**DGT**  
Connecting the  
world through  
chess since 1993.

Since its founding in the early 1990s, DGT has been at the forefront of innovation in the world of chess. What began as a small project born in Enschede, the Netherlands, has grown into a global chess force.

By introducing the first digital chess clocks at a time when only mechanical clocks existed, DGT revolutionised the game and changed the rhythm of tournaments forever. Our clocks quickly became the “Official FIDE Chess Clock” and remain the world’s bestselling game timers.

DGT continued to reshape the landscape of chess with the introduction of electronic boards, allowing millions of fans to follow live games online, bridging the gap between the traditional game and 21st-century technology.

Our mission has always been to make chess more accessible to everyone. DGT’s continuous innovation, from smart boards to adaptive chess computers ensures that players of all levels can engage with the game on their terms.

By combining intuitive design with cutting-edge technology, DGT helped the chess community to thrive.

Our passion for the game, respect for its traditions, and our relentless pursuit of innovation continues to drive us forward. As we look to the future, we remain committed to enhancing the experience of chess, bringing people together, and setting new standards for how the world’s oldest game is played in the modern era.

**DGT**

Setting a new  
standard for the  
global chess  
community.

We wanted to design our own set of chess pieces that would stand as a testament to what DGT represents, a new standard in chess design that reflects our commitment to the game and its players. The result is a timeless, globally appealing set that can be enjoyed by everyone. A robust product built to stand the test of time, celebrating the enduring beauty of chess.

## New products

**DGT Boards**  
are used at  
Olympiads, World  
Championships  
and all chess events  
around the world.

DGT boards have many uses, but they are best known for their role in chess competitions. They register games in real time and display the moves on screens or online platforms. With the fast and accurate DGT boards, chess games can be broadcast live for the entire world to follow.

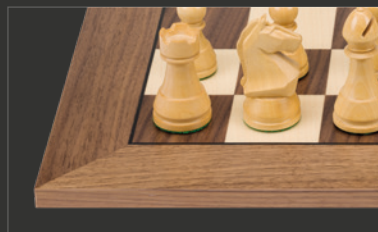

### Wooden Live Boards

Connect any number of boards together for a tournament set-up. The traditional wooden boards are available in Walnut, Rosewood or Wengé.

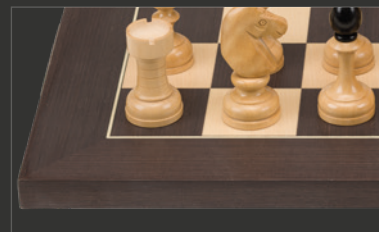

### Plastic Smart Boards

Smart Boards are energy efficient, lightweight and highly affordable. Fully compatible for a tournament set-up with wooden boards. The DGT3000 clock connects to all DGT boards.

Showing chess games live in real time via the internet is made easy with the free DGT LiveChess software and Cloud Service - [livechesscloud.com](http://livechesscloud.com).

## DGT e-Boards

Tradition meets  
technology.

Apart from their well-known use in tournaments, DGT boards are also very popular at home and for private use. The boards connect to your laptop, PC, smartphone or tablet.

DGT boards recognize each individual chess piece and combine the classical side of traditional chess with 21st century computer and internet technology.

Use the boards to:

- Record your games and retrieve them later for analysis or publication
- Broadcast your games live online
- Play online at chess websites and applications such as PlayChess, Lichess and Chess.com
- Play against chess engines on your PC, smartphone or online
- Play, train, analyze and learn by connecting the DGT Pi Chess Computer

The wireless Bluetooth e-Boards have an internal battery and can record your games anywhere.

DGT USB e-Board

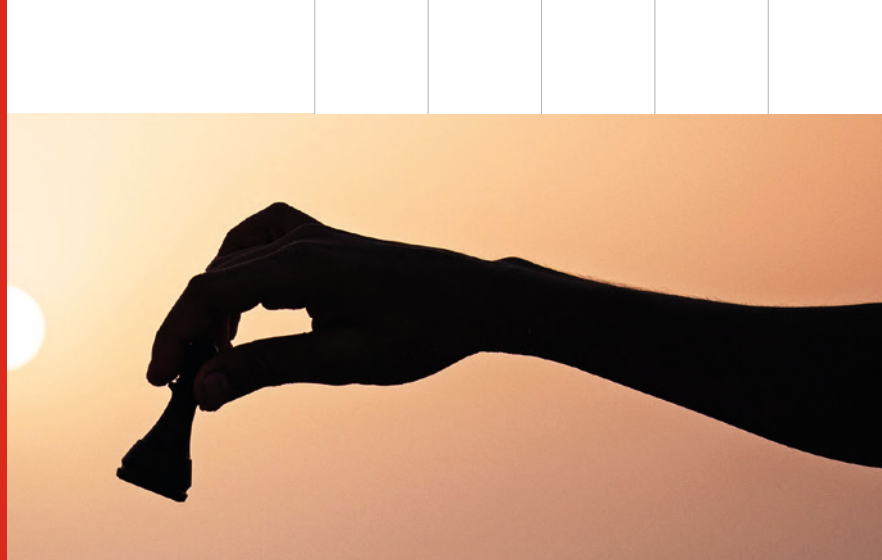

DGT Bluetooth Boards

## DGT Pegasus

All you need is a connection.

Dedicated board for online chess. Play on an elegant sensor chessboard, on your favourite chess platforms, against old or new friends and without using any screens. You can connect with the DGT app or others, such as the Lichess and Chess.com app (Android only).

### Use the app

Use the free DGT Chess app to connect your phone with the board. The app then connects to Lichess, a global chess community where you can play against millions of opponents. The DGT Chess app is available in the Google Play Store and App Store.

After connecting with an opponent, you can put your phone away and concentrate fully on the board. You will see your opponent's moves via pulsing LED rings on the board.

DGT Pegasus

# DGT

## Chess pieces.

New modern set, registered design by DGT. Selection of chess pieces is a very personal matter. DGT offers a variety of fine handmade sets for use on the electronic boards.

Modern Staunton

Most chess players prefer a slightly heavier feel of a piece when they make a move so all DGT sets are also available in a weighted version.

Weighted sets are around 220-260 grams heavier than the unweighted regular version.

The Official FIDE set has been used at World Championship matches since 2013.

All sets are supplied with two queens for each colour.

Timeless

FIDE

Classic

	Regular set	Weighted set
Modern Staunton	830 g / 29.2 oz	1080 g / 38 oz
Timeless	680 g / 24.0 oz	920 g / 32.5 oz
FIDE	Not available	1000 g / 35.3 oz
Classic	725 g / 25.6 oz	960 g / 33.9 oz

## DGT

Chess pieces are compatible with all wooden e-Boards and Smart Boards.

The exclusive Ebony set is made from real black ebony wood.

Made from high-quality plastic, the DGT Electronic Plastic pieces are an affordable alternative.

Designed around 1885 by sculptor Bohuslav Schnirch, the Czech Club set has been integral to Czech chess culture, featuring in prestigious tournaments.

All DGT chess pieces sets are supplied with two queens for each colour.

Plastic

Czech Club

Royal

	Regular set	Weighted set
Ebony	730 g / 25.8 oz	985 g / 34.7 oz
Plastic	Not available	990 g / 34.9 oz
Czech	845 g / 29.8 oz	Not available
Royal	760 g / 26.8 oz	1000 g / 35.3 oz

## DGT Centaur

Your perfect chess friend!

With its sleek design, circular LED lights for move indication and low energy e-paper display, DGT Centaur is a revolutionary and innovative chess computer. But most of all Centaur is unique because it automatically adapts to your playing level!

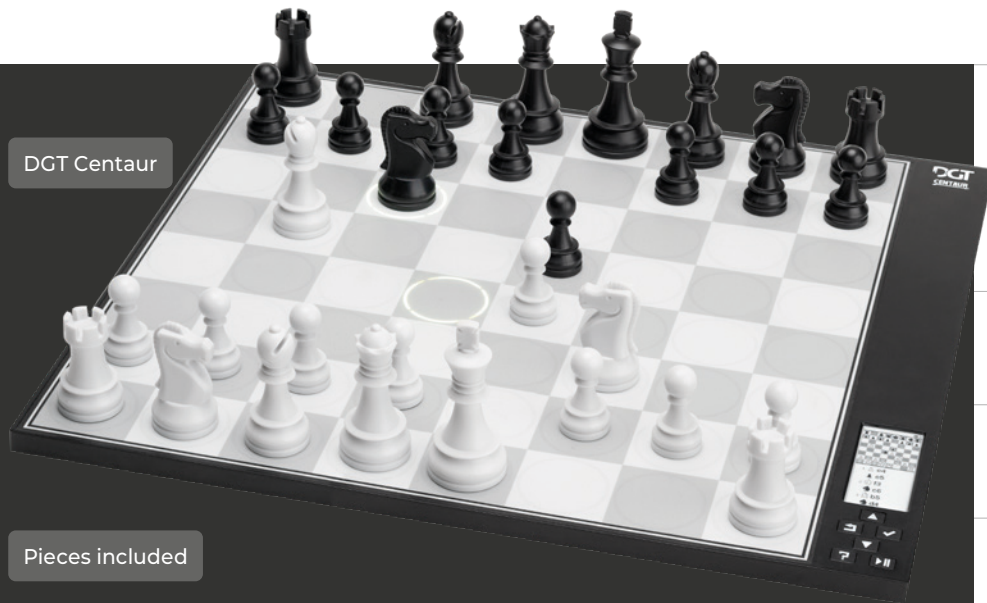

Other chess computers are no fun to play against because they have programs that are too strong even for Grandmasters. And setting a low playing level on such computers causes them to play in an unnatural way. DGT Centaur adjusts itself to your level and playing strength in a very human way.

The sensor board automatically knows where all the pieces are, so simply make your move and Centaur will respond by highlighting the squares to indicate its move.

Also available in a special see-through Crystal Edition.

DGT Centaur

Pieces included

## DGT Pi

Turn your DGT board into the ultimate sparring partner.

DGT Pi is a chess computer and clock in one that connects to all electronic DGT boards.

It is a great training tool for analyzing games and positions as well as playing chess using a real board and pieces. Improve your skills and become a better chess player.

Many different chess programs are included offering you a great variety of strengths and playing styles to enjoy. Play against Stockfish, Texel, Arasan, Rodent, Zurichess, Wylde Chess, Galjoen, Soyuri, Floyd, Laser, Robocide and Vajolet.

Connect a headset or speaker to your DGT Pi to hear the computer moves being spoken (in 5 languages) so you can fully focus on the game.

DGT Pi Chess Computer

## DGT3000

The most advanced professional chess clock.

### FIDE Championship Clock

The DGT3000 is the ultimate professional chess clock. In full accordance with FIDE rules and regulations and suitable for all occasions and purposes, at tournaments, at home, at the club, at chess academies or events.

### DGT3000 Limited Edition

DGT3000 and its wood look Limited Edition version come with the reassurance of an exceptional manufacturer's warranty of five years!

DGT3000 Limited Edition

## DGT Echo

### Professional chess clock with audio!

To enable blind and visually impaired players to take part in official chess competitions, DGT developed an audio clock that pronounces the time.

Through two earphones, one or both players can listen to the clock times. Players can press a button to hear their own remaining playing time or the opponent's time.

During set-up the menu is available in audio. The language spoken is English and the volume is adjustable. A spoken quick guide for the clock is available on the DGT website.

The clock is made in highly visible contrasting black and yellow colours so that visually impaired players can better see it. The large display further improves visibility, and the DGT Echo is supported by the International Braille Chess Association (IBCA).

DGT Echo is an audio version of the FIDE approved DGT3000 chess clock and connects to all electronic DGT boards. It is the ultimate professional chess clock, with twenty-four pre-set timing systems as well as options to save your own customized settings.

Speaking chess clock

**DGT2500**

**DGT2010**

Official  
chess clocks of the  
International Chess  
Federation FIDE.

A great DGT product developed to meet the needs of all players. With an intuitive design and a super clear display, keeping track of the playing time has never been easier. Setting the clock is simpler than ever. Adding penalty time is now faster and easier, with a one-button option that simplifies the job of arbiters at tournaments.

The DGT2500 is the new standard in game timing, approved and recommended by the International Chess Federation FIDE.

DGT2010 is the Official FIDE Chess Clock, approved and recommended by the International Chess Federation FIDE. It has timing methods for chess and many other two-player games such as Go and Scrabble. A professional chess clock for use in any competition, club or home game.

version

## **DGT1500**

When every  
second counts.

DGT1500

Designed with fast-paced chess games in mind, DGT1500 is the perfect game timer when every second counts.

Unique to this model is the extra digit displaying 10's of seconds, a great feature to keep track of your remaining game time. The crystal-clear display is easy to read during intense games.

The easy setup process allows players to start their games with minimal delay, making it the go-to choice for single period quick encounters.

One of its standout features is the time odds option, allowing different times to be set for each player, adding an extra layer of strategy and fairness to the game. This chess clock is not just a timekeeping device; it is a statement piece that reflects the innovation and elegance of modern chess.

DGT1500

## DGT1000 Series

DGT1002 is the simplest game timer with bonus options available anywhere. The DGT1002 has the popular bonus option whereby a certain amount of bonus time is added at each move. Use your DGT1002 with increments and never run out of time!

DGT1002
