- X-RAY MACHINE & INSTRUMENT

For Bulk, OEM and Tender Supply

Syringe Needle Destroyer is an equipment that helps to destroy the needle and mechanically cuts the syringes immediately after use. Major infectious diseases are spread by reusing syringes or needles. The device operates in a single step, requiring a push to release the outlet. As soon as the needle is placed into the slot, the heavy-duty transformer instantly incinerates it, and the syringe nozzle is shut off by manually withdrawing the blade handle. NaugraMedical is one of the leading Syringe Needle Destroyer Exporters, Manufacturer and Supplier in India, China.
