

Istruzioni di montaggio per il personale specializzato

VIESSMANN

Accessori per sottostruttura del tetto piano per Vitovolt 300 Sistema Est/Ovest 10°

- Coperchio della canaletta per cavi
- Connettore del colmo in direzione della guida
- Connettore del colmo in direzione del modulo
- Profilo per Solmont
- Vasca zavorra V01, V02
- Rivestimento laterale
- Collegamento delle tracce in direzione del modulo con adattatore del listello trasversale
- Collegamento delle tracce in direzione della guida
- Supporto centrale listello trasversale e di zavorra
- Supporto centrale

Coperchio della canaletta per cavi

Componente

Coperchio della
canaletta per
cavi

Utensili necessari

mazzuolo in gomma

! Attenzione

Quando si monta il coperchio della canaletta per cavi, fare attenzione a non danneggiare i cavi.

Connettore del colmo in direzione della guida

Componente

Connettore del colmo in direzione della guida

Utensili necessari

Chiave dinamometrica con inserto esagono mis. 5 mm

6179863 IT

Connettore del colmo in direzione del modulo

Componente

Connettore del colmo in
direzione del modulo

Sovracostruzione del colmo senza componenti aggiuntivi

Utensili necessari

Chiave dinamometrica con inserto
esagono mis. 5 mm

Il modulo è posizionato
centralmente
sopra il colmo e
l'inclinazione del tetto
è inferiore a 1,5°

Profilo per Solmont

Componente

Profilo per Solmont

Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm e chiave fissa mis. 18 mm

6179863 IT

Vasca zavorra V01

per tetti con gettata in ghiaia o substrato esistente

Componente

Vasca zavorra V01

Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm

Gettata
(ghiaia o substrato)
nella vasca zavorra

! Attenzione

Rispettare la copertura minima nella vasca zavorra, come da indicazioni per la progettazione.
L'altezza massima della gettata non deve superare 70 mm.

Vasca zavorra V02

per tetti non ancora ricoperti di ghiaia

Componente

Vasca zavorra V02

Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 8 mm

! Attenzione

Rispettare la copertura minima nella vasca zavorra, come da indicazioni per la progettazione.

L'altezza massima della gettata non deve superare 70 mm.

6179863 IT

Rivestimento laterale

Componenti

Rivestimento laterale

Utensili necessari

Chiave dinamometrica con inserto esagono esterno mis. 5 mm

Collegamento delle tracce in direzione del modulo

Componenti

Adattatore listello trasversale

Collegamento delle tracce

M8x30
10Nm

Utensili necessari

Chiave dinamometrica con inserto esagono mis. 5 mm ed esagono esterno mis. 8 mm

4,8x19
5Nm

6179863 IT

Collegamento delle tracce in direzione della guida

Componente

Appoggio traccia

Utensili necessari

Chiave dinamometrica con inserto
esagono mis. 5 mm ed
esagono esterno mis. 8 mm

CLIC!

4,8 x 19
5Nm

M8x16
10Nm

Supporto centrale listello trasversale e di zavorra

Supporto centrale per listello trasversale e di zavorra

Punto di avvitamento per rivestimento laterale

Componente

Supporto centrale listello
trasversale e di zavorra

Supporto centrale

Componente
Supporto centrale

Utensili necessari
Chiave dinamometrica con inserto
esagono mis. 5 mm
