

HYDRAULIC COPPER TUBE TERMINAL CRIMPERS

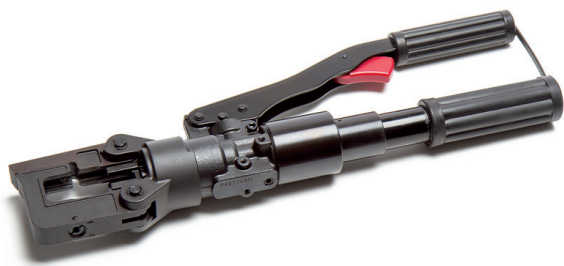

+ INFORMATION

- + Hydraulic crimp tool to suit copper cable terminals from 10mm² up to 240mm².
- + Supplied in a robust, impact resistant plastic case.
- + Complete with a full set of removable dies.
- + Meets the compression ratio requirements of BSEN 61238-1:2003.

+ SPECIFICATION

Maximum pressure 550 Bar	Length 375 mm
Oil capacity 56CC	Weight 2.8kgs
Max output 5.2 Tonnes	

+ PHCT-24OKIT

10mm² to 240mm²

- + A hand held hydraulic crimping tool, for use with copper tube terminals from 10mm² up to 240mm².
- + The two stage hydraulic system ensures rapid advance on low pressure, minimising the number of pump cycles needed to achieve maximum compression.
- + The kit contains seven interchangeable hexagon die sets: 10/16mm², 25/35mm², 50/70mm², 95/120mm², 150mm², 185mm² and 240mm².
- + Please specify the required Die Set when ordering.
Option 1: PHCT-24OKIT-COL
Supplied with dies suitable for crimping our COL range of terminals. (see page 79)
Option 2: PHCT-24OKIT-HD
Supplied with dies suitable for heavy duty terminals.
- + The crimp head can rotate 180° for ease of use.
- + Meets the compression ratio requirements of BSEN 61238-1:2003.

To order either of these tools with a calibration certificate please add /CAL to the end of the part number: For example **PHCT-24OKIT-COL/CAL**

HYDRAULIC COPPER TUBE TERMINAL CRIMPERS

+ INFORMATION

- + Hydraulic crimp tool to suit copper cable terminals from 16mm² up to 400mm².
- + Supplied in a robust, impact resistant plastic case.
- + Complete with a full set of removable dies.
- + Meets the compression ratio requirements of BSEN 61238-1:2003.

+ SPECIFICATION

Maximum pressure 700bar	Length 612mm
Oil capacity 14.7CC	Weight 6.5kgs
Max output 11.6 Tonnes	

+ PHCT-400KIT

- + A hand held hydraulic crimping tool, for use with copper tube terminals from 16mm² up to 400mm².
- + The two stage hydraulic system ensures rapid advance on low pressure, minimising the number of pump cycles needed to achieve maximum compression.
- + The kit contains twelve interchangeable hexagon die sets from 16mm² up to 400mm².
- + Please specify the required Die Set when ordering.
Option 1: PHCT-400KIT-COL
Supplied with dies suitable for crimping our COL range of terminals. (see page 79)
Option 2: PHCT-400KIT-HD
Supplied with dies suitable for heavy duty terminals.
- + The crimp head can rotate 180° for ease of use.
- + Meets the compression ratio requirements of BSEN 61238-1:2003.

To order either of these tools with a calibration certificate please add /CAL to the end of the part number: For example **PHCT-400KIT-COL/CAL**
