

# Sea/net

## Upgrade your shipping market intelligence.

- A single view of AIS, land, vessel, port, cargo and commodity data.
- Visualise positions, port traffic and weather.
- Create and manage multiple fleets. Filter by vessel type, ownership, size, laden-status, year and more.
- Set up alerts based on vessel status, expected time of arrival, zone entry, actual arrival and departure.

### 2,900

Users including owners, charterers, brokers & analysts

### CRSL

Powered by the world's most authoritative database.

### 9,000

Vessel positions updated every five seconds, including barges.

### 18,000

Data points on which to base any type of market analysis.

## Deeper insights. Better strategies.

- Inform better trading strategies with reliable real-time and historic data.
- Filter and export data by vessel, fleet, port, zone or custom polygons.
- Analyse activity, spot business opportunities and create informed trading positions.
