

# Istruzioni di montaggio per il personale specializzato

**VIESSMANN**

## Accessori per sottostruttura del tetto piano per Vitovolt 300 Sistema Sud 10°

- Coperchio della canaletta per cavi
- Vasca zavorra V01, V02
- Rivestimento laterale
- Collegamento delle tracce in direzione del modulo con adattatore del listello trasversale
- Collegamento delle tracce in direzione della guida
- Connettore del colmo
- Profilo per Solmont
- Supporto centrale

# Coperchio della canaletta per cavi

## Componente

Coperchio della  
canaletta per  
cavi

## Utensili necessari

Mazzuolo in gomma

## ! Attenzione

Quando si monta il coperchio della canaletta per cavi, fare attenzione a non danneggiare i cavi.

# Vasca zavorra V01

per tetti con gettata in ghiaia o substrato esistente

## Componente

Vasca zavorra V01

## Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm

## ! Attenzione

Rispettare la copertura minima nella vasca zavorra, come da indicazioni per la progettazione.

L'altezza massima della gettata non deve superare 70 mm.

6179883 IT

# Vasca zavorra V02

per tetti non ancora ricoperti di ghiaia

## Componente

Vasca zavorra V02

## Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm

Le viti sono  
preassemblate

5Nm

Gettata  
(ghiaia o substrato)  
nella vasca zavorra e sul  
profilo di fondo

## ! Attenzione

Rispettare la copertura minima  
nella vasca zavorra, come da  
indicazioni per la progettazione.

L'altezza massima della gettata non  
deve superare 70 mm.

# Rivestimento laterale

## Componente

Rivestimento laterale

## Utensili necessari

Chiave dinamometrica con inserto  
esagono mis. 5 mm

6179883 IT

# Collegamento delle tracce in direzione del modulo

## Componente

Adattatore listello trasversale

## Collegamento delle tracce

## Utensili necessari

Chiave dinamometrica con inserto esagono mis. 5 mm ed esagono esterno mis. 8 mm

## Collegamento delle tracce in direzione della guida

## Componente

### Collegamento delle tracce

## **Utensili necessari**

Chiave dinamometrica con inserto esagono mis. 5 mm ed esagono esterno mis. 8 mm

# Connettore del colmo in direzione del modulo

## Componente

Connettore del colmo in direzione del modulo

Sovracostruzione del colmo senza componenti aggiuntivi

## Utensili necessari

Chiave dinamometrica con inserto esagono mis. 5 mm

Il modulo è posizionato centralmente sopra il colmo e l'inclinazione del tetto è inferiore a 1,5°

# Profilo per Solmont

## Componente

Profilo per Solmont

## Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm e chiave fissa mis. 18 mm

6179883 IT

# Supporto centrale

## Componente

Supporto centrale

## Utensili necessari

Chiave dinamometrica con inserto  
esagono mis. 5 mm
