

SEASONAL CHANGES FOR PLANTS

PLANTS AND ANIMALS CHANGE WITH THE SEASONS. LOSING THEIR LEAVES, FLOWERING, OR BREAKING DORMANCY.

SPRING

In tree terms-Time when the sap rises.
A tree in spring -often full of blooms.
Examples-Magnolias, myrtles.

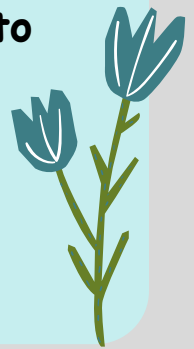

SUMMER

Increased sunlight - encourages trees to grow leaves.

The best trees to plant-silver maple, red oak, sugar maple, pagoda dogwood, and whitebark pine.

FALL

When the days grow shorter, chlorophyll dies off and other chemicals become the main source of color.

WINTER

begin making changes at the cellular level to become more tolerant of cold temperatures.
