DGT boards are used at
Olympiads,
World Championships
and all chess events
around the world.

DGT LIVE BOARDS

Chess Competitions

DGT boards have many uses but are best known for their use at chess competitions where they register the games in real time and show the moves on screens or on the website. With DGT boards the whole world can follow your chess games live.

Wooden Live Boards

Connect any number of boards together for a tournament set-up. The traditional wooden boards are available in Walnut, Rosewood or Wengé.

Plastic Smart Boards

Smart Boards are energy efficient, fast and accurate, lightweight and highly affordable. Fully compatible for a tournament set-up with wooden boards. The DGT3000 clock connects to all DGT boards.

Showing chess games live in real time via the internet is made easy with the free DGT LiveChess software and free Cloud Service - livechesscloud.com

DGT boards
are an inspiration
for the
serious player.

DGT e-BOARDS

BLUETOOTH e-BOARDS

Many uses of DGT boards

Apart from their well-known use in tournaments, DGT boards are also very popular at home and for private use. The boards connect to your laptop, PC, smartphone or tablet. DGT boards recognize each individual chess piece and combine the classical side of traditional wooden chess with unique 21st century technology.

Use the boards to:

- Record your games and retrieve them later for analysis or publication
- Broadcast your games live online
- Play online at chess websites and applications such as PlayChess, Lichess and Chess.com
- Play against chess engines on your PC, smartphone or online
- Play, train, analyze and learn by connecting the DGT Pi Chess Computer

The wireless Bluetooth e-Boards have internal battery and can record your games anywhere.

All you need
is a connection!

DGT PEGASUS

Dedicated board for online chess

Play without screens!

Play on an elegant sensor chessboard, on your favourite chess platforms, against old or new friends and without using any screens. You can connect with the DGT app or others, such as the Chess.com app (Android only).

Use the app

Use the free DGT Chess app to connect your phone with the board. The app then connects to Lichess, a global chess community where you can play against millions of opponents. The DGT Chess app is available in the Google Play Store and App Store.

After connecting with an opponent, you can put your phone away and concentrate fully on the board. You will see your opponent's moves via pulsing LED rings on the board.

New modern set,
registered design
by DGT.

MODERN STAUNTON

TIMELESS

PLASTIC

Electronic Chess Pieces

Selection of chess pieces is a very personal matter. DGT offers a selection of fine handmade sets for use on the electronic boards.

Most chess players prefer a slightly heavier feel of a piece when they make a move so all DGT sets are also available in a weighted version. Weighted sets are around 220-260 gram heavier than the unweighted regular version.

All sets are supplied with two queens for each colour.

Regular set Weighted set

Modern Staunton	720 g / 25.4 oz	940 g / 33.1 oz
Timeless	680 g / 24.0 oz	920 g / 32.5 oz
Plastic	Weighted only	990 g / 34.9 oz

DGT chess pieces
are compatible with
all wooden e-Boards
and Smart Boards.

CLASSIC

EBONY

ROYAL

FIDE

Electronic Chess Pieces

The exclusive Ebony set is made from real black ebony wood.

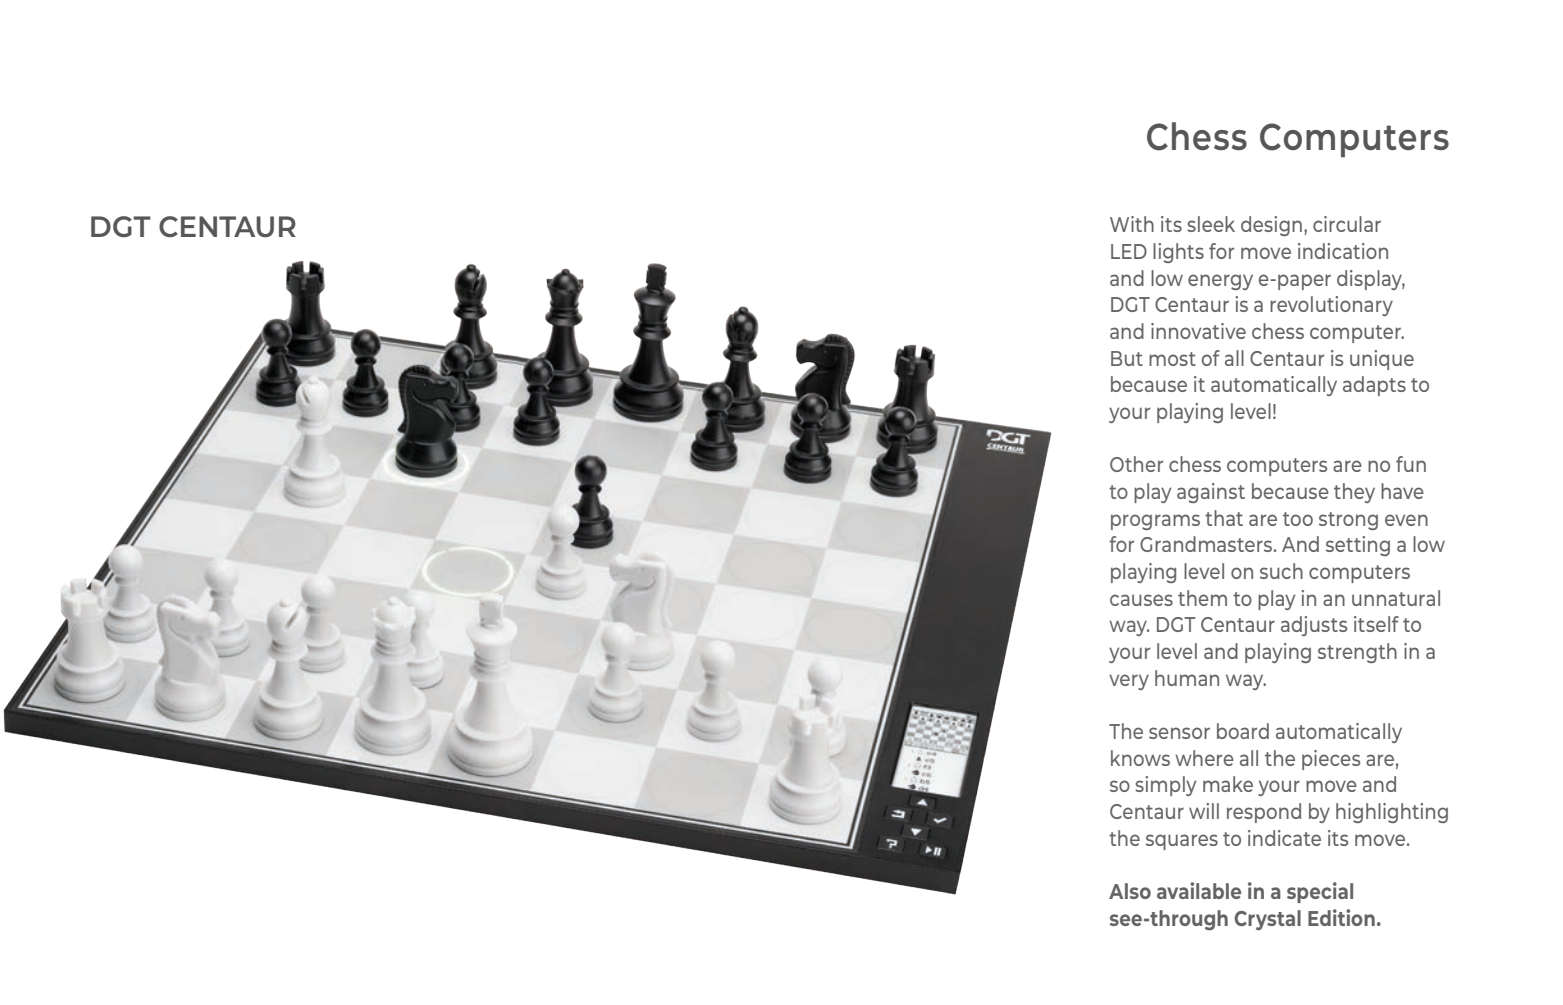

The Official FIDE Set is used at World Championship matches since 2013.

All DGT chess pieces sets are supplied with two queens for each colour.

	Regular set	Weighted set
Classic	725 g / 25.6 oz	960 g / 33.9 oz
Ebony	730 g / 25.8 oz	985 g / 34.7 oz
Royal	760 g / 26.8 oz	1000 g / 35.3 oz
Fide	Weighted only	1000 g / 35.3 oz

Your
perfect
chess
friend!

DGT CENTAUR

Chess Computers

With its sleek design, circular LED lights for move indication and low energy e-paper display, DGT Centaur is a revolutionary and innovative chess computer. But most of all Centaur is unique because it automatically adapts to your playing level!

Other chess computers are no fun to play against because they have programs that are too strong even for Grandmasters. And setting a low playing level on such computers causes them to play in an unnatural way. DGT Centaur adjusts itself to your level and playing strength in a very human way.

The sensor board automatically knows where all the pieces are, so simply make your move and Centaur will respond by highlighting the squares to indicate its move.

Also available in a special see-through Crystal Edition.

DGT Pi

Chess Computers

DGT Pi is a chess computer and chess clock in one that connects to all electronic DGT boards.

It is a great training tool for analyzing games and positions as well as playing chess using a real board and pieces. Improve your skills and become a better chess player.

Many different chess programs are included offering you a great variety of strengths and playing styles to enjoy. Play against StockFish, Texel, Arasan, Rodent, Zurichchess, Wylde Chess, Galjoen, Soyuri, Floyd, Laser, Cinnamon, Robocide and Vajolet.

Connect a headset or speaker to your DGT Pi to hear the computer moves being spoken (in 5 languages) so you can fully focus on the game.

The most
advanced
professional
chess clock.

DGT3000

FIDE Championship Clock

The DGT3000 is the ultimate professional chess clock. In full accordance with FIDE rules and regulations and suitable for all occasions and purposes, at tournaments, at home, at the club, at chess academies or events.

It is the most advanced chess clock available and connects to all electronic DGT boards.

With twenty five pre-set options it incorporates all fashionable timing systems for Chess as well as options for Scrabble, Draughts, Go. Save up to five of your own favourite customized settings.

DGT3000 and its wood look Limited Edition version come with the reassurance of an exceptional manufacturer's warranty of five years!

DGT3000 LIMITED EDITION

Professional
chess clock
with audio!

DGT ECHO

SPEAKING CHESS CLOCK

Professional Audio Clock

To enable blind and visually impaired players to take part in official chess competitions, DGT developed an audio clock that pronounces the time. Through two earphones, one or both players can listen to the clock times. Players can press a button to hear their own remaining playing time or the opponent's time.

During set-up the menu is available in audio. The language spoken is English and the volume is adjustable.

The clock is made in highly visible contrasting black and yellow colours so that visually impaired players can better see it. The large display also benefits the visually impaired player. The DGT Echo is supported by the International Braille Chess Association (IBCA).

DGT Echo is an audio version of the FIDE approved DGT3000 chess clock and connects to all electronic DGT boards. It is the ultimate professional chess clock, with twenty five pre-set timing systems as well as options to save your own customized settings.

Official
chess clocks of the
International Chess
Federation FIDE.

DGT2500

If you go for the win, timing is everything

The DGT2500 is the new standard in game timing, approved and recommended by the International Chess Federation FIDE. A great DGT product developed to meet the needs of all players. With an intuitive design and a super clear display, keeping track of the playing time has never been easier. An all-round clock ideal for tournaments and home use. Setting the clock for a new game is simpler than ever. It is also perfect for arbiters at tournaments, with new features to make their job easier.

DGT2010

DGT2010 is the Official FIDE Chess Clock, approved and recommended by the International Chess Federation FIDE. It has timing methods for chess and many other two-player games such as Go and Scrabble.

A professional chess clock for use in any competition, club or home game.

Bestselling
all-round
chess clock.

DGT North American upgraded version

DGT NORTH AMERICAN

The DGT North American has been setting the standard in chess clocks for a dozen years, enhancing the gaming experience of chess players throughout North America. After years of delivering an exceptional product, it was time to improve it further. Listening closely to the players' needs, we have developed an updated version of the same outstanding clock.

The DGT North American is one of the bestselling chess clocks in the world. It covers all popular timing systems and has 27 pre-programmed timing options, as well as manual settings. It is tailored specifically for tournament play in North America. With a variety of new and improved delay options, it will continue to be the clock of choice for both players and tournament organisers.

When every
second counts.

The perfect clock for Blitz and Rapid Chess

DGT1500

Designed with fast-paced chess games in mind, DGT1500 is the perfect game timer when every second counts.

Unique to this model is the extra digit displaying 10's of seconds, a great feature to keep track of your remaining game time. The crystal-clear display is easy to read during intense games.

The easy setup process allows players to start their games with minimal delay, making it the go-to choice for single period quick encounters.

One of its standout features is the handicap option, allowing different times to be set for each player, adding an extra layer of strategy and fairness to the game.

This chess clock is not just a timekeeping device; it is a statement piece that reflects the innovation and elegance of modern chess.

DGT1002
