

GSK organized and funded promotional symposium on Respiratory Syncytial Virus (RSV)

Wednesday, 20 September 2023, 14:00 - 15:30, Valencia Spain - the ninth ESWI influenza conference

Expert insights on RSV in Older Adults: disease burden, management, and prevention

Objectives:

- Increase understanding of RSV as a respiratory pathogen with substantial disease burden in older adults including those with certain underlying comorbidities
- Provide a fair & balanced overview of scientific data for a RSVPreF3 vaccine for older adults
- Discuss implementation perspectives and gaps to be addressed entering a new era of RSV prevention for older adults

Agenda

Chair: Dr Javier Díez-Domingo (Spain)

Welcome and introduction

Dr Javier Díez-Domingo (Spain)

RSV disease in older adults

- Overview of RSV epidemiology and burden in older adults including those with underlying comorbidities
Dr Ab Osterhaus (Germany)
-

Entering a new era of RSV prevention

- Overview of clinical data for a RSV vaccine for older adults
Dr Javier Díez-Domingo (Spain)
-

Challenges of vaccinating older adults

Dr Stefania Maggi (Italy)

Panel discussion: Implementation considerations and gaps to be addressed to protect older adults from RSV in a new era of RSV prevention
