My horse likes herbals

Phytotherapy in Equine Practice

Pocket guide

By Dr. Herbert Konrad.

2022. 176 pages. 57 coloured tables.

Format 11.5 x 16.5 cm. Flexible. € 32.80 [D]

ISBN 978-3-8047-4261-1

Lemon balm tea for competition anxiety, cottonwood bark for myositis, devil's claw root for laminitis – yes, herbal preparations promote healing in horses too!

An experienced veterinarian has gathered together the skills of his holistic treatment

- Profiles of herbal drugs: Therapy-relevant characteristics of the medicinal plants
- Veterinary practice: Examination, repertorisation (finding the suitable remedy), treatment plan, calculation of the dose for a horse, including examples of equine patients
- Indications: Proven phytotherapeutic agents for the most common diseases

This book shows that even chronic cases or those refractory to conventional medicine can be successfully treated with the healing power of plants.

Readership: Pharmacy, veterinary surgeons, animal health practitioners

Pictures, Poems and Prose

Pearls of wisdom

By Prof. Dr. Dr. h.c. mult. Ernst Mutschler.

2nd edition 2021. 112 pages. 44 colour figures.

Format 14.9 x 23 cm. Linen binding.

€ 19.80 [D]

ISBN 978-3-8047-4257-4

Professor Ernst Mutschler is famous through his many specialist publications as a medical professional and pharmaceutical scientist.

Pearls of wisdom is his most personal book, presenting thought-provoking texts about pharmacy and medicine, contemplative sayings and poems, reflections on friendship and family, on time and existence, and speeches at ceremonies and festive events – flanked and accompanied by beautiful photographs and illustrations.

A very special book – not only for those who know Professor Mutschler as a university lecturer, doctoral supervisor or colleague.

Readership: Pharmacists, pharmaceutical technicians, physicians, laymen interested in poetry, readers who are looking for something special

A solution for all cases

Medication Management in the Hospital

A workbook for ward pharmacists

Edited by Dr. Insa Gross, MSc Andreas Fischer and Dr. Holger Knoth.

2022. XXI, 457 pages. 37 coloured figures.
33 tables. € 69.00 [D]
ISBN 978-3-7692-7521-6

The ward pharmacist in the hospital is like the airbag in a car. As part of a fail-safe system, they monitor and optimise the patient's drug therapy. Ward pharmacists work hand in hand with medical and nursing staff.

That situation is also reflected in this workbook. All the cases presented were patients who had been cared for, evaluated and documented by a physician-pharmacist duo or similar team with combined medical and pharmaceutical expertise. The editorial team considered it important to illustrate all critical indications typically encountered in a hospital.

In assessing and selecting the examples, they were able to draw upon the many years' experience of their pioneering work as hospital and ward pharmacists.

Practical tips, checklists, comments and advice for working in the ward environment round off the individual chapters.

By learning from actual cases, this book offers the unique chance to develop an instinct for the pitfalls of drug safety. That applies to those who have successfully completed further training in the field of "Medication Management in the Hospital" and for all who wish to ensure the optimum treatment for their patients through competent work in clinical pharmacy.

Readership: Pharmacists, hospital pharmacists, ward pharmacists, pharmacy interns

A treasure chest full of advice-giving tips

Over-the-Counter Trainer

160 double-sided flashcards
for learning and counselling

By Dr. Kirsten Lennecke, Kirsten Hagel
and Claudia Rothermel.

2nd completely revised edition 2022.
160 double-sided cards. Format 14.8 x 10.5 cm.
Card index box. € 49.00 [D]
ISBN 978-3-7692-6988-8

Working at the sales counter is never dull: Every day, people come to you with the widest possible variety of questions and expect good advice. It does not matter whether it is about self-medication for adults, pregnant women, children, about aids and appliances, vegan diets or alternative medicine: Whatever your customer's concerns – you always offer well-founded counselling.

Based on real-life counselling situations routinely encountered in a pharmacy, the authors – all pharmacists with experience of retail sales – provide important information for such conversations and suggest helpful questions to ask when patients seek advice.

Become a sales counter expert in no time!

Mastering the everyday pharmacy routine

Pharmacy Practice for Pharmaceutical Technicians

Edited by Rainer Neukirchen.

By Dr. Holger Herold, Dr. Wolfgang Kircher,
Annegret Lehmann, Rainer Neukirchen, Rika Prager,
Anke Schichte, Heike Steen and Dr. Markus Zieglmeier.

5th completely revised edition 2022.

XX, 571 pages. 136 coloured figures.

117 coloured tables. Softcover. € 49.80 [D]

ISBN 978-3-7692-7122-5

This completely redesigned book provides concise knowledge about the main topics of over-the-counter sales. It provides the most important facts about:

- Areas of the law relevant to pharmacies and regulations on hazardous materials,
- The most important issues concerning self-medication and correct use of dosage forms,
- Medical devices such as bandages and dressings, blood pressure meters and incontinence products,
- Specific subjects such as interactions and the misuse of drugs.

Text boxes, revised to improve learning, highlight important information; diagrams and pictures illustrate the facts, and QR codes allow access to additional online material.

This standard work can be used as a textbook in class, to prepare for the final examination and as a reference work in everyday professional life. The book also brings together all that is important for returnees.

Readership: Pharmaceutical technicians in training and on the job, pharmacies that provide training, returning pharmaceutical technicians and pharmacists

Listen between the lines!

Tabu Subjects

Caught between the duty of confidentiality and the duty to speak

By Almut Roth.

2022. VIII, 120 pages. Format 21 x 29.7 cm.

Softcover. € 24.80 [D]

ISBN 978-3-7692-7706-7

Why is a subject regarded as off-limits and how does one handle it? What is better kept to yourself and what is essential that you say to the person affected? Countless people are ashamed of their diseases and do not dare to talk about them in public. But how can you find out what is meant, even though it is not openly stated? This calls for sensitivity and professional expertise!

Only if someone has sufficient background knowledge about a disease and its possible treatments can emerging worries and anxieties be confronted, preconceptions dispelled and existing myths refuted. This book sheds clear and concise light on 50 supposedly taboo subjects, as well as providing appropriate phrases for difficult consultations in the pharmacy!

Fascinating pharmacy

The Practice of Pharmacy

Textbook for pharmacy interns
Handbook for the pharmacy

Edited by Dr. Michael Sax.

Founded by Dr. Herbert Gebler and Dr. Gerd Kindl.

7th edition 2022. XXIII, 875 pages. 218 coloured figures.

132 coloured tables. Format 19.3 x 27 cm. Hardcover.

€ 89.00 [D]

ISBN 978-3-7692-7010-5

After pharmacy studies have ended, the fascinating world of the pharmacy awaits – simultaneously varied and challenging. This is no problem with this well-established standard work to hand! The 7th edition, with a new editor and new structure, goes through the various stages of pharmacy operation. Beginning with the social mandate to supply medicines and then considering the organisational and economic orientation of a pharmacy, one delves ever deeper into its inner workings.

In every area, the appropriate specific information can be found about pharmaceutical law and practice – whether this concerns the back office, over-the-counter medicines, dispensary and dispensing, or the supply of care homes, or preparation of cytotoxic drugs. In addition to the important topic “Dispensing of drugs and medical devices on prescription”, particular attention is paid to the principal activity in the pharmacy – giving advice on self-medication.

The contents are based on the regulations for registration of pharmacists and the guidelines of the Federal Chamber of Pharmacists for the practical training of pharmacy interns in the pharmacy. *The Practice of Pharmacy* safely navigates the user through the practical training year and is the ideal preparation for the 3rd State Examination! Returnees, pharmacies that provide training and pharmacists of many years' experience, will also benefit from this textbook and reference work.

Pharmaceuticals – the basics

Drug knowledge

Index cards for pharmacy-only and prescription-only active substances

By Dr. Thomas Wurm.

2nd edition 2022. 622 pages. 311 index cards.

Format 14.8 x 10.5 cm. Card index box.

€ 39.80 [D]

ISBN 978-3-7692-7614-5

With the huge number of medicinal products, it is easy to get lost in the pharmaceutical jungle.

Clearly divided into over-the-counter medicines, prescription-only drugs and narcotics, the flashcards make it easier for beginners to learn the material. In this way, information about

- Indications and mechanisms of action
- Doses and available dosage forms
- Instructions for use and special features

can be repeated and consolidated.

The new check section summarises the important side effects, interactions and contraindications. So now nothing stands in the way of successfully advising patients!

Tick it off!

Formulation Plausibility Check

In accordance with § 7 German Ordinance on the Operation of a Pharmacy

By Dr. Andreas S. Ziegler.

6th revised and expanded edition 2022.
245 pages. Sets of tables. Format 21 x 29.7 cm.
Softcover. € 43.80 [D]. ISBN 978-3-7692-7827-9

Formulation Plausibility Check (Pad with 50 sheets)

in accordance with § 7 German Ordinance on the Operation of a Pharmacy

50 pages. Format 21 x 29.7 cm. € 9.20 [D]

Set: Formulation Plausibility Check with Plausibility Check Pad

2022. Sets of tables and form pad. Format 21 x 29.7 cm. € 49.80 [D]. ISBN 978-3-7692-7911-5

The Ordinance on the Operation of a Pharmacy states that a plausibility check must be undertaken for each new formulation. The tabular compilations of this book help pharmacists to complete this task quickly and reliably. All the information required for the check is clearly laid out and easy to find.

New in the 6th edition: Many new active substance – ointment base combinations with demonstrated compatibility | more than 50 new ointment bases | 30 new active substances

Bonus: The information about standard doses for paediatric dermatology enables pharmacists to also prepare paediatric formulations. | References to the *Ziegler Rezepturbibliothek®* (Ziegler Formulation Library), where completely formulated manufacturing instructions for the named active substance – ointment base – combinations can be found. This makes it even easier to supply patients with tested standard preparations.

The set includes 50-sheet pads of the complementary form *Plausibility Check*. The form makes documentation easier and enables rapid and reliable navigation through the tables. This allows both the prescriber's treatment concept and also possible incompatibilities to be checked in less than no time.

The classics – more up-to-date than ever!

Jander / Blasius | Inorganic Chemistry I

Theoretical principles and qualitative analysis

By Prof. Dr. Eberhard Schweda.

19th completely revised edition 2022.

640 pages. 290 coloured figures. 71 coloured tables.

90 formulas. Incl. pocket folder. Hardcover. € 49.00 [D]

ISBN 978-3-7776-3009-0

Jander / Blasius | Inorganic Chemistry II

Quantitative analysis and preparations

By Prof. Dr. Eberhard Schweda.

18th completely revised edition 2022.

408 pages. 144 coloured figures. 76 coloured tables.

219 formulas. Incl. pocket folder. Hardcover. € 42.00 [D]

ISBN 978-3-7776-3010-6

For decades, hundreds of thousands of students have passed their chemistry exams and practical tests with the aid of this well-established textbook of inorganic chemistry. Its contents and teaching techniques have stood the test of time but are further developed, updated and supplemented by the most modern methods with each new edition. Volumes I and II together are four books in one and ideally suited to accompany the entire study course for the bachelor's degree in inorganic chemistry.

Volume I, the "Red Jander" covers all theoretical topics of general and inorganic chemistry. Properties of the elements, important reactions and the individual tests for metals and non-metals are described in the second part, together with the separation process.

Volume II, the "Blue Jander" explains the methods of quantitative analysis and describes the most important methods of synthesis, as well as more than 100 methods of preparative chemistry. **New** in this edition: A brief introduction to all major methods of spectroscopy and diffraction.

Chapters about safety and disposal, together with an extensive appendix containing many tables complete the book.

An innovative "pocket folder" is enclosed with every book. The handy folded poster for the lab coat pocket contains a summary diagram of separation techniques, a periodic table with important data on all chemical elements, and a collection of formulas.

Readership: Students of chemistry, pharmacy, biology, geology, food chemistry, environmental technology, environmental chemistry

S. Hirzel Verlag

Enjoy a carefree pregnancy!

A Healthy Pregnancy with Selected (Micro)Nutrients

Patient guide

By Uwe Gröber.

2022. 36 pages. 11 colour figures. 5 colour tables.

Format 11.5 x 16.5 cm. Sewn. € 4.60 [D]

ISBN 978-3-8047-4318-2

Adequate nutrition and a healthy lifestyle – before and during pregnancy – are of great importance for a trouble-free pregnancy, birth, and the subsequent development of the child. Since the nutritional status before the onset of pregnancy influences both fertility and the course of pregnancy, including complications, the birth and breastfeeding, close attention should be paid to a healthy diet and adequate supply of essential (micro)nutrients well in advance and not only at the family planning stage. Poor micronutrient status prior to conception is often carried over into pregnancy, and can significantly increase the risk of pregnancy complications and, for example, lead to the dreaded spina bifida in the child. This patient guide tells you what you need to know! Various micronutrients are described in detail. Special emphasis is placed on the latest study results concerning pregnancy and nutrition.

Readership: Pregnant women, pharmacists, pharmaceutical technicians, pharmaceutical manufacturers

Defying the pandemic

Covid, Influenza and more

How do I strengthen my immune system?
Patient guide

By Uwe Gröber and Prof. Dr. med. Michael F. Holick.

3rd edition 2022. 40 pages. 7 colour figures.
1 colour tables. Format 11.5 x 16.5 cm. Sewn.
€ 4.80 [D]
ISBN 978-3-8047-4323-6

Many patients are confused in the coronavirus crisis and ask what they can do to prevent themselves and their family from contracting the SARS-Cov-2 virus. There are now several studies that prove the influence of micronutrients such as zinc, selenium and various vitamins on the immune system and specifically on the course of viral diseases. In this brochure, successful author Uwe Gröber, pharmacist and head of the Academy for Micronutrient Medicine in Essen, has compiled his recommendations for strengthening the immune system.

Here you can learn

- why micronutrients may be considered for combatting the coronavirus,
- how the micronutrients are dosed and applied, and
- what effects micronutrients have on the immune system.

This strengthens the immune system in the fight against the coronavirus!

Readership: Patients, interested persons, physicians, alternative practitioners, pharmaceutical technicians, pharmacists

Greater quality of life for cancer patients

Coping Better with Cancer Therapy

Improved quality of life with the right vitamins and minerals. Patient guide

By Uwe Gröber and Prof. Dr. Klaus Kisters.

4th revised and enlarged edition 2022. 32 pages.

2 colour figures. 10 colour illustrations. 3 colour tables.

Format 11.5 x 16.5 cm. Sewn. € 4.40 [D]

ISBN 978-3-8047-4326-7

Cancer patients often suffer from malnutrition. Not only do they lack energy-providing macronutrients such as protein, fats and carbohydrates, they particularly lack the micronutrients that regulate the metabolism. Micronutrients such as vitamin D, selenium, L-carnitine, omega-3 fatty acids and vitamin C significantly contribute to supporting the immune system of cancer patients, reducing inflammatory processes, alleviating the side effects of cancer therapy, and improving their quality of life.

This patient guide provides information about the relationship between cancer, malnutrition, micronutrient deficiencies, the influence of cancer therapeutics on micronutrient balance, and how cancer patients can support their therapy and improve their quality of life with a controlled intake of micronutrients.

Readership: Pharmacists, pharmaceutical technicians, patients

Support medication, improve quality of life

Micronutrient Depleters: Cholesterol-lowering Drugs

Things to know about medicines and micronutrients
Patient guide

By Uwe Gröber and Prof. Dr. Klaus Kisters.

2nd edition 2021. 24 pages. 7 colour figures.
3 colour tables. Format 11.5 x 16.5 cm. Sewn.
€ 4.00 [D]

ISBN 978-3-8047-4260-4

Elevated blood lipid levels are among the major risk factors for cardiovascular diseases. The class of substances most commonly used for lowering blood lipids is the type of cholesterol-lowering drug known as statins. Taking cholesterol-lowering drugs can lead to disruption of the coenzyme Q₁₀ balance and muscle metabolism. In addition, statin therapy increases the need for selenium, vitamin D, omega-3 fatty acids, B vitamins and L-carnitine. This guide provides patients with important medical information about the interactions of their medicines with these micronutrients.

This way, patients can optimise their treatment, reduce the side effects of their medication, and improve their quality of life!

Readership: Pharmacists, pharmaceutical technicians, patients

Why metformin is considered a micronutrient depleter

Mikronährstoff-Räuber: Metformin

Things to know about medicines and micronutrients
Patient guide

By Uwe Gröber and Prof. Dr. Klaus Kisters.

3rd updated edition 2022. 24 pages. 6 colour figures.
1 colour table. Format 11.5 x 16.5 cm. Softcover.

€ 4.00 [D]

ISBN 978-3-8047-4319-9

This guide provides patients with important medical information about interactions of their drug products with vitamins and minerals. These interactions are not always listed in the accompanying package inserts. Taking the diabetes drug metformin can cause a vitamin B₁₂ deficiency, which causes severe nerve damage. Besides vitamin B₁₂, other micronutrients such as magnesium, coenzyme Q₁₀, vitamin C, vitamin D and chromium can support the therapy with metformin and other diabetes medicines.

This way, patients can optimise their treatment, reduce the side effects of their medication and improve their quality of life!

Readership: Pharmacists, pharmaceutical technicians, physicians, nursing staff, patients

NNV Headline

Mikronährstoff-Räuber: Säureblocker

Wissenswertes zu Arzneimitteln und Mikronährstoffen

By Uwe Gröber and Prof. Dr. Klaus Kisters.

3rd updated edition. 28 pages. 5 colour figures. 4 colour tables. Format 11.5 x 16.5 cm. Sewn. € 4.20 [D]

ISBN 978-3-8047-4325-0

This guide provides patients with important medical information about interactions of their drug products with vitamins and minerals. These interactions are not always listed in the accompanying package inserts. Those who take acid blockers such as omeprazole or pantoprazole may not only develop disorders relating to calcium, magnesium, vitamin D and bone metabolism in the long term, but above all become deficient in vitamin B₁₂.

This way, patients can improve their treatment, reduce the side effects of their medication and increase their quality of life!

Readership: Pharmacists, pharmaceutical technicians, physicians, nursing staff, patients

The oil of life

Omega-3

The healing power of marine fatty acids
Patient guide

By Uwe Gröber and Prof. Dr. Klaus Kisters.

3rd edition 2022. 36 pages. 23 colour figures.

Format 11.5 x 16.5 cm. Sewn. € 4.60 [D]

ISBN 978-3-8047-4324-3

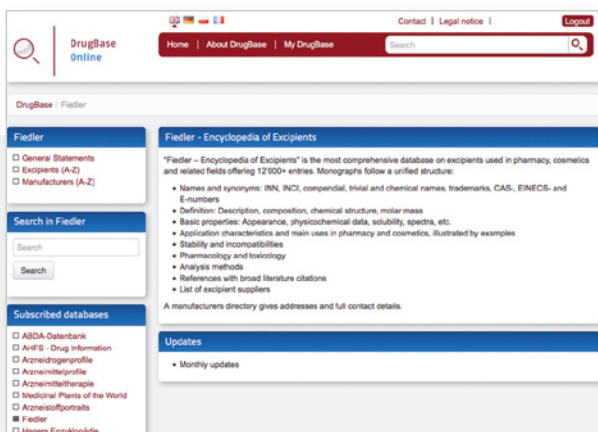

This guide gives patients up-to-date information based on solid medical and scientific facts. It teaches them how they can use omega-3 oil to

- improve health and successfully prevent disease,
- increase physical and mental performance,
- make the most of their medication and therapy, and
- improve quality of life and increase vitality.

Small changes can make a surprising improvement in health!

Fiedler – Encyclopedia of Excipients

at www.DrugBase.de

Revised by Dr. Martin Holzer.

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies: € 249.00 plus VAT*

For hospital pharmacies: € 498.00 plus VAT*

For pharmaceutical companies: € 996.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

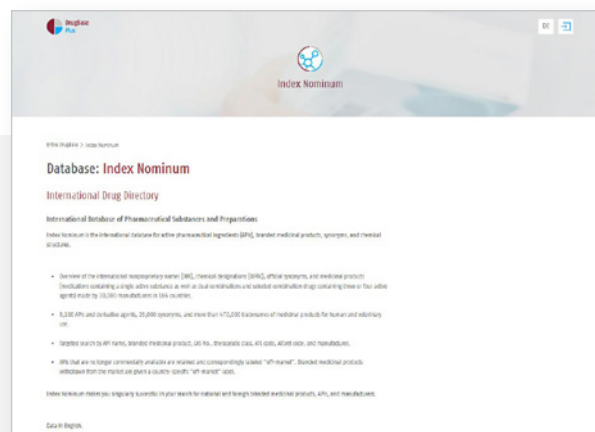

Fiedler – Encyclopedia of Excipients is the most comprehensive database on excipients used in pharmacy, cosmetics and related fields offering **more than 12,000 entries**. Monographs follow a unified structure:

- Names and synonyms: INN, INCI, compendial, trivial and chemical names, trademarks, CAS-, EINECS- and E-numbers
- Definition: Description, composition, chemical structure, molar mass
- Basic properties: Appearance, physicochemical data, solubility, spectra, etc.
- Application characteristics and main uses in pharmacy and cosmetics, illustrated by examples
- Stability and incompatibilities
- Pharmacology and toxicology
- Analysis methods
- References with broad literature citations
- List of excipient suppliers

A manufacturers directory gives addresses and full contact details.

Readership: Pharmaceutical and cosmetic industries, research organisations, laboratories, suppliers, authorities, colleges / universities, pharmacies

Index Nominum – International Drug Directory

at www.drugbase.plus

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies:

€ 372.00 plus VAT*

For hospital pharmacies: € 744.00 plus VAT*

For pharmaceutical companies: € 1,488.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

Index Nominum is the international database for active pharmaceutical ingredients (APIs), branded medicinal products, synonyms, and chemical structures.

- Overview of the international nonproprietary names (INN), chemical designations (IUPAC), official synonyms, and medicinal products (medications containing a single active substance as well as dual combinations and selected combination drugs containing three or four active agents) made by **30,000 manufacturers** in **166 countries**.
- **8,100 APIs** and derivative agents, **26,000 synonyms**, and **more than 470,000 tradenames** of medicinal products for human and veterinary use. Targeted search by API name, branded medicinal product, CAS No., therapeutic class, ATC code, ATCvet code, and manufacturer.
- APIs that are no longer commercially available are retained and correspondingly labelled "off-market". Branded medicinal products withdrawn from the market are given a country-specific "off-market" label.

Index Nominum makes you singularly successful in your search for national and foreign branded medicinal products, APIs, and manufacturers.
