

# Bus and Coach CNG (RNG) Systems

**Lightweight  
Long Range  
Durable & Safe**

## Features and Benefits

### Emissions

Natural gas delivers the most cost-effective NOx and CO2 emissions reductions, and the reductions are even more dramatic when using renewable natural gas, world's only carbon-negative fuel

### Performance

Box Fuel Management Module (FMM) with optional Blue iQ® Smart Gauge and extended range Marathon™ Regulator

### Lightweight, Long Range

Lightweight TUFFSHELL® all-composite Type 4 cylinders. Custom-engineered solutions available. Suitable for transit and coach various applications. Bus and transit fuel capacity options of 126-187 DGE. Up to 900 miles per fill up

### Quality

Our products are engineered, manufactured, and tested to the highest standards. Our in-house test protocols for components, assemblies, and completed systems exceed OEM quality, reliability, and durability standards

### Fast Fill

Fills up to 13% faster than competing CNG fuel systems

### Lower Total Cost of Ownership

Stable natural gas fuel prices enable long term reduced fuel expenditures compared to fluctuating diesel. NGVs eliminate fuel price spikes tied to oil supply and global geopolitical events

**Engineered for Quality,  
Safety, and Convenience**

Variety of options available for vehicle integration: on roof, on frame rail, integrated into body and custom integration
