For Bulk, OEM and Tender Supply

A patient monitor is a medical device that measures the vital signs of a patient. It is primarily used in intensive care, hospitalisation, and emergency rooms. Monitors can be linked to a central patient monitoring station. This provides healthcare teams with an overview of the parameters for all patients who are linked to a monitor. We at Naugra Medical, one of the leading Patient Monitor Exporters, are dedicated to serving a variety of hospitals, nursing homes, and clinics worldwide.
