

DGT USB e-Board

SUITABLE FOR HOME, SCHOOL OR CLUB

USB

No updates

2

Available in Walnut,
Rosewood or Wengé.

Product highlights

DGT e-Boards are the choice of professionals and amateurs alike. The USB e-Board connects to the computer via the USB cable. It is available in Wengé (pictured) or Rosewood, both with indices, or in Walnut without indices, and compatible with all electronic DGT chess pieces sets.

Individual piece recognition means that the board's sensor technology fast and accurately recognizes all individual pieces by colour and type. Use the innovative e-Board to record your games, play online, play against chess engines or broadcast your games live via the internet. The board stores up to 500 moves in its internal memory (power connection required).

The DGT 3000 chess clock connects to the board and the opponent's moves are shown on the clock's display. The board, pieces and accessories are supplied in a beautiful gift box.
