Forerunner of integrative medicine – practised all over the world

Anthroposophic Medicine

Medicinal therapy for 350 disease pictures

Edited by Dr. Matthias Girke,
Dr. Michaela Glöckler and Georg Soldner.

2020. XXXI, 773 pages. 54 colour figures.

Hardcover. € 98.00 [D]

ISBN 978-3-8047-4021-1

100 years after it was founded in Switzerland, anthroposophic medicine is nowadays an approach to treatment that is used worldwide. In this jubilee edition, 39 general practitioners and specialists experienced in anthroposophic therapy describe 350 disease pictures and their medicinal treatment – including Covid-19 – in understandable therapeutic concepts:

- Clearly arranged from head to toe, the disease pictures are taken from all specialties, ranging from neurology, ophthalmology, ENT and dentistry via the various disciplines of internal medicine such as cardiology, gastroenterology, diabetology, oncology, rheumatology to gynaecology, surgery, orthopaedics and rehabilitation.
- Other chapters are devoted to neonatology, paediatrics and adolescent medicine, the treatment of addiction, psychiatry and psychotraumatology, pain therapy, geriatrics and palliative medicine.
- Taking multiple sclerosis and chronic polyarthritis as examples, an insight is given into how the appropriate treatment can be derived from the anthroposophic understanding of disease.

This work provides rapid access to all important disease pictures and indications for anthroposophic medicine.

Readership: Pharmacists, physicians, alternative practitioners, pharmaceutical technicians, nursing staff

Improve the quality of life

Micronutrient Advice Indications

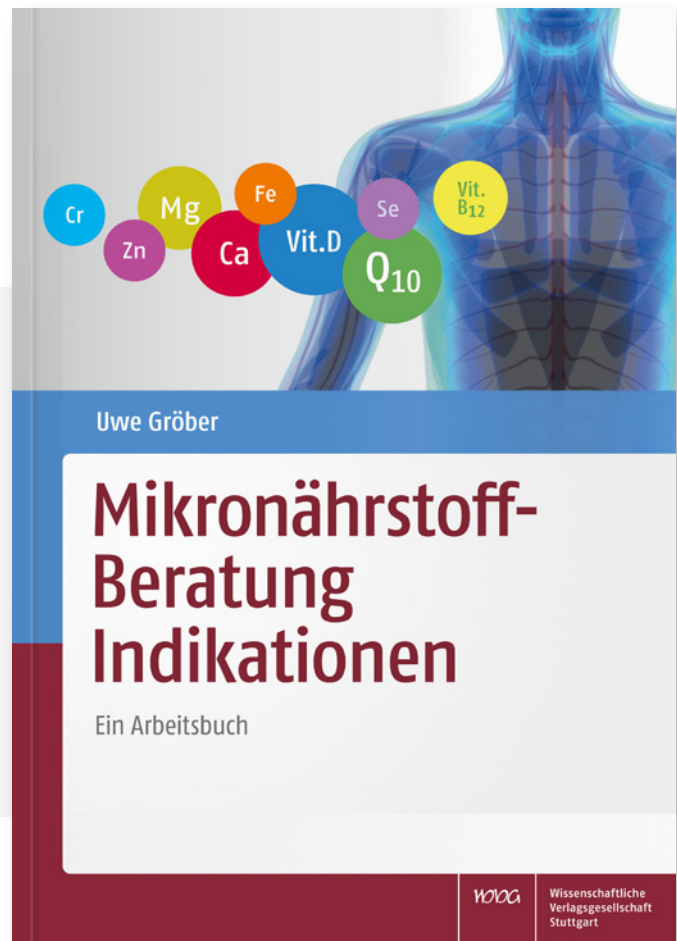

A workbook

By Uwe Gröber.

2020. VII, 129 pages. Format 20.5 x 29 cm.

Softcover. € 34.80 [D]

ISBN 978-3-8047-3953-6

In addition to taking their prescribed medicines, many patients wish to do something extra for their health. Micronutrient therapy offers a number of possibilities to improve the course of an illness, optimise its treatment or even prevent diseases from developing in the first place. Following many years of practical experience, the well-known author Uwe Gröber knows precisely which micronutrients are worth considering in various indications. In his workbook, he gives countless useful tips on the selection and use of micronutrients as well as on their suitability for different symptoms.

With this course book you will learn:

- Why micronutrients are appropriate in certain diseases,
- How the dosage of micronutrients is calculated and
- The underlying biochemical/physiological mechanisms.

The information is based on many studies in the area of micronutrient research.

The plus: the book contains a selection of questions about micronutrients to test your newly acquired knowledge!

Readership: Pharmacists, pharmaceutical technicians, interested persons

Building blocks of life

Amino Acids in Prevention and Treatment

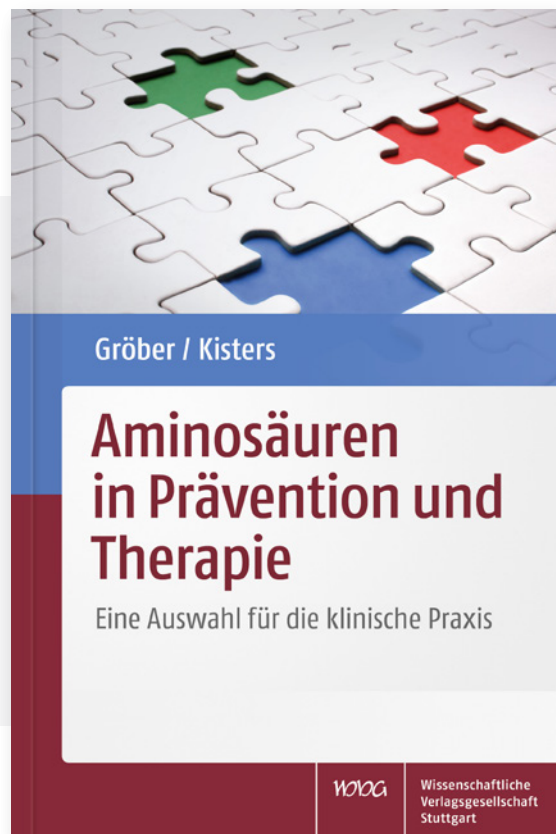

A selection for clinical practice

By Uwe Gröber and Prof. Dr. Klaus Kisters.

2020. 109 pages. 22 colour figures.

20 colour illustrations. Softcover. € 14.80 [D]

ISBN 978-3-8047-4093-8

In contrast to vitamins and minerals, for a long time, science paid only scant attention to amino acids, but this all changed when scientists Robert F. Furchgott, Louis J. Ignarro and Ferid Murad received the Nobel Prize for Medicine in 1998 for their work on amino acids.

Pharmacist Uwe Gröber, Head of the Academy for Micronutrient Medicine in Essen and Prof. Klaus Kisters, MD, Head of the Department of Medicine at St Anna Hospital in Herne – both experts in micronutrient medicine – have reviewed the subject and explain clearly and in practical terms:

- The importance of individual amino acids for our health
- How they are optimally used in combination with vitamins, minerals and trace elements
- Which diseases can be positively influenced in this way.
- Effects on colds and influenza, cold sores, diabetes, cardiovascular diseases, ADHD as well as stress and burnout are examined in more detail.

A further chapter is devoted to amino acids and their use in sportsmen and –women.

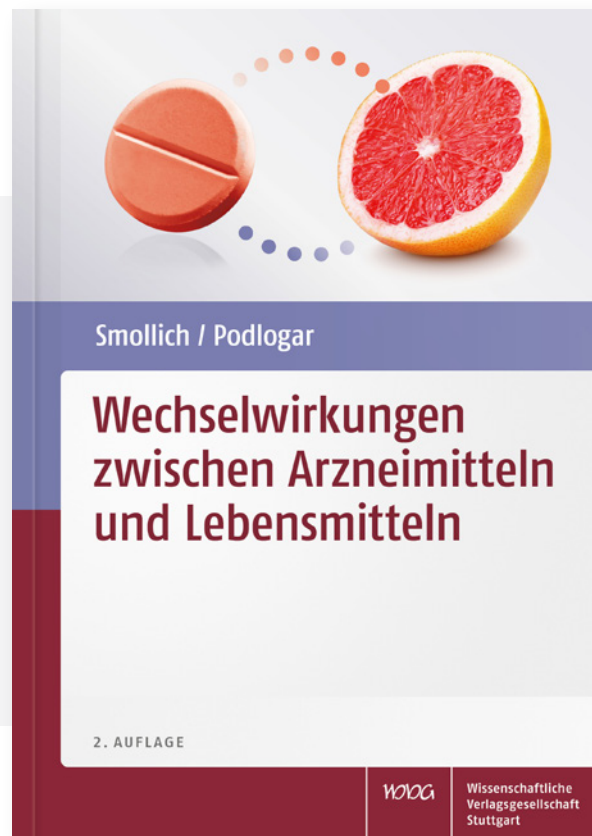

Readership: Pharmacists, pharmaceutical technicians, physicians

Before or after eating – and that's not all!

Interactions between Medicines and Food

By Prof. Dr. Martin Smollich
and Dr. Julia Podlogar.

2nd revised and enlarged edition 2020.
X, 134 pages. 21 colour figures.
19 colour tables. Softcover. € 29.80 [D]
ISBN 978-3-8047-4002-0

Interactions between medicines and foodstuffs may be just as clinically relevant as interactions between individual drugs. A single meal contains several hundred potentially interacting compounds that, in an individual patient, may be the deciding factor as to whether a treatment is successful or not. The resulting, sometimes serious risks are not known to most patients – nor to many physicians and pharmacists.

This practical handbook enables anyone interested in applied pharmacotherapy to keep abreast of the complex field of drug interactions. The authors – proven experts in clinical pharmacology and pharmaconutrition – describe the most important interactions and give concrete recommendations for action. Tables and overviews permit fast access to potentially problematic combinations.

This completely updated edition now also includes information about fruit juices and curcumin as well as a new chapter on food interactions in oncology.

Readership: Pharmacists, physicians, nutrition experts

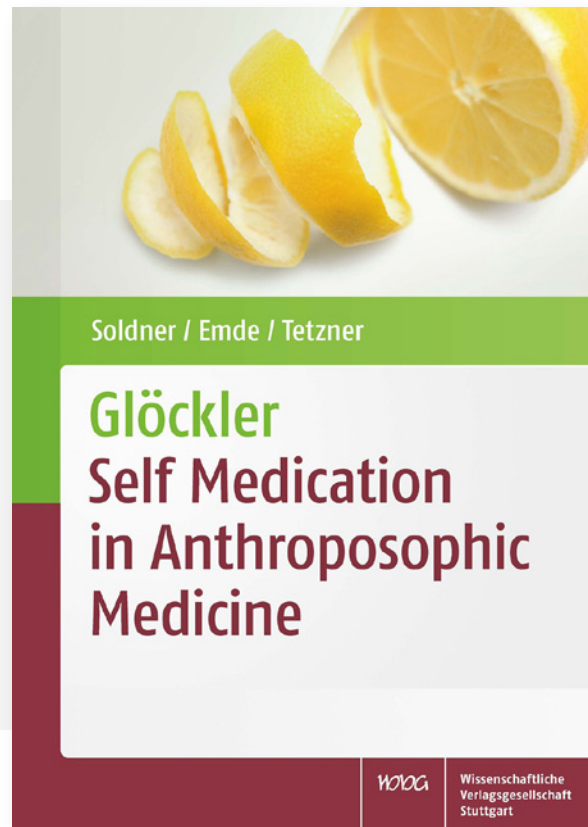

Strengthening the organism's self-regulation

Glöckler Self Medication in Anthroposophic Medicine

By Georg Soldner, Birgit Emde and Heide Tetzner.
Edited by Dr. Michaela Glöckler.

E-Book, PDF. 2020. 287 pages. € 54.00 [D]
ISBN 978-3-8047-3748-8

IN ENGLISH

Anthroposophic medicines are effective in such a way that they stimulate, strengthen, regulate and harmonise the organism's own activity in differentiated ways.

Patients and parents do not just need the help of experts, they are experts themselves. From their own experience as patients or parents, they often know very well which circumstances have triggered or repeatedly trigger the disease to be treated, which symptoms are in the foreground in cases of recurrent illness, which course of the disease is typical in their case and often also what aggravates or alleviates the symptoms.

This is the starting point of this publication, the authors provide:

- Brief descriptions of the symptoms described by patients or their parents
- Brief descriptions of the medications that are therapeutically suitable and have proven their worth in this constellation
- Detailed descriptions of their application, which can be adapted to the patient's respective age and individual circumstances

Readership: Pharmacists, physicians, alternative practitioners, pharmaceutical technicians, nursing staff

Chemistry – get in shape for your exam!

Chemistry I: Examination Questions

Original annotated questions through autumn 2017
General and inorganic chemistry for pharmacists

By Prof. Dr. Eberhard Ehlers.

2020. X, 562 pages. Softcover. With solutions to the MC questions in the appendix. € 41.00 [D]
ISBN 978-3-7692-7137-9

This catalogue of examination question is the ideal companion to the *Short Textbook on Chemistry I*. Together, both volumes help you prepare effectively for semester finals and for the first section of the German pharmaceutical licensing examination.

- 1788 original IMPP questions from the years 1979–2017
- With annotated solutions
- Covers Pharmacy I, or arranged by examination
- Comments use the same chapter numbering as the *Short Textbook on Chemistry I*
- Highlighting marks questions which have appeared more than once in the same wording.

Ace your exams with *Ehlers*!

Readership: Students of pharmacy

Holistic, indication-based, individualised

Anthroposophic Medicines

Advisory recommendations
for self-medication

By Birgit Emde and Juliane Riedel.

2nd revised and enlarged edition 2020.

XIII, 335 pages. 2 colour figures. 160 colour tables.

Format 11.5 x 16.5 cm. Flexible. € 32.00 [D]

ISBN 978-3-8047-3620-7

The selection of remedies in anthroposophic medicine is based on a differentiated human image – every patient appreciates such individualised recommendations!

In the new edition of their work, the two authors provide clearly structured, comprehensible information and recommendations. The new chapter “Pharmacy practice” provides, for each indication:

- Explanations of the anthroposophic approach to treatment,
- Questions to the customer about their medical history and differential diagnosis,
- Anthroposophic supplements to treatment for patients, who come to the dispensary with prescriptions or wishes for conventional medicines.

Readership: Pharmacists, pharmacy interns, pharmaceutical technicians

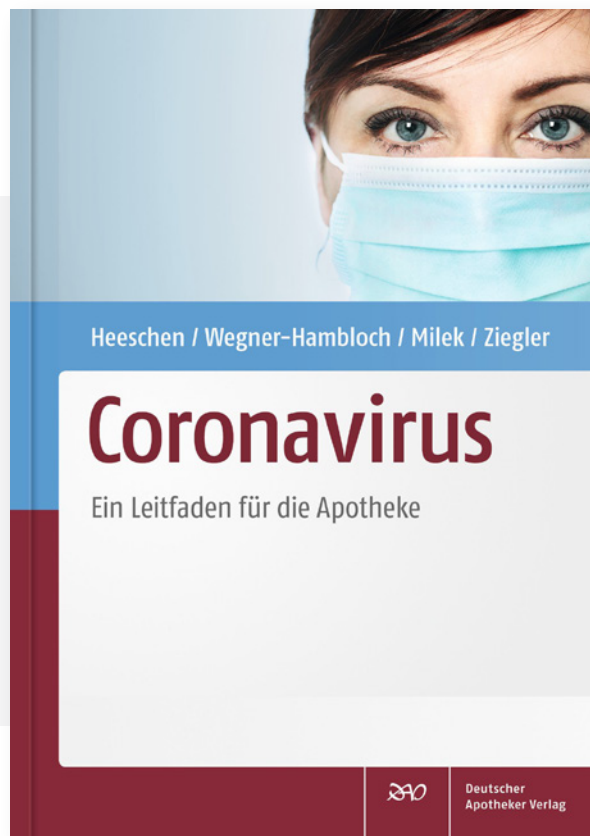

Coronavirus pandemic

Coronavirus

A guide for the pharmacy

By Prof. Dr. Walther Heeschen,
Dr. Sylvia Wegner-Hambloch,
Dr. Iris Milek and Dr. Andreas S. Ziegler.

2020. X, 73 pages. 2 colour figures.
4 colour tables. Softcover. € 19.80 [D]
ISBN 978-3-7692-7612-1

Although at first Covid-19 disease was only evident in China, during the months of January to March 2020, it spread across the whole world with far-reaching consequences.

This guide contains

- The background to the character of the virus and its spread
- Various information about the consequences for the operation of a pharmacy, including an emergency plan
- Precise instructions for the in-house production of disinfectants.

The guide also tackles questions and problems relating to employment law that arise in connection with the risk of infection in public premises.

Readership: Pharmacists, pharmaceutical technicians, hygiene managers

Last Minute Check – equipped for state examination day

By Dr. Uwe Weidenauer.

Last Minute Check – Pharmaceutical Technology / Biopharmacy

2nd revised edition 2020.
620 pages. 310 index cards.
Index card box. € 38.00 [D]
ISBN 978-3-8047-3983-3

By Christina Braun and Verena Kurth.

Last Minute Check – Clinical Pharmacy

2nd revised edition 2020.
726 pages. 363 index cards.
Index card box. € 38.00 [D]
ISBN 978-3-8047-3984-0

By PD Dr. Kristina Jenett-Siems.

Last Minute Check – Pharmaceutical Biology

2nd revised edition 2020.
620 pages. 310 index cards.
Index card box. € 38.00 [D]
ISBN 978-3-8047-3987-1

By Marlies Miertzsch.

Last Minute Check – Pharmaceutical / Medicinal Chemistry

2nd revised edition 2020.
620 pages. 310 index cards.
Index card box. € 38.00 [D]
ISBN 978-3-8047-3985-7

Preparations for the 2nd state examination are underway – and you are cramming for all you're worth. Do I know enough? Have I got the subject matter off pat? What will the questions be? Don't panic! Exam training and concise tests to check your learning progress are now worth their weight in gold!

The flash cards have been updated in the new edition.

- Relevant to the exam, because based on textbooks and actual exam questions
- Correct answers on the back of the cards enable instant checking
- Clear classifications in the card header

Whether a quick last-minute check or a simulated exam with fellow students – these cards will bring you safely over the finish line.

By Dr. Monika Neuback.

ISBN 978-3-8047-3986-4

Zielgruppe: Pharmacy students taking their 2nd state examination, university lecturers, state examination examiners, exam trainers

Successful graduation with the perfect logbook

The Pharmaceutical Technician Logbook

Tips on record keeping and
sample pharmaceutical calculations

By Heike Steen.

2020. VIII, 176 pages. 59 colour figures.

Format 21 x 29.7 cm. Softcover.

Download of blank sheets at Online-PlusBase.

€ 19.80 [D]

ISBN 978-3-7692-7363-2

The pharmaceutical technician students have almost made it: the first part of their training has been successfully completed, many exams have been passed and they are starting their six month internship in a wonderful pharmacy. Now they find themselves at the next milestone on the road to becoming a fully-fledged pharmaceutical technician: the internship logbook! The contents are laid down by the regulations governing the training and examination of pharmaceutical technicians. It is required before admission to the 2nd part of the examination and forms an important basis for the oral examination in the subject Pharmacy practice.

This logbook gives pharmaceutical technician interns the decisive incentive to keep their own individual records. It contains tips on how to achieve a logical, accurate, well-structured and visually perfect presentation of the contents. The second part of the book shows complete sample calculations for examples of individual and bulk formulations, tests on starting materials and selected topics of practical training in a pharmacy! The special added extra: free download of the blank sheets for tests and the preparation of pharmaceutical products at www.Online-PlusBase.de.

Readership: Pharmaceutical technician interns, pharmaceutical technician students, pharmacy managers, pharmaceutical technician schools

Traditional and new – a class of their own

Biogenic Drugs

Textbook of pharmaceutical biology

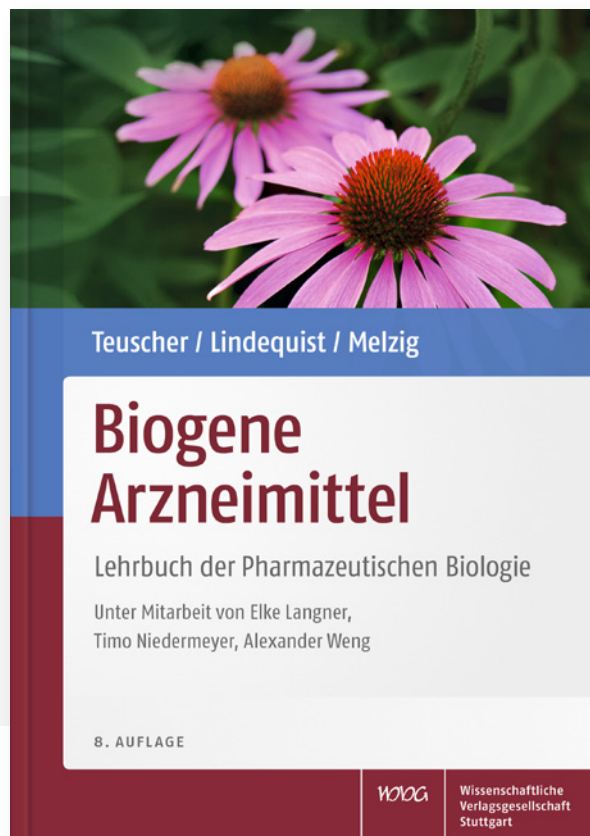

By Prof. Dr. Eberhard Teuscher, Prof. Dr. Ulrike Lindequist and Prof. Dr. Matthias F. Melzig. In collaboration with Dr. Elke Langner, Prof. Dr. Timo Niedermeyer and Dr. Alexander Weng.

8th revised and enlarged edition 2020.

XXIV, 898 pages. 234 colour figures.

22 colour tables. Hardcover. € 67.80 [D]

ISBN 978-3-8047-3607-8

The new *Teuscher* covers the range of relevant areas of biogenic drug substances and medicinal products. In its time-honoured way, it conveys knowledge about the

- Nature, origin and processing of crude drugs
- Structure, biosynthesis and metabolism of the constituents
- Preparation, pharmacology and use of the active substances
- Dosage and side effects of the medicinal products derived from them

The book deals with both classically produced and genetically engineered antibiotics, hormones, enzymes as well as blood and immunological products. Completely new chapters discuss cytokines, gene therapy, use of stem cells and traditional Chinese medicine.

For generations, the textbook and companion for both students and fully qualified professionals!

Readership: Students of pharmacy, biology, biochemistry, medicine and chemistry, pharmacists, physicians, biologists, natural products chemists, laypersons interested in the natural sciences and medicine

Insight into closed worlds – rethinking required?

Not available!

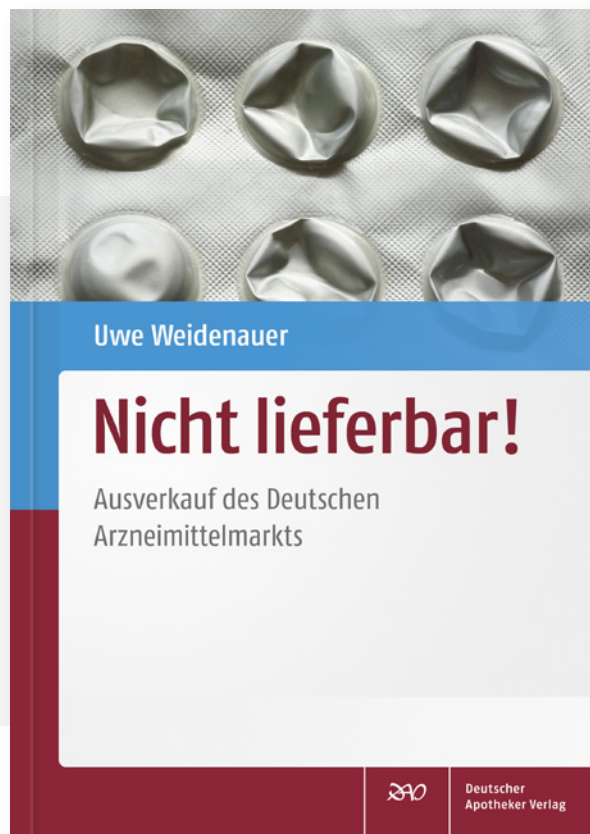

Out of stock on the German medicines market

By Dr. Uwe Weidenauer.

2020. XIV, 123 pages. 32 colour figures.

20 colour tables. Softcover. € 19.80 [D]

ISBN 978-3-7692-7613-8

“Unfortunately, your medicine is unavailable”. This statement has now become part of the standard repertoire of staff in many pharmacies. A serious, ever-growing problem. Key commodities are suddenly no longer available as a matter of course. Today people are aware that medicines do not come from local factories, but are the end products of global supply chains. Many important drugs have long since come from Asia.

Pharmacy has not remained immune to the effects of globalisation. Many things that happen in far-away markets affect the availability of a particular medicine in Europe.

But why is this so? And, most importantly, what can be done to combat it?

This book wants to help pharmacy staff give plausible answers to customers, nursing staff, doctors’ practices and health insurance schemes.

Readership: Pharmacy staff, physicians, health insurance companies, nursing care services, health authorities

Through cabinets of curiosities, herbariae and poison chambers

Calendar for Pharmacists 2021

Edited by Oswald Peer.

2021. Twelve four-colour prints on art paper with calendar and, on the reverse, detailed descriptions and suggestions for further reading. Coloured title page. Format 49 x 49 cm. Spiral bound with eye for hanging up the calendar. Explanatory texts in English and German. € 94.00 [D]
ISBN 978-3-7692-7561-2

IN ENGLISH AND GERMAN

Our contribution for the year 2021 is a calendar of a special kind. With the selection of the objects we travel to the beautiful city of Bressanone, where there is a jewel of the European pharmacy and pharmaceutical history: the Pharmacy Museum Bressanone – Il Museo della Farmacia Bressanone (www.pharmaziemuseum.it). The example of a Bressanone family of pharmacists tells the exciting and sometimes exciting story of medicines from the realm of minerals, animals and plants. All objects that we present to you are treasures from the traditional collection of the Museo della Farmacia, and our special thanks go to Dr. Oswald Peer. We would like to bring the selected exhibits to you again this year with interesting background information, stories from literature, art and handicrafts.

You will learn something about how elegant pocket spit bottles can be and why they are called 'Blauer Heinrich'. We show you one of the oldest European herbariums with almost a thousand dried and pressed plants, all of which come from the famous botanical garden in Padua. And we take you into the hermetically sealed poison chambers, where substances such as morphine, opiates or snake venom have been kept since ancient times. Our calendar also shows you how exciting the interior of historical pharmacy cabinets can be, especially when they house more than 200 drawers and what artistic and colourful variations the glass factories have made for the storage of tinctures, medicinal healing waters and herbal essences.

Readership: Pharmacists, physicians, art historians, historians of pharmacy and medicine

Lyme disease and ticks are surrounded by myths, trivialisation, ignorance and false information.

- Ticks don't fall off trees and don't live exclusively in forests,
- Ticks don't obey a strict calendar, but have a temperature sensor and are active at temperatures of 7 °C and above – even at Christmas time,
- There is no vaccine against Lyme disease.

Only someone, who addresses the Lyme disease infection on a factual basis, can recognise, overcome or even avoid it. This guide offers rapid information and help.

Putting young people in the focus

Nutritional Practice Infants, Children, Adolescents

Concise advisory knowledge

By Dr. Ute Alexy, Dr. Annett Hilbig and Frauke Lang.
Edited by Prof. Dr. Martin Smollich.

2020. XXIV, 402 pages. 37 colour figures.
105 colour tables. Hardcover. € 48.00 [D]
ISBN 978-3-8047-3395-4

Anyone giving responsible advice about questions on nutrition must have sound expert knowledge. This must not only be scientifically reliable, but must at the same time be relevant and practicable in the individual context.

The concept behind the book series **Nutritional Practice** is to provide the necessary translation of current research results and guidelines into recommendations suitable for everyday use. In accordance with this consistent, practical approach, the focus is on the individual person in his or her particular stage in their life.

The present volume is based on the various stages in life between infancy and adolescence. It therefore covers all questions about nutrition in health and disease from the first day of life to young adulthood.

Readership: Dietitians, nutrition experts, physicians, pharmacists, midwives

Concise advisory knowledge

Nutritional Practice Women and Men

Concise advisory knowledge

Edited by Prof. Dr. Martin Smollich. With contributions by Birgit Blumenschein, Dr. oec. troph. Annett Hilbig, Julia Kugler, Dr. Claudia Laupert-Deick, Julia Sausmikat and PD Dr. Birgit-Christiane Zyriax.

2020. XVIII, 308 pages. 30 colour figures.
75 colour tables. Hardcover. € 44.00 [D]
ISBN 978-3-8047-3394-7

This volume in the book series **Nutritional Practice** sheds light on gender-specific aspects of the prevention and treatment of dietary deficiencies in women and men.

Part I presents the principles, with an overview of the sociocultural influences on nutritional behaviour and differences in dietary practice between women and men, which lead to relevant consequences for gender-specific communication about nutrition.

Part II explains in practical detail the wide range of topics concerning nutrition in pregnancy and lactation.

Part III focusses on aspects of nutrition in life situations and on diseases that exclusively or predominantly occur in women. In addition to the menopause, these include various psychogenic eating disorders, breast cancer and polycystic ovary syndrome (PCOS).

"... simply a 'must have' book."

Effective local planning response to climate change

Make Communities Climate-fit

Microclimate, heatwaves and heavy rainfall – strategies for adapting urban and regional development to climate change

Edited by Dr. Claus-Peter Hutter and Dr. Karin Blessing.

2020. 182 pages. 4 colour tables. Contributions of the Baden-Württemberg Academy for Nature and Environmental Protection, volume 57.

Softcover. € 29.80 [D]

ISBN 978-3-8047-4071-6

Risks associated with climate change are generally most intensely experienced at the community level. Effects such as heat stress and extreme weather events are already clearly noticeable today. The result is a negative impact on the quality of life and serious damage to the economy.

These consequences present new challenges for the planning of green space and water management. Model projects carried out over a number of years show methods and ways by which a climate-responsive, multifunctional green-blue infrastructure can mitigate the effects of climate change on the urban environment.

This book summarises the proceedings of the Expert Meetings of the Stuttgart Regional Association and the Baden-Württemberg Academy for Nature and Environmental Protection.

Readership: Those interested in environmental topics and sustainability, local authority employees, teachers

The significance of the quantum theory

Quantum 8

Edited by Prof. Dr. Konrad Kleinknecht.

2020. 180 pages. 9 colour figures, 6 b/w figures.

Publication series of the Heisenberg Society, volume 8. Format 12.5 x 19 cm. Hardcover.

€ 29.00 [D]

ISBN 978-3-7776-2867-7

Quantum 8 contains the lectures given at the September 2019 Annual Meeting and Assembly of the Heisenberg Society. The physicist Thomas Klar describes the discovery of laser-assisted optical super-resolution microscopy, for which Eric Betzig, Stefan Hell and William Moerner were awarded the Nobel Prize for Chemistry. Barbara Blum-Heisenberg gives an impressive account of how music and philosophy acted as sources of creativity for her father, Werner Heisenberg. The print version of the German original version of the lecture that Heisenberg gave in Copenhagen in 1955 to celebrate the 70th birthday of Niels Bohr is also included. In this lecture, which came to be known as the Copenhagen Interpretation, Heisenberg described how the meaning of quantum theory was developed.

The Heisenberg Society is committed to disseminating the intellectual heritage of Werner Heisenberg, is working to ensure the digital recording and processing of his written legacy and organises workshops for teachers of quantum physics.

Who's afraid of SNR – LFO – BPM – FOC – MSB – VHF – PWM?

Audio Engineering

for special events technicians
in training and on the job

By Christoph Grzesinski.

Founded by Dr. Volker Smyrek.

4th completely revised edition 2020.

XXIV, 588 pages. 714 figures. 71 tables.

Softcover. With 152 exercises. € 48.00 [D]

ISBN 978-3-7776-2819-6

We all know that audio engineering is more than just acronyms. But what do they all mean?

This practical textbook is designed to meet the special needs of events technicians. The textbook stands out from the crowd because it is designed specifically with the university curriculum and professional needs in mind, making it not only an excellent companion in the classroom, but a useful reference for on the job as well.

The author, himself an instructor for special events technicians, covers the ground from physical fundamentals of acoustics and electronics to setting up mixing consoles and sound systems, providing a multitude of useful tips without confusing the reader with extraneous details. A chapter on video technology rounds off the book.

Sample calculations put the material in a practical context, and sample problems at the end of each chapter (with solutions in the appendix) help review what has been learned and inspire further thought. Entertaining guest essays provide a broader perspective.

Readership: Special events technicians and specialists

Standard work on the history of the German language

Wilhelm Schmidt

History of the German Language

A textbook for German studies

Part 1: Introduction, prehistory and history

Part 2: Old High German, Middle High German and Early New High German

Edited by Dr. Elisabeth Berner and
Prof. Dr. Dr. h.c. Dr. h.c. Norbert Richard Wolf.

12th edition 2020. XLII, 509 pages. 16 figures.

Softcover. € 34.00 [D]

Prepublication price valid until 15.11.2020: € 29.00 [D]

ISBN 978-3-7776-2775-5

The 12th revised and updated version of the *History of the German language* – long regarded as an indispensable standard work for German Studies, has just been published. From now on, this comprehensive textbook on the history of the language is divided into two volumes.

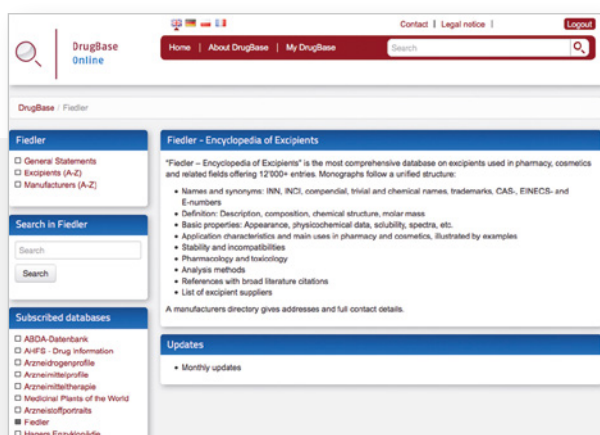

In addition to introducing questions about historical linguistics, the first volume provides a detailed account of the prehistory and history of German right up to the present day. Based on extensive source analyses, the focus is on aspects of culture and social history; only the chapters on the Indo-Germanic and Germanic language include key information about structural history.

The second part contains concise, but readily understandable accounts of Old, Middle and Early New High German in terms of phonology, graphemics, morphology and syntax. Not only are synchronous descriptions given of the particular language period, but also the development of German language construction at all structural levels is explained. The association of grammatical synchrony and structural diachrony is a particular characteristic of this second part of Schmidt's work on the history of language.

Readership: Students of German studies, medievalists

Fiedler – Encyclopedia of Excipients

at www.DrugBase.de

Revised by Dr. Martin Holzer.

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies: € 232.00 plus VAT*

For hospital pharmacies: € 464.00 plus VAT*

For pharmaceutical companies: € 928.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

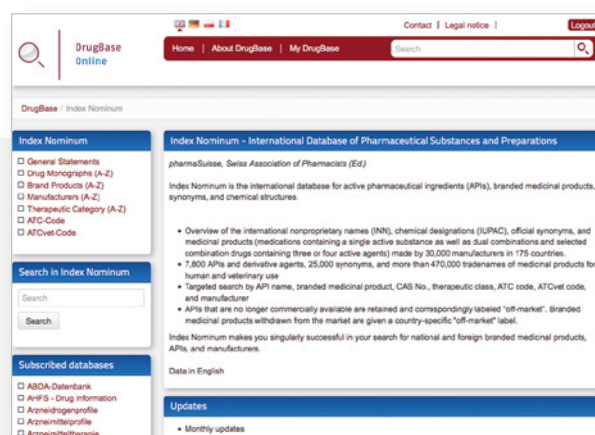

Fiedler – Encyclopedia of Excipients is the most comprehensive database on excipients used in pharmacy, cosmetics and related fields offering **more than 12,000 entries**. Monographs follow a unified structure:

- Names and synonyms: INN, INCI, compendial, trivial and chemical names, trademarks, CAS-, EINECS- and E-numbers
- Definition: Description, composition, chemical structure, molar mass
- Basic properties: Appearance, physicochemical data, solubility, spectra, etc.
- Application characteristics and main uses in pharmacy and cosmetics, illustrated by examples
- Stability and incompatibilities
- Pharmacology and toxicology
- Analysis methods
- References with broad literature citations
- List of excipient suppliers

A manufacturers directory gives addresses and full contact details.

Readership: Pharmaceutical and cosmetic industries, research organisations, laboratories, suppliers, authorities, colleges / universities, pharmacies

Index Nominum – International Drug Directory

at www.DrugBase.de

Edited by pharmaSuisse, Swiss Association of Pharmacists.

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies:

€ 338.00 plus VAT*

For hospital pharmacies: € 676.00 plus VAT*

For pharmaceutical companies: € 1,352.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

Index Nominum is the international database for active pharmaceutical ingredients (APIs), branded medicinal products, synonyms, and chemical structures.

- Overview of the international nonproprietary names (INN), chemical designations (IUPAC), official synonyms, and medicinal products (medications containing a single active substance as well as dual combinations and selected combination drugs containing three or four active agents) made by **30,000 manufacturers** in **166 countries**.
- **8,100 APIs** and derivative agents, **26,000 synonyms**, and **more than 470,000 tradenames** of medicinal products for human and veterinary use
- Targeted search by API name, branded medicinal product, CAS No., therapeutic class, ATC code, ATCVet code, and manufacturer
- APIs that are no longer commercially available are retained and correspondingly labelled "off-market". Branded medicinal products withdrawn from the market are given a country-specific "off-market" label.
