

Easy to change your Microsoft Account Phone Number

 Microsoft®
Office

Step 2: Once you sign-in, you will see the following page with many details about your Microsoft account. Click the **Security** tab.

Step 3: On this page, you should see options to change your password, update security information, and review recent activity. select **Update info** button.

Step 4: Clicking the Update info option will take you to the following page where you require to verify your identity by either selecting your current phone number or secondary email address.

Select one of the options, enter last four digits of your phone number currently associated with your Microsoft account or write the secondary email address, and then click **Send code** button to receive the verification code to your phone number or secondary email address.

The screenshot shows a web browser window with the address bar displaying "https://login.live.com/login.srf?wa=wsig". The page title is "Help us protect your account". The main heading is "Protect your account". Below the heading, the text reads: "Before you can access sensitive info, you need to verify your identity with a security code. How would you like to receive your code?". There is a dropdown menu with "Text" selected. Below this, the text says: "To verify that this is your phone number, enter the last 4 digits including [redacted], and click 'Send code' to receive your code." There is a text input field labeled "Last 4 digits of phone number". Below the input field, there is a blue link that says "I have a code" and a blue button that says "Send code".

Step 5: Write in the verification code. Click the **Submit** button to verify your identity.

Step 8: Select **A phone number** from the first drop-down box, select your country, enter your phone number which you want to associate with your Microsoft account, and select a method to verify the contact number (text & call).
Click **Next** button.

The screenshot shows a web browser window with the URL <https://account.live.com/proofs/Manage/basic?mkt=en-us>. The page title is "Microsoft account" and the main heading is "Add security info". Below the heading, there is a message: "We won't use this to spam you—just to keep your account more secure." followed by "Verify my identity with:". The form contains three input fields: a dropdown menu with "A phone number" selected, a dropdown menu with "United Kingdom (+44)" selected, and an empty text input field. Below these fields, there is a section "Verify phone via:" with two radio button options: "Text" (which is selected) and "Call". At the bottom of the form, there are two buttons: "Next" (highlighted in blue) and "Cancel" (greyed out).

Step 9: If you have chosen text method to verify your number, you will receive a code to your phone number. Finally, enter the code received on the phone in the field and then click **Next** button.

- If you want to receive alerts (when Microsoft finds unusual activity on your account), Pick **Change alert options** link on the same page, and simply check the box next to your phone number.
