More than a CMS

From data-driven automation to interactive, multi-display orchestration, without heavy custom code.

Control. Reliability. Results. At any scale.

Livesignage is an **automation-first platform** for **digital signage and AV orchestration**.

One ecosystem to run **data-driven content**, interactive touch and **multi-device scenarios**.

- **Automation-first software**

Real-time content that updates itself from data, dashboards and feeds.

- **Future-proof your displays**

Deploy for one need today, expand tomorrow using the same platform.

- **Complex projects, simple workflows**

From signage to immersive experiences, kept simple through one interface.

Compatible with

Android  **androidtv**

Always up to date. Zero repetitive work.

Automation is what powers Livesignage content.
Connect the tools you already use, and your screens update themselves: every day, in real time.

WHAT YOU GET

- **Always up-to-date content** without rebuilding visuals every time
- **Brand consistency by design** through professional templates
- **Fewer mistakes, less stress:** no copy-paste, no outdated versions
- **More time for what matters:** strategy, creativity, and experience

HOW IT WORKS

- **Connect your data sources:** spreadsheets, databases, ERP/CRM, dashboards
- **Choose a branded template** designed for clarity and impact
- **Data fills the layout automatically** and updates whenever the source changes
- **You stay in control:** rules, scheduling, and screen targeting

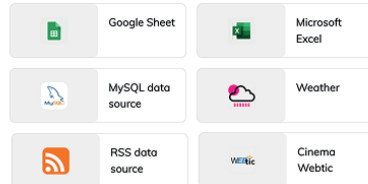

Livesignage is the most innovative solution on the digital signage market.

Sources

Internal Communication

Widgets

FROM SOURCES TO ON-BRAND SCREENS

Sources: connect what you already use

Spreadsheets, databases, ERP/CRM, BI dashboards, calendars, web feeds and social channels, all turned into live content inputs.

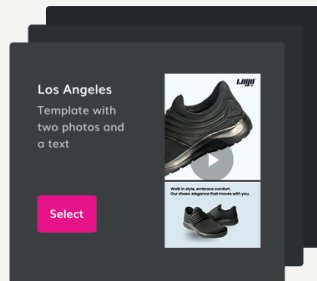

Animated templates, built-in

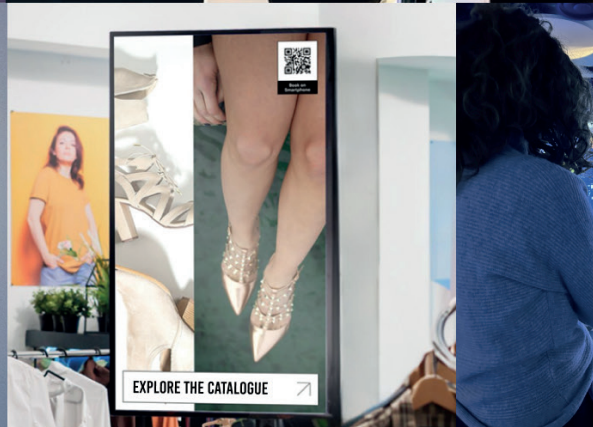

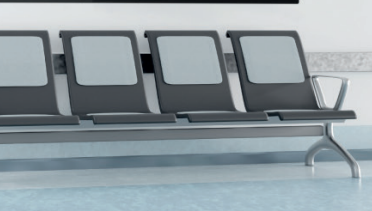

Motion-ready layouts that stay on-brand while data updates: no extra video production, no constant redesign.

Works across any use case

From queue updates and internal messaging, to city events and room schedules, sources and templates scale together as needs evolve.

Animated Templates

Make every display effective across every industry.

The same platform, tailored to every environment and use case.

Retail

Automated pricing and promos and **immersive flagship** experiences with touch and sync.

Corporate

Internal comms and **room booking**, with interactive controllers and live availability on every floor.

Education

Timetables, **room changes** and alerts: instantly shared across campus screens.

Museums & Culture

Interactive journeys and **immersive rooms**, syncing content with lighting, projectors and sensors.

Industry

Safety messages and **production status**, with real-time alerts that stay visible and controlled.

Smart City

Public info and city events, kept live through connected sources and local systems.

Transportation

Departures and gate/platform updates, plus real-time disruption messaging.

Banking

Branch communication and **queue status**, with targeted **campaigns** that stay current and on-brand.

Hospitality

Welcome and wayfinding, plus menus and events tailored by location, time and language.

And more

Bring every display to life

CORE FEATURES, ADVANCED EXPERIENCES AND READY-TO-DEPLOY SOLUTIONS.

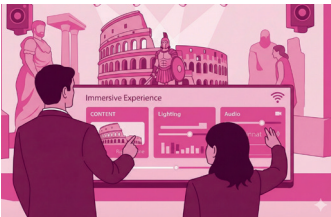

Digital Signage

Playlists, scheduling, layouts and multi-zone screens: built for daily operations.

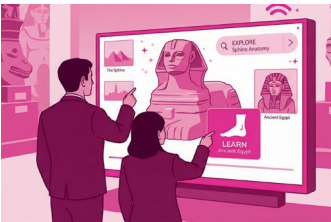

Vertical Solutions

Ready-to-deploy packs: configured fast, scalable across locations.

Immersive & AV Orchestration

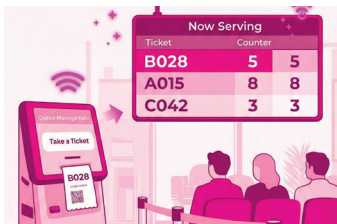

Synchronize screens with lights, audio, projectors and sensors: one control layer.

Interactive Experiences

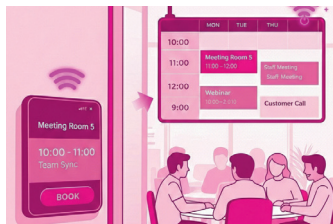

Touch kiosks, directories and controllers to guide, inform and engage.

READY-TO-DEPLOY VERTICAL SOLUTIONS

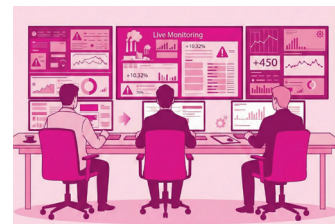

Queue Management

Operate queue kiosks and show live ticket status: always updated from real-time data.

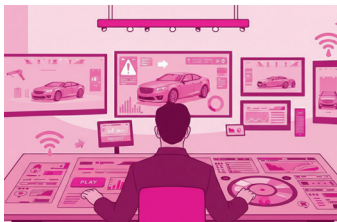

Room Booking

Room occupancy and schedules synced automatically with your calendars.

Data Control Room

Live dashboards for production and operations, with critical alerts always visible.

Interactive Controller

Simple touch interfaces to trigger and manage showrooms or immersive rooms.

Digital Boards

Share documents and updates on touch displays to keep teams aligned in real time.

Custom Solutions

When you need something unique, we extend the platform: connectors, logic and interfaces built to fit your workflow.

The message doesn't stop on the screen

Bring what's on the display to mobile, instantly.
So attention becomes action.

With Livesignage you can:

- Open a dedicated mobile page
- Tap links and explore details
- Save information for later

BENEFITS:

Unlimited depth

Bring specs, extra videos, and full catalogues to the phone beyond what fits on screen.

Instant action

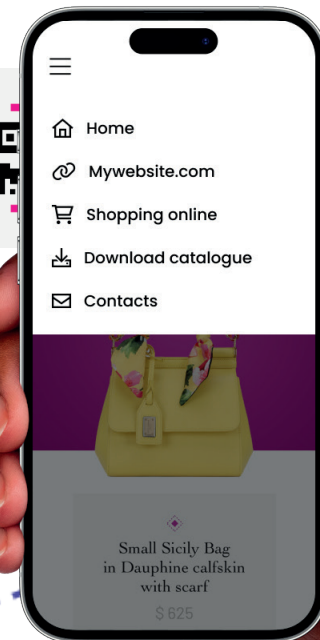

Add buttons to buy, book an appointment, or sign up, right from mobile.

Measure interest

See what people actually open and interact with.

MEASURE YOUR SUCCESS WITH DATA

In Livesignage, data is everywhere. From QR scans to touch interactions, every action can be tracked, so you can:

- **Prove ROI** with real, verifiable results
- **Understand** what captures **attention**
- **Improve communication** based on evidence
- **Invest more** in what works

Livesignage makes every screen a measurable conversion moment.

Experience Designer

Go beyond traditional digital signage.
Design interactive and immersive journeys that sync
content, lights and audio, without custom code.

Easy to create

No-code interface for daily
signage and advanced
interactive/immersive scenarios
without complex tools.

Serious to run

Centralized, secure management
for multi-site networks, with
real-time monitoring and remote
control of your AV ecosystem.

Update Content

ORCHESTRATE SPACES, NOT JUST SCREENS.

- **Total orchestration**

Screens, lights, audio and sensors work as one coordinated experience.

- **Reactive environments**

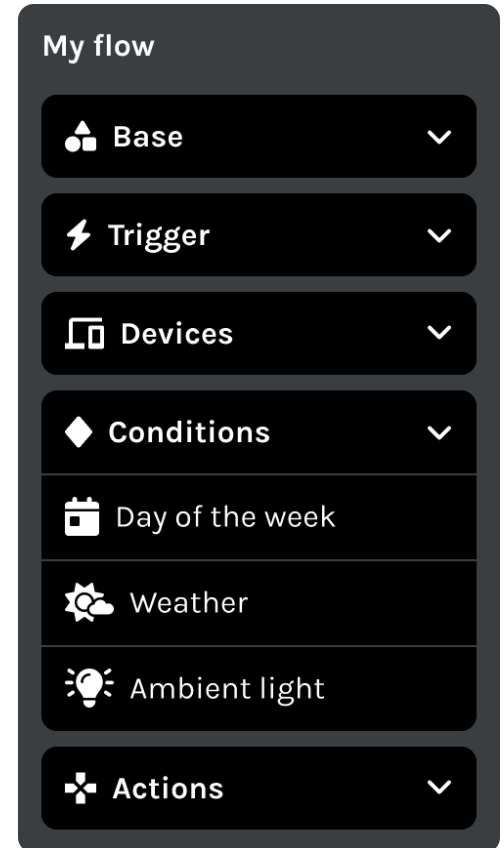

Trigger scenarios from touch, schedules, sensors or live data, so the space responds in real time.

- **Beyond playlists**

Not just looping content: build interactive and immersive journeys across multiple devices.

- **Complex made simple**

Create and update advanced experiences with a visual workflow, no heavy custom builds.

Built for real operations. Everywhere.

Livesignage is built for teams that need screens to work, every day, in every location.

From **one store to global networks**, content stays accurate, consistent, and controlled.

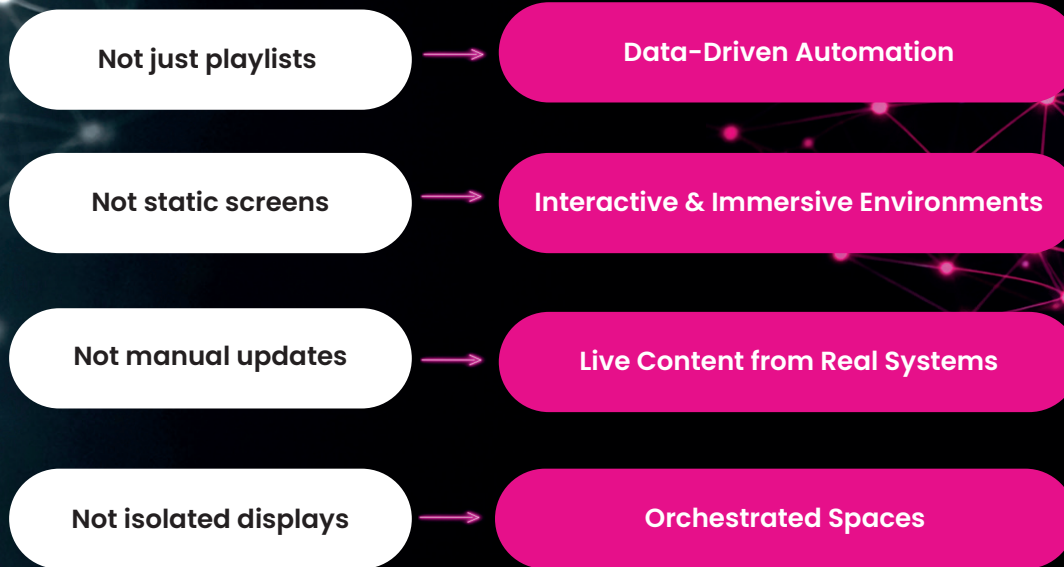

- **Content** that stays fresh **without manual work**.
- Systems that **connect to real data**.
- **Experiences** that remain on-brand **everywhere**.
- A **platform** that's **secure and easy** to govern.
- **Workflows** that are **simple**, even for **complex projects**.
- **Operations** that **hold up** across networks.

Livesignage is the answer.

Livesignage ≠ Digital Signage

Livesignage is used to orchestrate content, devices and experiences across complex, multi-device environments: where reliability and results matter.

**BEYOND DIGITAL SIGNAGE.
BUILT FOR MEASURABLE IMPACT.**
