## Medical terminology – made easy!

In daily healthcare work, communication needs to be quick and clear – and that requires a solid grasp of the right medical terms.

This compact book presents the essential foundations of Latin grammar and medical terminology – in a clear, concise and memorable way. The author provides extensive insight into prefixes, suffixes and word roots related to the body and its diseases.

- What is post-operative hyperparathyroidism?
- What is hyperhidrosis?
- What do prophylaxis, provisional and prolapse have in common?

Bonus: 'The Top 40' exercise section and a 'Short Overview of the Names of Medicinal Plants'.

Who said Latin had to be boring?

**Target group:** Students of pharmacy, medicine, biology, pharmacists, physicians, nursing and healthcare professions

### Microlatinum for Healthcare Professions

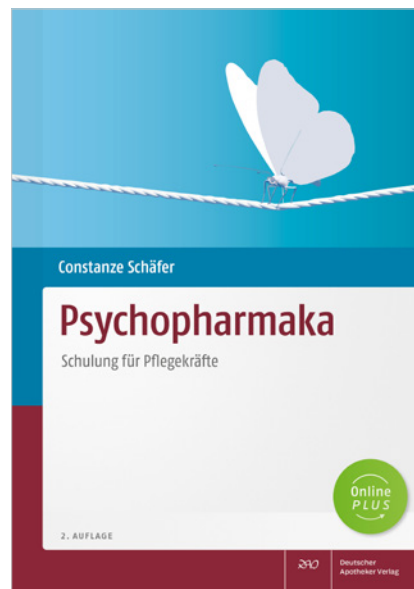

An introduction

by Prof. Dr. A. Kerckhoff

4th revised edition 2025, 140 pages, 27 figures,

format 11.5 x 16.5 cm, softcover, € 14.80 [D]

ISBN 978-3-8047-4367-0

## In moderation and with care

Psychotropic drugs in the elderly carry significant risks of dangerous side effects, such as cognitive impairment, falls and confusion, and their use requires careful evaluation of the patient's condition and concurrent medications. Nursing staff have the best insight here and play a key role in identifying and preventing sometimes serious side effects. This training equips nurses with the basic knowledge they need! Concise, care-focused content featuring key information on common mental illnesses in old age and their treatments. The content covers delirium, unipolar and bipolar depression, schizophrenia, sleep disorders, Parkinson's disease, dementia and epilepsy. Nursing staff should be familiar with typical symptoms and commonly used medications, as understanding side effects and interactions can save lives. The content of the second edition has been updated to reflect current therapeutic guidelines and the latest scientific findings. Now available with a practical brochure (replacing the CD). It includes lecture texts for the 37 training slides. The PowerPoint presentation can be downloaded from [www.Online-PlusBase.de](http://www.Online-PlusBase.de). If needed, it can be customised by the lecturer or home care pharmacy to meet the specific needs of the corresponding nursing facility. A colour-coded system on the slides offers guidance through the drug groups.

**Target group:** Pharmacists, pharmacies supplying nursing homes, physicians, nursing management

### Psychotropic Drugs

Training for nursing staff

by Dr. C. Schäfer

2nd revised and enlarged edition 2025, 42 pages, 14 colour figures, 7 colour tables, format 21 x 29.7 cm, paperback, incl. 37 PowerPoint slides for download at Online-PlusBase, € 39.00 [D], ISBN 978-3-7692-8480-5

## Squaring the circle

Key information for nurses treating elderly and multimorbid patients in pain:

- How does pain manifest and how can it be assessed?
- Which analgesics are used and how are they administered?
- What roles do opioids and cannabis play?
- Which interactions and contraindications must be avoided?

The goal: to raise awareness of optimal pain treatment among nursing staff. The training package includes a brochure with presentation texts for 39 PowerPoint slides, plus a downloadable version of the presentation. All materials can be customised as needed.

**Target group:** Pharmacists, physicians, nursing managers in geriatric care

### Pain treatment in Nursing Care

Training for nursing staff

by Dr. C. Schäfer.

3rd revised and enlarged edition 2025, 44 pages, 18 colour figures, 4 colour tables, format 21 x 29.7 cm, paperback, incl. 39 PowerPoint slides for download at Online-PlusBase, € 39.00 [D]  
ISBN 978-3-7692-8548-2

## Holistic bandaging

By addressing the growing customer demand for naturopathic therapy recommendations, the pharmacy positions itself as a hub for holistic health advice. In this book you will discover:

- the most effective additions to enhance bandaging and pad applications,
- key considerations when selecting the appropriate bandaging materials, and
- how the interplay of stimulus, temperature and time can help alleviate various complaints.

Illustrated step-by-step instructions make it easier to get started with bandaging counselling. The revised 2nd edition has been expanded to cover new areas of application and provide additional insights into medical device law and also features new illustrations.

**Target group:** Pharmacists, pharmacy interns, pharmaceutical technicians, alternative practitioners, nursing staff, midwives and interested laymen

### Wraps and Pads

Guidance, selection and application

by U. Uhlemayr and D. Wolz

2nd revised and enlarged edition 2025, 155 pages, 62 colour figures, 4 tables, format 17 x 24 cm, paperback, € 28.00 [D]  
ISBN 978-3-7692-8033-3

## Normal? Abnormal? Requiring treatment?

Parents often feel uncertain about their children's health. Is the symptom clinically significant or is it completely harmless? Is everything progressing as expected or could there be a developmental disorder? Parents seek guidance not only from paediatricians but also from pharmacists. Here, you can gain insights directly from the author, an experienced paediatrician. He provides valuable insights into common childhood illnesses, developmental disorders and modern therapeutic options. The topics cover everything from nutrition and infant care to the most relevant infections, emergencies and vaccinations in children and adolescents. Here, the balance between conventional medicine and naturopathy is increasingly being explored as a valuable complement.

An indispensable guide for pharmacy professionals seeking to support parents and their children with care and sensitivity.

**Target group:** Pharmacists, pharmaceutical technicians, pharmacy interns, returnees, pharmaceutical technicians in training

### Parents in the Pharmacy

Expert guidance on childhood and adolescent illnesses

by Dr. A. Boeck  
2025, 304 pages, 53 colour figures, 182 tables,  
5 QR codes, format 17 x 24 cm, paperback, € 38.00 [D]  
ISBN 978-3-7692-8124-8

## Toxic truths

This practical and beautifully illustrated handbook features over 50 monographs that provide essential information on identifying characteristics, toxic components, poisoning scenarios, mechanisms of action, clinical symptoms, and the toxicity and toxicology of major plants, animals, fungi, drugs and chemicals.

Information on treatment options and antidotes helps to ensure rapid treatment.

Comparative analyses with similar organisms and substances facilitate recognition and differentiation, helping to prevent confusion.

The work is rounded off with references to pharmacopoeias and notes on analytical methods.

Bonus feature: a quick-reference list of effective antidotes.

**The ultimate guide**

**Target group:** Pharmacists, physicians, toxicologists, laymen

### Poisons and Poisonings

Knowledge, understanding, recognition, action

by S. Buchheim-Schmidt and Dr. R. Schwarzbach,  
in collaboration with Dr. H. Hentschel  
2025, 262 pages, 124 colour figures, 3 colour tables,  
format 13 x 19 cm, softcover, € 29.80 [D]  
ISBN 978-3-8047-4578-0

## The classic reference on medicinal products

For over 50 years, the 'Mutschler' has served students and professionals as a well-founded standard in pharmacology, clinical pharmacology and toxicology. As customary, the 12th edition is clear, practical and evidence-based – featuring new active substances, biologics, drug classes and current guidelines. The indication-based organisation, concise chapter structure and over 1,400 structural formulas furthermore enable a deep understanding of mechanisms of action at the cellular and molecular levels.

The basics of anatomy, physiology, pathophysiology and drug effects are clearly explained within the relevant chapters. The critical evaluation of each substance's therapeutic benefit and side-effect profile supports a well-informed and differentiated approach to the use of medicine.

Didactically well-conceived and supported by numerous illustrations and tables, this work offers a reliable foundation for clinical practice, professional training and study – with comprehensive coverage of the examination material for the medical and pharmaceutical state examinations.

The 'Mutschler' is for anyone who not only uses medicines, but also seeks to understand them.

**Target group:** Students of medicine, pharmacy, dentistry, biology, biochemistry, chemistry, molecular medicine, medical computing and psychology as well as physicians, particularly in general practice and internal medicine, pharmacists, dentists, biologists, biochemists and chemists

### Mutschler's Drug Actions

Pharmacology – clinical pharmacology – toxicology

by Prof. Dr. Dr. G. Geisslinger, Prof. Dr. T. Gudermann, Prof. Dr. B. Hinz, Prof. Dr. A. Kannt, Prof. Dr. P. Ruth and Prof. Dr. U. Storch

12th completely revised edition 2025, 1,484 pages, 718 colour figures, over 1,400 structural formulas, 322 colour tables, format 19.3 x 27 cm, hardcover, € 96.00 [D], prepublication price valid until 31.12.2025: € 76.00 [D]  
ISBN 978-3-8047-4506-3

## Is everything OK?

Laboratory parameters often evoke strong emotions. Many people are familiar with the anxiety of awaiting blood test results or the pride of showcasing perfect results from their last check-up. However, laboratory parameters are just puzzle pieces in diagnosis and therapy. The most critical factor is accurately interpreting them within the clinical context. The necessary know-how can be found here:

- practical, concise schematic diagram for the evaluation of laboratory values
- systematic grouping into diagnostic fields
- details on function and standard values
- references to disruptive factors and practical tips

New in the 5th edition: Information on laboratory pathways from the National Association of Statutory Health Insurance Physicians (KBV), Alzheimer's diagnostics, blood tests for early cancer detection, molecular pathological biomarkers and other current topics.

This book offers a solid knowledge base for all healthcare professionals – ensuring excellent advice and patient care!

**Target group:** Pharmacists, pharmaceutical technicians, nursing staff/students, physicians, medical technicians

### Laboratory Parameters

Understand, classify, interpret

by Dr. Dr. U. Grass

5th revised and enlarged edition 2024, 187 pages, 22 colour figures, 18 colour tables, format 17 x 24 cm, paperback, € 29.80 [D]  
ISBN 978-3-8047-4511-7

## Wildly toxic

From slithering snakes and creepy-crawly spiders to glowing jellyfish – venomous creatures evoke both fear and fascination. Over millions of years, they have evolved remarkable defence mechanisms and lethal cocktails. Their poisons are used to capture and break down their prey. However, due to improper handling or lack of awareness, they can also pose a threat to humans.

This book explores the fascinating world of venomous creatures on land and in the sea – and uncovers their secrets:

- Where do bites, stings and poisonings pose a risk?
- What substances do animal venoms contain and how do they act?
- How should first aid be administered and how are poisonings treated?

The 4th edition has been expanded to include additional venomous species, along with fascinating new case studies and illustrations.

**Discover the captivating world of nature's poisonous creatures – well worth the risk!**

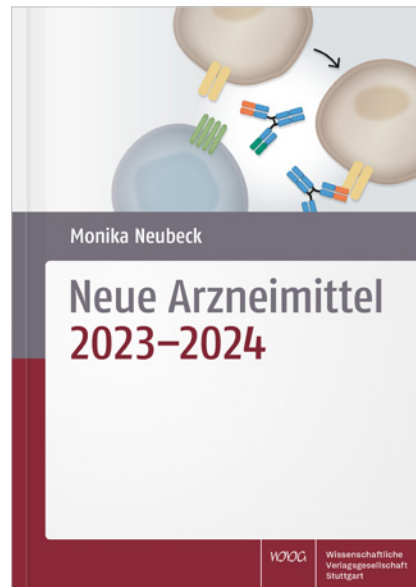

**Target group:** Biologists, toxicologists, pharmacists, physicians, travellers (also off the beaten track), scuba divers, nature lovers, interested laymen

### Poisonous Animals

A handbook for biologists, toxicologists, physicians and pharmacists

by Prof. Dr. D. Mebs

4th revised and enlarged edition 2025, 441 pages, 402 colour figures, 35 formula drawings, 1 colour table, format 19.3 x 27 cm, hardcover, price to be determined  
ISBN 978-3-8047-4373-1

## A new broom sweeps – cleaner?

Approximately 30 to 50 new active ingredients are approved in Germany each year. Keeping track and forming a well-informed opinion can be time-consuming and challenging in the daily routine of pharmacy practice.

This resource provides comprehensive information on all 41 new pharmaceuticals introduced between December 2023 and November 2024, clearly organised and professionally evaluated.

Active ingredient profiles give a clear overview, while detailed graphics illustrate complex modes of action and pathological mechanisms. The author also examines authorisation-relevant studies as well as economic aspects.

Each article concludes with an assessment of the therapeutic relevance and discusses the underlying disease, including its symptoms and previous treatment options, and compares the new active ingredient with its strongest competitors. This allows you to quickly determine whether the new medicinal product represents a groundbreaking innovation or merely an analogue preparation.

**Target group:** Pharmacists in dispensaries and hospitals, physicians in hospitals and practices

### New Medicinal Products

2023-2024

by Dr. M. Neubeck

2025, 258 pages, 96 colour figures, format 17 x 24 cm, paperback, € 39.80 [D]  
ISBN 978-3-8047-4592-6

## Comprehensive care throughout

Many expectant mothers seek natural treatments for their complaints. This pocket guide explores the possibilities of complementary medicine, including their mechanisms of action. It serves as a practical, indication-orientated reference for pharmaceutical professionals, midwives, and physicians – supporting the safe use of these treatments during this vulnerable life stage.

The second edition has been completely updated to include nutrition during pregnancy and breastfeeding, and is now divided into three sections:

- Part 1 – Treatment forms: aromatherapy, Bach flower therapy, homeopathy, phytotherapy, allopathy
- Part 2 – General, helpful information for pregnancy, postpartum and breastfeeding
- Part 3 – Indications presented in colour-coded chapters across the various sections

The wide range of complementary treatments helps identify the most suitable treatment option for each patient.

**Target group:** Pharmaceutical technicians, pharmacy interns, pharmacists, midwives, physicians, laymen

### Complementary Medicine from pregnancy to breastfeeding

by I. Stadelmann, D. Wolz, J. Glenc and N. Stadelmann  
2nd updated and enlarged edition 2025, 530 pages,  
2 colour figures, 6 colour tables, format 11.5 x 16.5 cm,  
flexible, € 39.80 [D]  
ISBN 978-3-7692-7310-6

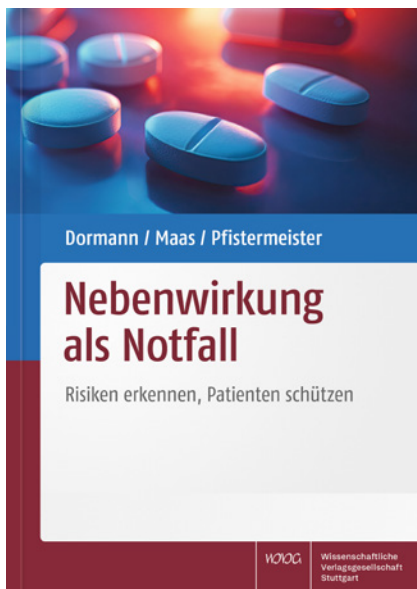

## The perspective may change, but the focus on what is essential remains constant!

If the goal is to find the most effective solution for patients, clinical reasoning is the key. To optimise treatment, various perspectives are taken into account within the framework of medication analysis. Whether from a pharmacist's or doctor's perspective – patient well-being comes first. For the first time, volume 4 summarises 15 cases from the new 'POP era'. The cases were taken from the series of the same name in the Deutsche Apotheker Zeitung and demonstrate how clinical reasoning can support medication analysis to identify risks, prevent medication errors and find solutions tailored to each individual patient. So, what is left to wait for? A chance should be taken on a new perspective.

**Target group:** Students of pharmacy, pharmacy interns, pharmacists

### POP | Patient-Orientated Pharmacy Clinical medication management – 15 cases Volume 4

edited by Dr. D. Dartsch and Dr. O. Rose,  
by Dr. C. Fechtrup, Dr. I. Richling, PD Dr. M. Büchter, J. Barth,  
Dr. Dr. H. Giesen, Prof. Dr. F. Gieseler, S. Erzkamp, M. Haaf,  
L. Heitmann, S. Krouß-Greiling, PD Dr. G. Leicht, Dr. D. Michel,  
P. Pölzing, Dr. D. Hage, Dr. F. Richling, Dr. I. Waltering and  
PD Dr. T. Warnecke  
2025, 160 pages, 25 colour figures, 15 illustrations.  
41 colour tables, format 21 x 29.7 cm, softcover, € 32.00 [D]  
ISBN 978-3-7692-8483-6

## From harmless to fatal: Understanding and avoiding adverse reactions

Adverse drug reactions (ADRs) are a frequent cause of patient hospitalisations. ADRs are often overlooked or not identified in time because the symptoms are not associated with the use of the medication.

Precisely this challenge is addressed in this book: Using 34 real-life patient cases, the experienced team of authors demonstrates how ADRs can be promptly identified, treated and avoided. The concise case descriptions and compact 'Lessons learned' boxes provide an overview of common ADRs, their clinical presentation and pathophysiology. Clearly presented everyday situations impart practical knowledge to pharmaceutical and medical staff. The objective is to raise awareness of ADRs and promote an open approach to dealing with errors.

It is worth taking a closer look at medication to ensure safe usage.

**Target group:** Pharmacists, pharmaceutical engineers, pharmaceutical technicians and trainees, pharmacy interns, students of pharmacy and medicine, physicians, nurses

### Adverse reactions requiring urgent intervention

Recognising risks, protecting patients

edited by Prof. Dr. H. Dormann, Prof. Dr. R. Maas  
and Dr. B. Pfistermeister

2025, approx. 150 pages, 28 colour figures, 38 colour tables,  
format 17 x 24 cm, softcover, price to be determined  
ISBN 978-3-8047-4574-2

## Security in a digital world

At a time when cyberattacks and data breaches are becoming a daily threat, safeguarding your pharmacy has never been more essential. In addition to safeguarding sensitive patient data, it is crucial to ensure the operational continuity of your pharmacy. Both preventing economic losses and ensuring the uninterrupted supply of medicines to the population are crucial. As pharmacies are part of the critical infrastructure, high cyber resilience and robust business continuity management are now essential.

The authors offer a practical introduction to essential aspects of IT security and clarify key legal considerations. Practical recommendations are provided, including strategies to protect against attacks and data loss, as well as guidance on how to respond to (cyber) emergencies. This resource enables pharmacies to develop a customised security concept and implement a comprehensive Information Security Management System (ISMS) step by step.

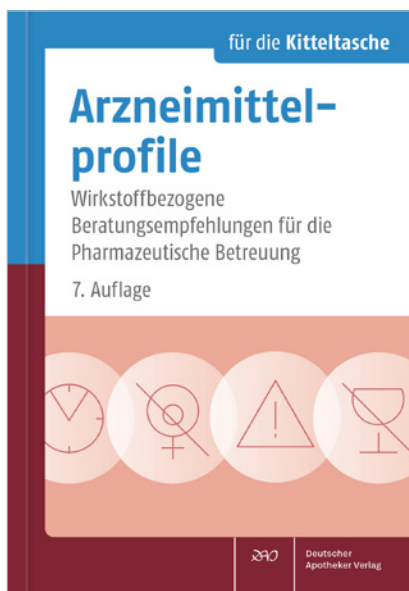

**Target group:** Pharmacy owners, pharmacy employees, pharmaceutical technicians, pharmaceutical sales assistants, staff, pharmacists

### Cybersecurity in the Pharmacy

Increase awareness, strengthen prevention,  
handle emergencies

by Prof. Dr. Dr. D. A. Effertz and M. Mensing  
2025, 200 pages, 10 colour figures, 35 colour tables,  
format 17 x 24 cm, paperback, € 34.80 [D]  
ISBN 978-3-7692-8328-0

## Show your profile!

Do you rely on structured guidance for initial prescriptions or self-medication consultations? Do you analyse your patient's medications as part of medication management? Are you seeking quick information during consultations? For 25 years, pharmacies have been well-equipped with reliable „drug profiles“!

- More than 300 fully revised fact sheets on the most essential medicinal substances
- Pictograms illustrating proper medication use
- Colour-highlighted patient information
- 32 new active substance profiles

New: Active ingredient-specific text templates for providing written support for consultations, including essential information and formulations for the „Notes“ section of the nationwide medication plan.

Show your profile and optimise drug therapy for your patients!

**Target group:** Pharmacists, pharmaceutical technicians, pharmacy interns

### Drug Profiles

Active ingredient-based guidance recommendations for pharmaceutical care

by Dr. J. Framm, A. Framm, Dr. E. Heydel,  
A. Mehrwald and G. Schomacker

7th revised and enlarged edition 2025, 486 pages,  
format 11.5 x 16.5 cm, flexible, € 34.00 [D]  
ISBN 978-3-7692-7436-3

## Self-medication – presented in a systematic and accessible format

From A for allergic rhinitis to Z for zoster, providing guidance on self-medication is a key responsibility in pharmacy – and one that spans a wide range of topics. The 8th edition of this compact, practical standard work delivers both pharmaceutical knowledge and counselling competence. Over 100 indications, presented in a proven, systematic format:

- Flowcharts provide a structured foundation for each consultation
- Concise descriptions summarise the key aspects of each condition
- Recommended active ingredients and substance classes present treatment options at a glance
- Supplementary information offers additional recommendations, alternative approaches and practical tips
- Guidance for special patient groups supports tailored counselling during pregnancy, in childhood and for senior patients

This practical pocket guide is a must-have companion for pharmacy consultations.

**Target group:** Pharmacists, pharmaceutical technicians, pharmacy interns, pharmaceutical technician students, pharmaceutical technician trainees, returnees

### Self-Medication

A practical guide to pharmaceutical counselling

by Dr. K. Lennecke and K. Hagel

8th updated edition 2025, 443 pages, 2 colour figures,  
108 flowcharts, format 11.5 x 16.5 cm, flexible, € 35.00 [D]  
ISBN 978-3-7692-8406-5

## Achieve success with 100 cards

These flashcards are ideal for anyone seeking to prepare quickly and effectively for the 'Over-the-Counter Medicines' knowledge test. The content is based on the German Chamber of Industry and Commerce (DIHK) list of questions and includes all the essential information needed to pass: From key exam content with exercises, format, success tips, question types and original exam questions with solutions to descriptions and illustrations of all 40 herbal medicines, with matching exercises.

**Prepare for the exam in no time.**

**Target group:** Candidates for the expertise examination 'Over-the-Counter Medicines' in retail

### Proof of Expertise in Over-the-Counter Medicines

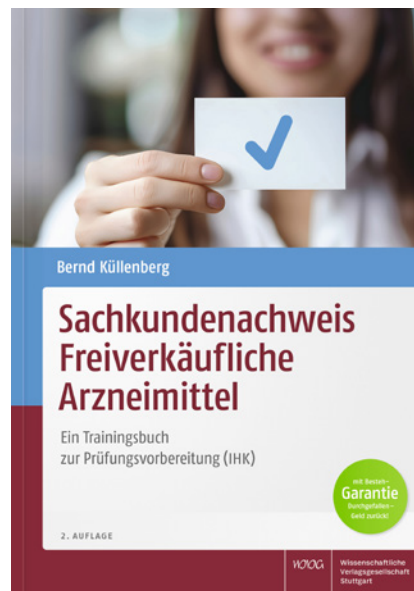

100 flashcards for exam preparation (Chamber of Industry and Commerce (IHK))

by Dr. A. Jessen

2nd updated edition 2025, 212 pages,

format 14.8 x 10.5 cm, slipcase, € 24.80 [D]

ISBN 978-3-8047-4371-7

## Set to pass the knowledge test

Every retail employee who dispenses over-the-counter medicines must demonstrate their expertise to the German Chamber of Industry and Commerce. However, the volume of learning material is often difficult to manage alongside day-to-day work.

This training book focuses solely on exam-relevant content and is divided into 30 concise, easily digestible learning units. With a daily commitment of just half an hour, it will optimally prepare readers within a month. Subsequent mock examinations provide readers with confidence by simulating real-life conditions. Making study-related stress and exam anxiety a thing of the past.

Through his seminars, the author has successfully prepared hundreds of candidates for the subject knowledge test – achieving a success rate close to 100%. Anyone who works through this training book consistently will be well-positioned to pass with confidence.

**Target group:** Candidates for the expertise examination 'Over-the-Counter Medicines' in retail

### Proof of Expertise in Over-the-Counter Medicines

A textbook for exam preparation (Chamber of Industry and Commerce (IHK))

by B. Küllenberg

2nd updated edition 2025, 132 pages, 40 colour figures,

15 tables, format 21 x 29.7 cm, softcover, € 32.00 [D]

ISBN 978-3-8047-4593-3

## Contraceptive failure?

Missed a pill, broken condom or unprotected sex – when every minute counts, swift action is essential! Since 2015, women in Germany have been able to go directly to the pharmacy – saving valuable time otherwise spent visiting a doctor.

This guide equips pharmacy staff with the essential knowledge to provide safe, informed support during sensitive consultations:

- Background and key facts: legal, physiological, and pharmacological information on emergency contraception
- Counselling support: decision-making flowcharts, communication tips and FAQs
- Case examples: guidance for borderline situations
- Tools and aids: QMS info, check-list and Federal Pharmacy Chamber (BAK) guidelines, English-language tips and useful contacts

Now in its second, updated edition, this guide is an essential everyday resource for pharmacy staff providing emergency contraception advice.

**Target group:** Pharmacists, pharmaceutical technicians, pharmacy interns

### Morning-After Pill

Emergency contraception advice

by Dr. M. Kelm, founded by L. P. Frohn  
2nd updated edition 2025, 84 pages, 12 colour figures,  
4 colour tables, 4 QR Codes, format 21 x 29.7 cm,  
softcover, € 26.00 [D]  
ISBN 978-3-7692-8321-1

## Safe and correct use of dosage forms – practical knowledge for daily pharmacy work

From pills and capsules to patches, drops and creams – the world of pharmaceutical forms is highly diverse. This variety poses new challenges for pharmaceutical professionals every day. Whether transdermal patches, sustained-release pills, oral inhalers or suppositories – safe and effective treatment can only be ensured through correct use.

This standard reference offers in-depth knowledge, practical advice and numerous tips for the correct handling of dosage forms. It combines background knowledge with practical tips.

The author discusses common application errors and also examines the physiological characteristics of special groups such as geriatric and paediatric patients.

New in this edition: content on Connected Drug Delivery Devices. The book also includes:

- Numerous product images,
- Overview tables of commonly used finished medicinal products by form,
- Application videos for dosage forms requiring detailed explanation.

This indispensable reference work for pharmacies, clinics and teaching is essential when the package insert falls short.

**Expert advice ensures safe use.**

**Target group:** Pharmacists, pharmaceutical technicians, students of pharmacy, pharmacy interns

### Correct use of Pharmaceutical Forms

Proper use and storage of medicinal products

by Dr. W. Kircher  
5th updated and enlarged edition 2025,  
514 pages, 115 colour figures, 222 colour tables,  
format 19.3 x 27cm, hardcover, € 68.80 [D]  
ISBN 978-3-7692-7961-0

## A good choice

„I'd like the green cough medicine!“ Experienced pharmacy staff instantly know what the customer means. This book helps newcomers identify the right medicine for each customer. Concise information organised according to the Pareto principle, and numerous packaging images combine the knowledge that is essential for providing effective advice with key self-medication preparations.

- Patient consultations. From usage instructions to important notes: This information is crucial for effective consultations!
  - At the back of your mind. From comparable preparations to information for special patient groups: Bonus material for professional expertise!
  - At a glance. Over 200 package photos: Instantly recognise customer requests!
- TOP 60 knowledge: Dive deep and address 80% of customer questions with confidence!

**Target group:** Pharmacy interns, pharmaceutical technician interns, returnees

### TOP 60 OTC Medicinal Products

by Dr. K. Lennecke  
2nd updated edition 2025, 133 pages, 200 colour figures,  
format 11.5 x 16.5 cm, paperback, € 19.00 [D]  
ISBN 978-3-7692-8034-0

## First aid for medical aids and devices

From blood glucose meters to bandages and syringes – pharmacies supply a wide range of medical aids and products. The range of products available on the market can seem overwhelming. This book condenses information according to the Pareto principle, offering a quick and essential overview.

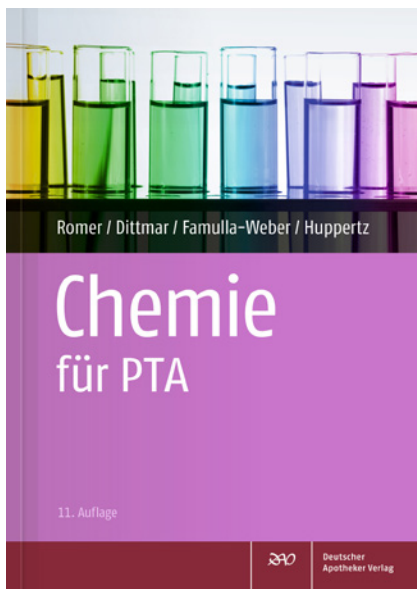

- Patient consultations: From basic mode of action to correct application – essential knowledge for pharmaceutical advice.
- Professional insight: common sources of error and useful equipment – additional professional knowledge that adds value.
- Visual aids: over 90 illustrations to identify and demonstrate key products.

**Master the TOP 60 and answer 80% of customer questions with confidence.**

**Target group:** Pharmacy interns, pharmaceutical technician interns, returnees

### TOP 60 Medical Aids and Devices

by Dr. C. Schäfer  
2nd updated edition 2025, 147 pages, 91 colour figures,  
format 11.5 x 16.5 cm, softcover. € 19.80 [D]  
ISBN 978-3-7692-8467-6

## The right chemistry – right here!

Chemistry is all about smells and explosions – but real understanding often gets left behind. This textbook keeps you on track by reviewing the fundamentals, strengthening chemical understanding and guiding students towards independent learning.

Thanks to the pharmaceutical context, chemistry is understood as the foundation of medicinal substances. Practical examples, mnemonics and summaries enhance the structure and make the content easier to digest. The book sparks pharmaceutical technicians' interest in medicinal substances – an ideal foundation for mastering everyday chemistry in both study and practice.

**Target group:** Pharmaceutical technicians in training and on the job, teachers at pharmaceutical technician schools, students of pharmacy

### Chemistry for Pharmaceutical Technicians

by M. Romer, S. Dittmar, Dr. D. Famulla-Weber and C. Huppertz

11th revised edition 2025, 720 pages, 1,204 colour figures, 132 colour tables, format 17 x 24 cm, softcover, € 52.00 [D]  
ISBN 978-3-7692-8485-0

## Microscopy like never before

Mastering microscopic techniques and understanding plant cells and tissues are fundamental aspects of pharmaceutical biology.

The author duo – both experienced university lecturers – guide readers through the theoretical foundations and provide detailed instructions for preparing, identifying and drawing microscopic structures of medicinal plants. The relationship between structure and function is presented in a clear, practical manner, enabling readers to explore the fascinating world of plant cells and tissues step by step. In addition, each chapter references the drugs in the pharmacopoeia.

The proven textbook and practical manual is now in its 5th edition and more structured and clearly laid out than ever! It is intended for students of pharmacy and biology, prospective and fully qualified pharmaceutical technicians, as well as pharmacists and biologists. In addition, the work is ideally suited for pharmaceutical technician instructors and university lecturers.

The ideal companion for both training and professional practice.

**Target group:** Students of pharmacy and biology, pharmaceutical technicians in training and on the job, pharmacists, biologists

### Anatomy and Histology of Seed Plants Microscopic practical course

by Prof. Dr. E. Stahl-Biskup and Prof. Dr. J. Reichling  
5th revised edition 2025, 212 pages, 202 colour figures, 11 colour tables, format 17 x 24 cm, softcover, € 28.00 [D]  
ISBN 978-3-7692-7973-3

## Best practices for the pharmaceutical technician diary

Pharmaceutical technician students have nearly made it: The first phase of training has been completed, numerous exams have been successfully passed and they are now beginning their six-month internship at their chosen pharmacy. The next milestone on the path to becoming a qualified pharmaceutical technician: the internship diary! The content is determined by the training and examination regulations for pharmaceutical technicians. It is a prerequisite for admission to the second part of the examination and serves as a vital foundation for the oral exam in pharmacy practice. This book provides the crucial inspiration for their own, individual pharmaceutical technician diary. It gives tips on how to generate coherent, error-free and well-structured contents and present them in an optically perfect manner. An additional support and source of inspiration come from complete sample reports on specimen formulations and bulk preparations, on testing starting materials and on selected pharmacy topics. New in the 2nd edition: With the implementation of the Pharmaceutical Technician Reform Act in January 2023, changes have been introduced to pharmaceutical technician training. Part one of the book outlines the new legal regulations, including the updated guidelines from the Federal Chamber of Pharmacists on pharmaceutical technician practical training. It also provides detailed information on the training contract and plan.

**Target group:** Pharmaceutical technician interns/students, pharmacy managers, pharmaceutical technician schools

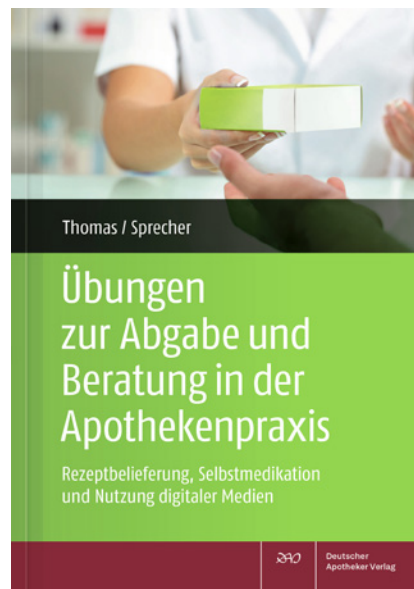

### The Pharmaceutical Technician Diary

Tips and templates for drafting

by H. Steen

2nd revised and enlarged edition 2025, 191 pages, 106 colour figures, 5 colour tables, format 21 x 29 cm, paperback, download of blank forms at [Online-PlusBase.de](https://Online-PlusBase.de), € 24.80 [D]  
ISBN 978-3-7692-8052-4

Pharmacy

## The right fit for every consultation situation in the pharmacy

Expertise alone does not guarantee a successful consultation – what matters is how it is conveyed to the customer. Here the tools for successful communication in everyday pharmacy practice can be found: clear technical and legal principles, practical tips and a wealth of realistic exercises. The training covers the safe use of digital media, conducting consultations on a wide range of indications and essential communication skills – from active listening to targeted conversation techniques.

Whether self-medication, prescription delivery or medical devices: this textbook provides optimal preparation for delivering competent, clear and customer-oriented advice in everyday pharmacy practice. It is also the ideal companion for pharmaceutical technician training in the subject „Exercises in Delivery and Consultation using Digital Technologies.“

Practical, comprehensive and directly applicable – for training, exams and professional practice!

**Target group:** Pharmaceutical technicians in training, returning pharmaceutical technicians and pharmacists, pharmacy interns

### Exercises in Dispensing and Consulting in Pharmacy Practice

Prescription delivery, self-medication and use of digital media

by A. Thomas and N. Y. Sprecher

2025, 296 pages, 86 colour figures, 5 colour tables, 86 QR codes, 65 exercise tasks and 31 consulting exercises, format 17 x 24 cm, softcover, € 42.00 [D]  
ISBN 978-3-7692-7928-3

## Pitfall avoided – successful communication!

Forgetting to include billing details for artificial insemination on a prescription, overlooking critical usage instructions for a fentanyl patch or cutting someone off mid-sentence? No need to fall into these traps! This book is a go-to guide for avoiding the common pitfalls of everyday pharmacy practice. From handling the first prescription to ensuring effective communication at the counter – this guide covers 60 common and sensitive issues, presented concisely according to the Pareto principle.

- Avoiding common errors – from unclear prescriptions and OTC requests to communication missteps and billing mistakes, this guide highlights the key issues.
- The right advice – concise case studies, dos and don'ts, and communication tips demonstrate best practices that you can apply immediately.
- Want to go deeper? Professional insights for situations that require more than just the basics.

**Master the TOP 60 and answer 80% of customer questions with confidence!**

**Target group:** Pharmacy interns, pharmaceutical technicians, pharmacists, returnees

**TOP 60**  
**Pitfalls in Consultation and Communication**  
 Rx and OTC

by C. Weber and C. Schulz  
 2025, 212 pages, 34 colour figures, format 11.5 x 16.5 cm, softcover, € 22.00 [D]  
 ISBN 978-3-7692-8293-1

## Hazardous substances in the pharmacy? Focus on safety

The daily handling of hazardous substances is a routine part of pharmacy practice – just like the legally mandated training of the team. This mandatory training ensures that employees receive instruction that is comprehensive, practical and legally compliant:

- Well-founded yet concise content on the classification, labelling, sale and documentation of hazardous substances, as well as the required protective measures
- Chapter-based structure allowing flexible training formats
- Specifically tailored to the practical needs of pharmacy settings
- Flowcharts to support structured decision-making in the sale of hazardous substances

PowerPoint slides, explanatory texts, documentation forms and copy templates are available both in print and as downloadable files at [www.Online-PlusBase.de](http://www.Online-PlusBase.de). The presentation is fully editable and can be adapted to meet individual needs. This allows the annual training to be completed with minimal effort – yet maximum impact!

**Target group:** Pharmacy managers, QMS officers, persons responsible for the quality management system, pharmacists, pharmaceutical technicians

**Mandatory Training**  
**on Hazardous Substances**

by Dr. A. S. Ziegler  
 2025, 95 pages, 35 colour figures, 2 colour tables, format 29.7 x 21 cm, spiral bound flip book, incl. 42 PowerPoint slides for download at Online-PlusBase, € 98.00 [D]  
 ISBN 978-3-7692-8408-9

## The only book needed

For decades, magazines, countless self-help books and advertisements have been filled with promises for a quick, convenient and, above all, effortless weight loss. Yet even experts often find it difficult to determine the benefits and, more importantly, the potential harm of the multitude of strategies, programmes and products on offer. It usually takes a great deal of time to fully understand and examine the methods from all angles and to critically analyse them. However, this compact guide will quickly bring readers up to speed.

The author, a qualified nutritionist and dietician, systematically compares the 100 most popular weight-loss diets using monographs and evaluates them objectively and neutrally according to all the key criteria. The general section features a helpful bonus guide: 'Which diet is right for me?'

The book is aimed at nutritionists, other professionals and anyone, who wants to help themselves or others lose weight in a healthy and sustainable way.

**A trusty companion for losing weight safely and effectively.**

**Target group:** Pharmacists, physicians, dieticians and other nutrition professionals, nutritionists, interested laymen

### Diets at a glance

Everything worth knowing about losing weight

by B. Küllenberg

2025, 625 pages, 12 colour figures, 98 colour tables, format 17 x 24 cm, softcover, approx. € 38.00 [D]

ISBN 978-3-8047-3392-3

## History of science meets modern physics

'Quanten 10' presents the fascinating lectures from the Heisenberg Society's General Meeting in October 2021. For the first time since COVID-related restrictions were lifted, audiences had the opportunity to attend two high-profile scientific presentations in a lecture hall at Ludwig Maximilian University. Nobel Laureate Reinhard Genzel took the audience on a journey to the centre of the Milky Way, guiding them through the discovery of the gigantic black hole with a mass four billion times that of the sun. Klaus Hentschel then explained how the idea of light quanta gradually emerged, demonstrating the complexity of Einstein's concept, first presented in 1905, and how its interpretation was the subject of heated debate for decades. This volume is enriched by a personal speech Werner Heisenberg gave at the opening of the Werner Heisenberg School in Garching, where he shared some of his own experiences from his school days. The Heisenberg Society is committed to preserving the legacy of Werner Heisenberg, exploring fascinating aspects of the history of science – particularly quantum mechanics – and teaching modern physics in schools.

**Target group:** Physicists, science historians, Heisenberg scholars

### Quanten 10

Publications of the Heisenberg Society, Volume 10

edited by Prof. Dr. J. Blümer

2025, 121 pages, 22 colour figures, 12 b/w figures, format 12.5 x 19 cm, hardcover, € 30.00 [D]

ISBN 978-3-7776-3359-6

## From big to small – there's something for everyone!

Whether it is a bothersome cold or a painful headache, homeopathic medicines have proven effective in treating many everyday ailments. In this book, you will discover which homeopathic remedies are essential for your medicine cabinet and how to harness the healing power of homeopathy for the entire family.

Now in its 12th edition, this guidebook draws on many years of medical expertise. Helpful overview tables make it quick and easy to identify the ideal product. Additionally, special symbols highlight medicines that are particularly suitable for children, pregnant women and travel first-aid kits.

**Target group:** Patients, parents/pregnant women, pharmacists, pharmaceutical technicians in training and on the job, alternative practitioners

### Homeopathy for the Whole Family

by Dr. M. Wiesenauer  
12th revised edition 2025, 305 pages, format 17 x 21.5 cm,  
paperback, € 28.00 [D]  
ISBN 978-3-7776-3543-9

## Diversity in consultations

Self-medication offers a wide range of therapy options that can be used in a targeted manner. This volume contains therapy recommendations for a specific clinical picture from the areas of

- Phytotherapy
- Homeopathy (single and complex remedies)
- Anthroposophic medicine
- Aromatherapy
- Schuessler salts
- Spagyrics
- Bach flower therapy

as well as recommendations on food supplements and the microbiome.

For over 100 self-medication indications, suggested preparations for all the above-mentioned therapeutic approaches have been compiled in a compact, pocket-sized format.

The 3rd edition has been greatly expanded and updated to include advice options.

The highlight: In addition to the recommendations from complementary medicine, the reader is also always told how to treat according to the allopathic approach. This guarantees that users will always find the right medicine for the purpose.

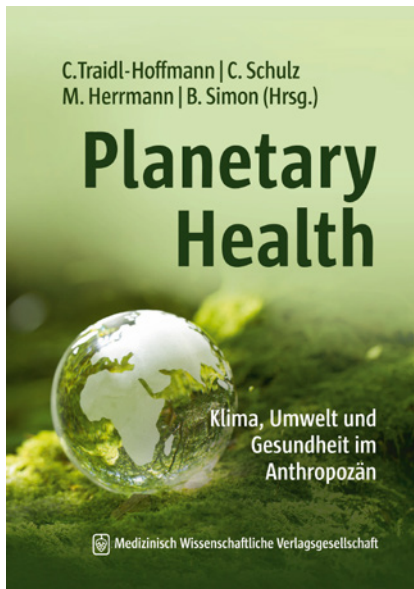

**Readership:** Pharmacists, pharmaceutical technicians, pharmacy interns, physicians, alternative practitioners

### Complementary Medicine

Advice recommendations for self-medication

by M. Schlenk, G. Bauer, H. Blaschke, B. Emde, Dr. M. Glöckler, M. Müller-Frahling and N. Schlesinger  
3rd revised and enlarged edition 2024, 976 pages, 4 colour  
figures, format 11.5 x 16.5 cm, flexible, € 58.00 [D]  
ISBN 978-3-7692-8032-6

## How can people be healthy when the earth is sick?

The Planetary Health concept centres on the connections between human health and the health of our planet. The increasing destruction of ecosystems due to humanity's expansive way of life is already having a negative impact on our health, first and foremost through environmental pollution, species extinction and the advancing climate crisis. This increasing overexploitation of our planet's limited resources is an unprecedented challenge for society. This development must now be taken into account in the context of health and medicine – and the medical sciences must be properly equipped to deal with the consequences for health in detail. Examples include the deadly effects of heatwaves, the increase in allergies and the emergence of new types of pathogens.

This compendium brings together the latest knowledge on the diverse consequences of the climate crisis, which is still new to many medical fields. These are consequences that will continue to influence the health of generations to come. The first comprehensive book to summarize the medical effects of our environment:

- strategies, concepts and methods for the medical management of challenges
- exciting excursions on climate communication, sustainability in healthcare and more
- implications of climate change for the various medical specialities
- 2nd edition of the successful standard work – thoroughly updated, supplemented with new chapters

**Target group:** Health professionals, health scientists, stakeholders in the healthcare system, public and press

### Planetary Health

Climate, environment and health in the Anthropocene

edited by Prof. Dr. C. Traidl-Hofmann, PD Dr. C. Schulz, Dr. M. Herrmann and Prof. Dr. B. Simon

2nd edition 2026, 362 pages, 17 figures, format 16.5 x 24 cm, paperback, € 29.99 [D], ISBN 978-3-95466-650-8 (study edition)

Planetary Health

## Art meets medicine – the role of art in healthcare

Art, medicine and health have many points of contact and a long tradition. Even in Greek mythology, Apollo was the god of the arts. Artistic approaches to therapy (including visual and performing arts, music, dance and literature) have been used for many centuries and are still offered in some medical institutions today. Despite this long practical experience, there is little scientific evidence of its effectiveness.

Basic research provides an important basis for art therapy with interesting new approaches for investigating possible mechanisms of action. In addition, the overall social significance of art for health is an important topic, especially with regard to preventive effects for the population.

The book provides a comprehensive overview of how art can be used as a health-promoting resource and highlights various research approaches. In addition, a brief review of the historical development of art in medicine is given. For the first time, the influence of music, painting, dance, literature and architecture on people's state of health and the healing effect they can have is shown.

**Target group:** Art therapists, artists, psychotherapists, child and adolescent psychologists, psychoanalysts and psychologists, health professionals, music and dance therapists, art and music educators, community musicians

### Arts and Medicine

How music, painting, theatre, dance, literature and architecture heal

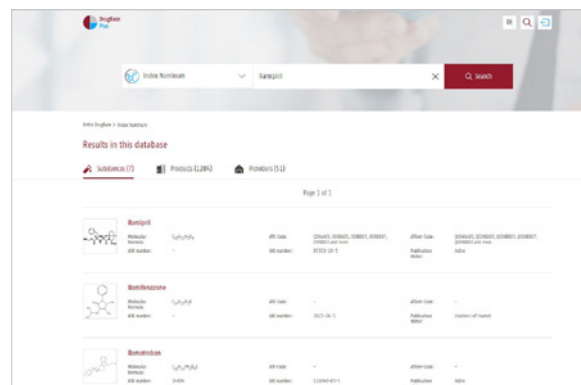

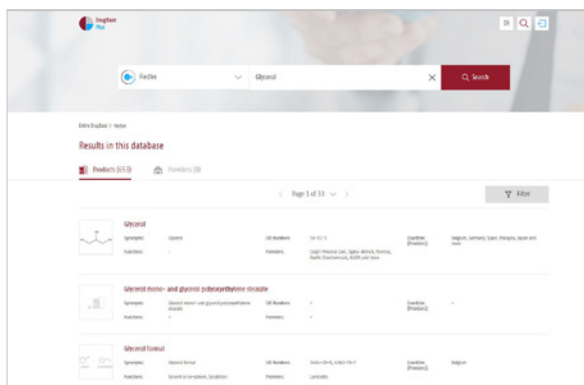

edited by Prof. Dr. S. N. Willich

2025, 278 pages, 51 figures, format 16.5 x 24 cm, paperback, € 59.95 [D]

ISBN 978-3-95466-884-7

## Database of excipients in pharmacy, cosmetics and related fields

Fiedler – Encyclopedia of Excipients is a comprehensive database on excipients used in pharmaceutical, cosmetic and other products offering more than 12,000 entries.

Monographs follow a unified structure:

- Names and synonyms: INN, INCI, compendial, trivial and chemical names, trademarks, CAS-, EINECS- and E-numbers
- Definition: Description, composition, chemical structure, molar mass
- Basic properties: Appearance, physicochemical data, solubility, spectra, etc.
- Application characteristics and main uses in pharmacy and cosmetics, illustrated by examples
- Stability and incompatibilities
- Pharmacology and toxicology
- Analysis methods
- References with broad literature citations
- List of excipient suppliers

A manufacturers directory gives addresses and full contact details.

**Target group:** Pharmaceutical and cosmetic industries, research organisations, laboratories, suppliers, authorities, colleges/universities, pharmacies

### Fiedler – Encyclopedia of Excipients at drugbase.plus

Yearly subscription fee for one concurrent user from one location:

For community/retail pharmacies: € 324.21 [D]\*

For hospital pharmacies: € 648.42 [D]\*

For pharmaceutical companies: € 1,296.84 [D]\*

## International database of pharmaceutical substances and preparations

Index Nominum is the international database for active pharmaceutical ingredients (APIs), branded medicinal products, synonyms, and chemical structures.

- Overview of the international nonproprietary names (INN), chemical designations (IUPAC), official synonyms, and medicinal products (medications containing a single active substance as well as dual combinations and selected combination drugs containing three or four active agents) made by 30,000 manufacturers in 166 countries.
- 8,100 APIs and derivative agents, 26,000 synonyms, and more than 610,000 tradenames of medicinal products for human and veterinary use.
- Targeted search by API name, branded medicinal product, CAS No., therapeutic class, ATC code, ATCvet code, and manufacturer.
- APIs that are no longer commercially available are retained and correspondingly labelled 'off-market'. Branded medicinal products withdrawn from the market are given a country-specific 'off-market' label. Index Nominum makes you singularly successful in your search for national and foreign branded medicinal products, APIs, and manufacturers.

**Target group:** Pharmacists, authorities, pharmaceutical industry and wholesale
