

AGRICULTURAL

EUROL.COM

The ongoing success and profitability of your farming operations are crucial. That's why it's vital your agricultural equipment is always up and running for peak production, no matter the season or other challenges.

At Eurol, we get it. Our top-grade lubricants are engineered to boost both the performance and longevity of your machinery. Opting for the right lubricants can cut down on maintenance, minimize stoppages, extend the time between oil changes, and drive up your overall productivity.

Enter the brand and model of your vehicle into our oil advisor, and you'll instantly receive tailored product recommendations.

Eurol Specialty producten

Drawing on our deep expertise in application, we've developed the Eurol Specialty lubricants using SYNGIS Technology. This cutting-edge technology synergizes lubricating and protective qualities, delivering superior performance in even the toughest conditions. Choosing Eurol Specialty products translates to improved efficiency, significant cost reduction, increased productivity, and a minimized environmental impact. Our team is ready to schedule a live demonstration to showcase these advantages in action.

REDUCE COSTS IN TULIP CULTIVATION

Triflor uses machinery daily to move bins of tulip bulbs. To make the chains in the machines run smoother, Triflor opted for Eurol Chain Lube S-AC 38 FD. With this Eurol Specialty lubricant, the chains of the transport machines are lubricated, leading to less wear and tear and downtime. The result? More uptime, less standstill, and less pollution. Less lubricant is needed, and the machines stay clean: unlike conventional lubricants, Eurol Chain Lube S-AC 38 FD prevents sand from sticking to the chains.

Performance:

5000 euro each year

Lengthen machine life

PROTECTION AGAINST CROP JUICES

Thomas Span is workshop manager at JvESCH in Cromvoirt. He was looking for a replacement for three lubricating greases, each with its own application: pin and bushing connections, bearings and underwater use. Crop juices play a role in this. The goal was to streamline lubrication to reduce the chances of incorrect application and downtime. JvESCH was able to go from using three different greases for three applications to using just one grease for maintaining their mowers. With Eurol Grease CS-2/103-S, not only has the frequency of lubrication decreased, but there's also been a 20% to 25% reduction in the amount of grease required.

Performance:

Thousands of euros saved

From 3 greases down to 1

ABOUT EUROL

We are a Dutch family business, active since 1977, with a passionate team and a modern production facility. Our products are available in over 90 countries and in diverse sectors including heavy duty, agri, industry, automotive, and racing. For commercial and technical support, Eurol offers Dealer and Service Point formulas, extensive digital tools, and the expertise of our specialists. This ensures customers worldwide get the best products, excellent service, and maximum return on lubricants.

Dakar Winning Quality

The Dakar Rally has been an ultimate testing stage for our products for years. Our collaboration with international racing teams contributes to the further development of our products. Partly thanks to the use of the Eurol Specialty racing line, multiple Dakar victories have been achieved.

Use the interactive lubrication points tool to see which products we offer for the most essential parts of your vehicle.
