PREFACE	9
About the Authors	10
CHAPTER 1 • GSM and GPRS	11
1.1 Introduction	11
1.2 GSM Network Architecture	12
1.3 1G, 2G, 3G, 4G and 5G	13
1.4 Using GSM and GPRS in Microcontroller Projects	16
1.5 The GPRS	18
1.6 Summary	19
CHAPTER 2 • GSM/GPRS BOARDS	20
2.1 GSM Click Board	20
2.2 Using The GSM Click Board with a PC	24
2.3 GSM Click Board GSM AT Commands	28
2.3.1 Syntax of AT Commands	29
2.3.2 General Purpose AT Commands	30
2.3.3 Phonebook Access	35
2.3.4 Clock Management	37
2.3.5 Alert Sound	37
2.3.6 Operator and Network Control	39
2.3.7 Some Useful General Commands	40
2.3.8 Call Control	42
2.3.9 Sending and Receiving SMS Messages	43
2.4 SIM900 GSM/GPRS Shield for Arduino	52
2.4.1 SIM900 Shield GSM AT Commands	55
2.5 Using the AT Command Tester	58
2.6 Summary	62
2.7 Exercises	62
CHAPTER 3 • MICROCONTROLLER DEVELOPMENT TOOLS	63
3.1 Software Development Tools	63
3.1.1 Text Editors	64

3.1.2 Assemblers and Compilers	64
3.1.3 Simulators	65
3.1.4 Integrated Development Environment (IDE)	65
3.2 Hardware Development Tools	65
3.2.1 Development Boards	66
3.2.2 Device Programmers	70
3.2.3 Breadboards	71
3.3 Example Program for the Clicker 2 for PIC18FJ Development Board	72
3.4 Example Program for the Arduino Uno Development Board	81
3.5 Summary	82
3.6 Exercises	83
CHAPTER 4 • PIC MICROCONTROLLER <i>GSM CLICK BOARD</i> GSM PROJECTS	84
4.1 PROJECT 1 – Sending An SMS Text Message to a Mobile Phone	84
4.1.1 The Hardware	84
4.1.2 The Software	86
4.1.3 Improved Program	90
4.2 PROJECT 2 – Sending the Temperature as SMS Text Messages	98
4.2.1 The Hardware	98
4.2.2 The Temperature Sensor	99
4.2.3 The Software	101
4.3 PROJECT 3 – SMS Controlled Relay	109
4.3.1 The Hardware	109
4.3.2 The Software	114
4.3.3 Improved Program	123
4.4 Summary	132
CHAPTER 5 • ARDUINO UNO <i>SIM900 GSM/GPRS SHIELD</i> GSM PROJECTS	133
5.1 PROJECT 1 – Sending SMS Text Messages to a Mobile Phone	133
5.1.1 The Hardware	133
5.1.2 The Software	134
5.1.3 Modified Program	137
5.2 PROJECT 2 – Sending the Temperature as SMS Text Messages	140

5.2.1 The Hardware.	140
5.2.2 The Software	142
5.3 PROJECT 3 – SMS Controlled Relay	147
5.3.1 The Hardware.	147
5.3.2 The Software	149
5.3.3 Improved Program	154
5.4 PROJECT 4 – Controlling Room Temperature With SMS Commands	159
5.4.1 The Hardware.	160
5.4.2 The Software	162
5.5 Summary	170
CHAPTER 6 • GPRS PROJECTS	171
6.1 GPRS Connection.	171
6.2 Reading the Contents of a Web Page	172
6.3 UDP/TCP Data Communications.	174
6.4 PROJECT 1 – Sending Temperature Data to a PC Using UDP	179
6.4.1 The Hardwares.	179
6.4.2 The Software	180
6.5 PROJECT 2 – Sending Temperature Data to a PC Using TCP	188
6.5.1 The Hardware.	188
6.5.2 The Software	188
6.6 PROJECT 3 – Storing the temperature data on the cloud	196
6.6.1 The Hardware.	196
6.6.2 The Cloud	197
6.6.3 The Software	200
6.7 Summary	206
INDEX	207
