Professional handling of medication in nursing and care settings

Drug Products in Nursing and Care Practice

Safe handling of medication

By Dr. Ulrich R  th and Friedhelm Kamann.

2023. XV, 365 pages. 165 colour figures.

104 colour tables. Softcover. € 34.80 [D]

ISBN 978-3-8047-4205-5

The assessment of nursing and care needs and the organisation and quality assurance of nursing care are key tasks performed by nursing staff. This also includes administering medication, something which requires sound organisation, control, implementation and documentation. Nurses observe whether medication is taken consistently, has the desired effect, and whether undesirable side effects occur. The drug product as a „special commodity“ – whether in inpatient long-term care, in outpatient care, or in hospital – requires special knowledge concerning

- correct storage,
- the pharmacological effect, and
- appropriate application.

This book is geared towards the diseases and symptoms of people requiring nursing or care. All the important facts concerning the use of medicines are presented here in an understandable manner, focusing on the essentials. Numerous illustrations and practical tips provide the link to everyday nursing care. It is the ideal textbook and reference work for nursing and care assistants as well as nursing professionals.

Readership: Trainee nursing professionals, trainee nursing and care assistants, nursing professionals, nurses, geriatric nurses, employees of outpatient care services, nursing and care staff

Gentle remedies for our furry friends

Homoeopathy for Cats and Dogs

By Dr. Daniela Birkelbach.

2023. XI, 347 pages. Format 11.5 x 16.5 cm.

Flexible. € 26.00 [D]

ISBN 978-3-8047-3490-6

Alternatives or supplements to conventional medicine for cats and dogs? Yes, homoeopathy provides holistic therapeutic approaches for our four-legged friends too! Whether they are suffering from anxiety, conjunctivitis, or a tick bite, this book describes the appropriate homoeopathic remedies. The author draws on her many years of experience as an animal healer and presents the most important symptoms and their treatment using homoeopathy.

This handy paperback fits into a lab coat pocket and provides:

- Basic information on homoeopathy for dogs and cats
- Symptoms from A to Z
- Characteristics of the most important single-remedy homoeopathic preparations

Readership: Pharmacies, homoeopathic veterinarians and animal healers, interested laypersons (animal owners)

Stay healthy through the COVID-19 pandemic

COVID-19 and Long-COVID

Better resilience through immune-relevant micronutrients

By Uwe Gröber.

2nd edition 2023. 240 pages.
14 colour figures. 6 colour tables.
Hardcover. € 32.80 [D]
ISBN 978-3-8047-4329-8

There is still no drug that can cure COVID-19 and late complications are not yet predictable. It is therefore all the more important that the body's own immune system is adequately supplied with micronutrients. This is the only way that the biochemical defence mechanisms can function smoothly. The reader will discover

- which micronutrients are relevant for the immune system,
- why SARS-CoV-2 can affect several different organs and an increasing number of late complications become evident as Long-COVID,
- how micronutrients can promote resilience.

This book is unique! For the first time, the ramifications of a COVID-19 infection are explained at a cellular level. The results of new studies are incorporated in every case. The effects of corona vaccinations were newly included in the second edition. The remarks are supported by extensive references.

Readership: Pharmacists, pharmaceutical technicians, nutrition experts, physicians

Drug products individually packaged for the patient

Compulsory Training Preparing and blistering

Pursuant to Art. 34 ApBetrO

By Manuela Queckenberg.

2nd updated and enlarged edition 2023.
IV, 92 pages. 37 colour figures. Format 29.7 x 21 cm.
Spiral pad with tabletop display, 43 PowerPoint
slides, Online-PlusBase. Approx. € 53.00 [D]
ISBN 978-3-7692-8020-3

If medicines are prepared or blistered in advance, this not only saves time during the course of nursing care but also prevents medication errors. Section 34 of the German Ordinance on the Operation of a Pharmacy (ApBetrO) regulates the procedure and at the same time stipulates staff training. This is the perfect tool to use!

The whole field of preparing and blistering, presented on 43 slides:

- **Basics:** definitions and statutory requirements
- **Requirements:** rooms, staff, hygiene, and occupational safety and health
- **Prerequisites:** quality and plausibility
- **Drug products:** whitelist and blacklist
- **Manufacture:** from deblistering to labelling

The content of the 2nd edition has been updated. The volume now contains many new photos and illustrations. Training slides, explanatory text and the form for documenting the training can be found as usual on the tabletop display and for download.

Whether new employees or old hands – everyone benefits!

Readership: Pharmacists and pharmaceutical technicians in community pharmacies and hospitals, pharmacies supplying care homes

Striking the right note

Talking to Customers in Pharmacies

A conversation guide
for newcomers and old hands

By Dr Kirsten Lennecke.

Illustrated by Barbara Kohm.

5th updated and enlarged edition 2022.

X, 241 pages. 38 figures, including 8 caricatures;

one QR code. 15 tables. Softcover. € 34.80 [D]

ISBN 978-3-7692-7920-7

The basis for successful advice is having a sound knowledge of the effect and application of medicines, but also an instinct for the individual needs and characteristics of the person asking for your help. This skill can be trained!

Entertaining explanations and numerous case examples taken from everyday pharmacy practice help with this. They show how pharmacy staff can react empathetically, avoid misunderstandings, and manage delicate situations with confidence.

The 5th edition has become more colourful! This applies not only to the illustrations, but also to the team and customers of our model pharmacy. A personality model with distinctive colours representing the different characters promises exciting insights.

Good communication creates satisfied customers who want to come back again and again!

Readership: Pharmacists, pharmaceutical technicians

Treatment with a plan

Medication Analysis

Basic principles and case examples

Edited by Pharm. D. Ina Richling.

2nd edition 2023. XXII, 407 pages. 31 colour figures. 19 QR codes. 123 colour tables.

Pharmaceutical services „pDL“.

Softcover. € 48.00 [D]

ISBN 978-3-7692-7953-5

Several different pills prescribed by many different physicians: pharmacists encounter patients in this situation every day! What at first seems quite normal can, on closer inspection, be fraught with considerable risks of drug-related problems. Using this analysis as a core component of medication management, pharmacies have the key risk minimisation tool at their disposal.

The authors guide their readers step by step through the discussions with the patient, the stages of the analysis, and the clear documentation. Case examples reflect on the content and illustrate implementation.

The launch of pharmaceutical services enables an improvement in the safety and efficacy of customers' drug therapy in the pharmacy by means of the service „Extended medication counselling for polymedication“. Everything pharmacists need to know for the necessary medication analysis can be found in this book. This completely revised 2nd edition includes:

- Important information on pharmaceutical services
- Illustrative case examples on many indications
- QR codes that lead to additional digital material

Whether it is a detailed adjustment or a major change to medication: every patient benefits from the intervention.

Readership: Pharmacists

Here at last – the pharmaceutical services!

High Blood Pressure

Standardised risk assessment

By Pharm. D. Ina Richling
and Dr. Constanze Schäfer MHA.

2023. X, 89 pages. 25 colour figures.
22 tables. Pharmaceutical services „pDL“.
Format 21 x 29.7 cm. Softcover. € 28.00 [D]
ISBN 978-3-7692-8059-3

The „Standardised risk assessment of high blood pressure“ enables every pharmacy to easily expand its range of services. This tool provides the pharmacy staff with the basis for providing such a service. It contains clear information on the development of hypertension and guideline-based drug therapy. Step by step, the user is guided through practical blood pressure measurement according to standard operating procedures through to individual advice and subsequent billing.

This tool contains the following supplementary information:

- Legal requirements for handling medical devices and/or blood pressure monitors
- Frequently asked questions and case examples
- What one should know about quality management
- Work aids and forms as copy templates

Readership: Pharmacists, pharmaceutical technicians

Pharmacology – easier than ever

Pharmacology

320 index cards
With questions and answers
on the use of medicines

By Dr. Thomas Wurm.

4th completely revised and enlarged edition 2023.
344 pages. Format 14.8 x 10.5 cm. Card index box.
€ 42.80 [D]
ISBN 978-3-7692-7932-0

Whether treating diabetes, pain, or high blood pressure, the correct use of medicines is important and must be learned. The index cards are clearly structured and guide the user through the major topics. For example, they

- explain basic physiological principles,
- explain the principles of pharmacotherapy, and
- describe the correct use of medicines.

The set of cards is rounded off with short profiles of the most important drug classes associated with the respective topics.

In addition to factual updates, the completely revised edition features a new layout in which the learner moves intuitively through the subject, allowing the content to be learned and revised in a structured way.

**So that no question remains unanswered:
whether when learning or in subsequent professional life.**

Readership: Pharmaceutical technicians and trainees, pharmacists,
returnees to the profession, medical students

Towards greater biodiversity

Enhance Knowledge of Species, Preserve Biodiversity

Documentation of the Status Colloquium of the Academy for Nature and Environmental Protection Baden-Württemberg marking the launch of the Integrative Taxonomy Initiative of the State of Baden-Württemberg

Edited by Michael Eick and Dr. Daniel Baumgärtner.

2023. 124 pages. Contributions of the Academy for Nature and Environmental Protection Baden-Württemberg, volume 60. Softcover. € 22.00 [D]

ISBN 978-3-7776-3317-6

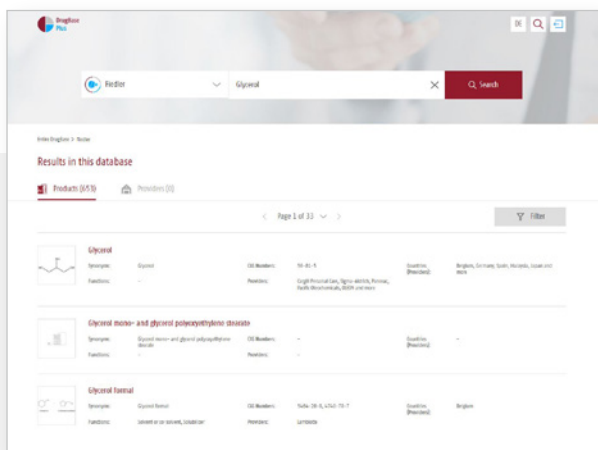

The state initiative „Integrative Taxonomy Baden-Württemberg“ was launched in 2019 to counteract the progressive extinction of species. The initiative aims to educate and train experts, providing them with sufficient species knowledge, and to strengthen taxonomic competence in society. It is supported by two pillars: firstly, imparting species knowledge in research and teaching at the University of Hohenheim and the State Museum of Natural History Stuttgart, and secondly, the further education and training centre at the Academy for Nature and Environmental Protection Baden-Württemberg that furthers species knowledge in a target-group specific way.

The conference transcript documents the Status Colloquium of the Academy for Nature and Environmental Protection Baden-Württemberg marking the start of the state initiative „Integrative Taxonomy Baden-Württemberg“. Based on 21 contributions, it presents the necessity of imparting species knowledge at all levels in Baden-Württemberg, and also the activities of the environmental academies in the BANU network for more qualification and nationwide certification. In addition, a look is taken at what is being done in this field in neighbouring German-speaking countries.

Readership: Administration departments, public authorities, ecologists, politicians, and people interested in nature and environmental issues

Fiedler – Encyclopedia of Excipients

at www.drugbase.plus

Revised by Dr. Martin Holzer.

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies: € 274.00 plus VAT*

For hospital pharmacies: € 548.00 plus VAT*

For pharmaceutical companies: € 1,096.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.

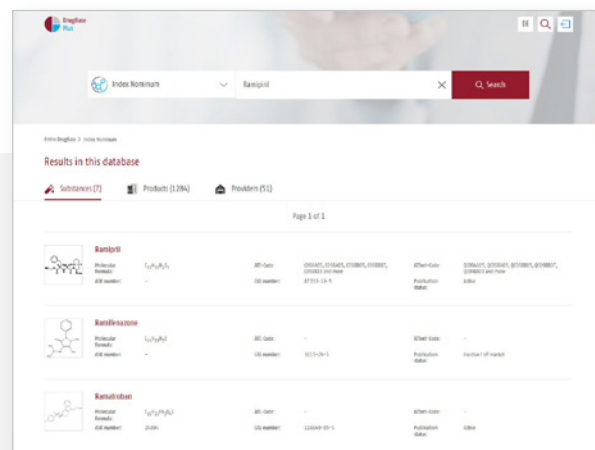

Fiedler – Encyclopedia of Excipients is a comprehensive database on excipients used in pharmacy, cosmetics and related fields offering **more than 12,000 entries**. Monographs follow a unified structure:

- Names and synonyms: INN, INCI, compendial, trivial and chemical names, trademarks, CAS-, EINECS- and E-numbers
- Definition: Description, composition, chemical structure, molar mass
- Basic properties: Appearance, physicochemical data, solubility, spectra, etc.
- Application characteristics and main uses in pharmacy and cosmetics, illustrated by examples
- Stability and incompatibilities
- Pharmacology and toxicology
- Analysis methods
- References with broad literature citations
- List of excipient suppliers

A manufacturers directory gives addresses and full contact details.

Readership: Pharmaceutical and cosmetic industries, research organisations, laboratories, suppliers, authorities, colleges / universities, pharmacies

Index Nominum – International Drug Directory

at www.drugbase.plus

Yearly subscription fee for one concurrent user from one location:

For community / retail pharmacies: € 409.00 plus VAT*

For hospital pharmacies: € 818.00 plus VAT*

For pharmaceutical companies: € 1,636.00 plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.

Index Nominum is the international database for active pharmaceutical ingredients (APIs), branded medicinal products, synonyms, and chemical structures.

- Overview of the international nonproprietary names (INN), chemical designations (IUPAC), official synonyms, and medicinal products (medications containing a single active substance as well as dual combinations and selected combination drugs containing three or four active agents) made by **30,000 manufacturers** in **166 countries**.
- **8,100 APIs** and derivative agents, **26,000 synonyms**, and **more than 610,000 tradenames** of medicinal products for human and veterinary use.
- Targeted search by API name, branded medicinal product, CAS No., therapeutic class, ATC code, ATCvet code, and manufacturer.
- APIs that are no longer commercially available are retained and correspondingly labelled "off-market". Branded medicinal products withdrawn from the market are given a country-specific "off-market" label.

Index Nominum makes you singularly successful in your search for national and foreign branded medicinal products, APIs, and manufacturers.

Readership: Pharmacists, authorities, pharmaceutical industry and wholesale
