WHY PERSONAL DATA IS PROCESSED AND ON WHAT BASIS

SomeBuddy processes personal data for the following purposes:

(1) Providing the Service

The purpose of processing personal data is to provide the Service, which includes the handling of the reported Social Media Violation and related legal advice to resolve the Social Media Violation.

- a) Processing of the Customer's personal data is based on the Customer's consent. The Customer is entitled to withdraw consent in accordance with section 8 of this Privacy Notice at any time. Please note, however, that the withdrawal of consent while the

Social Media Violation is still being handled means that the case will be closed, as handling is not possible without personal data. Similarly, the withdrawal of consent does not affect the lawfulness of the case handling prior to the withdrawal.

A child (under 13 years old) may also report a Social Media Violation in the Service. Also in these situations the processing of personal data is based on the Customer's consent. In accordance with the applicable data protection legislation the consent of the holder of parental responsibility is not required in the context of preventive or counseling services offered directly to a child (GDPR, Recital 38). The Service is a legal counselling service of the kind mentioned above to resolve Social Media Violations.

- b) Representatives of an organization may report on the Service a Social Media Violation, targeting a person other than the Customer, that has occurred in the organization. In this situation, the processing of (other than the Customer's) personal data is based on SomeBuddy's legitimate interest to provide legal advice to organizations in solving Social Media Violations where it is not possible to provide such advice without the processing of personal data. There is a wider public interest in addressing and solving Social Media Violations, in particular against children and adolescents. In order to ensure the protection of privacy, SomeBuddy has assessed and weighed the legitimate interest by means of the balance test in accordance with the instructions of the Office of the Data Protection Ombudsman. If you would like more information regarding the assessment of the legitimate interest and the balance test, please contact SomeBuddy using the contact details mentioned in section 1.

(2) Service development

SomeBuddy processes personal data to develop the Service. In this respect, the processing of personal data is based on SomeBuddy's legitimate interest in teaching the artificial intelligence used by the Service, enhancing the customer experience, service and information security of the Service. Only pseudonymous or completely anonymous information is used to teach artificial intelligence. If you would like more information regarding the assessment of the legitimate interest, please contact SomeBuddy using the contact details mentioned in section 1.

(3) Marketing

SomeBuddy processes personal data of its customers in order to handle sales and marketing activities related to the business of SomeBuddy. In this regard, the purpose of the processing of personal data is, among other things, to enhance the Customer's awareness of SomeBuddy's service, collecting feedback from Customers, conducting opinion and market research, marketing SomeBuddy's service and sending event invitations.

In respect of Marketing, the processing of personal data is based on the Customer's consent, which the Customer is entitled to withdraw at any time in accordance with Section 8 of this Privacy Note. SomeBuddy does not target direct marketing to children (under 13 years old).
