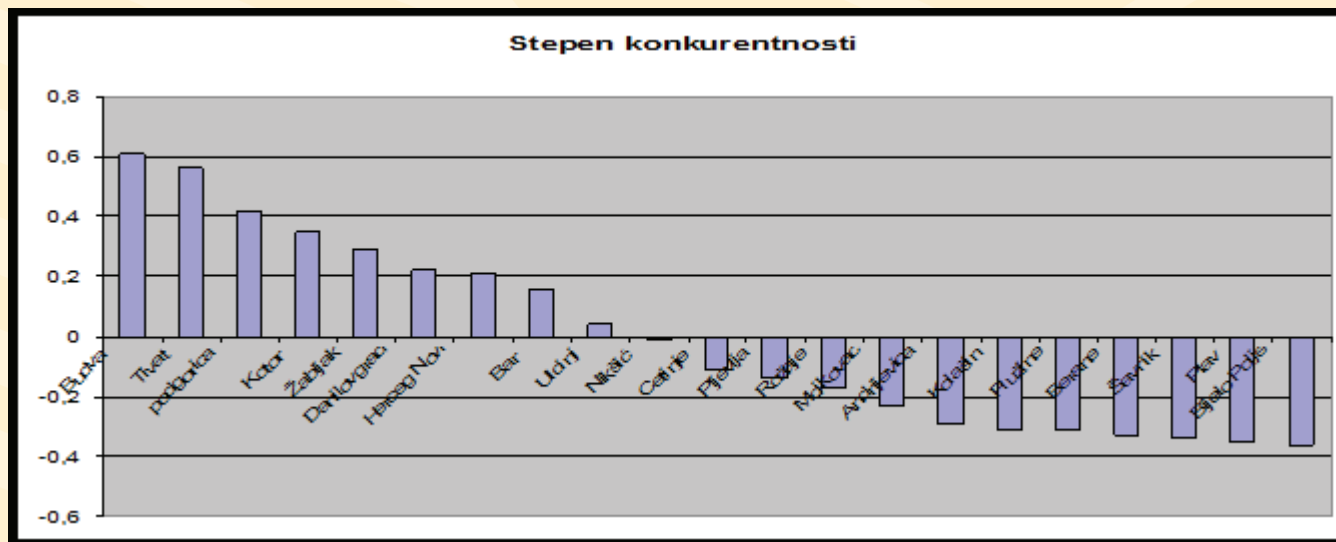

Total number of employed persons is 4.473 (Aug 2017) in sectors:

Companies	2355
Non-commercial sector	2118
Total.....	4473

Nezaposlenost u opštini Danilovgrad je ispod državnog prosjeka.

Turizam sa potencijalnim mogućnostima kulturnog (vjerskog) turizma, planinskog i tranzitnog turizma, lovom, ribolovom, raftingom Zetom itd.

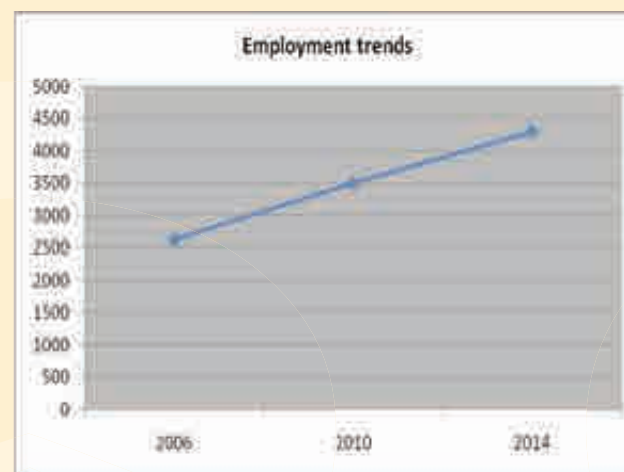

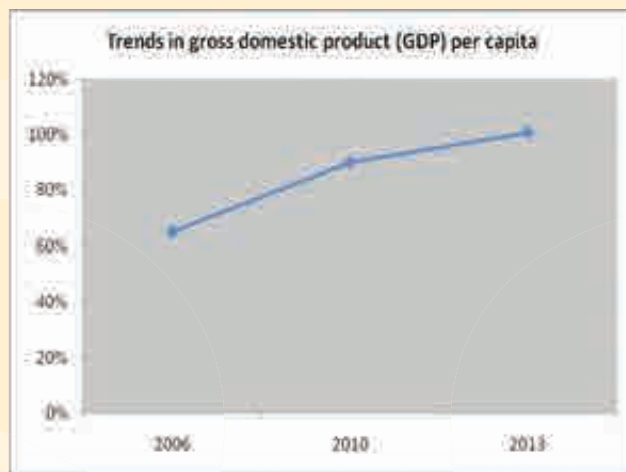

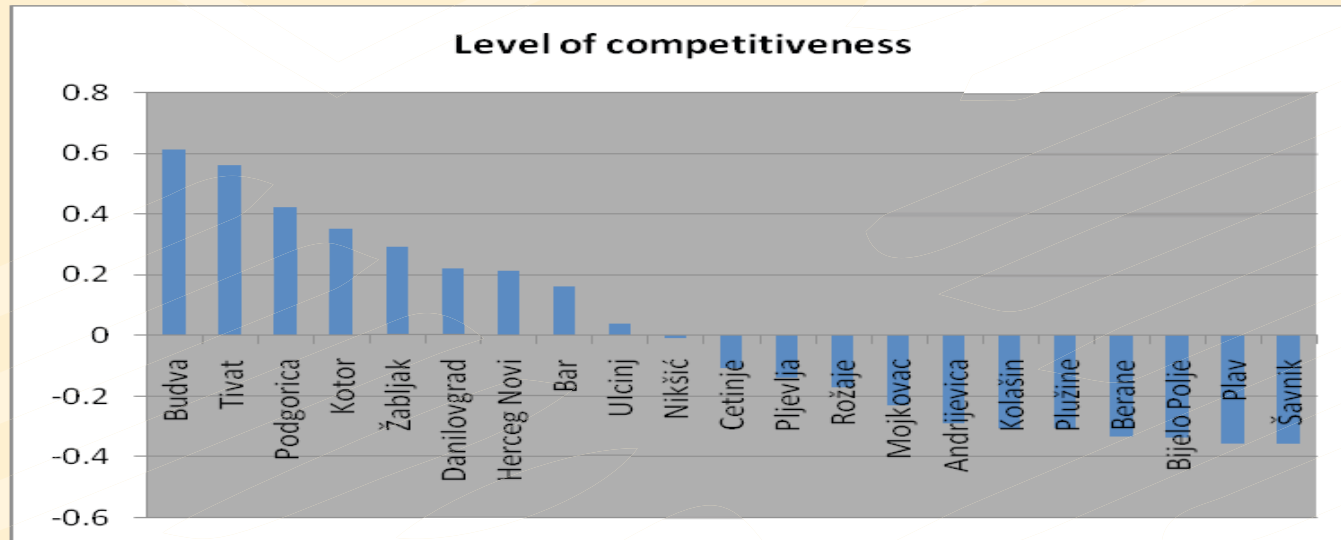

Dostignuti nivo razvijenosti, konkurentnosti i zaposlenosti u 2014. godini ilustruju sledeći grafikoni:

Unemployment rate in Danilovgrad municipality is below national average.

Tourism with potentials for cultural (religious) tourism, mountain and transit tourism, hunting, fishing, rafting on Zeta etc.

The achieved level of development, competitiveness and employment in 2014 is illustrated by the following charts

USLOVI ZA BIZNIS

U periodu od 2006. do 2014. godine Opština Danilovgrad je intenzivno radila na stvaranju uslova za razvoj biznisa. Uslovi za to su razvojne strategije i planovi, prostorni planovi, biznis zone, infrastruktura i benefiti, odnosno uklanjanje biznis barijera.

Razvojne strategije i planovi

Opština Danilovgrad je 2011. godine donijela lokalnu Strategiju održivog razvoja (donacija holandske Vlade), 2012. godine donijela je Strateški plan razvoja opštine Danilovgrad za period 2012-2018 sa Akcionim planovima za implementaciju ovih dokumenata za isti period. Donijela je Strategiju razvoja turizma, Višegodišnji investicioni planovi za period 2005 – 2009. i 2010 – 2014. godine su realizovani i investiciono značajno premašeni. Donijet je program kulture 2016 – 2020. godine, Program razvoja lovstva 2011-2020. godine, Studija ulaganja u male i srednje programe u organskoj poljoprivredi i prehrambenoj industriji, kao i niz drugih pojedinačnih specifičnih razvojnih programa po oblastima.

Poseban značaj ima donošenje prostorno planskih dokumenata. Prvi Prostorni plan opštine do 2020. godine donijet je 2007. godine, Generalni urbanistički plan Danilovgrada kao administrativnog centra 2008. godine i niz drugih planova nižega reda. Godine 2014. usvojen je Prostorno urbanistički plan i donešeni detaljni urbanistički planovi gradskog jezgra Danilovgrada, mjesnog centra Spuž i prostora Glave Zete i Ostroga.

Strateška dokumenta Opštine
Strategic documents of Municipality

BUSINESS CONDITIONS

From 2006 to 2014, the Municipality of Danilovgrad worked intensively on creating conditions for business development, such as: development strategies and plans, spatial plans, business zones, infrastructure and benefits, i.e. the removing business barriers.

Development strategies and plans

In 2011, the Municipality of Danilovgrad adopted the local strategy for sustainable development (donation of the Dutch Government). In 2012 it adopted the Strategic Development Plan 2012-2018 of the Danilovgrad Municipality with the Action Plans for the implementation of these documents for the same period. It adopted the Tourism Development Strategy, Multi annual investment plans for 2005 – 2009 and 2010 – 2014 are implemented and significantly exceeded. We have adopted Program of cultural development 2016 – 2020, Program of hunting development 2011 - 2020, Study of investments in small and medium programs in organic agriculture and food industry, as well as number of other programs for specific areas.

The adoption of spatial planning documents is of a particular importance. First Municipal Spatial Plan until 2020 was adopted in 2007, while the General urban plan of Danilovgrad as an administrative centre and a number of other secondary plans were adopted the following year. In 2014. the Spatial Plan was adopted, as well as detailed urban plans for the city core of Danilovgrad, local Centre Spuž and areas of Glava Zete and Ostrog.

ISTRAŽIVANJE JAVNOG MJENJENJA

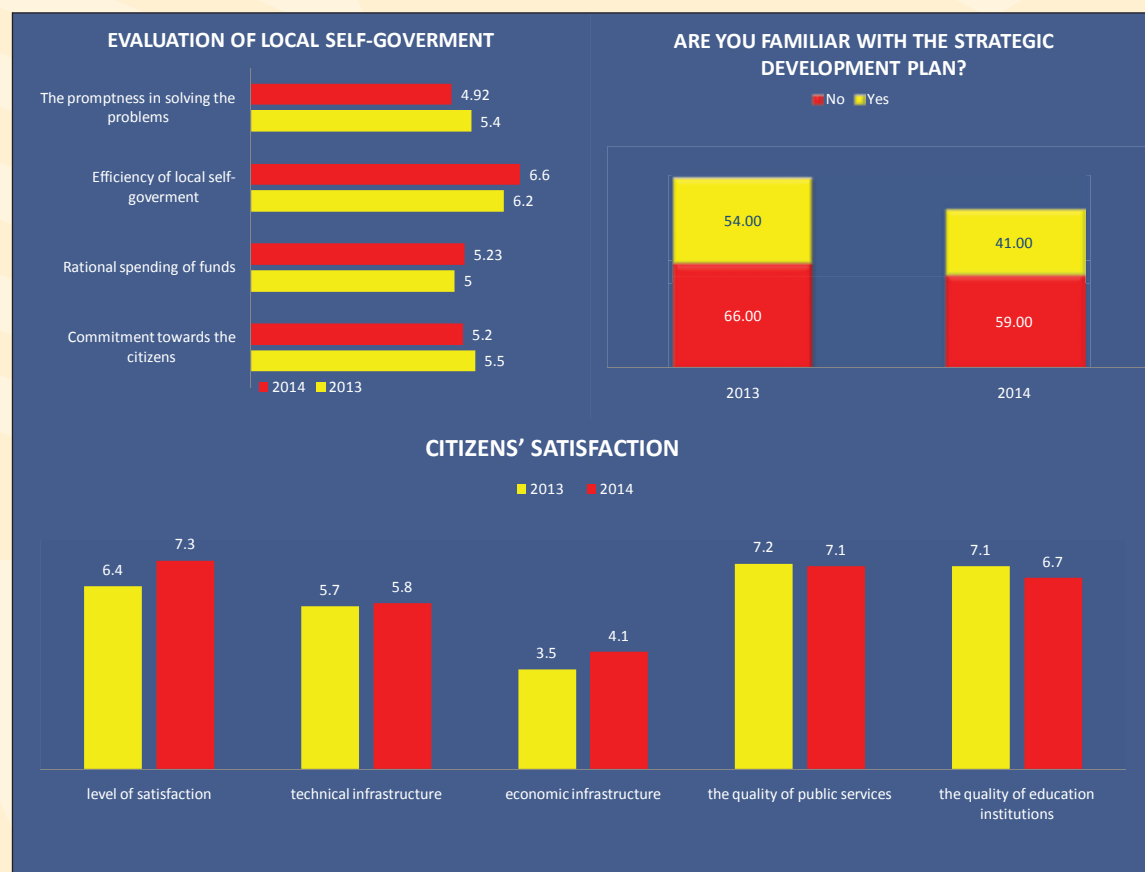

Dva odvojena istraživanja o zadovoljstvu građana sprovedena tokom maja 2013. i novembra 2014. godine na području opštine Danilovgrad organizovana su sa ciljem upoređivanja i davanja uvida u promjene vrijednosnih stavova građana prema lokalnim vlastima u posmatranom periodu. Po podacima dobijenim iz istraživanja sprovedenog u 2014. godini evidentno je da je upoznatost građana sa radom lokalne vlasti, te donesenim Strateškim planom razvoja opštine značajno porasla u odnosu na 2013. godinu. Takođe, zabilježeno je povećanje nivoa povjerenja građana prema radu lokalne samouprave, kao i zadovoljstvo kvalitetom tehničke i privredne infrastrukture.

Rezultati ispitivanja javnog mnjenja

PUBLIC OPINION POLL

Two separate surveys on citizens' satisfaction conducted during May 2013 and November 2014 in DaniloVgrad were organized with the aim of comparing and giving insight into the changes in citizens' attitudes towards the local authorities in this period. According to data obtained from a survey carried out in 2014, it was evident that citizens became more informed about the performance of local authorities and adopted Strategic Development Plan of the municipality in comparison to 2013. The survey also showed that citizens had more trust towards the performance of local government and were satisfied with the quality of technical and economic infrastructure.

Results of the public opinion polls

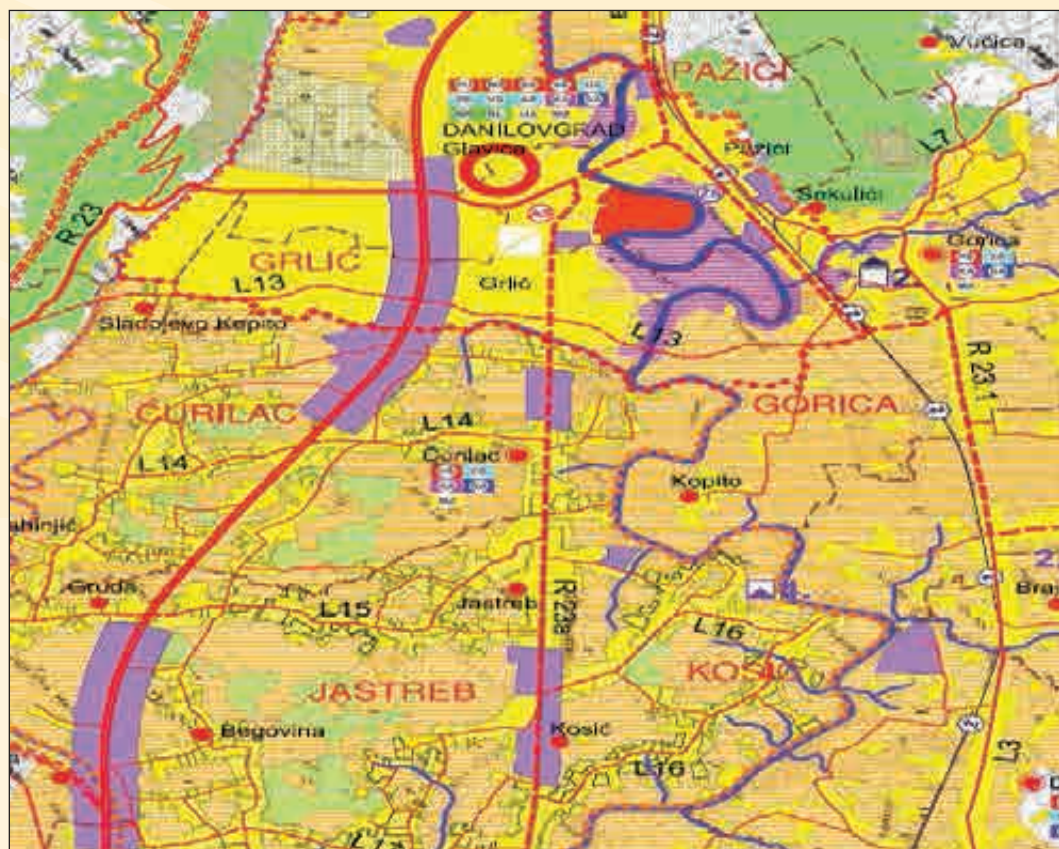

Institut za strateške studije – ispitivanje javnog mnjenja
Institute for Strategic Studies and Prognosis – public opinion poll

PRIVREDNE ZONE

ZONA DANILOVGRAD – M. ŽDREBAONIK, obuhvata 6 naselja i ima izgrađenu infrastrukturu. Osim vjerskog turizma i opreznog planiranja razvoja u zoni Ždrebaonika, područje je povoljno za značajne privredne aktivnosti, smještajne kapacitete, razvoj poljoprivrede i prerađivačkih kapaciteta iz oblasti prehrambenih proizvoda, prerade drveta, vađenja i prerade kamena i slično. Posebno oprezno planiramo razvoj u područjima koji pripadaju toku rijeke Zete

BUSINESS ZONES

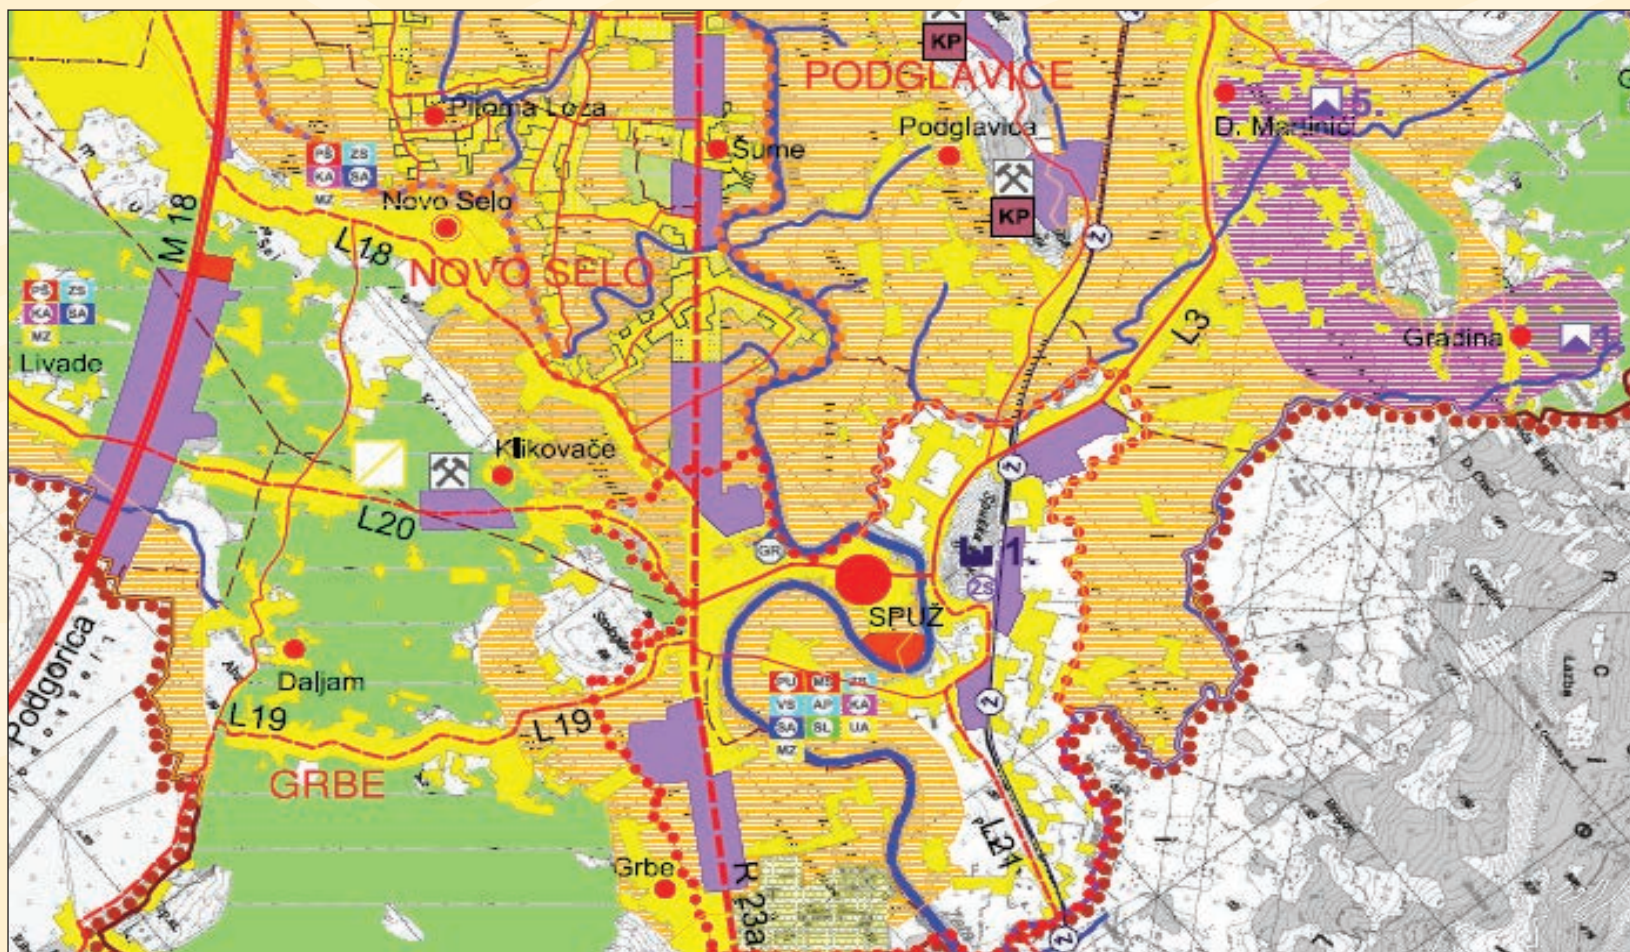

ZONE of DANILOVGRAD –ŽDREBAONIK MONASTERY, covers 6 settlements and has developed infrastructure. Apart from religious tourism and careful planning of development in the zone of Ždrebaonik, the area is favourable for significant economic activities, accommodation facilities, development of agriculture and processing capacities in the field of food products, wood processing, extraction and processing of stones etc. We are particularly careful about the planning of development in areas which belong to the flow of the river Zeta.

Zona Danilovgrad – M. Ždrebaonik
Zone of Danilovgrad –Ždrebaonik Monastery

ZONA MARTINIĆI – GRADINA, koja obuhvata više naselja, ima izgrađenu infrastrukturu neophodnu za razvoj privrednih aktivnosti iz oblasti ekoprivrede (eko-hrana i eko-turizam). Zona je bogata nalazištima građevinskog i ukrasnog kamena, ima značajnu istorijsku i kulturnu baštinu, Martinićku gradinu, Spuž i Spušku glavicu i slično.

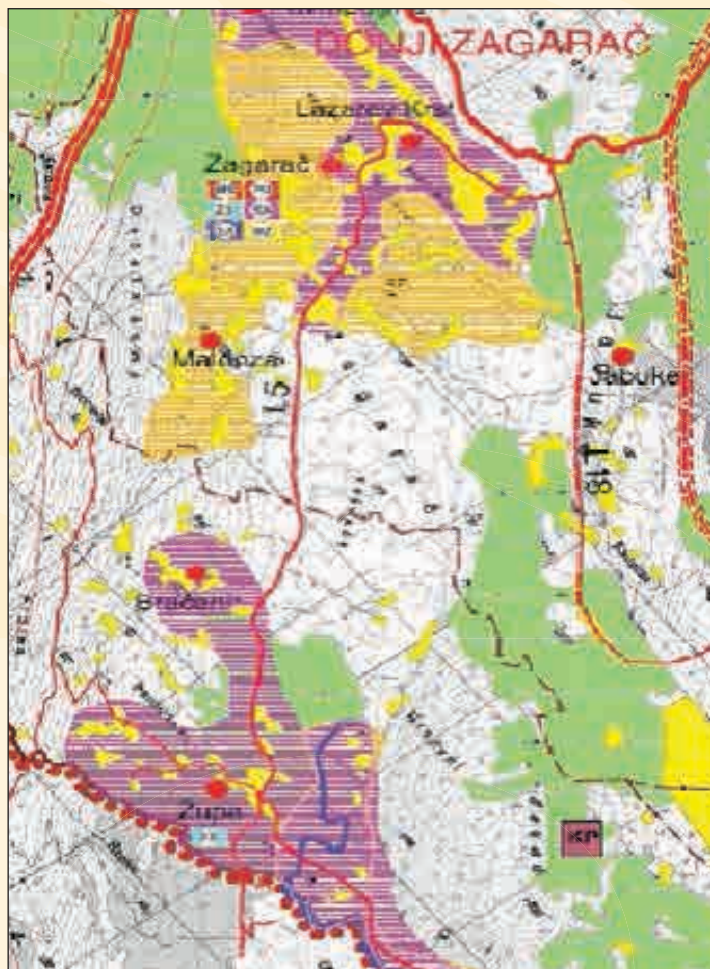

ZONE of MARTINIĆI – GRADINA, which covers more settlements, has a built infrastructure necessary for development of business activities in eco-economy (eco-food and eco-tourism). The zone is rich in deposits of ornamental and building stones, has an important historical and cultural heritage, Martinicka gradina, Spuž and Spuska glavica etc.

Zona Martinići – Gradina
Zone of Martinići – Gradina

ZONA BANDIĆI, obuhvata 8 naselja u okviru kojih se nalazi izdašno vodoizvorište Mareza, područje karakteristično za razvoj poljoprivrede (organska proizvodnja), gastronomski potencijali iz oblasti proizvodnje vina, meda, eko mesa i izgradnju smještajnih kapaciteta za razvoj eko turizma. Cilj bi mogao biti prilagođavanje seoskih područja – naselja ekološkim projektima i održivom razvoju.

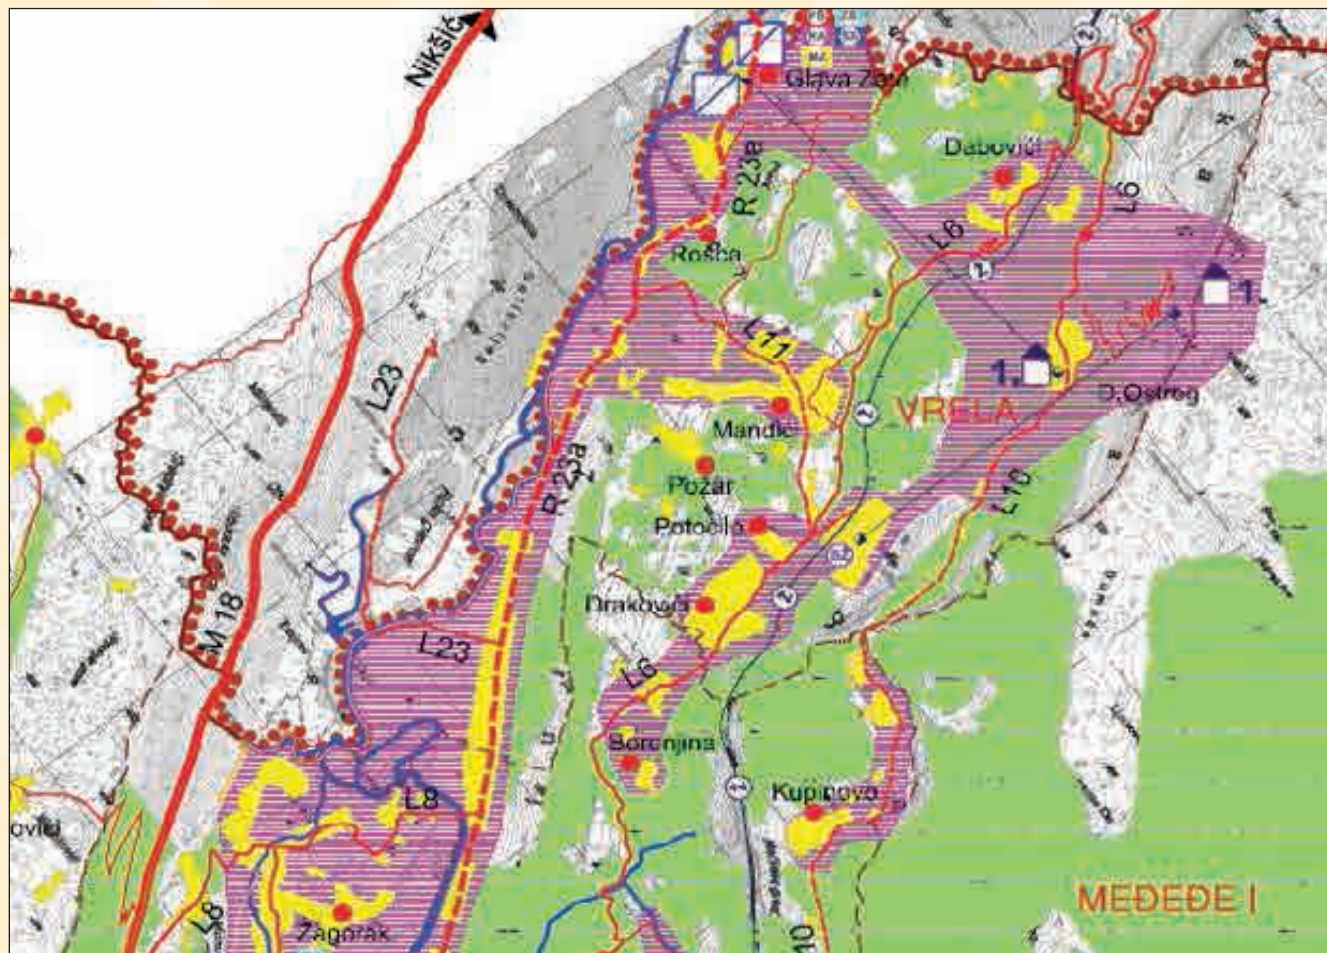

ZONE of BANDIĆI, includes 8 settlements within which there is abounding water spring Mareza. This area is very favourable for the agricultural development (organic production), gastronomic potentials in production of wine, honey, organic meat and construction of accommodation capacities for development of eco tourism. The aim could be to adapt the rural areas – villages to the eco projects and sustainable development.

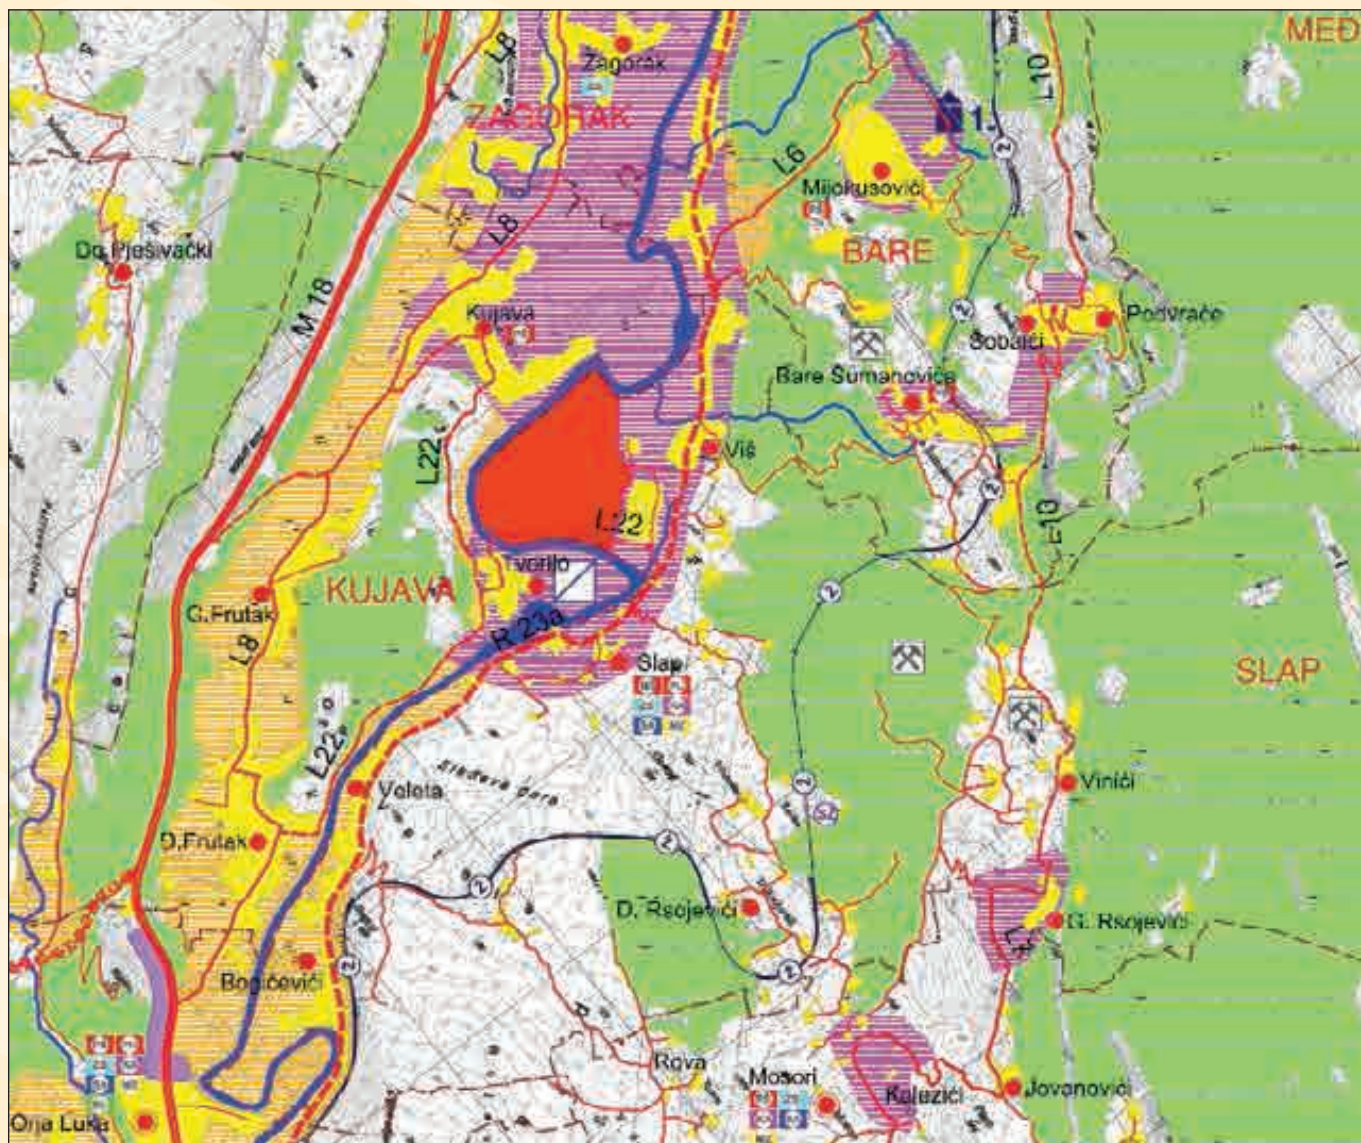

Zona Bandići
Zone of Bandići

ZONA GLAVE ZETE – MANASTIR OSTROG, koja obuhvata 20 naselja, ima izgrađenu infrastrukturu pogodnu za razvoj ekopoljoprivrede, ekoturizma i kulturnog turizma. Moguća ulaganja odnose se na izgradnju smještajnih kapaciteta, proizvodnju hrane, prerađivačku industriju iz oblasti prehrambene industrije i razvoj domaće radinosti. Takav koncept omogućava uspješan razvoj ruralnog područja, turizma i proizvodnje zdrave hrane.

ZONE of GLAVA ZETE – OSTROG MONASTERY, which covers 20 settlements, has developed infrastructure suitable for development of organic agriculture, ecotourism and cultural tourism. The possible investments refer to construction of accommodation capacities, food production, food processing industry and the development of home-made industry. This concept provides successful development of rural areas, tourism and production of healthy food.

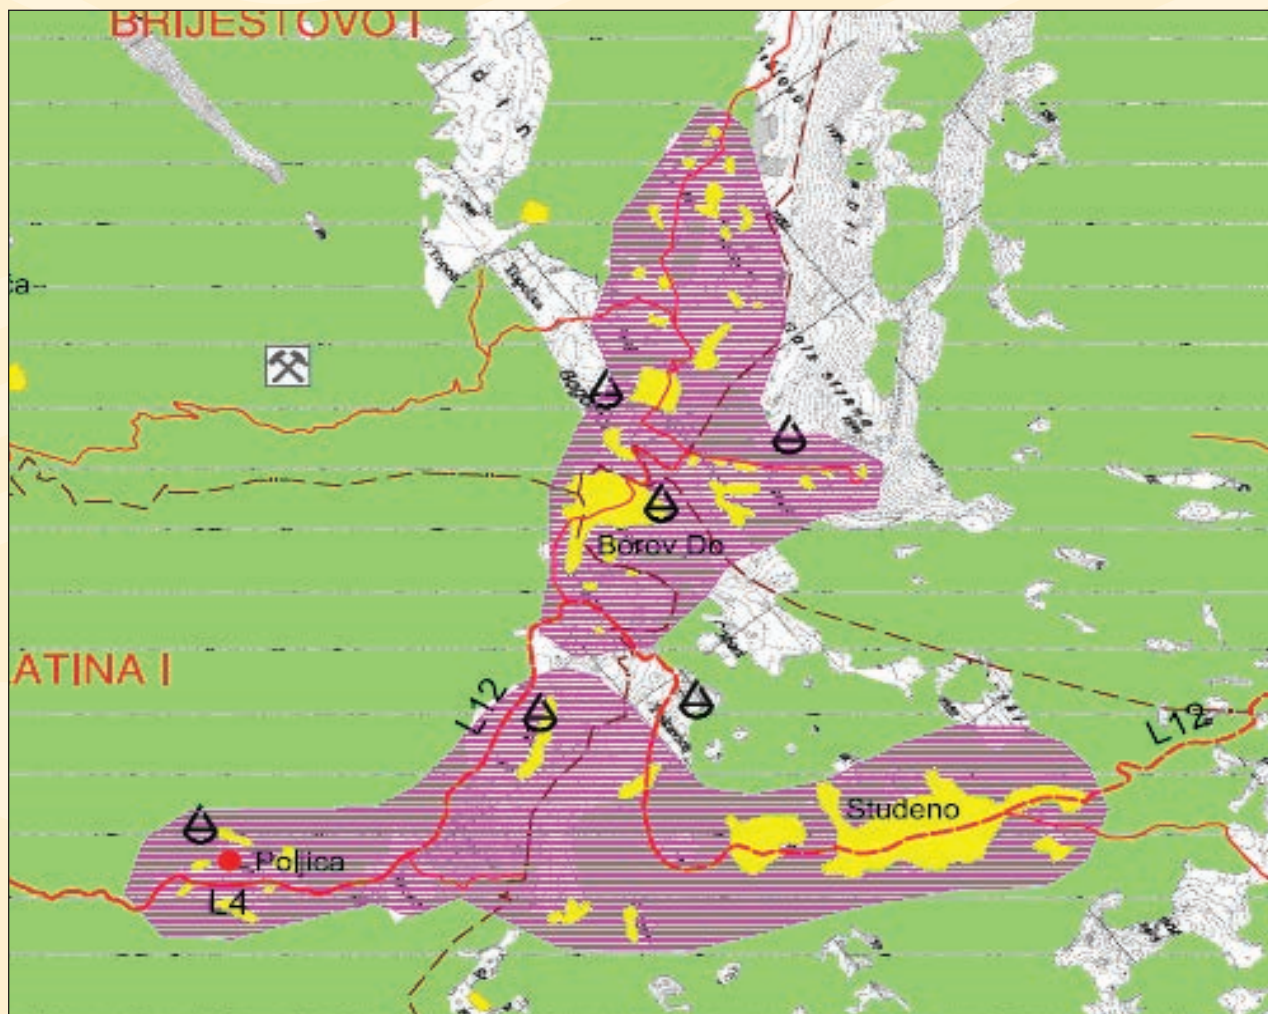

Zona Glava Zete – M. Ostrog
Zone of Glava Zete –Ostrog Monastery

Zona Glava Zete – M. Ostrog
Zone of Glava Zete – Ostrog Monastery

ZONA STUDENO, koja obuhvata 8 naselja, područje pogodno za izgradnju izletničkog, planinskog, lovnog i ostalih oblika turizma. Planirana je izgradnja i modernizacija saobraćajne i komunalne infrastrukture i smještajnih kapaciteta tipa planinarskih domova, lovačkih i šumskih kuća, malih hotela, eko ili etno sela i slično.

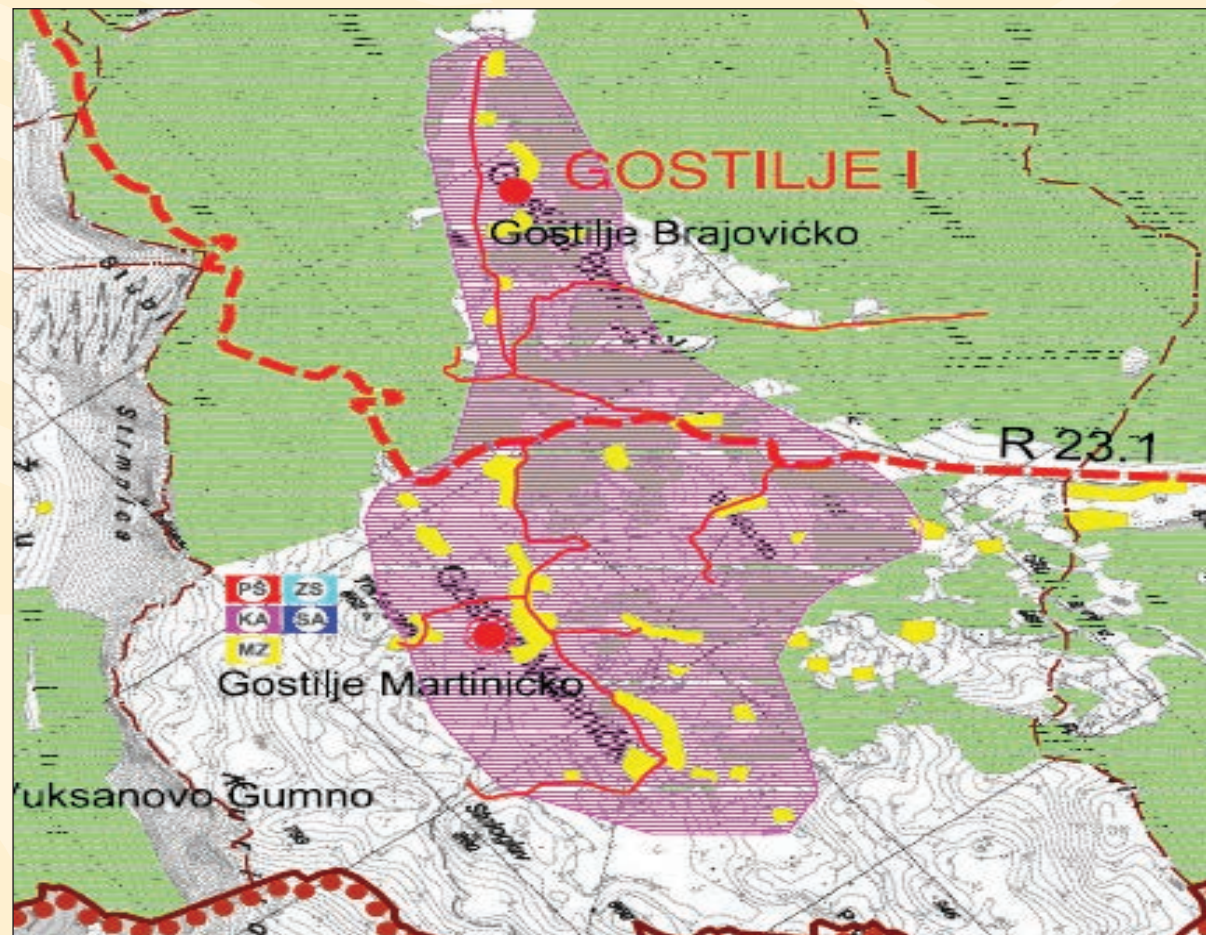

ZONE of STUDENO, which includes 8 settlements, is the area favourable for development of day-trips, mountain, hunting and other types of tourism. The transport and municipal infrastructure and accommodation capacities such as climbers' lodging, hunting and forest lodges, small hotels, eco and ethno villages etc are planned to be constructed and modernized.

Zona Studeno
Zone of Studeno

ZONA GOSTILJE, obuhvata 3 naselja, u kojoj je jako izraženo pražnjenje područja, koje ima neophodne karakteristike za razvoj eko privrede (proizvodnja eko hrane i razvoj seoskog turizma). Planirana je rekonstrukcija i modernizacija saobraćajne i komunalne infrastrukture kako bi se obezbijedili neophodni preduslovi i stimulacije za povratak na selo. Na ovu zonu nastavlja se zona Vukotice i Ponikice.

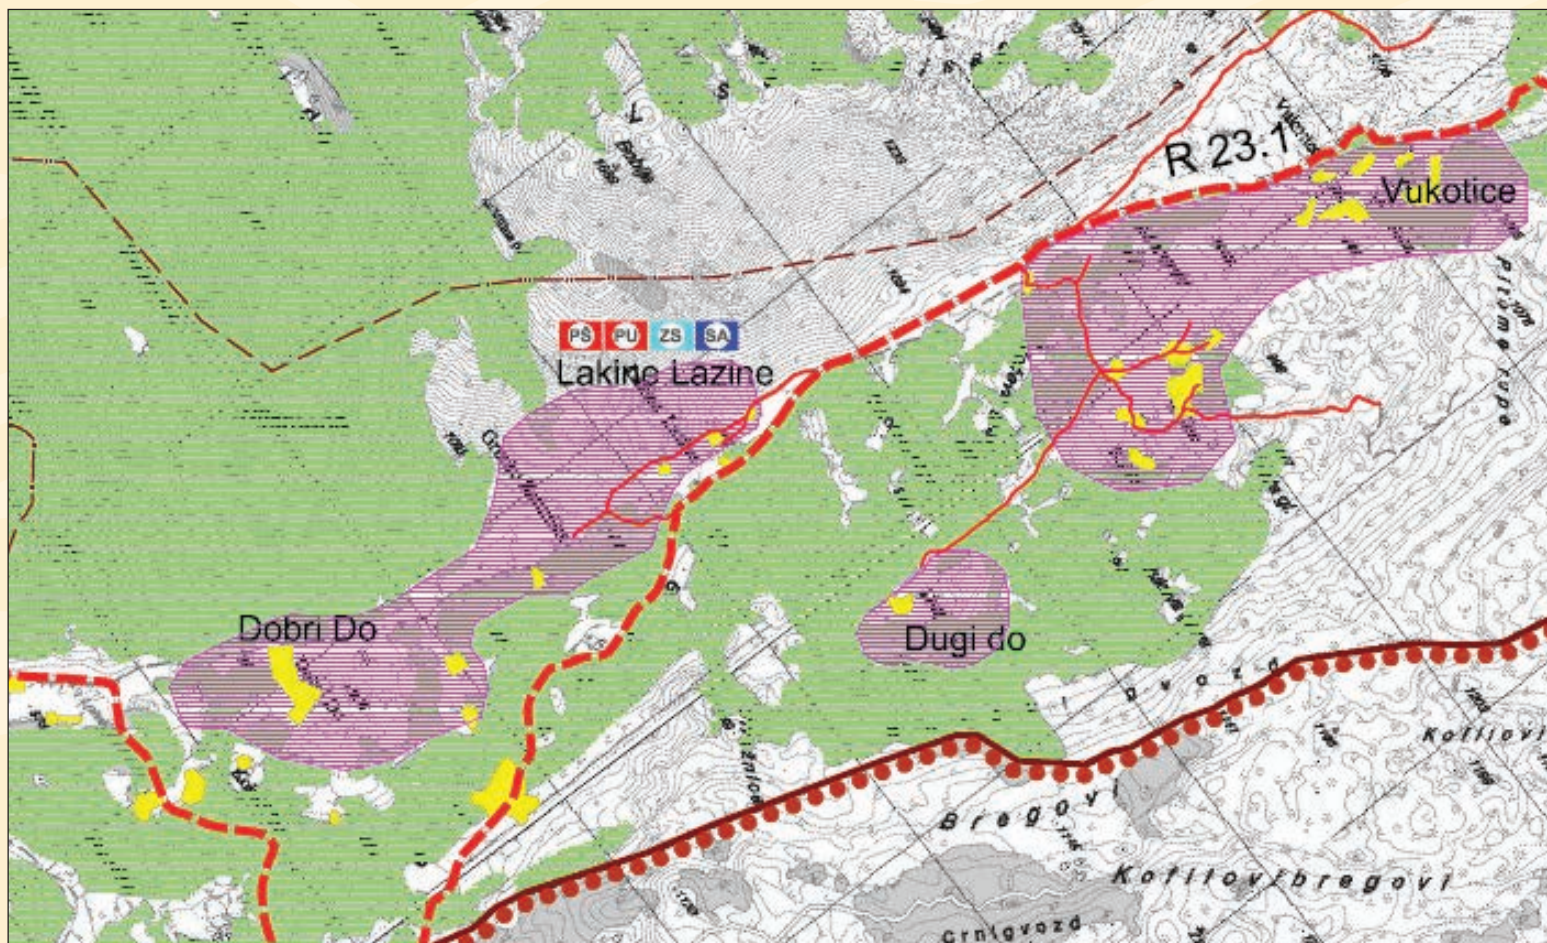

ZONE of GOSTILJE, covers 3 settlements, which is characterized by strong migration, has a necessary preconditions for development of eco-economy (production of organic food and development of rural tourism). The reconstruction and modernization of transport and municipal infrastructure is planned in order to create necessary preconditions and incentives for people to return to the village. It is followed by the zone Vukotice i Ponikice.

Zona Gostilje
Zone of Gostilje

ZONA VUKOTICA – PONIKVICA, predstavlja pogodno područje za razvoj izletničkog, planinarskog, lovnog i drugih oblika turizma, izgradnju izletišta, eko–katuna, izgradnju smještajnih kapaciteta, revalorizaciju katuna, saobraćajne, komunalne i druge infrastrukture, obnavljanje i sanaciju atraktivnih prostora (jezero na Ponikvici) i stimulaciju za razvoj poljoprivrede iz oblasti organske proizvodnje (mlijeko i mliječni proizvodi, eko-mesa), šumarske proizvodnje i korišćenje sporednih šumskih proizvoda.

ZONE of VUKOTICA – PONIKVICA, is convenient area for development of day-trip, mountaineering, hunting and other types of tourism, building vacation resorts, eco-katuns, accommodation facilities, the revaluation of summer pastures, transportation, municipal and other infrastructure. This zone is also suitable for renewal and restoration of attractive areas (Lake at Ponikvice) and the stimulation of agricultural development in the field of organic production (milk and dairy products, organic meat), forestry production and usage of non-timber forest products.

75% for apartment hotels, condo hotels and garni hotels

The complete text of the decision may be found athttp://www.danilovgrad.me/files/odluka_o_naknadi_18022014.pdf

PORESKE OLAKŠICE

Saglasno propisima na državnom nivou definisane su poreske olakšice, a posebno u dijelu stimulisanja razvoja strateških grana i manje razvijenih opština. One se odnose na:

- Porez na dohodak-oslobađaju se sva fizička lica (preduzetnici) za 8 godina, koji otpočinju djelatnost u nedovoljno razvijenim opštinama, shodno Zakonu o porezu na dohodak fizičkih lica;
- Porez na dobit-oslobađaju se pravna lica za 8 godina koja otpočinju djelatnost u nedovoljno razvijenim opštinama, a koja obavljaju proizvodnu djelatnost, shodno Zakonu o porezu na dobit;
- Porez na lična primanja i doprinosi na teret poslodavca-oslobađaju se određene kategorije nezaposlenih lica, kao i zaposleni u biznis zonama (do 31.12.2014. godine) shodno Uredbi o subvencijama za zapošljavanje određenih kategorija nezaposlenih lica, kao što su:
 - Lica sa najmanje 40 godina života,
 - Lica sa zavoda, duže od 5 godina,
 - Lice koje je zaposleno na izvođenju javnih radova,
 - Lice na neodređeno vrijeme nakon pripravnčkog staža,
 - Lice sa stečenim visokim obrazovanjem, nakon obavljenog osposobljavanja,
 - Lice za čijim je radom prestala potreba,
 - Lice radi sezonskog poslovanja,
 - Lica koja su korisnici socijalne naknade, sa preko 25 godina radnog staža,
 - Lica manjinske populacije.

Istom uredbom se definišu i olakšice, odnosno subvencije za zapošljavanje lica u biznis zonama, za djelatnosti koje posebnim aktom utvrdi Vlada Crne Gore.

TAX INCENTIVES

Pursuant to regulations at the state level, tax incentives are defined, particularly in the promoting development of strategic sectors and less developed municipalities. They refer to:

- Income tax - All natural persons (entrepreneurs), who undertake activities in underdeveloped municipalities, are exempted from the tax for 8 years according to the Law on Personal Income.
- Profit tax - Legal persons who undertake activities in underdeveloped municipalities and carry out production activities are exempted from the tax for 8 years, according to the Law on Corporate Income Tax;
- Personal income tax and contributions paid by employer - Certain categories of unemployed persons as well as employees in the business zones (up to 31.12. 2014) are exempted from these pursuant to the Decree on subsidies for the employment of certain categories of unemployed persons, such as:

Persons who are at least 40 years of age

Persons registered in the records of the Employment Agency of Montenegro for more than five years;

A person who is employed on carrying out public works,

A person who is employed for an indefinite period of time following the internship,

A person who acquired higher education following of traineeship,

A person whose services are no longer needed,

A person employed to perform seasonal work,

Persons who are financial compensation users, with over 25 years of service,

Persons who are members of minority population.

The same Decree shall define the incentives or subventions for employment of persons in business zones for activities regulated by the special Act by the Government of Montenegro.

Posebne podsticajne mjere

U skladu sa planskim dokumentima i raspoloživim sredstvima, Opština je donijela odluke o podsticajnim mjerama, i to:

- O posebnoj stimulaciji proizvođača mlijeka (3 centa po litru);
- O kupovini kombajna i besplatnoj žetvi;
- Odluku i Memorandum o učešću u izgradnji solarnih sistema na katunima i ruralnom području;
- Realizovan je veliki broj infrastrukturnih projekata, posebno na ruralnom području, uz učešće građana kroz neplaćanje naknada za eksproprijaciju zemljišta;
- O zabrani realizacije programa koji zagađuju okolinu.
- Obavezna registracija subjekata u opštini i obavezi prioritnog zapošljavanja profila građana sa ovog područja koji zadovoljavaju zahtjeve programa i investitora;
- Skraćivanje svih procedura za izdavanje građevinske dozvole (svedeno na vrijeme od 24 časa nakon dostavljanja propisane dokumentacije);

Sve ove mjere sprovedene su transparentno i kompatibilno sa podsticajima sa nivoa države, posebno u poljoprivredi kao strateškoj grani razvoja opštine i države.

Special incentive measures

In accordance with the planning documents and available resources, the Municipality of Danilovgrad has issued decisions on incentive measures, regarding:

- a special stimulation to the milk producers (3 cents per liter)
- a purchase of the combine harvester and free-of-charge harvest;
- the Decision and Memorandum on participation in the construction of solar system in summer pastures and rural areas;
- a number of infrastructure projects have been implemented, particularly in rural areas, in which the citizens were involved through non-payment of compensation for land expropriation;
- a prohibition of the implementation of environmental pollution program.
- Compulsory registration of entities in the municipality and the obligation of priority employment of citizens from this area who meet the requirements of the program and investor
- Shortening of procedures for issuing building permits (reduced to a period of 24 hours following the submission of the required documentation).

All these measures are transparent and compatible with incentives at the state level, particularly in agriculture as a strategic development sector of the municipality and the state.

ENERGETIKA

Hidro potencijal, klimatski uslovi i raspoloživa biomasa predstavljaju značajne resurse za proizvodnju električne energije, i uz program energetske efikasnosti stvaraju se šanse za zadovoljenje potreba za energijom na duži rok.

Rijeka Zeta

Rijeka Zeta, koja protiče kroz Danilovgrad, predstavlja veliki vodni potencijal. Zeta izvire ispod planine Vojnik. Od svog izvorišta prolazi Nikšićkim poljem ojačana vodom mnogih jakih izvora iz okoline. Gubi se u ponoru Slivlje na visini od 625 metara. Nakon 5 km podzemnog toka izbija na 81m nadmorske visine, na području Planinice - Glava Zete. Teče dugim tokom, oko 50 km, kroz Bjelopavličku ravnicu, te se kod Podgorice uliva u Moraču naspram antičke Duklje. Do Slivlja se zove Gornja Zeta, a od izvora Perućica Donja Zeta. Njena ukupna dužina sa podzemnim tokom iznosi oko 89 km, a površina sliva 1547 km².

Obale Zete su najčešće sačinjene od strmovitih brjegov, a u ravnici pored rijeke rađa sve što podneblje Mediterana može da ponudi: duvan, loza, nar, smokva, kivi, badem, kalifornijska breskva, japanska jabuka, mandarina, šljiva, itd. Zeta je bogata ribom, u njenim vodama se može naći: skobalj, pastrmka, klijen, mrena, jegulja, ukljeva... U šumi i na brežuljcima oko nje, kao i njenih pritoka Gračanice i Sušice staništa su pernate i druge divljači. S obzirom na to da Zeta nosi obimne količine vode, na Glavi Zete i Slapu podignute su hidrocentrale – HE Slap Zete i HE Glava Zete.

Mala HE Slap Zete je puštena u pogon 1952 godine, a i sada (nakon 60 godina) normalno radi. Projektant je na optimalan način definisao njene osnovne parametre: karakteristične kote dovoda i odvoda vode sa padom od 7 metara, instalisanu snagu od 1,2 MW i godišnju proizvodnju od 3,5 miliona kWh. Plasman proizvedene električne energije je projektovan na naponski nivo 10 kV, prema Danilovgradu i okolnim selima, a naknadno je ova elektrana priključena i na 35 kV dalekovod Glava Zete- Danilovgrad. Najveća godišnja proizvodnja iznosi 7.87 GWh (1972), a najmanja 1.88 GWh (2003). Prostorno urbanističkim planom opštine Danilovgrad planirana je rekonstrukcija ove HE u postojećim gabaritima, kroz zamjenu turbina i saniranje ponora uzvodno od brane, kao i njena modernizacija.

THE ENERGY SECTOR

Hydro potential, climatic conditions and available biomass are significant resources for the electricity production, and along with the energy efficiency program, the opportunities to satisfy needs for energy in the long term have been provided.

River Zeta

Zeta River, which runs through Danilovgrad, is huge water potential. Zeta springs below the mountain Vojnik. From its source it flows through Niksic field reinforced by many strong water sources from the surrounding. It disappears in the abyss of Slivlja at a height of 625 meters. After 5 km of subterranean course, it emerges at 81 m above sea level, in the Planinica - Glava Zeta area. It runs cca 50 km long through Bjelopavlici plain, and near Podgorica it flows into the river Moraca, on the opposite side of the ancient city of Duklja. Up to Slivlja it is called Upper Zeta, and from the source Perućica - Lower Zeta. Its total length with subterranean water flow is cca 89 km and the river basin covers the area of 1547 km².

The riverbanks are mostly made up of steep crests, but in the plain near the river everything Mediterranean climate can offer is being cultivated: tobacco, vine, pomegranate, fig, kiwi, almond, Californian peach, persimmon, tangerine, plum etc. Zeta is teeming with fish, there may be found: carp, trout, chub, barbell, eel, bleak... There are habitats of wildlife in the forest and on the hills around Zeta and its tributaries Gračanica and Sušica.

Since Zeta carries extensive amounts of water, hydroelectric power plants - HPP Slap Zeta and HPP Glava Zeta were built at Glava Zete and Slap. Small HPP Slap Zeta was put into operation in 1952, and now (60 years later) it operates properly. The architect defined its basic parameters in the optimal way: the characteristic measures of inlet and outlet of water with 7 meters drop, installed capacity of 1.2 MW and an annual production of 3.5 million kWh. Placement of generated electricity is projected at 10 kV, towards Danilovgrad and surrounding villages, and subsequently this power station is connected to the 35 kV long-distance power line Glava Zete - Danilovgrad. The highest annual production was 7.87 GWh (1972), and the lowest - 1.88 GWh (2003). The spatial urban plan of the municipality envisages reconstruction of the HPP in existing dimensions, through replacing turbines and rehabilitation of the abyss upstream of

Ovim zahvatima se očekuje povećanje instalisane snage za 10 %, kao i povećanje proizvodnje za oko 2 miliona kWh.

Hidroelektrana Glava Zete je puštena u pogon 1953. godine. Ova hidroelektrana je najveća mala HE u Crnoj Gori. Do kraja I faze elektrifikacije Crne Gore (1960) HE Glava Zete je predstavljala osnovni izvor električne energije za napajanje srednjeg i južnog dijela Crne Gore. Njena uloga i značaj bili su posebno važni jer je do tada južni elektroenergetski sistem Crne Gore bio odvojen od sjevernog energetskog sistema. Viskonaponsko postrojenje hidroelektrane Glava Zete (35 kV) predstavljalo je značajno čvorište sa kojim su bili povezani najvažniji potrošački centri Crne Gore. Hidroelektrana Glava Zete je protočna elektrana derivacionog tipa prosječne godišnje proizvodnje 9 GWh, dok njena planirana godišnja proizvodnja iznosi 12 GWh. Najveća godišnja proizvodnja od 19,73 GWh, ostvarena je 1979. godine. Ova hidroelektrana raspolaže sa dva agregata koji su u pogonu više od 50 godina, sa turbinama tipa Kaplan (vertikalne), snage 2x2680 kW i generatorima snage 2x3200 kVA, a njen pad iznosi 21.5 metara. U turbinskom, generatorskom i visokonaponskom postrojenju podzemne mašinske zgrade smještena je mašinska, elektro, hidromehanička, visokonaponska i oprema sopstvene potrošnje

Planirana je izgradnja Hidroelektrane Rošca, snage 5 MW, koja bi koristila vode HE Perućica. One bi bile zahvaćene jednom manjom branom na rijeci Zeti, iznad ušća donje vode HE Glava Zete u korito rijeke Zete. Brana bi bila locirana nizvodno od mosta na rijeci Zeti između postojećeg motela i sportskih terena. Ova hidroelektrana definisana je starom projektnom dokumentacijom Elektroprivrede Crne Gore i već je jednom bila na tenderu po BOT aranžmanu. Značaj ove HE se ogleda u povoljnim uslovima za gradnju i priključku na distributivnu mrežu opštine Danilovgrad.

Bogatstvo Zete nije samo u hidro potencijalu. Šanse su mnogo veće: uzgoj ribe i ribolov, ribnjaci, navodnjavanje, kupališta, rafting, mlinovi, prostor za razna kulturna zbivanja i sl. To potvrđuju sledeće fotografije..

the dam, as well as its modernization. These interventions are expected to increase installed capacity by 10%, as well as the production by cca 2 million kWh.

Hydropower Plant Glava Zete was put into operation in 1953. This hydropower plant is the largest small HPP in Montenegro. By the end of the first phase of electrification in Montenegro (1960), HPP Glava Zeta was the main source of power supply for the central and southern parts of Montenegro. Its role and significance were particularly important because until then the northern and southern power system of Montenegro were separated. High-voltage facility of HPP Glava Zeta (35 kV) was a significant hub which connected the most important consumer centres of Montenegro. Hydropower Plant Glava Zete is a run-of-river, diversion hydropower plant whose average annual production amounts to 9 GWh, while its projected annual production is 12 GWh. The largest annual production of 19.73 GWh was recorded in 1979. This hydropower plant has two generating units which have been in operation for more than 50 years, with Kaplan turbines (vertical) of 2x2680 kW and generators of 2x3200 kVA and its decline is 21.5 meters. Mechanical, electrical, hydro-mechanical, high-voltage and consumption equipment is placed in the turbine, generator and high voltage power plant of underground powerhouse.

The hydroelectric power Rošca, with power of 5 MW, which would use water from Perućica, is planned to be built. They would be affected by one smaller dam on the river Zeta, above the estuary of lower water of HPP Glava Zeta into the riverbed of Zeta. The dam would be located downstream from the bridge on the river Zeta between the existing motel and sports fields. This HPP is defined by the old EPCG's documentation and has already once been in the tender under the BOT arrangement. The significance of this HPP is reflected in the favorable conditions for the construction and connection to the distribution network of Danilovgrad.

The richness of River Zeta does not lie only in hydro potential. It offers plenty of opportunities: fish breeding and fishing, fish ponds, irrigation, swimming areas, rafting, mills, areas for various cultural events etc. which is confirmed by the following photos.

PROJEKAT UREĐENJA OBALE ZETE

Kako forma proističe iz funkcije, većina sadržaja u ovom projektu odnosi se na gradska okupljanja, kulturna dešavanja, proslave, odmor i rekreaciju građana. Planiran je i prostor za skulpture koje su značajne znamenitosti, a projekat sadrži raznovrsne zelene površine, dok se u neposrednom okruženju se nalaze i odgovarajući poslovni sadržaji.

U ostvarivanju komunikacije uređenja sa ambijentom, težnja je da se izmjenom ovog prostora prilagodi teren životnim potrebama građana, ali i ispoštuje i ostvari netaknuta pejzažna slika ljepote rijeke Zete i njene obale.

Likovno-oblikovni tretman prostora doprinosi stvaranju estetski skladnog objekta primjernog gradskoj obali, prepoznatljivog, jedinstvenog ambijenta koji čini skladan odnos sa već izgrađenim. Realizacija projekta je u završnoj fazi.

Budući izgled obale Zete u Danilovgradu

THE PROJECT OF ARRANGING THE COAST OF ZETA

As the form stems from the function, most of the content in this project relates to city gatherings, cultural events, celebrations, holidays and recreation of citizens. Also planned is a space for sculptures that are significant sights, project contains a variety of green spaces, while in the immediate environment are appropriate business facilities.

In the realization of communication with the ambience, the tendency is to adapt the ground for the needs of the citizens by changing this area, but also respects and achieves the untouched landscape image of the natural beauty of the river Zeta and its shores.

Art-shaped space treatment contributes to the creation of a highly aesthetic and harmonious object, appropriate for city shore and recognizable, unique ambience in harmonious relationship with already built forms. Realization of this project is in the final stage.

The future look of the Zeta coast in Danilovgrad

JEZERO NA MOKROJ PONIKVICI – REVITALIZOVANO

Prirodni faktori usloveli su potpuni nestanak ovog jezera u godinama početkom ovoga vijeka. Zahvaljujući velikom interesovanju građana i naučnih krugova strateški je planirano da se izvrši rehabilitacija istog. Nakon izrade projekta pristupilo se njegovoj realizaciji u 2015. godini, i isto je dobilo svoj prvobitni sjaj. U projekat je uloženo 170.000 eura, a sredstva su obezbijeđena uz pomoć Vlade Crne Gore.

PONIKVICA LAKE – RECOVERED

Natural factors have caused complete disappearance of this lake at the beginning of the century. Thanks to the great interest of citizens and professional public, recovering of this lake is strategically planned. After the development of the project, its realization started in 2015, and the lake is now fully recovered. 170,000 euros was invested in the project, and the funds were provided with the help of the Government of Montenegro.

ALTERNATIVNI IZVORI ENERGIJE

Klimatski uslovi i bogatstvo biodiverziteta, uz odgovarajuća tehničko – tehnološka rješenja, obezbjeđuju uslove za korišćenje energije sunca, snage vjetra i raspoložive bio-mase.

Energetska efikasnost

Štednja energije je imperativ vremena. Realizovani i projekti, čija je realizacija u toku, upućuju na opravdanost ulaganja.

ALTERNATIVE SOURCES OF ENERGY

Climatic conditions and rich biodiversity, with appropriate technical and technological solutions, provide conditions for the use of solar energy, wind power and available bio-mass.

Energy efficiency

Saving energy is an imperative of the times. The implemented projects as well as the on-going ones justify the investment.

Centar za kulturu Danilovgrad

Cultural Center Danilovgrad
LEGEND project

Nakon realizacije projekta LEGEND i uređenja enterijera sprata, Centar za kulturu Danilovgrad je dobio nove sadržaje - biblioteku, multimedijalnu salu i četiri kancelarije.
After implementation of LEGEND project, and reconstruction of the second floor, Cultural Center Danilovgrad has new new contents - library, multimedia hall and four offices.

Na teritoriji opštine funkcioniše određen broj subjekata koji se bave proizvodnjom aparata i materijala za potrebe elektroprivrede, kao i pružanjem usluga u toj oblasti. Među njima najznačajnije privredno društvo je Mezon d.o.o.

Mezon d.o.o.

MEZON

Firma Mezon d.o.o. je osnovana 1992 god. za izvođenje elektro radova, za što posjeduje sve potrebne licence. U svom dosadašnjem radu uspješno je izvodila radove na infrastrukturnim objektima javne rasvjete, NN mreža, dalekovoda, elektro instalacije tunela, uzemljenja, elektro instalacije objekata i jedna je od vodećih firmi u svojoj djelatnosti na crnogorskom tržištu.

A number of entities engaged in the production of appliances and materials for the needs of electric power industry, as well as service provision in this field operate in the municipality. Among them, the most important business organization is Mezon d.o.o.

Mezon Ltd

Adresa/ Address: Bandići b.b., 81410 Danilovgrad
Tel/ Phone number: +382 77 272 021
Tel/Fax/ Phone/Fax: +382 77 272 022

E-mail: mezon@t-com.me

Company Mezon Ltd. was established in 1992 in order to perform electrical works, for which it has all the necessary licenses. So far, it has successfully carried out projects on the infrastructural facilities of public lighting, low voltage network, power-transmission lines, electrical installation of the tunnel, grounding, electrical installations of the facilities. It is one of the leading companies in this type of activity in the Montenegrin market.

Zeta Energy doo Danilovgrad je enegretska kompanija osnovana 2010. godine između Elektroprivrede Crne Gore (vlasnik 51 % kapitala) i norveške energetske kompanije NTE (vlasnik 49 % kapitala) sa ciljem razvoja obnovljivih izvora energije u Crnoj Gori. Kompanija je formirana od kapitala EPCG u vidu dvije male hidroelektrane (MHE Glava Zete i Slap Zete) i kapitala NTE koji će obezbijediti neophodna sredstva za izvršenje radova na rekonstrukciji i remontu ove dvije MHE. Troškovi ovih radova će predstavljati NTE-ov dio kapitala u zajedničkoj kompaniji. Svrha formiranja zajedničke kompanije između NTE i EPCG je razvoj i eksploatacija obnovljivih izvora energije u Crnoj Gori kao što su hidroenergija, energija vjetra, solarna energija, bio energija

Zeta Energy d.o.o..

Prioritetni projekti su rekonstrukcija MHE Glava Zete, rekonstrukcija MHE Slap Zete, planiranje i mogućnost izgradnje MHE Rošca, poslovanje i održavanje MHE, mjerenja vjetra i određivanje pogodnih lokacija za farme vjetrenjača, planiranje i izgradnja farmi vjetrenjača, eksploatacija solarne energije zajedno sa farmama vjetrenjača.

Zeta Energy Ltd. Danilovgrad is the energy enterprise founded in 2010 by Elektroprivreda Crne Gore (owner of 51% of the capital) and Norwegian energy company NTE (owner of 49% of the capital) in order to develop renewable energy sources in Montenegro. The company was set up by the EPCG's capital which includes two small hydropower plants (SHPP Glava Zete and Slap Zete) and NTE's capital which will provide the necessary resources for the execution of works on reconstruction and overhaul of these two SHPP. The cost of these works will be the NTE's share capital in the joint venture. The purpose of the establishing the joint venture between NTE and EPCG is to develop and exploit renewable energy sources in Montenegro, such as hydropower, wind power, solar energy, bio energy.

Zeta Energy Ltd

Adresa/Address: Slap Zete bb

Telefon/Phone number: +382 20 813 311

Fax: +382 20 813 311

E mail: maja@zeta-energy.me

Web: www.zeta-energy.me

Priority projects include reconstruction of SHPPs Glava Zete and Slap Zeta, planning and the possibility of building SHPP Rošca, operation and maintenance of SHPPs, wind measurements and defining suitable sites for wind farms, planning and construction of wind farms, exploitation of solar energy along with wind farms.

POLJOPRIVREDA I PREHRAMBENA INDUSTRIJA

Opština raspolaže sa 17.302 ha obradivih površina. Oko 3000 gazdinstava raspolaže sa posjedima raznih veličina. Usitnjenost posjeda je ograničavajući faktor, no i pored tog, prostora za bavljenje poljoprivredom je jako mnogo, s obzirom na karakter reljefa opštine. Povoljna submediteranska klima Bjelopavličke ravnice, koja čini pretežni dio poljoprivrednog zemljišta opštine Danilovgrad, sa dobrim pedološkim i bonitetnim karakteristikama, kroz koju čitavom dužinom protiče rijeka Zeta, i duž koje su lateralno raspoređene podzemne vode pogodne za navodnjavanje predstavljaju vrlo povoljne resurse za razvoj poljoprivrede. Obodna brdska područja i dosta atraktivna katuništa u planinskim područjima Sinjavine, Lukavice i Latičnog su značajna dopuna pomenutim resursima opštine. Planinska područja se koriste za razvoj stočarstva, uzgoj krompira i žitarica na ograničenim područjima, dok je razvoj sela baziran na principu specijalizovanih farmi.

Infrastruktura izgrađenost područja Bjelopavličke ravnice (saobraćajna, elektro, hidrotehnička infrastruktura) omogućila je razvoj proizvodnih kapaciteta (farme, plastenici, voćnjaci, vinogradi, ribnjaci i sl.), kao i prerađivačkih pogona (mljekare, pekare, mlinovi, pogoni za prerađivanje kafe i proizvodnju pića, konditorskih proizvoda, tjestenina, ljekobilja, začina i sl.), što ukazuje na dalje mogućnosti razvoja poljoprivrede opštine. Relativno zadovoljavajuće poljoprivredne površine, struktura i sortni sastav gajenih biljnih vrsta u voćarstvu i povrtarstvu, veličina fonda i rasni sastav stoke i živine, duga tradicija bavljenja poljoprivredom, uz prihvatanje savremenih metoda rada, i stalno obučavanje i usavršavanje poljoprivrednih proizvođača i stručnog kadra u odabranoj proizvodnji su, isto tako, značajne pretpostavke za dalji razvoj poljoprivrede.

Blizina velikih potrošačkih centara kakvi su Podgorica, Nikšić, crnogorsko primorje, uz razvoj turizma, omogućavaju relativno siguran i povoljan plasman poljoprivrednih proizvoda opštine, pogotovo onih koji imaju komparativne prednosti, kao što su rano povrće i voće, mlijeko i mliječni proizvodi, jagnjeće i jareće meso, med, proizvodi od meda i sl. Plasman sopstvenih poljoprivrednih proizvoda preko turizma je „izvoz na pragu“, što je takođe svojevrsan resurs od velikog značaja.

AGRICULTURE AND FOOD INDUSTRY

The municipality has 17,302 ha of arable land. Cca 3,000 farms possess properties of various sizes. Fragmentation of the properties is a limiting factor, but in spite of that, there are a lot of areas for agriculture, considering the character of the relief of the municipality. A favorable sub-Mediterranean climate in Bjelopavlici plain, which makes the major part of the agricultural land of Danilovgrad, characterized by good soil and land potentials, through which the river Zeta runs, and along which ground water suitable for irrigation are laterally placed, present very favorable resources for agricultural development. The peripheral hill areas and plenty of attractive summer pastures in mountainous areas of Sinjavina, Lukavica and Latično are a significant contribution to the abovementioned resources of municipality. Mountain areas are used for the development of livestock breeding, cultivation of potatoes and cereals in limited areas, while rural development is based on the principle of specialized farms.

Infrastructure construction of Bjelopavlici plain areas (transport, electrical, hydro-technical infrastructure) has enabled the development of production facilities (farms, greenhouses, orchards, vineyards, fish ponds etc.) as well as processing plants (dairies, bakeries, mills, plants for coffee processing and beverage production, confectionery, pasta, herbs, spices, etc.), which indicate the further opportunities for agricultural development of the municipality.

Relatively satisfactory agricultural areas, structure of the various cultivated plant species in fruit and vegetable growing, the size of livestock and poultry, the long tradition of agriculture, with the adoption of modern work methods and continuous training of agricultural producers and professional staff in selected production are also important preconditions for further development of agriculture.

The vicinity to major consumer centers such as Podgorica, Nikšić, Montenegro coast, along with the development of tourism provide a relatively safe and convenient placement of agricultural products of municipality, especially those which have a competitive advantages, such as early vegetables and fruits, milk and dairy products, meat of lamb and kid, honey, honey products etc. The placement of one's own agricultural products through tourism is "export at the threshold", which is also a resource of great importance.

Ratarstvo - povrtlarstvo

Klimatski uslovi i relativno velike površine plodnog zemljišta doprinjeli su da se dolina Zete vjekovima smatrala žitnicom Crne Gore. Danas se na ovom prostoru od strnih žitarica gaje pšenica, ječam, kukuruz, vrlo malo raž. Rod se uglavnom koristi za ishranu vlastite stoke, a veoma male količine se plasiraju na tržište. U posljednjih nekoliko godina pod kukuruzom se nalazi od 40 do 50 ha obradivog zemljišta. Radi se o hibridima žutog i bijelog kukuruza i o domaćem bijelom kukuruzu. Veće površine domaćeg bijelog kukuruza nalaze se na području Kujave, Dobrog Polja i Viša u blizini rijeke Zete. Na ovom području postoje znatno veće površine koje treba iskoristiti u većoj mjeri. Od ostalih ratarskih kultura na najvećim površinama je zastupljena lucerka i ta se površina kreće od 60-80 ha.

Razvojne šanse za ratarstvo:

U budućnosti razvoj ratarske proizvodnje upravo bi trebalo usmjeriti na uzgoj kukuruza (ustaliti na oko 500 ha uz organsku proizvodnju) namijenjenog za proizvodnju kukuruznog brašna, kao i kukuruza namijenjenog za tzv. pečenjake. Raž, ječam i heljdu treba takođe gajiti tehnologijom organske proizvodnje na osrednje plodnim zemljištima, u ukupnoj površini od 100 ha. Biomasa stvorena ovom proizvodnjom treba se kombinovati sa biomasom drugih opština u Crnoj Gori, s obzirom na relativno skromnu proizvodnju. Potrebno je proučiti mogućnost popune korišćenja biomase sa deponijom u Podgorici.

U periodu do I svjetskog rata povrtarstvo u opštini Danilovgrad nije bilo ni približno razvijeno kao ratarstvo. Najviše su se za sopstvene potrebe gajili pasulj i krompir, a od ostalog povrća gajio se luk, blitva, cvekla i kupus (uglavnom raštan). Procentualno učešće ovih kultura u ukupnoj proizvodnji u Crnoj Gori u 2010. god. (0,78 % i 0,46 %), su ubjedljiv pokazatelj ove proizvodnje ako se ona uporedi sa učešćem obradivih površina opštine od 4,31 % u ukupnim obradivim površinama u Crnoj Gori.

Posljednjih desetak godina tj. od formiranja udruženja uzgajivača povrća u zatvorenom prostoru (udruženje „Plasteničara“) počinje veća i organizovanija proizvodnja povrća u opštini Danilovgrad. Danas se pod plastenicima nalazi oko 80.000 m² što čini 1/3 ukupne plasteničke proizvodnje povrća u Crnoj Gori. Najviše se gaji paprika (60 %), krastavac (25 %), paradajz (10 %) i

Crop husbandry– vegetable growing

Thanks to climate conditions and relatively large areas of fertile land, the valley of Zeta has been considered a granary of Montenegro for centuries. Today, cereal crops such as wheat, barley, corn and very little rye are grown in this area. The crop is used for feeding the livestock and a very small amount is placed on the market. In the last few years, 40 to 50 hectares of arable land has been cultivated with corn. This is a hybrid of yellow and white corn and domestic white corn. Larger areas of domestic white corn are in Kujava, Dobro Polje and Viš near the river Zeta. There are larger surfaces which need be used to a larger extent. Among the field crops grown in most areas is lucerne and the area ranges from 60-80 ha.

Development opportunities for crop husbandry:

In future, the development of crop production should be focused on the cultivation of corn (at cca 500 ha along with organic production) intended for the production of corn-flour and corn intended "pečenjak" (type of roast corn on the cob). Rye, barley and buckwheat should be cultivated as well using technology of organic production in moderately fertile soils, in a total area of 100 ha. Biomass made in this production should be combined with biomass of other municipalities in Montenegro, given the relatively modest production. It is necessary to examine the possibility of filling the usage of biomass together with the landfill in Podgorica.

In the period up to the World War I, vegetable growing in Danilovgrad was not nearly developed as crop husbandry. The beans and potato were mostly cultivated for the one's own purposes as well as onions, chard, beet and cabbage (mainly collard greens). The percentage share of these crops in the total production of Montenegro in 2010 (of 0.78% and 0.46%) is persuasive indicator of the production compared with the share of cultivated area in the municipality of 4.31% of the total arable land in Montenegro.

Bigger and more organized vegetable production in the municipality of Danilovgrad has begun in the last ten years, i.e. since establishing the association of greenhouse vegetable growers (Association "Plasteničara"). Today the greenhouses cover the area of cca 80,000 m² which makes 1/3 of the total greenhouse vegetable production in Montenegro. The vegetables which are mostly grown are: pepper (60%), cucumber (25%), tomato (10%) and other vegetables (lettuce, chard, spinach - 5%). Production of peppers and cucumbers in greenhouses is estimated at about 350 t and 100 t of tomato.

ostalo povrće (salata, blitva, spanać - 5 %). Proizvodnja paprike i krastavca u plastenicima se procjenjuje na oko 350 t, a paradajza na 100 t.

Razvojne šanse za povrtlarstvo:

Treba planirati znatno veće obradive zemljišne površine, koje iznose oko 100 ha pod plastenicima i oko 600 ha na otvorenom polju. Proizvodnju povrća treba koncentrisati u dolini rijeke Zete (odmah iza plavne zone) i na onim zemljištima koja imaju siguran i stalan izvor vode za navodnjavanje.

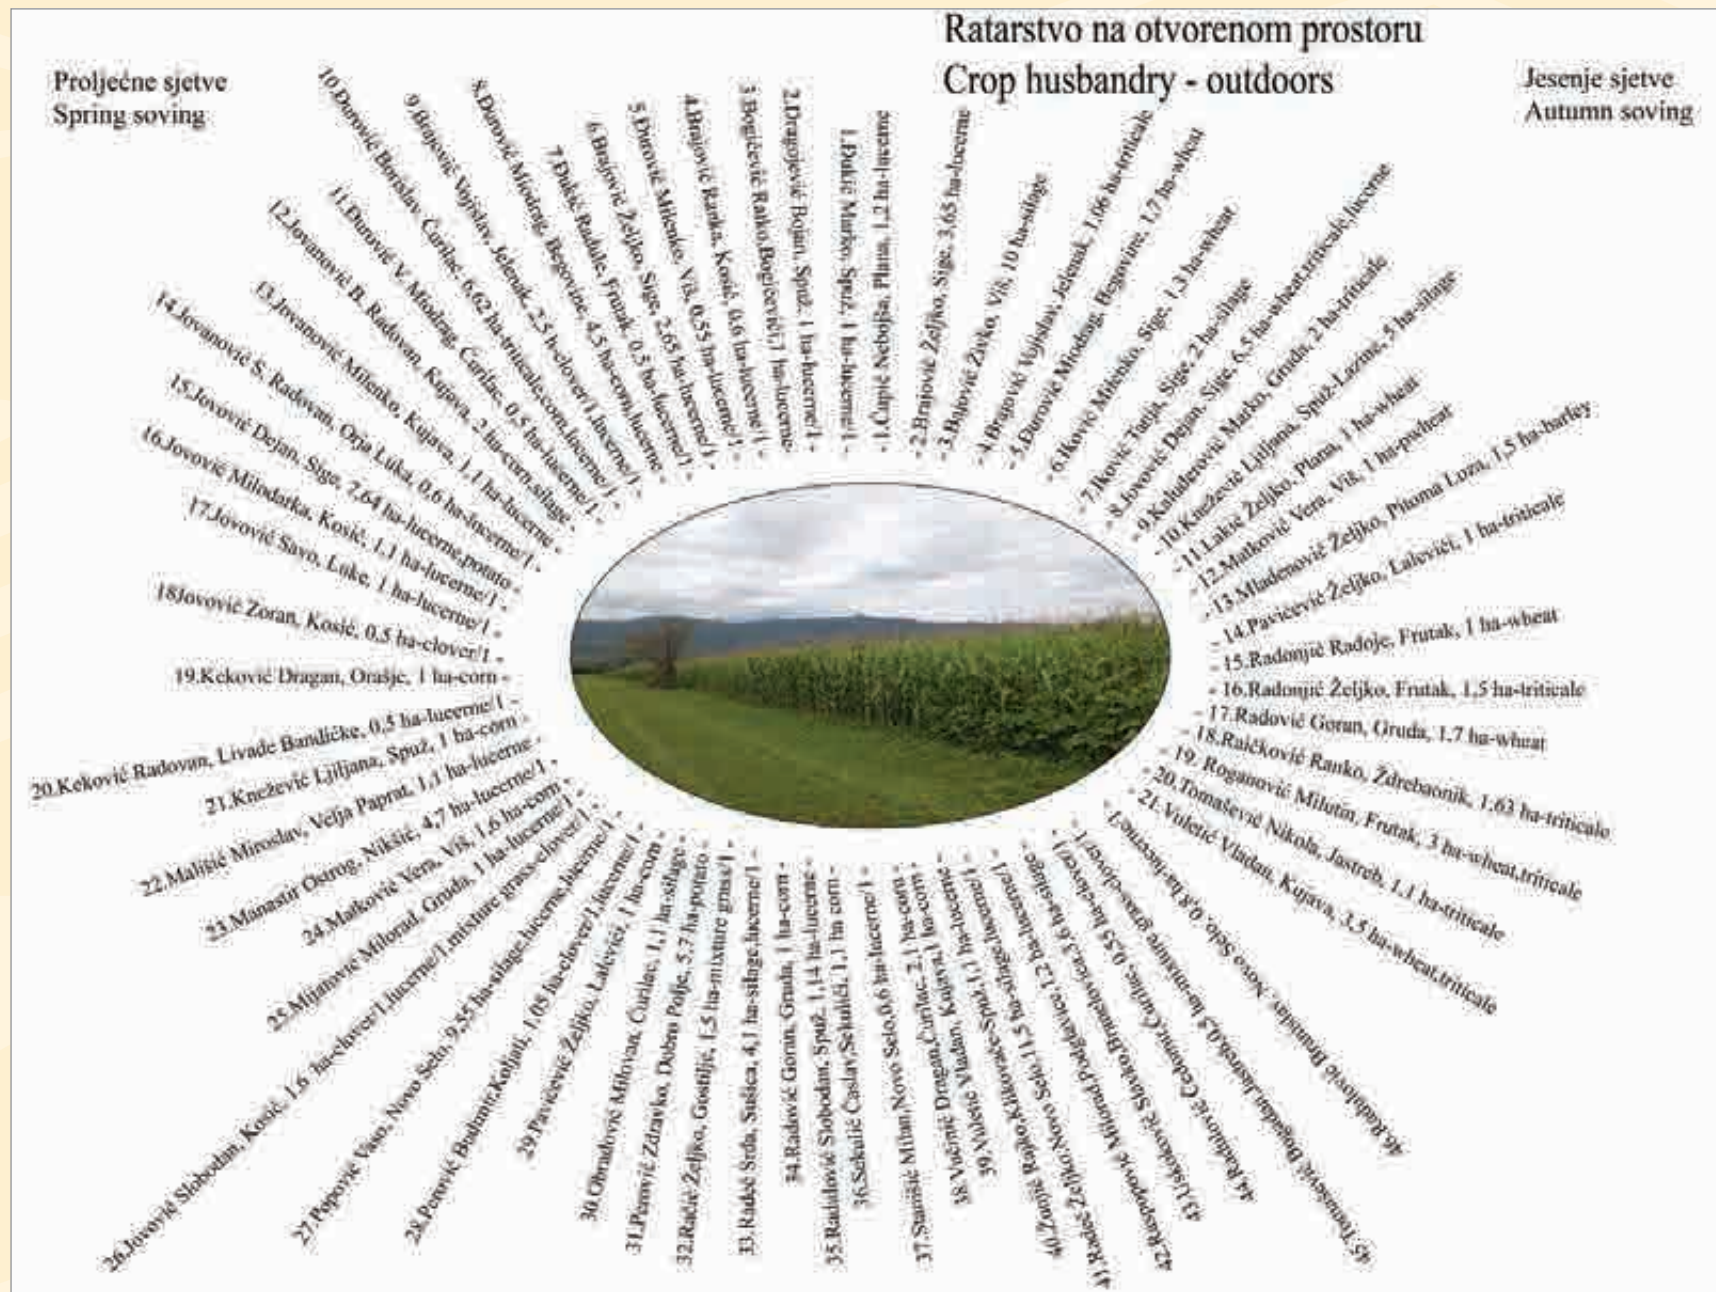

Planinsko ruralno područje
Mountain rural area

Development opportunities for vegetable growing:

Significantly larger arable lands, which amount to cca 100 ha of greenhouses and 600 ha outdoors need to be planned. The production of vegetable needs to be concentrated in the valley of river Zeta (right behind the flooded zone) and in the areas which have the safe and permanent water springs for irrigation.

Bjelopavlička ravnica
Bjelopavlička valley

Najveći proizvođači u zatvorenom prostoru:

Green house Jovović d.o.o. – Preduzeće koje se pored uslužnih djelatnosti bavi i proizvodnjom povrća. Trenutno preduzeće obrađuje 12000 m² pod plastenicima, i 90000 m² na otvorenom prostoru. Godišnja proizvodnja iznosi oko 1000 t. Posjeduju svoju maloprodaju, hladnjače za čuvanje povrća, dostavna vozila i kompletnu mehanizaciju za obradu navedenih površina, sistem za navodnjavanje i građevinske mašine. U okviru kolektiva preduzeća posluje mlađi tim, obučen za izgradnju novih i sanaciju starih plastenika. U okviru firme sprovodi se i obuka i praktična nastava za đake srednje poljoprivredne škole i za studente poljoprivrednog fakulteta. Proizvode i ljekovito i začinsko bilje (mentu, žalfiju, ružmarin, majčinu dušicu, cikoriju, lavandu, celer i dr). U plastenicima postoji i sistem parnog grijanja, kao i sistemi za zaštitu od snijega i mraza. Osnovne kulture, koje se u većim količinama proizvode su: kupus, kelj, brokoli, karfiol, keleraba, krompir, paprika, paradajz, jabučar, šeri paradajz, krastavac, blitva, zelena salata, spanać, rukola, šargarepa, kukuruz, luk, boranija i dr. Takođe, preduzeće posjeduje i farmu svinja.

Brajović Božidar – Budo, oficir u penziji koji se bavi poljoprivredom više od 20 godina u selu Jelenak, na površini od oko 4 ha. U proizvodnji povrća i plateničkoj proizvodnji bio je rekorder Crne Gore za 2004. godinu. Proizvodi gotovo sve vrste sadnica povrća i to oko 200 hiljada komada na godišnjem nivou. U rasadniku voća proizvodi kontejnerske sadnice jagoda, malina, kupina, aronija, godži berija, smokava, drenjina i divljeg šipka, kom je posvećena posebna pažnja. Proizvodi sok i pekmez od divljeg šipka i drijena, sa namjerom da u narednom periodu otvori u Jelenku otkupni centar, gdje bi se plodovi ovih biljaka u većim količinama prerađivali i plasirali na tržište Crne Gore. Za 2014. godinu dobitnik je nagrada Ministarstva poljoprivrede i ruralnog razvoja i TO Podgorice za očuvanje domaćih resursa.

Vujošević Ratko je proizvođač koji posjeduje plastenike na površini od 3000 m² u Veljoj Paprati u Danilovgradu. Plateničkom proizvodnjom bavi se od 1990. godine, a proizvodi sve vrste povrća i rasada. Posljednjih nekoliko godina na površini od 2000 m² započeo je proizvodnju vučjih bobica, a takođe je započeo i proizvodnju rasada voća, egzotičnih biljaka i lončanica.

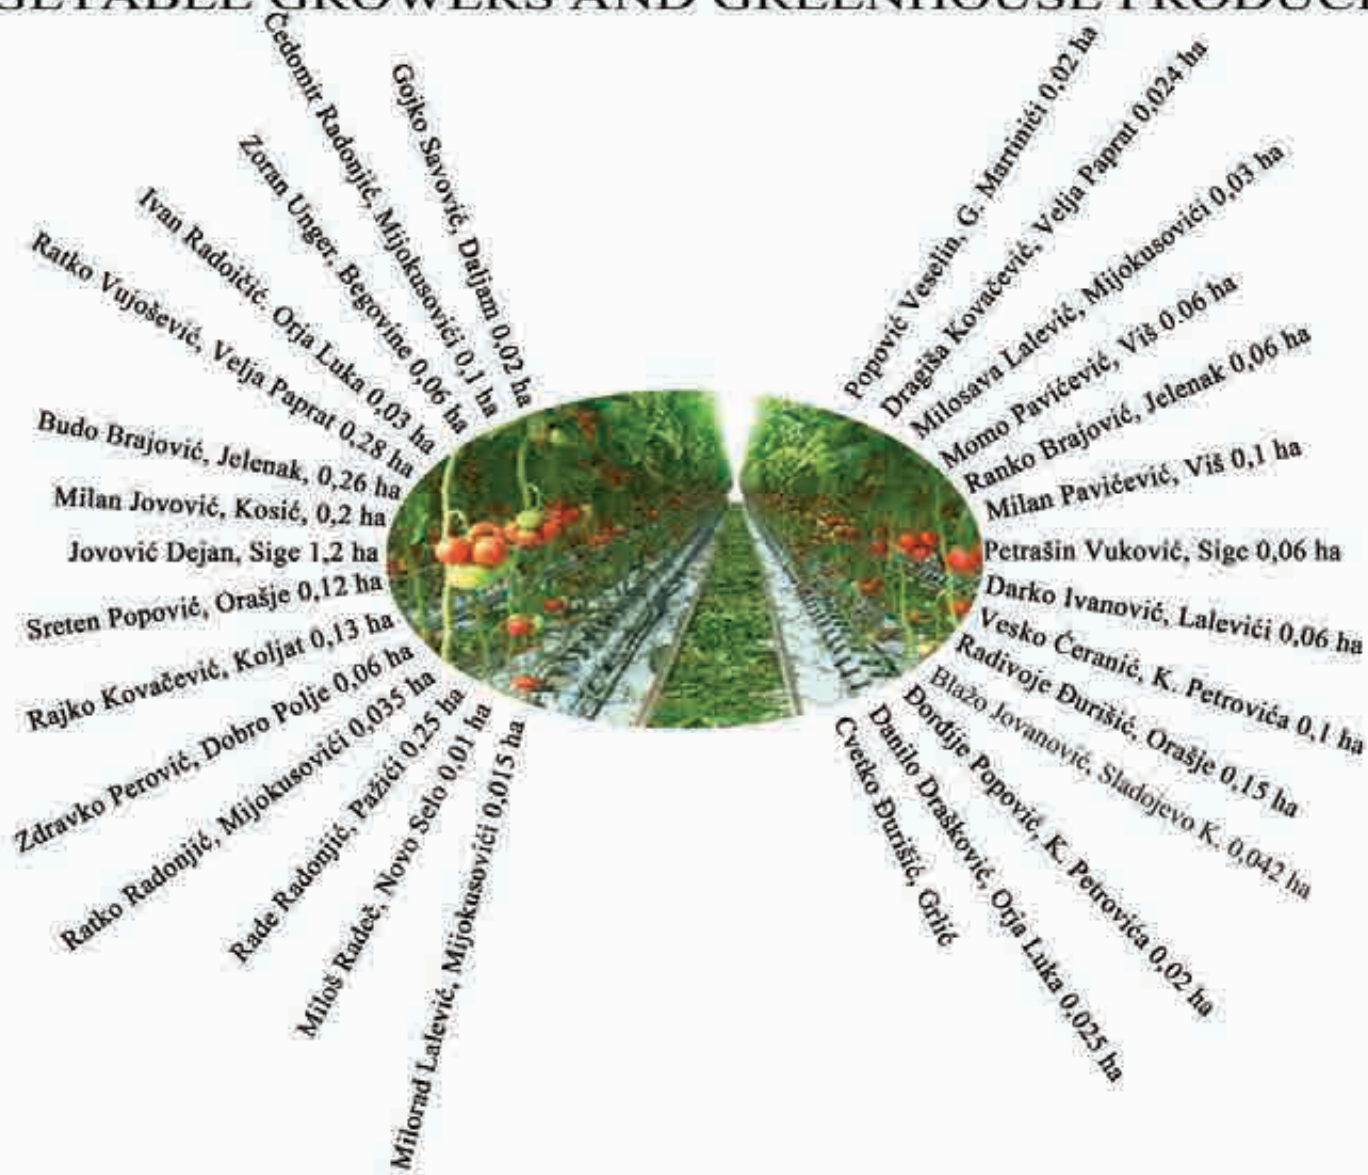

The biggest greenhouse producers are as follows:

Green house Jovovic Ltd. – In addition to providing service activities, the company is engaged in the production of vegetables as well. Currently the company is cultivating 12,000 m² in greenhouses, and 90,000 m² outdoors. Annual production is cca 1,000 t. It possesses its own retail trade, refrigerators for storing vegetables, delivery vehicles and whole machinery for processing the areas, irrigation systems and construction machinery. A young team, trained for construction of greenhouses and rehabilitation of the old ones works in the company. The company performs the teaching and training for students of secondary schools and Faculties of Agriculture. It produces medicinal herbs and spices as well (mint, sage, rosemary, thyme, chicory, lavender, celery, etc.). In the greenhouses there is also a system of steam heating, as well as systems for protection from snow and frost. The main crops, which are produced in large quantities include: cabbage, kale, broccoli, cauliflower, kohlrabi, potato, pepper, tomato, jabučar, cherry tomato, cucumber, chard, lettuce, spinach, arugula, carrots, corn, onions, green beans etc. The company owns a pig farm as well.

Brajović Božidar – Budo, a retired officer who has been engaged in agriculture for more than 20 years in the village Jelenak, in the area of cca 4 hectares. He was a champion of Montenegro in vegetable and greenhouse production in 2004. He produces almost all types of vegetable seedlings and cca 200 thousand pieces annually. In the nursery of fruit he produces container seedlings of strawberries, raspberries, blackberries, aronia, wolfberry, figs, cornel-berry as well as pomegranate, which was given a special attention to. He produces pomegranate and cornel-berry juice and jam in order to establish the purchasing center in Jelenak in the forthcoming period, where the larger quantities of fruits of these plants would be processed and placed in the market of Montenegro. He is the 2014 winner of the Prize of the Ministry of Agriculture and Rural Development and Tourism Organization Podgorica for the preservation of local resources.

Vujošević Ratko is a manufacturer who owns greenhouses in the area of over 3000 m² in Velja Paprat in Danilovgrad. He has been engaged in greenhouse production since 1990. He produces all kinds of fruits and vegetables. In the last few years he has began the production of wolfberries as well as the production of seedlings of fruit, exotic plants and pot plants in an area of 2000 m².

UZGAJIVAČI POVRĆA I PLASTENIČARI VEGETABLE GROWERS AND GREENHOUSE PRODUCERS

Radonjić Radojica – Rade – Organizovao proizvodnju na površini od 0,25 ha u zatvorenom prostoru, u Pažićima. Bavi se proizvodnjom rasada povrća, cvijeća, šipka i godži berija. Najviše zastupljene vrste povrća su paradajz, paprika, krastavac, tikvica, lubenica, pipun, plavi patlidžan, kupusnjače, jagode, salata, blitva u najpoznatijim sortama i hibridima. Istovremeno se bavi i proizvodnjom paradajza, paprike, krastavca, boranije i salate na površini od 0,12 ha na otvorenom prostoru.

Radonjić Radojica – Rade – organized the production in the area of 0.25 ha in enclosed space in Pažići. He produces seedlings of vegetable, flowers, pomegranate and wolfberries. The most familiar varieties and hybrids of tomatoes, peppers, cucumbers, zucchini, watermelon, muskmelon, eggplant, cruciferous vegetables, strawberries, lettuce, Swiss chard are the most represented types of vegetables. At the same time he also produces tomatoes, peppers, cucumbers, green beans and lettuce in an area of 0.12 ha outdoors.

Stočarstvo

Stočarstvo, a posebno **govedarstvo** je u ranijim periodima, uz proizvodnju žita, bilo u danilovgradskoj opštini najvažnija grana poljoprivrede, pa i privrede u cjelini. U posljednjih tridesetak godina evidentna je stagnacija u razvoju govedarstva, jer se broj goveda u periodu 1989-2010. godine gotovo prepolovio (pad sa 6.190 na 2.977). Identična situacija je i na nivou Crne Gore, gdje je stagnacija čak izraženija nego u opštini Danilovgrad (pad sa 189.403 na 84.046). I pored povoljnijih zemljišnih resursa, broj krava i steonih junica u periodu 1989-2010. godine opada, čime se smanjuje i baza za povećanje proizvodnje mlijeka u opštini (pad sa 5.409 na 2.932). Međutim, rasni sastav goveda i proizvodnja mlijeka po jednoj kravi, u opštini su bolji od prosjeka za Crnu Goru, ali još uvijek u znatnom zaostatku za razvijenim zemljama.

Ovčarstvo je takođe u ranijim periodima bilo jedno od najznačajnijih stočarskih grana, odmah iza govedarstva. Prema zvaničnim statističkim podacima, broj ovaca u danilovgradskoj opštini u 1989. godini iznosio je 15.126 grla, odnosno 3,10 % fonda ovaca Crne Gore. Danas je taj broj smanjen za nekih 25 %, ali postoji vrlo značajno povećanje u odnosu na period od prije desetak godina.

Razvoj **kozarstva** sve više dobija na značaju kako za proizvodnju mlijeka i mliječnih proizvoda tako i za proizvodnju jarećeg mesa i drugih mesnih proizvoda.

Intenzivni uzgoj **svinja** u opštini Danilovgrad počinje izgradnjom svinjogojske farme „Spuz“ 70-ih godina prošlog vijeka, čiji je projektovani kapacitet bio 10.000 tovljenika. Dosadašnja tradicija gajenja svinja u Crnoj Gori, naročito u danilovgradskoj opštini je bila zasnovana na uzgoju pojedinačnih grla za sopstvene potrebe. Jedino organizovane farme proizvode za tržište. Broj svinja je sa 7.656 u 1989. godini, a zatim 5.964 u 2006. godini opao na samo 326 u 2010. godini. Ovakvo stanje je navelo izvjestan broj proizvođača da se počnu baviti sopstvenom proizvodnjom prasića za tržište, što se i vidi u broju suprasnih krmača u 2010. godini (1.098).

Livestock raising

In the past, livestock raising, especially **cattle breeding** along with the corn production was the most significant branch of agriculture as well as the economy as a whole in Danilovgrad. The stagnation in the development of cattle breeding was obvious in the last thirty years, because the number of cattle in the period 1989-2010 was almost halved (decline from 6,190 to 2,977). The same situation was recorded at the state level, where stagnation was more noticeable than in Danilovgrad (decline from 189,403 to 84,046). Despite the favourable land resources, the number of cows and heifers in calf declined in the period 1989-2010, and thus reducing the base for the increase of milk production in the municipality (decline from 5,409 to 2,932). However, the breed of cattle and milk production per cow in the municipality had been better than the average for Montenegro, but it was still lagging behind the developed countries.

Sheep breeding was also one of the most important branches of livestock raising, just behind cattle breeding in the past. According to official statistics, the number of sheep in the Danilovgrad in 1989 amounted to 15,126 head, or 3.10% of the sheep stock of Montenegro. Today, the number has been reduced by about 25%, but there is a very significant increase in comparison to the period of about ten years ago.

The development of **goat farming** is becoming increasingly important in the production of milk products, as well as for the production of goat meat and other meat products.

Intensive **pig breeding** in Danilovgrad began with the construction of pig farm "Spuz" in 70es of the last century, whose projected capacity was 10,000 stalled hogs. The previous tradition of pig breeding in Montenegro, especially in Danilovgrad was based on the breeding of individual head for own use. Only organized farms produce for the market. The number of pigs in 1989 amounted to 7,656, while in 2006 it was 5,964. It fell to 326 in 2010. This situation has induced a number of manufacturers to begin with their own production of pigs for the market, which was evident in the number of sows in pigs in 2010 (1,098).

Živinarstvo u opštini, kao i u ostalim djelovima Crne Gore, zasnivalo se na domaćoj autohtonoj kokoši relativno male nosivosti. Sistem uzgoja bio je ekstenzivan. Sedamdesetih godina prelaskom na kavezni način držanja koka nosilja počinje se komercijalizovati gajenje kokoši. U danilovgradskoj opštini se tih godina podiže prva velika farma koka nosilja u Crnoj Gori, kapaciteta od 100.000 nosilja, koji je kasnije povećan za još 50.000. Tranzicija privrede, a zatim i ptičji grip, doveli su skoro do potpunog uništenja organizovane živinarske proizvodnje u danilovgradskoj opštini. Međutim, farma koka nosilja u Martinićima dobila je novog vlasnika, koji je započeo njenu obnovu, tako da će ista tokom 2015. godine obnoviti proizvodnju u punom kapacitetu.

Razvojne šanse

Stočarstvo treba razvijati u ravničarskom i u brdsko-planinskom dijelu opštine. To se prvenstveno odnosi na tradicionalne grane stočarstva (govedarstvo, ovčarstvo, kozarstvo, pčelarstvo) dok svinjarstvo, živinarstvo i netradicionalne grane treba više vezati za ravnice i rijeku Zetu. U području ravnice trebalo bi forsirati proizvodnju mlijeka. U brdsko-kraškom području gajiti govečad kombinovanih proizvodnih svojstava (mlijeko-meso). Ovčarstvo se može razvijati kako u ravničarskom, tako i u brdskom području opštine. Uzgoj bazirati na držanju ovaca tokom zime u selu, a tokom ljeta na katunima. Kozarstvo treba forsirati u brdsko-kraškom dijelu opštine, gdje koza može koristiti brst i pašu bolje od drugih vrsta stoke. Takođe, svinjarstvu treba posvetiti adekvatnu pažnju, kako bi opština i dalje bila lider te proizvodnje u Crnoj Gori.

Poultry in the municipality, as well as in other parts of Montenegro, was based on domestic, local chickens with relatively small egg-laying ability. The system of breeding was extensive. In the seventies the transition to the cage system of keeping hens led to commercializing the growing of chickens. In that period, the first large hen farm in Montenegro was established, with the capacity of 100,000 hens. Later it increased by another 50,000. The transition of the economy, and then the bird flu led to almost complete destruction of the organized poultry production in Danilovgrad. However, hen farm in Martinici has got a new owner, who has begun the reconstruction, so the production will be renewed at full capacity during 2015.

Development opportunities

Livestock breeding needs to be promoted in plain and mountainous areas in the municipality. This primarily refers to the traditional branches of livestock breeding (cattle, sheep, goat breeding, beekeeping), while the pig and poultry breeding and non-traditional sectors needs to be more related to the plains and river Zeta. The milk production needs to be imposed in the plains. The cattle of combined production features (milk-meat) need to be reared in hill-karst area. Sheep breeding can be developed both in the plains and in the mountain area of the municipality. The breeding should be based on keeping the sheep during winter in the village, and during summer on pastures. Goat breeding should be imposed into a hill-karst part of the municipality, where the goats can use grass and pasture better than any other livestock. Also, the pig breeding should be given an adequate attention, so the municipality would still be the leader of this production in Montenegro.

Farma magaraca

Addressa: Gradina Martinička, bb

Telefon: 067 245 006

Početakom 2015. godine u Martinićima je otvorena farma magaraca. Prva farma magaraca u Crnoj Gori je osnovana sa ciljem da se ova vrsta sačuva od izumiranja, i da se postepeno poveća njihov broj u Crnoj Gori. Planira se da se farma uskoro otvori i za posjetioce, čim se za to stvore potrebni uslovi. Magareće mlijeko, koje je dobro za bronhitis, astmu, kašalj, alergiju, različite bolesti kože, se sakuplja i prodaje na farmi.

Donkey Farm

Address: Gradina Martinička, bb

Phone number: 067 245 006

The farm of donkeys was founded in Martinići earlier this year. The first donkey farm in Montenegro was established in order to prevent the extinction and gradually increase their number. The plan is also to open farm to the visitors as soon as the conditions are created. The donkey milk, which is a good cure for bronchitis, asthma, cough, allergy, various skin diseases, is collected and sold at the farm.

Pčelarstvo

U vrijeme knjaževine Crne Gore tj. u sklopu prve poljoprivredne škole u Danilovgradu, formiran je prvi ogledni uljanik – pčelinjak u nastavne svrhe. Međutim, **pčelarstvo** ni tada, a ni danas nije razvijeno onoliko koliko to objektivno omogućavaju prirodni uslovi (resursi). Pčelari su organizovani u Udruženje pčelara koje broji oko 80 pčelara sa oko 3000 košnica pčela, a prosječan prinos po košnici je oko 10 kg meda. Kompletna proizvodnja se realizuje na domaćem tržištu.

Razvojne šanse:

U ovoj oblasti neophodno bi bilo raditi na popularizaciji pčelarstva i uvođenju novih, savremenijih metoda gajenja pčela. Potrebno je zasnivanje novih pčelinjaka i nabavka repromaterijala (savremenih košnica, matica, pčelarske opreme i sl.) uz specijalizaciju proizvodnje i pregonsko pašarenje. Pažnju treba usmjeriti i na unaprjeđenje organizacije otkupa meda i drugih pčelinjih proizvoda, poboljšati asortiman i pakovanje meda po zahtjevu tržišta, naročito po zahtjevu turističko-ugostiteljske privrede.

Beekeeping

At the time of the Principality of Montenegro ie. under the first agricultural school in Danilovgrad, the first experimental beehive - apiary for teaching purposes was established. However, neither then nor today beekeeping has not been developed as much as natural conditions (resources) allow it. Beekeepers have set up a Beekeeper Association, which gathers cca 80 of them with cca 3,000 beehives and their average yield per hive is about 10 kg of honey. The entire production is realized in the domestic market.

Development opportunities:

In this field, it would be necessary to work on popularisation of beekeeping and the introduction of new, modern methods of bee breeding. It is necessary to found a new apiary and purchase raw materials (modern beehives, nucs, beekeeping equipment, etc.) along with the production specialization and driving bees to pastures. Attention should be focused on improving the organization's purchase of honey and other bee products, the product range and packaging of honey according to the request of the markets, especially the tourism and hospitality sector.

Kuća Meda - U julu 2015. godine otvorena je „Kuća meda“, centar za razvoj i afirmaciju pčelarstva u Crnoj Gori. Ovaj objekat će biti od velikog značaja za razvoj pčelarstva u Crnoj Gori, jer će to biti mjesto gdje će se vršiti otkup, pakovanje i distribucija meda i svih pčelinjih proizvoda, kao i obuka ljudi koji će se baviti pčelarstvom i obuka studenata Poljoprivrednog fakulteta. Opština Danilovgrad je za izgradnju „Kuće meda“ donirala zemljište površine 1162 m², a sam objekat će biti površine 625 m², sačinjen od tri proizvodna pogona, pratećeg skladišnog i prodajnog prostora, hale za sterilizaciju i proizvodnju voska, prostorije za pakovanje meda, kancelarija za zaposlene i učionica kapaciteta 100 mjesta. Kroz izgradnju „Kuće meda“ će se omogućiti da se preko 2300 porodica, koje se bave pčelarstvom u Crnoj Gori, ujedine i povežu, i na taj način će se pomoći uzdizanju pčelarstva u Crnoj Gori na zavidan nivo.

House of Honey – In July 2015 „House of honey“, center for development and promotion of apiculture in Montenegro, was opened. This institution is of great importance for the development of beekeeping in Montenegro, as this will be the place where the purchase, packaging and distribution of honey and bee products will be carried out. “House of Honey” will also provide training of people who will be engaged in beekeeping as well as students of Faculty of Agriculture. For the construction of the “House of Honey” the Municipality of Danilovgrad donated an area of 1162 m². The facility will cover the area of 625 m², it will be made up of three production plants, additional storage and retail space, a hall for sterilization and the production of wax, honey packing rooms, offices for employees and 100-seats classroom. The construction of the “House of Honey” will provide an opportunity for more than 2,300 families to be engaged in beekeeping in Montenegro, to join hands and establish contacts, and thus help elevate beekeeping in Montenegro to an enviable level.

Prima - vet d.o.o. je prva privatna veterinarska ambulanta u Crnoj Gori. Pružaju usluge zdravstvene zaštite životinja uz rutinsku upotrebu savremene dijagnostičke i laboratorijske opreme, kao i terapijske procedure po uzoru na zemlje sa veoma razvijenim stočarstvom. Bave se organizacijom edukacija veterinara i farmera, radi unaprjeđenja stručnosti u radu, kao i poboljšanja uslova i rezultata u proizvodnji kod farmuskog načina držanja životinja.

Prima - vet Ltd. is the first private veterinary facility in Montenegro. It provides health care of the animals with the routine use of modern diagnostic and laboratory equipment, as well as therapeutic procedures modelled on countries with highly developed livestock raising. It organizes training of veterinarians and farmers, in order to improve professionalism as well as the conditions and results of the production of farm rearing animals.

Voćarstvo i vinogradarstvo

Opština Danilovgrad (Bjelopavlička ravnica) je oduvijek imala povoljne uslove za gajenje različitih voćnih vrsta (kontinentalnog i mediteranskog), ali se ono nikada nije razvilo kao ratarstvo nekada ili povrtarstvo posljednjih nekoliko godina. Danas u Crnoj Gori ima oko 9.700 ha pod voćem, od čega procentualno učešće voćarstva opštine Danilovgrad iznosi 2,73 %. Na teritoriji opštine Danilovgrad najčešće se od voća gaji jabuka, kruška i višnja, a pored ovih vrsta tu su još i pitomi nar (šipak), jagoda, kesten, japanska jabuka, iglica, malina, kupina i manji broj stabala maslina i mandarina.

Razvojne šanse za voćarstvo:

Moguće je da se na oko 400 ha plavnih površina uz samu obalu rijeke Zete (50 do 100 m udaljenosti od rijeke), u ljetnjem periodu zasade isključivo zimske sorte jabuke za biološko voćarstvo. Za ostale voćne vrste (kruška, dunja, šljiva, trešnja, višnja, breskva, kajsija, smokva, šipak, kivi, orah, lješnik, jagodasto voće i dr.) treba isplanirati novu površinu od 240 ha na boljim zemljištima. Danilovgradska opština ima povoljne uslove za razvoj divljeg nara i lješnika. Nar treba širiti po goletima i kamenitim terenima, a lješnik plantažnim putem na obradivom zemljištu. Mnoge od ovih sorti zahtijevaju tretman pesticidima, a potrebno je u odabiru orijentisati se na otporne vrste, kao što su dunja, kruška, smokva.

Gajenje vinove loze na području opštine Danilovgrad je veoma staro, a jedan češki putopisac je napisao 1891. godine da korito rijeke Zete i Bjelopavlička župa daju vino koje je uz Crmničko pravi delikates. Bjelopavlička ravnica nije prepoznatljiva po proizvodnji grožđa i vina, a podatak iz 2010. godine jeste da postoji 444.850 čokota vinove loze na površini od oko 225 ha. Posljednjih nekoliko godina ova proizvodnja lagano raste, a prinos po čokotu od 3,35kg u odnosu na prosjek Crne Gore (2,40 kg) ukazuje i na intenzivniji način gajenja.

Razvojne šanse za vinogradarstvo:

Za vinogradarstvo najbolje uslove imaju tereni po obodu ravnice, na 200 do 400 m nadmorske visine, dok su u ravnici jedino šljunkovita i pjeskovita zemljišta pogodna za vinovu lozu. Na mjestima gdje se može obezbijediti normalno navodnjavanje treba planirati gajenje stonog grožđa, a na ostalim površinama vinskog. Za vinograde predvidjeti 350 ha za vinske i 50 ha za stone sorte. Treba gajiti sorte vinove loze za crno vino: Vranac, Kratošija i Merlo, a za bijelo vino: Šardone, Savinjon, Rkaciteli. Za stono grožđe treba gajiti: Kardinal, Afuz-ali, Lasta i Moldava. Pojedine kulture kroz manifestacioni turizam mogu predstavljati turistički motiv.

Fruit and vine-growing

Danilovgrad Municipality (Bjelopavlici plain) has always had favourable conditions for growing various fruits (continental and Mediterranean), but it has never been developed as a crop husbandry or vegetable growing in recent years. Today the fruit is grown in the area of cca 9,700 ha, of which a share of fruit-growing in Danilovgrad is estimated at 2.73%. The commonly grown fruit in the municipality include apple, pear and cherry, as well as pomegranate, strawberry, chestnut, Japanese persimmon, jujube, raspberries, blackberries and a small number of olive trees and tangerine.

Development opportunities for fruit-growing:

There is a possibility to plant only winter apple varieties for organic fruit growing in some 400 ha of flooded area along the riverbanks of Zeta (50 to 100 meters from the river) in summer. A new area of 240 ha on better plot should be planned in order to grow other types of fruit (pear, quince, plum, sweet and sour cherry, peach, apricot, fig, pomegranate, kiwi, walnut, hazelnut, berries, etc.) Danilovgrad has favourable conditions for the growing pomegranate and hazelnuts. The pomegranate should be grown in barren mountains and rocky terrain, while hazelnut should be grown in plantations on arable land. Many of these varieties require pesticide treatment, and when making a selection it is necessary to focus on the hardy species, such as quince, pear, fig.

Vine-growing in Danilovgrad is very old. In 1891 a Czech traveller wrote that wine produced in the riverbed of Zeta and District of Bjelopavlici, along with the wine from Crmnica was considered a real delicacy. Bjelopavlici plain was not only distinguished by the grape and wine production. According to the data from 2010, there were 444,850 vine stocks in the area of cca 225 ha. During the past few years, the production has increased slightly, and the yield per vine of 3.35 kg, compared to an average of Montenegro (2.40kg), points to the intensive way of growing.

Development opportunities for vine- growing:

The areas in the circumferential plain at 200 to 400 m above sea level provide the best conditions for vine-growing. On the other hand, only gravel and sandy areas in the plain are suitable for wine grapes. The table grape should be grown in the areas where normal irrigation could be provided, while wine-grapes should be cultivated in other areas. Vineyards should be provided with 350ha of wine and 50ha of table grapes. The wine-grape varieties which needs to be grown include: Vranac, Kratošija and Merlo for red wine and for white wine: Šardone, Savinjon, Rkaciteli. In order to produce table grapes, the varieties which need to be grown are: Kardinal, Afuz-ali, Lasta and Moldava. Specific crops may represent tourism motive through cultural and artistic events.

Od kupovine Farme koka nosilja u Martinićima u decembru 2014. godine, firma Agromont d.o.o. Nikšić je u rekonstrukciju objekata i kupovinu nove opreme uložila oko 5.500.000,00 eura. Kapacitet farme je 150.000 koka nosilja. Trenutno je u fazi pripremanje objekta za uzgoj koka nosilja, čiji će kapacitet biti 200.000 komada na godišnjem nivou. Namjera firme je da u bliskoj budućnosti proširi kapacitete farme na 200.000 koka nosilja.

Since the acquisition of hens farm in Martinici in December 2014, the company Agromont Ltd Niksic invested about 5.500.000,00 euros in reconstruction of facilities and purchase of new equipment. The farm's capacity is 150.000 hens. It is currently adapting facilities for breeding of hens, whose capacity will be 200.000 pieces annually. The company's intention is to expand the capacities of the farm to 200,000 hens in the near future.

Fabrika stočne hrane AD Spuž

“Fabrika stočne hrane” AD Spuž je u vlasništvu firmi “Nikšićki mlin” AD i “Agromont” d.o.o. Od fabrike koja nije radila deset godina, za veoma kratak period napravljena je savremena fabrika sa svim standardima koji danas postoje na tržištu Evropske unije. Proizvodni program nudi kupcima najkvalitetnije kompletne krmne smješe i vitaminsko-mineralne predsmješe za sve vrste i kategorije domaćih životinja. Kvalitet gotovih proizvoda kontroliše se u laboratoriji koja je opremljena najsavremenijom opremom za određivanje kvaliteta smješa, a uvođenje HACCP-sistema osigurava zdravstveno bezbjedne proizvode. Proizvodnja je potpuno automatizovana, što garantuje da smješe sadrže sve potrebne sastojke za kvalitetan uzgoj domaćih životinja, a pored toga obezbjeđena je stručna podrška tehnologa i veterinara. Pored tržišta Crne Gore, koje je svakako primarno, planiran je izvoz proizvoda na tržišta Bosne i Hercegovine, Hrvatske, Albanije.

**Fodder Factory JSC Spuž**

Adresa/Address: Grbe bb, Spuž
Tel/Fax/Phone/Fax: +382 20 818 850

E-mail: komercijalafsh@gmail.com

“Fodder Factory” JSC Spuž is owned by the companies “Nikšićki mlin” JSC and “Agromont” Ltd. From a factory that did not work for ten years, in a very short period, a modern factory was built with all the standards of the European Union market. The production program offers customers the highest quality complete feed formula and vitamin and mineral premixes for all types and categories of domestic animals. The quality of finished products is controlled in a laboratory equipped with modern equipment for determining the quality of the mixture, and the introduction of the HACCP system ensures a health-care product. Production is fully automated, which guarantees that the products contain all the necessary ingredients for the quality breeding of domestic animals, and in addition, expert support from technologists and veterinarians is provided. In addition to the Montenegrin market, which is definitely the primary one, it is planned to export products on the markets of Bosnia and Herzegovina, Croatia, Albania.

Nikšićki mlin AD Nikšić
Područna jedinica Spuž

U novembru 2015. godine "Nikšićki mlin" je kupio mlin "Jastreb" u Spužu. U kompleksu se nalaze silosi kapaciteta 30.000t, magacini i proizvodni pogon za proizvodnju pšeničnog brašna. Po prvobitnoj ideji, kompleks pruža podršku "Nikšićkom mlinu" i "Fabrici stočne hrane" Spuž, u snadbijevanju žitaricama. Kada je ovaj kompleks u pitanju, naša vizija je jasna i konkretna a odnosi se na stvaranje modernog centra za trgovinu žitaricama koji će biti strateški značajan za ekonomiju Crne Gore. Centar za trgovinu žitarica lociran je na izvanrednoj poziciji što mu omogućava otvorenost prema tržištu Albanije, a preko luke Bar i na druga tržišta. U skladu sa zahtjevima tržišta postoji mogućnost i početka prerade u proizvodnim pogonima.

Nikšićki mlin JSC Nikšić

E-mail:office@niksickimlin.com

Web: www.niksickimlin.me

In November 2015, the "Nikšić Mlin" purchased the "Jastreb" mill in Spuž. The complex has silo capacity of 30000t, warehouses and a production plant for the production of wheat flour. According to the original idea, the complex provides support to "Nikšićkom mlinu" and "Fodder factory" in Spuž, the supply of cereals. When this complex is in question, our vision is clear and concrete and it refers to the creation of a modern center for trade in cereals that will be strategically important for the economy of Montenegro. The Center for Grain Trade is located in an extraordinary position that allows it to be open to the Albanian market, and through the ports Bar and other markets. In accordance with market requirements, there is the possibility of starting processing in production.

Šimšić montmilk d.o.o. - Mljekara Lazine

Ova mljekara je prva privatna mljekara u Crnoj Gori, prisutna je na crnogorskom tržištu od 1998. godine i već nekoliko godina predstavlja apsolutnog lidera crnogorskog mljekarstva. Od osnivanja, njeni proizvodi su prepoznati i priznati kao vodeći po kvalitetu u mljekarskoj industriji Crne Gore, a prema istraživanju iz 2012. godine, mljekara Lazine je brend broj jedan u proizvodnji i prodaji mlječnih proizvoda u Crnoj Gori. Tokom 15 godina poslovanja mljekara Lazine kontinuirano radi na unaprjeđenju i praćenju međunarodnih standarda kvaliteta u ovoj oblasti.

Godišnji otkup i prerada mlijeka je oko 7,5 miliona litara. Mlijeko se prikuplja iz Zetsko Bjelopavličkog i sjevernog dijela Crne Gore: Nikšić, Pljevlja, Kolašin, Bijelo Polje i Berane, koji obezbjeđuju otkup mlijeka visokog kvaliteta. Kvalitet proizvoda prepoznat je i potvrđen na brojnim međunarodnim sajmovima, gdje je mljekara Lazine često osvajala najveća priznanja

**Šimšić montmilk Ltd - Dairy Lazine**

Adresa/Address: Lazine bb

Tel/Fax/Phone/Fax: +382 20 815 312, 815 313

E-mail: mljekara.lazine@yahoo.com

Web: www.mljekaralazine.me

This is the first private dairy in Montenegro, it has been operating on Montenegrin market since 1998 and it has been an absolute leader of dairy industry in our country. Since its establishment, its products are distinctive and recognized as a leading in quality in this industry in Montenegro. According to survey conducted in 2012, dairy Lazine is a leading brand in production and sale of dairy products in the state. During 15 years of business operation dairy Lazine has continually been working on promotion of and following international quality standards in this area.

Annual purchase and processing of milk is about 7.5 million liters. The milk is collected from the area of Zetsko-Bjelopavlička plain and northern part of Montenegro: Niksic, Pljevlja, Kolasin, Bijelo Polje, Berane, which provide purchase of high quality milk. Product quality has been recognized and confirmed at numerous international fairs, where dairy Lazine often won the highest awards.

ZZ Čevo d.o.o. - Sirana Katunjanka

Radi i posluje u okviru "ZZ Čevo", Cetinje. Firma počela sa radom 2002. godine na Čevu, novi pogon u Danilovgradu izgrađen je 2011. godine, a počeo sa proizvodnjom u septembru 2012. godine. Pogon je izgrađen po svim standardima, površine je 500 m², opremljen je savremenom opremom za proizvodnju sireva i drugih mliječnih proizvoda. 2013. godine implementiran je HACCP sistem. Osnovna djelatnost preduzeća je proizvodnja sira, i to polutvrdog, tvrdog, dijet sira, zatim surutke, i drugih mliječnih proizvoda. Trenutni kapacitet pogona je 3 000 litara u jednoj smjeni. Sirana raspolaže sopstvenim voznim parkom za otkup mlijeka i dostavu robe. Zapošljava 10 radnika, a trenuno ima 60 kooperanata.

ZZ Čevo Ltd – Cheese Dairy Katunjanka

Adresa/ Address: Grlić b.b. Danilovgrad

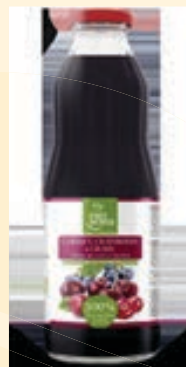

Tel/fax/ Phone/fax : 020/818-060; 067/537-259

E-mail:siranakatunjanka@gmail.com

It operates and does business within the "ZZ Čevo", Cetinje. The company began its operations in 2002 in Čevo, the new plant in Danilovgrad was built in 2011 and its production initiated in September 2012. The plant is built in line with all standards, and covers the area of 500 m². It is supplied with modern equipment for the production of cheese and other dairy products. In 2013 the HACCP system was implemented. The main activity is production of cheese - semi-hard, hard, diet cheese, then whey, and other dairy products. Current plant capacity is 3 000 liters per shift. Dairy has its own motor pool for milk purchase and delivery of goods. It employs 10 workers, and currently has 60 subcontractors.

Fru Monte d.o.o.

Fabrika za preradu voća „Fru monte“ d.o.o. iz Podgorice počela je sa radom 2015. godine, kada je menadžment nakon analize tržišta odlučio da počne sa preradom i proizvodnjom prirodnih svježih sokova. Svježe ubrani i presovani voćni sokovi od nara i borovnice se pakuju u premijum staklenoj ambalaži od 0,75 litara. Kod kupaca je „Fru monte“ d.o.o. prepoznat kao premijum brend koji zaslužuje svako poštovanje jer su svježina i prirodni ukusi voća sa netaknutih predjela Crne Gore nešto što svakog konzumenta dovodi u kontakt sa prirodom. Savremena tehnologija, poštovanje standarda i posvećenost svih zaposlenih – osnove su poslovne filozofije preduzeća, uz slogan upućen kupcima: DOBRODOŠLI U KRALJEVSTVO VOĆA.

Factory for processing of fruits “Fru monte” Ltd from Podgorica started working in 2015, when the management, after market analysis, decided to start processing and producing natural fresh juices. Freshly picked and pressed fruit juices of pomegranate and blueberries are packed in premium glass bottles of 0.75 liters. Customers recognized “Fru Monte” Ltd as a premium brand which deserves all respect, because freshness and natural flavors of fruits from untainted areas of Montenegro are something that brings every consumer in contact with nature. Modern technology, respect for standards and commitment of all employees – is the basis of business philosophy of the company, with the slogan sent to customers: WELCOME TO THE KINGDOM OF FRUIT.

BOMVAS d.o.o. – Kuća zdrave hrane Vodenica

Kompanija "BOMVAS" d.o.o. je osnovana 2010. godine i bavi se veleprodajom i maloprodajom zdrave hrane. Prva prodavnica zdrave hrane "Vodenica" otvorena je 2010. godine u Danilovgradu. Osnovna ideja kompanije je da kupcima pomogne da otkriju, istraže i prihvate zdrav način ishrane, što ih konstantno podstiče da unapređuju i šire poslovanje. Danas u sastavu kompanije posluju četiri maloprodajna objekta, od kojih tri u Podgorici.

U maloprodajnim objektima "Vodenica" može se naći najbolji izbor zdravih namirnica svih vrsta – ljekovitog bilja, čajeva, dijetetskih proizvoda i dr.

Simex rev d.o.o.

"Simex rev" d.o.o. je mala porodična firma, nastala kao nastavak generacijskog bavljenja mesom i mesnim prerađevinama. Nalazi se u Bjelopavlićima, na magistralnom putu Nikšić-Podgorica, gdje se trenutno gradi industrijski pogon za preradu mesa i mesnih prerađevina. Sam pogon treba biti otvoren do 31.10.2017 godine, a radovi se izvode pod pokroviteljstvom projekta Ipad-like 2 koji je podržan od strane Ministarstva poljoprivrede i ruralnog razvoja Crne Gore. Osnovni asortiman budućeg pogona biće: rasečeno meso, poluproizvodi od mesa, proizvodi od mesa tradicionalni suhomesnati proizvodi, čiji proces proizvodnje će biti upotpunjen savremenom tehnologijom, kao i dimljena rebra, dimljena slanina i ostali dimljeni proizvodi, i dr. Osnovna težnja firme biće nabavka sirovina sa domaćeg terena, da bi se potrošačima omogućilo konzumiranje sto zdravijih proizvoda.

Monte Delicius d.o.o. Podgorica
Pogon za preradu mesa u Danilovgradu (u izgradnji)

Preduzeće Monte Delicius je osnovano prije četiri godine i ispočetka je zamišljeno kao zanatska proizvodnja mesnih prerađevina za potrebe manjeg broja restorana i picerija. Međutim, potrebe tržišta kao i napredak u poslovanju doveli su do potrebe širenja proizvodnih kapaciteta, tako da danas preduzeće gradi modernu proizvodnju u opštini Danilovgrad, kapaciteta za oko 100 tona gotovog proizvoda u jednoj smjeni. Završetak radova je predviđen do kraja 2017. godine.

Planira se da se uz postojećih 5 radnika zaposli još toliko, postepeno, kako se bude širio asortiman. Distributeri proizvoda ove kompanije su velika preduzeća poput HD Laković, Bonesa Bar, Sirex, Mega Budva i drugi.

Simex rev Ltd

Adresa/ Address: Grlić bb. Danilovgrad

"Simex rev" d.o.o. is a small family company, formed on a basis of a traditional family business of meat producing and processing. It is located in Bjelopavlici, on the main road Niksic-Podgorica, where an industrial plant for meat processing and meat production is currently being built. The plant should start working by the end of October 2017, and it is being built through Ipad-like 2 project, supported by the Ministry of Agriculture and Rural Development of Montenegro. The basic assortment of the future plant will be: cut meat; semi-finished products from meat, traditionally dried meat products, whose production process will be complemented by modern technology, as well as smoked ribs, smoked bacon and other smoked products etc. The main focus of the company is to supply all the necessary meat and other materials domestically, so that their consumers can get the healthiest products possible.

Monte Delicius Ltd Podgorica
Meat factory in Danilovgrad (under construction)

Adresa/ Address: 10 crnogorske br. 2, Podgorica

Monte Delicius was founded four years ago, and was originally organized as craft production of meat products for the needs of smaller number of restaurants and pizzerias. However, the needs of the market as well as business development created a need for expansion of production capacities, so today the company builds modern production facility in Danilovgrad municipality, with capacity for production of around 100 tons of finished product in one shift. The completion of works is expected by the end of this year.

As they are expanding their assortment, the company's plan is to employ five new workers, in addition to five that are already employed. Distributors of the products are large companies like HD Laković, Bones Bar, Sirex, Mega Budva, and other.

ŠUMARSTVO, DRVOPRERADA I LJEKOVITO BILJE

Šumarstvo

Na teritoriji opštine Danilovgrad, šume i šumsko zemljište obuhvataju 16.394 ha ili 32,72 % ukupne površine opštine. Ukupna drvena zaliha u šumama opštine Danilovgrad je 1.811,473 m³. Bruto drvena masa na području opštine Danilovgrad iznosi 2.174.462 m³. Zastupljene su sledeće vrste: bukva, munika, jela, cer, kao i druge vrste u manjem obimu. Ukupan godišnji sječivi etat u svim šumama u opštini Danilovgrad iznosi 26.909,10 m³ bruto drvene mase. Ukupni sječivi godišnji etat u svim šumama na teritoriji opštine Danilovgrad obračunat je sa 66,9 % od ukupnog zapreminskog prirasta ($26.909,10 \text{ m}^3 : 40.235,70 \text{ m}^3 = 66,9 \%$).

Nije bilo ozbiljnih koncesionara sa ovog područja, već je to činilo privredno društvo "Sava trans" d.o.o., ali je podignuto nekoliko pogona za preradu na bazi drvene mase. To su uglavnom primarne faze, pilane ili pogoni niskog stepena obrade do nivoa kabaste ambalaže. Tu imamo nekoliko subjekata: „Okov“ - Danilovgrad, Pilana „Čakarević“ - Novo Selo, Pilana „Stojanović“ kao i druga privatna lica na nivou stolarskih radionica. Ugradnjom namještaja i drugih vrsta servisa u ovom dijelu bavi se preduzeće „Velco company“ d.o.o. čije je sjedište u Danilovgradu.

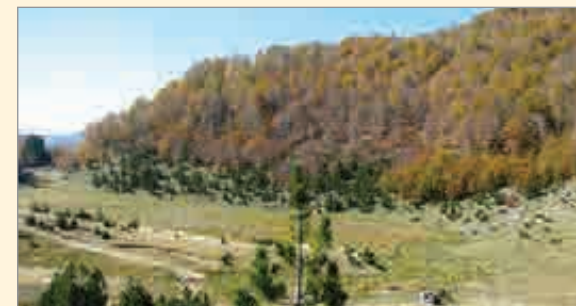

Razvojne šanse: Zbog značajnih drvnih zaliha koje postoje na teritoriji opštine Danilovgrad postoji mogućnost dodatnog otvaranja preduzeća koja bi se bavila preradom drveta.

FORESTRY, WOODPROCESSING AND HERBS

Forestry

Forests and forest land cover 16,394 ha or 32.72% of the total area of municipality. The total timber stock in the forests in Danilovgrad amounts to 1,811,473 m³. Gross timber mass in the municipality amounts to 2,174,462 m³. The following species are included: beech, white-bark pine, fir, bitter oak, as well as other species in smaller amounts. The total annual allowable cut in all forests in the municipality is 26,909.10 m³ gross timber mass. The total annual allowable cut in all forests in the Danilovgrad municipality amounts to 66.9% of the total volume-increment ($26909.10 \text{ m}^3 : 40235.70 \text{ m}^3 = 66.9\%$).

There were no serious concessionaires in this area, but this activity was performed by a company "Sava trans" doo. On the other hand, a number of plants for timber processing were established. These are generally the primary phases, sawmill facilities or low-level processing to the level of bulky packaging. Here we have a few entities: „Okov“ – Danilovgrad, Sawmill „Čakarević“ – Novo Selo, Sawmill „Stojanović“ and other private entities at the level of carpentry workshops. The company "Velco company" d.o.o., whose headquarters is in Danilovgrad, is engaged in furniture fitting and other types of service.

Development opportunities: Due to significant timber stocks, which exist in the municipality, there is a possibility for establishment of additional company which would be engaged in wood processing.

Drvoprerada

Koncesionar – Ugovor o koncesiji za eksploataciju šuma u poslednjih nekoliko godina zaključilo je privredno društvo "Sava trans" d.o.o. Cetinje.

Prerađivači

Preradom drvne mase pretežno u primarnim fazama bave se:

Velco d.o.o., Plana bb, tel 020/883-357

Woodprocessing

The concessionaire - The company "Sava trans" d.o.o. Cetinje concluded the concession contract for the exploitation of forests in recent years.

Wood processing entities

The following companies are engaged in the processing of timber mass mostly in primary phases:

Velco Ltd, Plana bb, phone number: 020/883-357

Firma Velimirović company international – Velco d.o.o. od 2002. godine posluje u Danilovgradu - Plana bb. Njihov proizvodni prostor obuhvata 1800 m² radnog i skladištenog prostora, a bave se uslugama osnovne obrade elemenata od drveta i izradom namještaja, uz korišćenje najsavremenijih mašina. Koriste najmodernije mašine za rezanje i obradu pločastih materijala, najmodernije CNC mašine za rezanje, rezbarenje i izradu nepravilnih oblika, elemenata ili crteža u drvetu i mašine za kantovanje ploča sa predglodalima, što omogućava kvalitet kantovanja koji će zadovoljiti i najzahtjevnije kupce.

Pored toga, preduzeća koja se bave preradom drveta su i:

Farmont MP d.o.o.**Farmont MP Ltd**

Osnovna djelatnost kompanije je proizvodnja i promet lijekova, promet medicinske opreme i medicinskih sredstava, plantažno gajenje kao i otkup i prerada ljekovitog bilja i šumskih plodova. Djelatnost se obavlja u novoizgrađenom poslovnom centru Farmont-a od cca 1000 m² na adresi Kosić b.b. Danilovgrad, sa savremenim distributivnim centrom i sekundarnom proizvodnjom lijekova, za koju je dobijena dozvola za proizvodnju lijekova od Agencije za lijekove i medicinska sredstva Crne Gore (CALIMS). Završen je, takođe, audit od američke firme Alvogen, tako da se sada ulazi u probnu proizvodnju lijekova u okviru koje treba da se dobije GMP sertifikat koji omogućava početak proizvodnje lijekova – 40 lijekova u 5 grupa. Na velikim površinama se takođe plantažno gaji aronija i malina (dvije najveće plantaže u Crnoj Gori). Planirano je plantažno gajenje ljekovitog bilja i šumskih plodova, i njihov otkup i prerada. U završnoj fazi je planiranje i uskoro će se pristupiti realizaciji II faze objekta, koji će biti namijenjen za primarnu proizvodnju lijekova i preradu ljekovitog bilja i šumskih plodova.

The company's main activity is the production and trade of medicines, transport of medical equipment and medical devices, plantation cultivation as well as the purchase and processing of medical plants and forest fruits. The activity is performed in newly built business centre Farmont of cca 1000m² at Kosić bb Danilovgrad, with modern distribution centres and secondary production of drugs for which the license for the production of medicines was obtained from the Agency for Medicines and Medical Devices of Montenegro (CALIMS). The audit by the US Company Alvogen was completed, so now the company begins with the trial production of medicines for which it needs to obtain GMP certificate that allows the beginning of testing production of medicines – 40 medicines in 5 groups. The raspberry and aronia are cultivated at plantations (the two largest plantations in Montenegro). The cultivation of herbs and forest fruits as well as their purchase and processing are included in company's plans. The plan for Phase II of the facility, which will be designed for the primary production of medicines and processing of medicinal plants and forest fruits, is in final stage and soon the impantation will begin.

The company has been engaged in this industry for over 15 years and currently their production amounts to cca 50 t of fresh mushrooms at annual level.

RUDARSTVO

Rudarstvo - AG kamen

Opština Danilovgrad raspolaže sa više vrsta mineralnih sirovina: ukrasni kamen, tehnički građevinski kamen, karbonatna punila u industriji, karbonatna brašna u stočarstvu, crveni boksiti, cementni laporci, gline i laporci za ciglarstvo, gvožđe, grafit i bituminozne stijene. Ekonomsku opravdanost za eksploataciju imaju ukrasni i tehnički kamen, te karbonatna punila i brašna, gline i laporci. Arhitektonsko građevinski (AG) kamen je svakako najznačajniji. Na području opštine identifikovano je za eksploataciju 10 nalazišta: Klikovače, Suk, Đeđezi, Visočica, Maljat, Lalevići, Kriva ploča, Močila, Vinići i Đinova glavica. Svako od ovih nalazišta je specifično po vrsti i kvalitetu kamena. Trenutno se u eksploataciji nalaze Maljat i Visočica. Procijenjene geološke rezerve stijenske mase u ova dva nalazišta kreću se oko 1.200.000 m³.

Razvojne šanse:

S obzirom na broj nalazišta arhitektonsko građevinskog kamena, različitost kvaliteta i pristupačnost za eksploataciju, evidentno je da postoje izvanredne šanse za razvoj biznisa u ovoj oblasti.

Nalazište Visočica i uglačani uzorak kamena sa nalazišta
The site Visočica and the samples of burnished stones

MINING INDUSTRY

Mining industry - Architectural structural stone

There are several types of mineral raw materials in Danilovgrad: decorative stone, technical construction stone, carbonate fillers in the industry, carbonate meal in livestock raising, red bauxite, cement marl, clay and marl for brickmaking industry, iron, graphite and bituminous rocks. The exploitation of decorative and technical stone and carbonate fillers and flour, clay and marl is justified in economic terms. Architectural structural stone is certainly the most important. In the municipality 10 sites for exploitation have been identified: Klikovače, Suk, Đeđezi Visocica, Maljat, Lalevići, Kriva ploča, Močila, Vinići and Đinova glavica. Each of these sites is specific for the type and quality of the stone. Currently Maljat and Visočica are in operation. The geological reserves of rock mass in these two sites are estimated at cca 1.2 million m³.

Development opportunities:

Regarding the number of sites of architectural -structural stone, diversity of quality and accessibility for exploitation, it is evident that there are excellent opportunities for the development of business in this area.

Eksploatacijom i preradom arhitektonsko građevinskog kamena bave se:

AD Mermer Danilovgrad

„Mermer“ AD je najstarije i najveće preduzeće u Crnoj Gori koje se bavi eksploatacijom i obradom kamena. Sa radom je počelo prije više od 50 godina i od male zanatske radionice preraslo u kombinat koji je zapošljavao nekoliko stotina zaposlenih. Kroz svoj istorijat preduzeće je prošlo više organizacionih i vlasničkih transformacija, tako da je danas – akcionarsko društvo sa većinskim stranim kapitalom i sa oko 90 zaposlenih. Trenutno vrši eksploataciju kamena na ležištu Maljat, a apliciralo je za koncesije na još dva ležišta. „Mermer“ ima i sopstvenu fabriku za obradu kamena. Eksploatacija kamena se vrši savremenom opremom i postupcima koji se primjenjuju u sličnim kompanijama u Evropi i svijetu. U Fabrici za obradu postoji sva potrebna oprema za izradu zahtjevnih elemenata od kamena. Kamen iz „Mermer“ je stigao na razne adrese u Evropi, pa i do Kine i Australije i jako je tražen na evropskom tržištu. Kapaciteti proizvodnje su na godišnjem nivou: oko 3500 m³ blokova i 60.000 m² obrađenih gotovih proizvoda.

The following entities are engaged in exploitation and processing of architectural-structural stone:

Joint-stock company Mermer Danilovgrad

Adresa:/ Address : Pažići bb
Email: office@mermer.co.me
www.maljat.me

Joint-stock company „Mermer“ is the oldest and largest company in Montenegro engaged in the exploitation and processing of stone. Its business operation began more than 50 years ago and from a small workshop grew into a conglomerate which employed several hundred people. Throughout its history the company underwent more organizational and ownership transformation, so it is today - a joint stock company with majority foreign capital and with cca 90 employees. It is currently exploiting stone at deposit Maljat, and has applied for a concession on two more deposits. „Mermer“ has its own factory for stone processing. Stone exploitation is carried out with modern equipment and procedures applicable to similar companies in Europe and the world. The factory has all the necessary equipment for making demanding elements of stone. Stone from „Mermer“ has been delivered at various addresses in Europe, as well as in China and Australia and is very popular in European market. Production capacities on an annual basis are: cca 3500 m³ of blocks and 60,000 m² of processed finished products.

Šišković d.o.o.
Društvo za obradu kamena

„Š I Š K O V I Ć“ d.o.o. **DRUŠTVO ZA OBRADU KAMENA**

Porodica Šišković bavi se klesarstvom i obradom kamena više od 100 godina. Nastavljajući porodičnu tradiciju g. Gojko Šišković je 1963. god. u Trebinju osnovao firmu za proizvodnju i preradu kamena, koja i danas uspješno radi pod nazivom "Dragan Šišković" d.o.o. i prerađuje oko 400 kubnih metara sirovine godišnje. Radi povećanja obima proizvodnje, 1994. godine počinje izgradnja još jednog pogona u Danilovgradu. Danas preduzeće "Šišković" u Danilovgradu predstavlja najsavremeniju fabriku za proizvodnju i preradu kamena sa godišnjim kapacitetom 110.000 m². Kompanija "Šišković" se bavi obradom kamena u svim njenim fazama od najjednostavnijih do najsloženijih. Preduzeće raspolaže najsavremenijom opremom i koristi najnovije tehnologije obrade kamena. Preduzeće je locirano u Danilovgradu, gdje se nalazi i majdan.

Family Šišković has been engaged in stone-mason's trade and stone processing for more than 100 years. Continuing the family tradition Mr. Gojko Šišković founded a company for the production and processing of stone in Trebinje in 1963. Today it successfully operates under the name of "Dragan Šišković" d.o.o. and processes about 400 cubic meters of raw material per year. In order to increase the volume of production, the construction of another plant in Danilovgrad began in 1994. Today the company "Šišković" in Danilovgrad is the most modern factory for the production and processing of stone, with an annual capacity of 110,000 m². The company "Šišković" is engaged in the stone processing in all its stages from the simplest to the most complex. The company has modern equipment and uses the latest technologies of stone processing. The company is located in Danilovgrad, where there is a mine.

Preradom arhitektonsko građevinskog kamena bave se i:
MeGran d.o.o.

Fabrika za obradu prirodnog kamena kompanije „MeGran“ nalazi se u neposrednoj blizini kamenoloma mermera Maljat. Fabrika je snabdjevena modernom italijanskom opremom visoke tehnologije, što omogućava izvođenje svih vrsta radova vezanih za obradu prirodnog kamena. Mašine s programskim upravljanjem omogućavaju izvođenje radova uz visoku brzinu i preciznost. Fabrika nudi kompleks radova za rješavanje zadataka oblaganja objekata uz korišćenje prirodnog kamena, kako za spoljašnje, tako i za unutrašnje radove: ploče za oblaganje zidova, podova i fasada; arhitektonsko-građevinske proizvode od kamena, stepeništa, simsove, ploče za ventilirane fasade, kamine, stubove, dekorativne stubove, vijence, mozaik elemente pejzažnog dizajna i gradske arhitekture, fontane, sve ekskluzivne proizvode od granita, mermera i drugog prirodnog kamena po skicama i crtežima klijenta; projektovanje proizvoda po skicama naručioca; razradu proizvoda i dr.

In addition, the following companies are engaged in processing of architectural-structural stone

PRUŽANJE USLUGA

Pružanjem usluga na području opštine Danilovgrad bavi se 185 registrovanih subjekata, od čega su 155 privredna društva a 30 samostalne uslužne radnje. Po obimu posla, veličini subjekta i uspješnosti rada izdvajaju se kao karakteristični sledeći subjekti:

Montenomaks Control & logistics d.o.o.

Kompanija „Montenomaks C&L“ osnovana je 1999. godine, a danas je jedan od lidera u oblasti logistike i špedicije u Crnoj Gori. Od 2017. godine kompanija posluje kao jedna od članica NELT grupe. Sa sjedištem u Danilovgradu, „Montenomaks C&L“ broji 140 zaposlenih, raspoređenih u 12 poslovnica širom Crne Gore, i pruža kompletnu logističku uslugu: od međunarodnog transporta, regulisanja carinskih dokumenata, skladištenja, manipulacije robom, sve do isporuke krajnjem korisniku – putem kompanijske kurirske službe Maksexpress. Investicijom u moderan Distributivno logistički centar, u okviru koga funkcioniše i Carinska ispostava Danilovgrad, uz vrhunski komunikacioni sistem implementiran u njegovo rukovođenje, zaokružena je usluga i omogućena njena prilagodljivost specifičnim korisničkim potrebama. Izgrađen po ugledu na centre evropskih partnera, DLC se prostire na površini od 12.000 m², sa skladišnim prostorom od 3.000 m². Poslovanje kompanije je usklađeno sa zahtjevima međunarodnih standarda ISO 9001:2015, ISO 14001:2015, kao i HACCP sistemom, implementiranom u procese skladištenja i distribucije robe. „Montenomaks C&L“ je ovlašćeni zastupnik kompanije FedEx za Crnu Goru, što, uz individualno članstvo u međunarodnim udruženjima IATA i FIATA, predstavlja svojevrsnu potvrdu kvaliteta usluge.

SERVICE PROVISION

There are 185 registered entities which provide services in the territory of Municipality, of which 155 companies and 30 service trades. According to the volume of work, the size and the efficiency of operation the following subjects are singled out:

Montenomaks Control & logistics Ltd

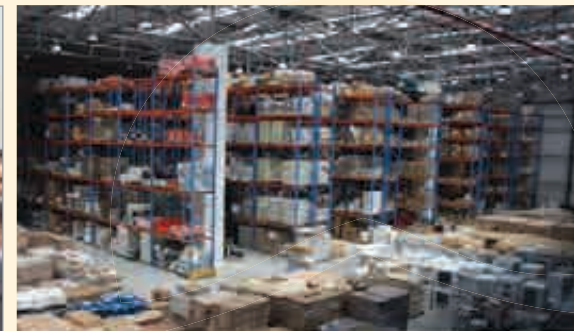

Adresa/ Address: Ćurilac bb

Tel/ Phone : 077/200-001;

E-mail: office@montenomaks.co.me

Web: www.montenomaks.com

The company "Montenomaks C&L" was founded in 1999, and today it is one of the leaders in the field of logistics and freight forwarding in Montenegro. Since 2017 company has been operating as a member of the NELT Group. Headquartered in Danilovgrad, "Montenomaks C&L" has 140 employees, deployed in 12 branches throughout Montenegro, and provides a complete logistics service: from international transport, regulation of customs documents, warehousing, goods manipulation, up to the delivery to the final user - through the company courier service Maksexpress. Investing in a modern Distribution Logistic Center, within which the Danilovgrad Customs Office operates, along with a superb communication system implemented in its management, the service is rounded up, and its adaptability to specific user needs is enabled. Built on the reputation of the centers of European partners, the Distribution Logistics Center covers an area of 12,000 m², with a storage space of 3,000 m². The company's operations are in line with the requirements of the international standards ISO 9001: 2015, ISO 14001: 2015, as well as the HACCP system, implemented in the processes of storage and distribution of goods. "Montenomaks C&L" is an authorized representative of FedEx for Montenegro, which, with individual membership in international associations of IATA and FIATA, represents a kind of confirmation of the quality of the service.

Business offices of four banks operate in this area such as: Crnogorska Komercijalna Banka, Prva banka Crne Gore, Societe generale Montenegro and Hipotekarna banka, as well as microfinancial institution Alter Modus. The development of business is especially supported by Investment and Development Fund of Montenegro.

FORMULA USPJEHA

I Poznavati sebe – SWOT analiza (Snage – Slabosti – Šanse – Prijetnje)

Inkluzivan rast: ljudski resursi;
 Pametan rast: ekonomske aktivnosti i kultura;
 institucionalni kapaciteti i strateški razvojni dokumenti;
 Održiv rast: prirodni resursi;
 osnovna infrastruktura.

II Timovi za pripremu i praćenje strategija, planova i projekata

Paralelan rad na prostorno-urbanističkim i razvojnim planovima.

III Timovi za implementaciju usvojenih projekata

Sprovođenje neophodnih procedura – korak po korak do finala.

IV Monitoring implementacije planova i strategija

Princip transparentnosti – maksimalno uključivanje civilnog sektora.

V Dopunski uslovi

Poznavanje užeg i šireg okruženja; Biti u korak sa napretkom tehnike i tehnologije; Poznavanje standarda i certifikacija.

VI Poželjni koraci u biznisu

Porodični biznis – mali i srednji preduzetnici; Udruženja srodnih biznismena – gransko povezivanje; Klasteri – objedinjavanje znanja i iskustva i zajednički nastupi; Rađanje velikih kompanija.

VII Otklanjanje biznis barijera – uslov za privlačenje investitora

Efikasne institucionalne procedure; Ukupnjavanje zemljišnih posjeda i jasno definisanje imovinskih pitanja; Naknade za komunalije prilagoditi održivosti projekata; Privredne zone učiniti privlačnijim za investiture; Poznavati tržište rada; Iskristiti raspoložive potencijale bivših preduzeća i preduzeća u stečaju.

VIII Stimulacija postojećih i novih investitora

Poreske olakšice; Stimulacije sa nivoa lokalne samouprave.

NAPOMENA: Stručne službe lokalne samouprave uradile su i „Mapu mogućih biznis lokaliteta u opštini Danilovgrad“, koja se nalazi na sajtu opštine (www.danilovgrad.me) i koja će biti od koristi za postojeće i nove investitore.

FORMULA FOR SUCCESS

I To know oneself – SWOT analysis (Strengths – Weaknesses – Opportunities – Threats)

Inclusive growth: human resources;
 Smart growth: economic activities and culture;
 institutional capacities and strategic and development documents;
 Sustainable growth: natural resources;
 basic infrastructure.

II Teams for preparation and monitoring strategies, plans and projects

Parallel activities on spatial and urban and development plans

III Teams for implementation of approved projects

Following the necessary procedures – step by step to the realization.

IV Monitoring the implementation of plans and strategies

Transparency approach – maximum involvement of civil sector.

V Additional conditions

Being familiarized with the immediate and wider environment; Being in step with the progress of technology; Knowing standards and certification.

VI Desirable steps in business

The family business – small and medium sized entrepreneurs; associations of related businessmen – branch networking; clusters – uniting knowledge and experience and joint performance; creating large companies.

VII Removing business barriers – precondition for attracting investors

Efficient institutional procedures; to expand land properties and define property issues clearly; to adjust the utility fees to the sustainability of projects; to make business zones more attractive to investors; to know the labor market; to use available resources of the former and companies in bankruptcy.

VIII Stimulation of existing and new investors

Tax exemption; stimulation by local self-government.

NOTE: „Professional services of the local self-government made „Map of areas suitable for business development“, which is uploaded to the official web site of the Municipality (www.danilovgrad.me) and will be of use for existing and new investors.

Ispravnost formule potvrđuju laureati iz Sarajeva za 2015. godinu

The formula has been confirmed by laureates from Sarajevo for 2015

Na predlog više desetina ranijih dobitnika nagrade, predsjednik Opštine Branislav Đuranović dobio je najviše priznanje u izboru Nezavisne agencije, Evropskog udruženja menadžera i časopisa Euromenadžer - **„NAJPREDSJEDNIK OPŠTINE“** za „izvanredne rezultate u radu i razvoju Opštine, stvaranje povoljnog ambijenta za biznis i otvaranje Danilovgrada prema ekonomskim i ostalim partnerima u Crnoj Gori i regionu“, kako stoji u priznanju.

At the suggestion of dozens of previous award winners, the president of Municipality Branislav Djuranovic received the highest award in the selection of the Independent Agency, European Association of Managers and magazines Euromanager - "the best president of the municipality " for "the outstanding performance in operation and development of the municipality, creating a favorable environment for business and Danilovgrad opening towards the economic and other partners in Montenegro and the region", as it is stated in the award.

Pored predsjednika Opštine Danilovgrad nagradu je dobio i generalni direktor kompanije „Mezon“ Danilovgrad Radomir Kovačević („Najmenadžer i najkompanija u 2015.godini“), koji je vlasnik i direktor kompanije od njenog osnivanja 1992. godine.

Apart from the President of the Municipality, the CEO of "Mezon" Danilovgrad Radomir Kovacevic (**"Manager of the Year and Best Company in 2015"**), who is the owner and director of the company since its founding in 1992 was awarded as well.

LAUREAT IZ SARAJEVA ZA 2016. GODINU

„Montenomaks C&L“ je dobitnik nagrade „Naj menadžer i naj kompanija u 2016. godini“ koja je dodijeljena kompaniji i njenom izvršnom direktoru gospodinu Radovanu Raduloviću od strane Nezavisne agencije Euromenadžer i Evropskog udruženja menadžera.

„Montenomaks C&L“ je dobitnik nagrade Unije poslodavaca Crne Gore za društvenu odgovornost za 2016. godinu u kategoriji „Briga za zaposlene“.

LAUREAT FROM SARAJEVO FOR 2016

„Montenomaks C&L“ is the winner of the award „Best Manager and best Company in 2016“ which is awarded to the company and its Executive Director, Mr. Radovan Radulović, by the Independent Agency Euromanager and the European Association of Managers.

„Montenomaks C&L“ is the winner of the award of the Union of Employers of Montenegro for Social Responsibility for 2016 in the category „Care for employees“.

ZAKLJUČAK

U ovom Vodiču nastojalo se maksimalno prikazati sadašnje stanje resursa, raspoloživih kapaciteta, ali i prostori i dalje mogućnosti za ulaganja na području opštine. Pri tom, poseban akcenat stavljen je na uklanjanje biznis barijera i stvaranje drugih uslova za privlačenje investitora, za nova ulaganja i otvaranje radnih mjesta. Evidentno je da se tokom proteklog perioda broj subjekata mijenjao, novi su registrovani, a dio starih je brisan iz evidencije, ali to nije imalo odraza na ukupan novostvoreni ambijent, koji karakteriše veliki broj aktivnih privrednih društava i preduzetnika, prije svega u oblasti eksploatacije prirodnih resursa. Svi oni aktivno rade na unaprjeđivanju tehnologija i usvajanju evropskih standarda. Takođe, sve više na značaju dobija klusterski pristup organizacije, formiranje udruženja, a od posebnog značaja biće i ukрупnjivanje poljoprivrednih površina. Vrlo intenzivno se krenulo sa korišćenjem kapaciteta bivših preduzeća, koja će imati ne samo opštinski, već i širi regionalni značaj.

Uporedo sa ovim, intenzivno se radi na izradi planskih dokumenata, koji se u ovoj opštini u kontinuitetu nadograđuju, čime se stvaraju šanse za veća ulaganja postojećih privrednih subjekata i za privlačenje novih investitora.

Sve ovo potvrđuje da opština Danilovgrad raspolaže značajnim resursima, koji prevazilaze opštinske granice, te da je u dosadašnjem periodu formiran milje koji garantuje dalju podršku ove opštine i predstavlja garanciju svestranije podrške državnih i evropskih institucija.

Obzirom na broj dodatih subjekata i izvršenih drugih izmjena, što značajno doprinosi kvalitetu dokumenta, sa razlogom se može zaključiti da je opredjeljenje za dopunu postojećeg dokumenta odraz potrebe i stvarnih kretanja u oblasti razvoja biznisa na području opštine Danilovgrad

CONCLUSION

In this guidebook, we tried to present current state of the resources, available capacities, but areas and further opportunities for investment in the municipality as well. In addition, a special emphasis was placed on removing business barriers and creating other conditions for attracting investors, new investments and job creation. It is evident that during this period a number of entities have changed, new ones have been registered, and some old ones have been erased from the register. Nevertheless, it had no impact on their overall newly created environment, which is characterized by a large number of active enterprises and entrepreneurs, primarily in the exploitation of natural resources. All of them are actively working on improving technology and adopting European standards. Also, the cluster approach of an organization, establishing associations are gaining more importance, and a special emphasis will be put on the enlarging of agricultural areas as well. We have started to use the capacities of the former companies which will have not only municipal but also regional importance.

Along with this, we are working intensively on the drawing up planning documents, which are continuously upgraded in the municipality, thus creating opportunities for further investments of existing business entities and attracting new investors.

All these facts confirm that the Danilovgrad has significant resources which go beyond municipal boundaries, and up to now the milieu which guarantees the continued support of the municipality has been formed. It is also a guarantee for more comprehensive support of government and European institutions.

Considering the number of new business entities added and other changes made in the document, and how they significantly contributed to improvement of its quality, it was reasonable to conclude that the decision to revise the existing document was a right thing to do, as it is a reflection of needs and developments in the field of business in the Danilovgrad municipality.
