The only Internationally Recognized Qualifications for Electric Vehicles

Having the necessary skills and knowledge to repair and maintain high voltage vehicles will be vital in the future as the vehicle become more widespread and manufacturers and insurers will mandate compulsory training and certification.

IMI qualifications are the only internationally recognised qualifications that will give your students a real edge of employability. The unique partnership of Lucas-Nuelle and the IMI ensures that your students gain the most up to date qualifications by training on the world best training equipment.

Suitable qualifications are available for everyone in the automotive industry, from non-technical staff, maintenance and diagnostic technicians to recovery and rescue personnel.

APPROVED
CENTRE

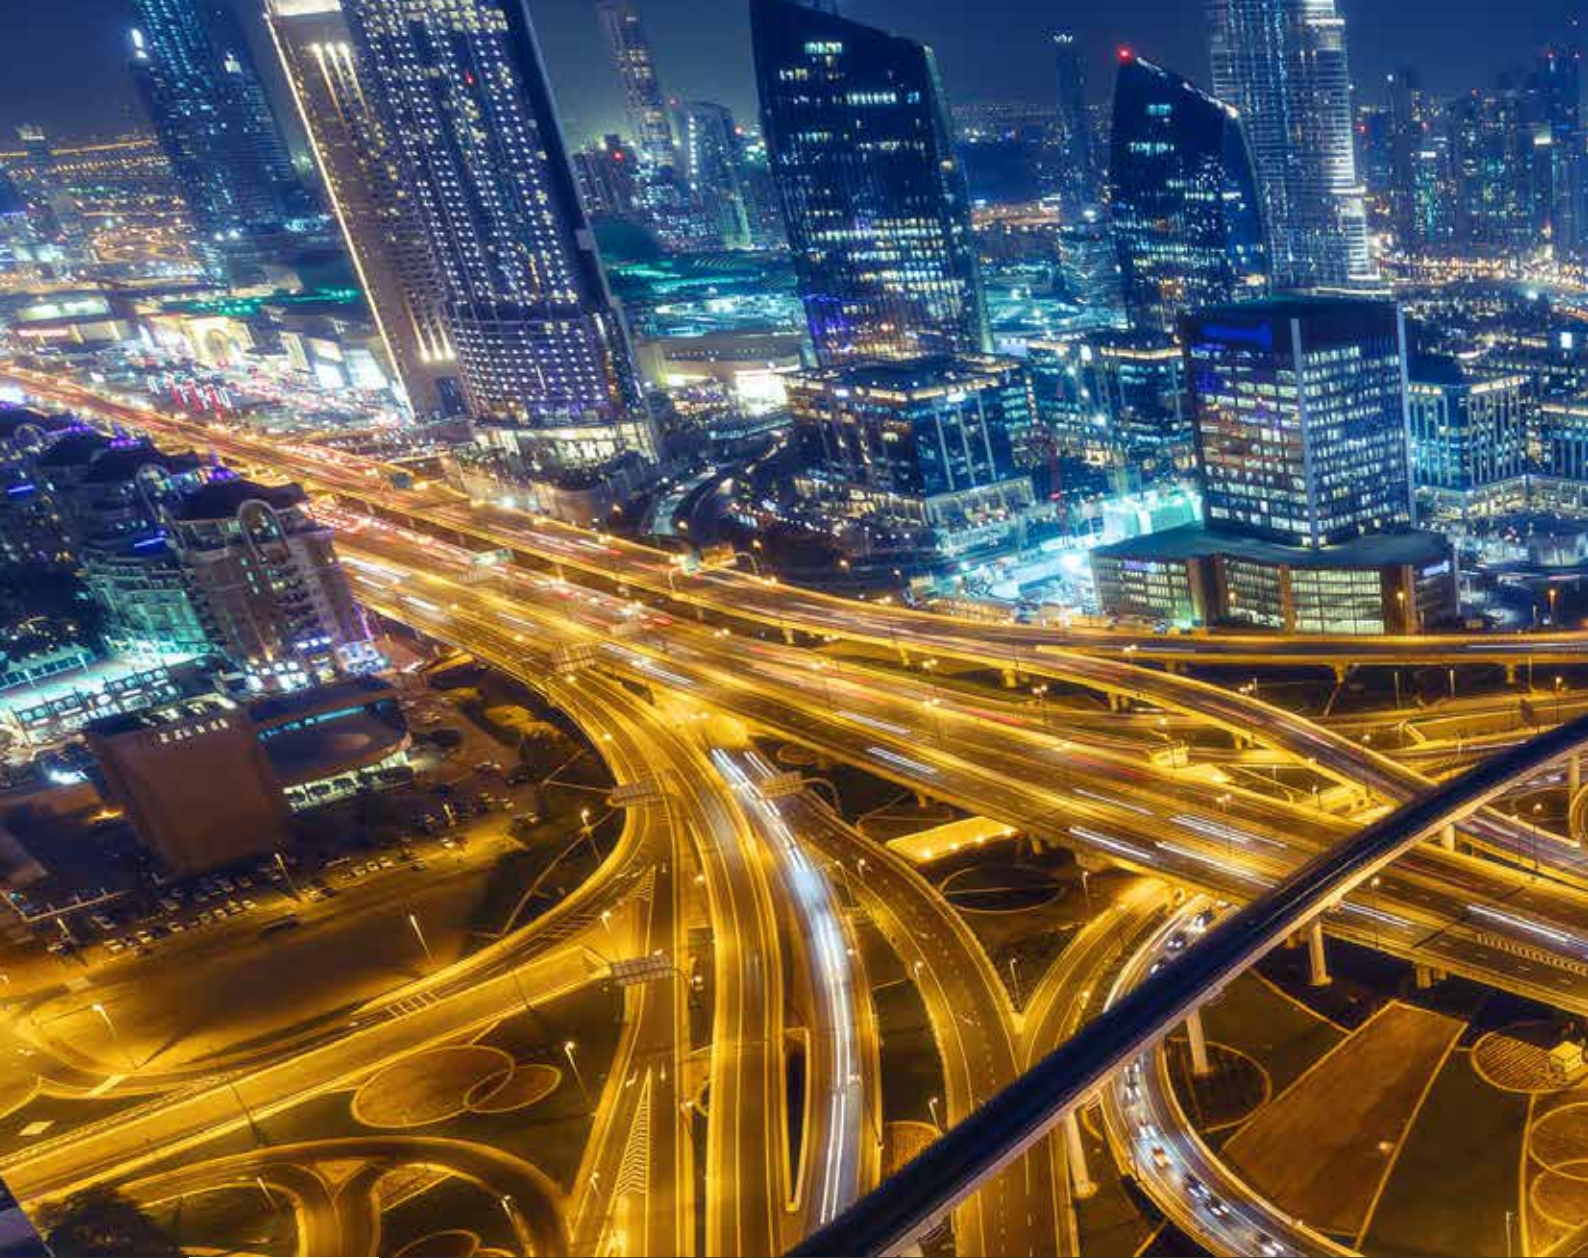

Benefits to your Institute

- A complete solution for electric vehicle training including:
- Increasing the turnover of the institute by delivering short courses more often
