

This disclosure is a necessary addition to your client agreement with FxPro Global Markets MENA Limited ('FxPro' or 'us') and should be acknowledged and signed by you. This disclosure is not intended to include all risks associated with the products and services provided to you by us. The products and services provided to you by FxPro are detailed in your client agreement. In addition to your client agreement FxPro should also provide you with this disclosure to outline the associated risks related to Foreign Exchange (FX) trading. It is your responsibility to consider personally, or through any legal or professional advice, whether the products are suitable for you or not and whether you can afford to risk your investment.

**Significant Loss Potential and no guarantees:** You should be aware that the risk of loss can be substantial when transacting in FX. You should carefully consider whether such transactions are suitable for you and only risk an amount of money you can afford to invest/lose. You should also note that the funds or property you post as your initial deposit and the FX positions you hold with us are not guaranteed. FxPro may use these deposits against losses generated by your transactions. You are personally responsible for all losses resulting from these positions, however your losses will be limited to the equity in your account per FxPro's negative balance protection policy (see Order Execution Policy section 11.3).

You should also be aware of the following:

**Margin Trading,** in the context of FX, involves posting funds or property in the form of a margin deposit to your FX trading account. This margin deposit allows you to trade more than the deposit you have posted. This is known as leverage. Any leverage you utilise will amplify your losses and you may rapidly lose all the funds or property you deposited as margin.

**Stop loss limits** are set to limit your losses. However, during times of significant market volatility, limited liquidity, failure of electronic or telecommunications systems, or force majeure it may not be possible to give effect to Stop Loss Limits at the requested price. Stop losses are not guaranteed and you will remain liable for all losses.

**Inherent Conflicts.** FxPro is the counterparty to all your FX transactions. When you sell, FxPro will be the buyer. When you buy, FxPro will be the seller. When you lose money on a transaction, FxPro may make money on the same transaction in addition to fees and commissions it may charge you. The prices offered to you by us may not necessarily be the best prices available and may differ from prices offered to other clients of FxPro.

**Electronic trading platforms,** no matter how convenient or efficient, do not remove the risks associated with FX transactions.

**Un-regulated activities.** An electronic trading platform for retail FX transactions is not an exchange. It does not connect to or route orders to an exchange. It is simply an electronic connection for communicating with FxPro. This trading platform may not be regulated by a financial services regulator. So how you and FxPro use the platform is governed only by your contract with FxPro.

Furthermore, FX services that you receive may be provided by another company, in another country, connected to FxPro. Activities conducted in those countries are not regulated by the DFSA. You should seek information from FxPro about which financial services regulator is responsible for regulating each of the products and services FxPro provides to you before you commit any funds.

This brief risk disclosure does **not disclose all risks** associated with FX transactions. You should carefully consider the amount of money you can afford to lose, before you commit funds for trading purposes. If you are not sure that you understand a particular product, instrument or transaction, you should first seek appropriate professional advice before entering into the product, instrument or transaction.

I acknowledge that I have received and read the disclosure above.
