PQ Capability Curves

SUN2000-215KTL-H0

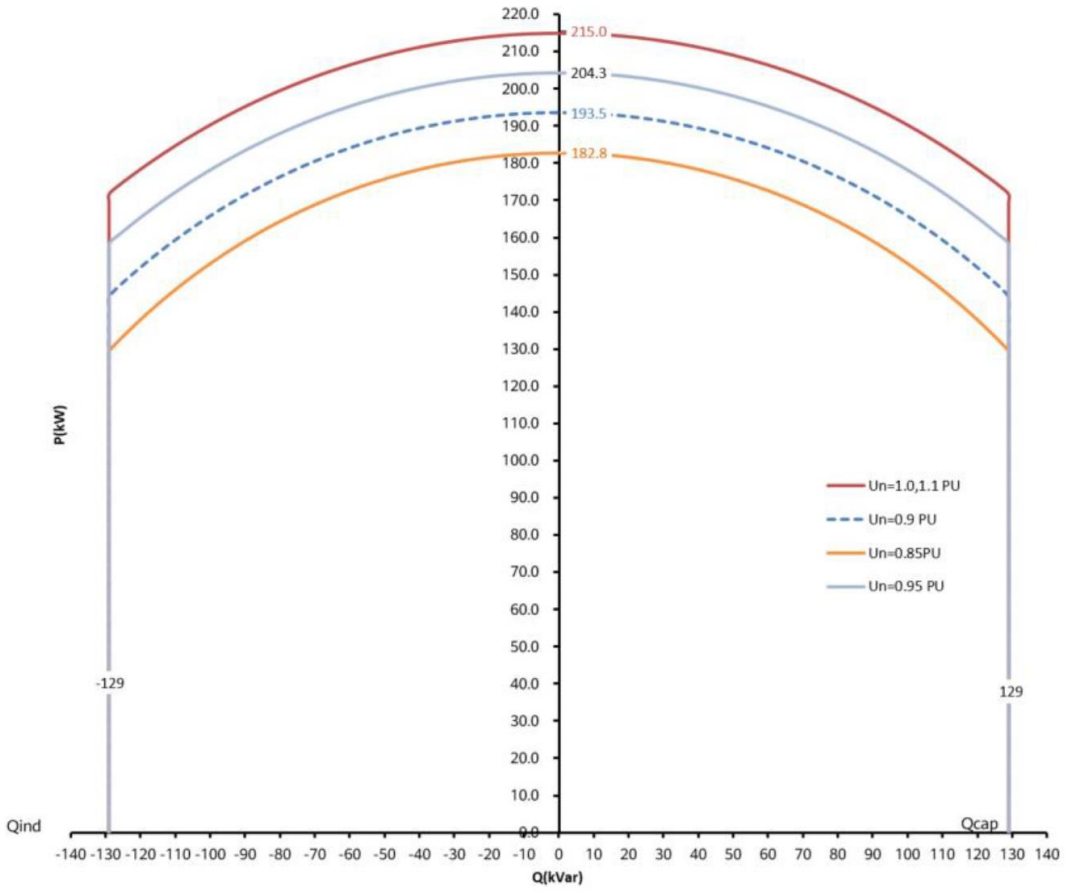

Huawei Technologies Co., Ltd.

The text and figures reflect the current technical state at the time of printing. Subject to technical changes. Errors and omissions excepted. Huawei assumes no liability for mistakes or printing errors. Version No.01-(201910)

PQ Curve per P<400 kW

P-Q Curve of SUN2000-215KTL-H0

Note: When SUN2000-215KTL-H0 operates at grid voltage 1.0/1.1 p.u., the output power can reach 215kW (when PF=1) or 215kVA.

When SUN2000-215KTL-H0 operates at grid voltage 0.95 p.u., the output power can reach 204.3kW (when PF=1) or 204.3kVA.

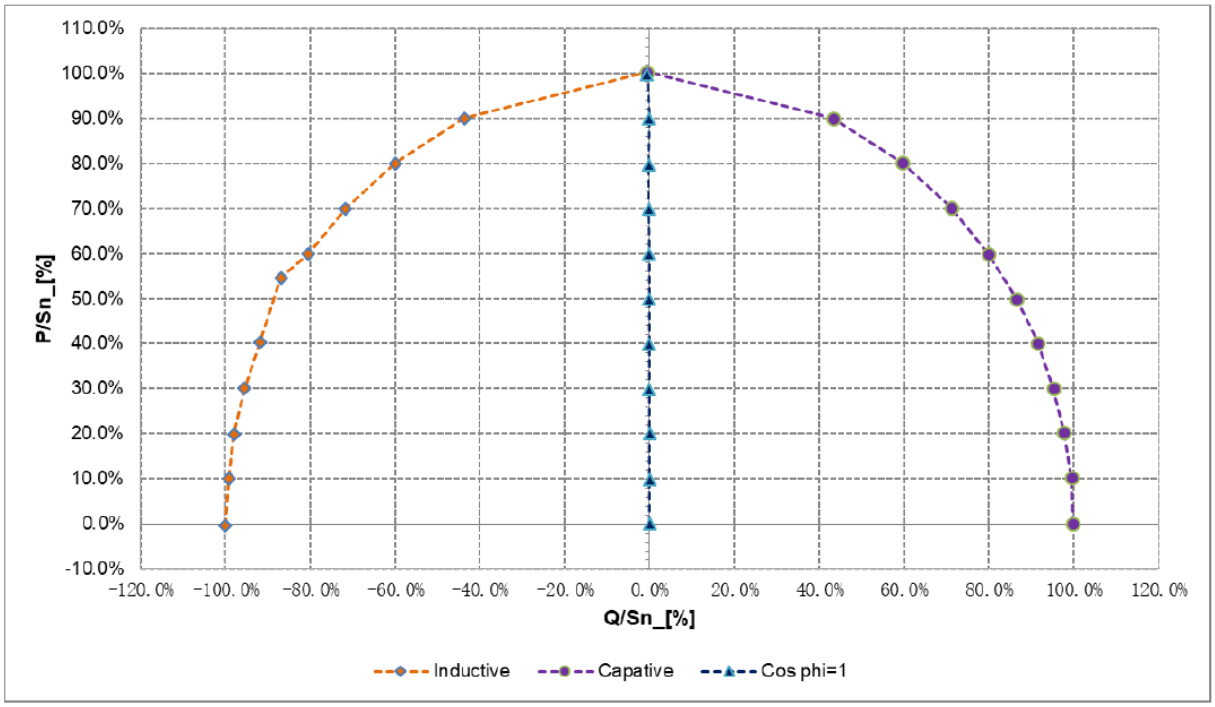

When SUN2000-215KTL-H0 operates at grid voltage 0.9 p.u., the output power can reach 193.5kW (when PF=1) or 193.5kVA.

When SUN2000-215KTL-H0 operates at grid voltage 0.85 p.u., the output power can reach 182.8kW (when PF=1) or 182.8Kva.
