## FOR A PEACEFUL LIFE IN THE OPEN AIR

### PASSION FOR GARDEN FURNITURE

Looking back, this is a beautiful story of how a regional wholesaler and retailer of household goods became one of the leading manufacturers of outdoor furniture in 70 years. Udo Stern – the founder of STERN – began retailing a wide range of products in 1947 – including household items, ovens, stoves, mailboxes and bird cages. Basically, everything that people needed following the Second World War. With the emergence of a variety of specialized large-scale “green-field” distribution formats at the end of the 1960s, the STERN mixed-goods business came to an end and began focusing on garden furniture.

More than 50 years later, a lot has changed in the field of “garden lifestyle”. What has remained is a focus on design, quality and functionality. These are all characteristics of good products, which have always been the focus of STERN and will continue to be so.

In cooperation with carefully selected designers and our product management we design unique products for the outdoor area. Thereby we focus on uniqueness and a sustainable realization.

### DOSER + ZIMPRICH

In 2005 Yvonne Zimprich and Wolf Doser established their office for design in Trier. Their working environment encompasses the development of products and spatial concepts, with special regard to furniture design for the indoor and outdoor area. The challenge they set themselves when developing a concept is to reduce the product to its function and emotion. Thereby a consistent and honest design is as important as an economic realization. Numerous awards underline their work.

# OUTDOOR FABRIC

## FOR LUXURIOUS COMFORT

### FOR OUTDOOR USE

Products with these high-quality fabrics, provided with a special PU coating and fast-drying foam, unite everything you could wish for outdoors – the look and feel of indoor furniture combined with the essential qualities for permanent outdoor use.

## THE MATERIAL

The PU coating on the inside of the fabric inhibits the infestation of bacteria and fungi and makes the surface of the fabric virtually waterproof. The use of swelling threads at the seams provides additional protection against moisture, as these swell after sewing. In the event that some water penetrates the product, there is a fast-drying foam inside which allows the water to flow through easily and air to circulate. A coarse textile is sewn into the underside of the product, so that the water can flow out easily.

## A UNIQUE PIECE OF WORK

**GLEN & SORTINO** 244 – 245

**NOEL** 246 – 247

Synthetic wicker made from polyethylene has all of the exceptional properties required for the outdoors. It is weatherproof (to  $-15^{\circ}\text{C}$ ), UV resistant, stable and low maintenance. Wicker furniture does not have to be treated or painted. The material is also completely recyclable.

Please note that wicker products are unique items that can never appear exactly identical due to the high proportion of manual work involved. Color deviations due to different batches are also possible.

# WOOD

## WONDERFUL NATURAL PRODUCT

Teak wood is very robust and weather-resistant and convinces with its high strength and hardness. It hardly deforms even in changing climates and is comparable to oak wood. Due to the oils stored in the teak, the wood is already well protected and has a very long durability.

Due to the natural variations in the wood, each product and finish may vary slightly.

## ALWAYS BEEN POPULAR

DESIGN: STERN®

page 358

Teak is particularly suitable for outdoor use. The high content of natural oils makes this type of wood weatherproof and durable. In the course of time, teak – unless treated with a protector – acquires its unmistakable silver-grey patina.
