CONFERENCE

EXCLUSIVE PRE-EVENT INTERVIEW

Dr. Salah S. Meemar

Vice Dean of Student Affairs for Development
Taibah University

Dr. Salah S. Meemar shares his view on growing importance of innovation and technology in Middle East Education Industry

Fleming.: How can education sector in Saudi Arabia be reformed in your opinion?

Dr. Salah S. Meemar:

- ✓ We have to shift towards decentralization in our education system.
- ✓ We have to raise the standards of selection, accountability and reward our teachers.
- ✓ We have to begin the comprehensive reform in our education system by starting with the primary school and then we can do the rest because the comprehensive change in all levels did not work

Fleming.: Innovation in education – your comments.

Dr. Salah S. Meemar: For me the aims of the innovation in education is to provide affordable and effective services that inspire and motivate students to be lifelong learners and wanted in the labor market

Fleming.: How can technology play an important role in education innovation?

Dr. Salah S. Meemar: Today the technology is one of the very important tool in our life not just in education life! The technology became accessible among young and elderly! The technology can enhance student acquisition of discrete skills through drill and practice. Improved technologies allow improved monitoring and dissemination of the knowledge and skills and assist the teacher to provide creative teaching, assessment, and feedback.

Fleming.: In your opinion, how can education awareness be increased ?

Dr. Salah S. Meemar:

- ✓ By helping students discover and live their true potential.
- ✓ By increasing the link between what students learn and the labor market needs.
- ✓ By Raise our ranking in education among the top countries in education.

Fleming.: How do you think the participants will benefit from this conference?

Dr. Salah S. Meemar: The participants will learn the latest theories and best practices in the field of education that can be applied immediately to improve their system and their performance

Be part of ACADEMIA ARABIA, 10 – 11 April 2016, Riyadh – Saudi Arabia
