Fast fill

# ProCab® H hydrogen fuel systems

## Features and benefits

- Installed behind the cab and requires as little as 31" of frame rail space
- Fuel capacity options from 25-35 kg to fit any application
- Integrated fuel management module on left side
- Optional integrated right side auxiliary fill panel
- Strong, lightweight protective aluminum structure
- Automotive-grade exterior paint can match any fleet's custom color

### Durable

Based on Agility's widely-used ProCab CNG system architecture, which has been track tested for a simulated one million miles and validated by multiple OEM test programs

### Long range

Possible to store up to 35 kg of hydrogen in a seven-cylinder system; aligns with existing top fairings and side extender fairing for improved aerodynamics

### Compact

Mounted close to the cab to increase available frame rail space

### Safe

Our products are put through the most rigorous testing in the industry

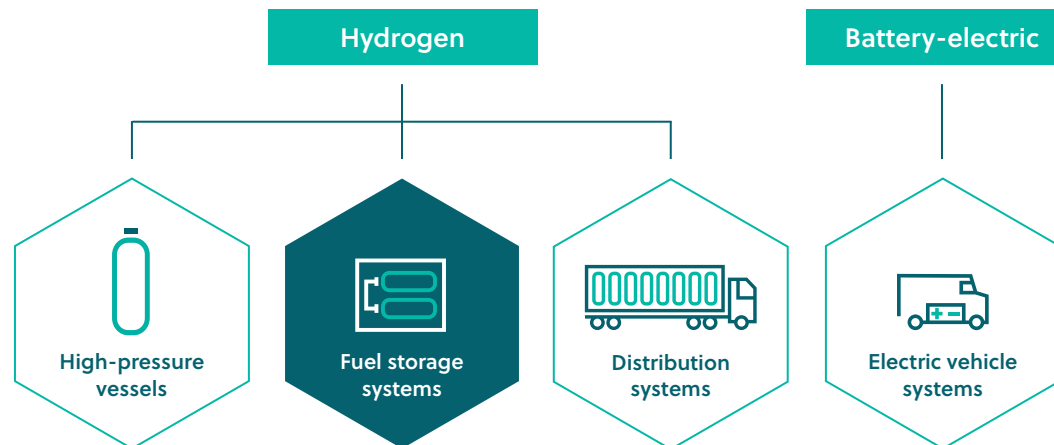

### Lightweight

Carbon fiber composite and aluminum construction minimizes system weight, letting you haul more freight

### Fast fill

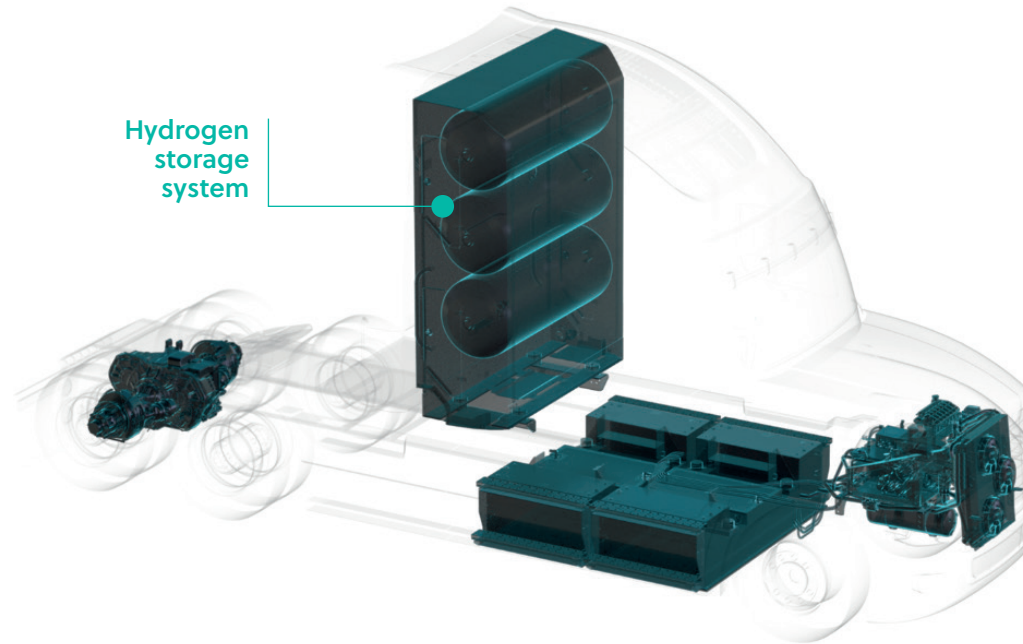

Zero emissions operation with fast fill to keep your truck on the road
