

PCZ

- Halogen free marking sleeve for snap on mounting onto cables and wires.
- Strong barbs secures the sleeve safely but still readjustable.
- Excellent readability with high abrasion and chemical solvent resistance.
- Printable on site with Partex plotter MK1 and MK500.

GENERAL INFORMATION

Design

Customized multi character marking in halogen free Zerex material.

The profile design is open with strong sturdy barbs, which give a quick mounting.

Print

Etching ink jet print with high resolution.

TECHNICAL SPECIFICATION

Temperature range

-30°C to +90°C (-22°F to +194°F).

Storage

+10°C to +27°C (+32°F to +81°F) < 95% Rh

Product performance

Good resistance to bases, salt solutions, saltwater, marine atmospheres, oils, greases and petroleum products.

It is not affected by electrolytic corrosion found in and around salt water.

Material

Zerex PA12 compound.
Cadmium, silicon and halogen free.

Colour

Yellow and white
(others on request depending on volumes).

APPLICATION AND PACKAGING

PCZ are available in four sizes to fit most commonly used wire diameters.

PCZ has strong barbs holding the sleeve firmly but still possible to readjust.

Unsorted

A loop of semi cut sleeves, packed in plastic bags or cartons.

Sorted

Marking sleeves packed according to customer request.

- MFS 10
- MFS 20
- MFS 30

Options

- MFS 10
One and the same profile sorted in bags or reels. For a easier handling of ordered project.

MFS 10 types: Bag or Reel.

- MFS 20
Different profiles is sorted in bags, e.g. sorted by cabinet, drawing or cable. This enables fast mounting high control over ordered profile.

MFS 20 types: In bags by cable, drawing, or cabinet.

- MFS 30
Double-sorting. The markers are first sorted by cable and then the "cable bags" are sorted by cabinet. MFS 30 also allows you to sort the markers on a sheet. Gives a great overview of your markers.

MFS 30 types: Double-sorted in bag or on sheets.
