Nigeria Teacher Development Programme (TDP) Impact Evaluation of Output 1: In-Service Teacher Training Endline Survey 2017

Teacher interview instrument.
Excerpt from enumerator endline manual.

October 2017
1 Teacher interview

The teacher questionnaire will be administered by the data collector to all the teachers who were interviewed at baseline and who are still employed at the school in the current school year. These same teachers will also be observed while teaching.

The data collector will conduct a one-to-one personal interview with the selected teachers and their responses will be recorded. Wherever possible, the interview should be conducted in a quiet place with no other staff present.

You will start by identifying the state, LGA, school and your own name, as in the head teacher interview (see section above).

1.1 Teacher availability

Confirm if the teacher is still enrolled at the school at endline, and if yes, whether the teacher is available for an interview on the day of the visit.

If you are carrying out a classroom observation and teacher interview with the same teacher, you may combine seeking consent for the two instruments by reading the form just once. Then respond to the following two questions to confirm that you have read the form and that the teacher has given consent.

If the teacher does not give consent you may ask them if there is anything they have not understood, but if they continue to refuse to be interviewed you should not seek to alter their decision. Record that they have not given consent and stop the interview.

If the teacher gives consent for the interview but not for the lesson observation, then you can proceed with the interview.
