Discussions for the Provisions of the Research and Development Working Group

In general the proposal for the provisions has been accepted, including the following changes:

Ad §1.1: It was discussed if the limit of 15 members should be removed. Since there was currently no need for it, the limit remains, but may be removed in the future.

Ad §1.6: A rule has been added how to handle votes for which an equal amount of votes have been raised for the different options.

Ad §1.7: Has been removed, since we already have members across different Working groups.

Ad §1.8: A sentence has been added that makes clear that the members of the Working Group are in general allowed to perform every kind of research in the field of Distributed Ledger Technologies and / or Web 3 as long as they do not ask for additional funding.
