

RATCHET CABLE CUTTER : PRCC325.

Description.

Ratchet controlled cable cutter light weight and compact, suitable for cutting of both copper and aluminium cables with standard insulation, i.e PVC, PP, RUBBER.

(Not suitable for use with steel wire armoured cables).

Features.

High precision cast blades designed to cut smoothly and cleanly without distortion of cable.

Ratchet controlled to ensure full cut cycle with consistent applied pressure, reduces operator fatigue and enables single handed operation.

Emergency release lever to stop cut cycle at any stage.

Light weight and compact for easy use.

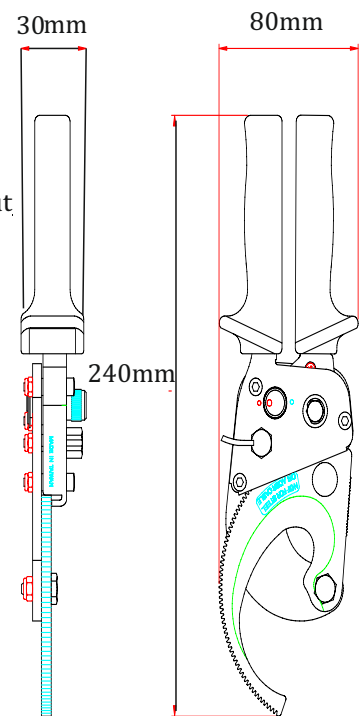

Moulded TPR handles for optimum grip.

Safety lock mechanism.

Application.

For use with both copper and aluminium soft insulated cables up to 325 mm/sq.

(Not suitable for steel wire armoured cables).

Material specification.

Fixed blade material: Sk5 high carbon steel.

Moving blade material: 63CRM hardened steel.

Frame material: S45C.

Handle grip material: Thermoplastic rubber.

Weight: 0.60kgs.
