Cryptocurrency Apps:
Global Trends

★ Apps for managing crypto are getting more user-friendly and are no longer the privilege of the tech-savvy

👤 Compliance with KYC / AML requirements is a must

🔒 Users opt for apps with multiple levels of security

⇄ A single app combines options for managing both crypto and fiat. Users can easily convert funds in both directions

OWNR Ecosystem Solutions

Multi-currency crypto wallet
with the possibility
of crypto-to-fiat exchange

Prepaid Visa cards linked
to a crypto wallet account
(possibility of white label solutions)

Partner portal for
servicing user
group cards

How Can I Use These Features?
With a Visa prepaid card you can:

- Pay employees from all over the world

- Make payments to merchants, agents and partners

- Optimize control over funds and charges
  of various user groups

- Fix the profit and withdraw it to the card
  (for crypto traders)

- Change crypto to fiat and use
  the card for purchases, all in one app

What is Partner Portal?

Partner Portal is a convenient solution for those who want
to order and manage a large number of cards

In the Partner Portal, you will be able to order multiple
cards at once, follow the updates of the issuing, and
manage financial flows all on one website

Client creates an account with OWNR

Client fills out a short questionnaire (name, delivery address) and redeems the code to order the card

Client picks up the card at the delivery address

Client activates the card

KYC Verification

Prepaid Visa Cards
and Partner Portal

Portal Interface:
Key Operations With Cards

Cards

All cards and related data are displayed regardless of the issuance status

Transactions

In this section you will find all transaction information, including card issue dates, balance replenishment, internal transfers, withdrawals etc
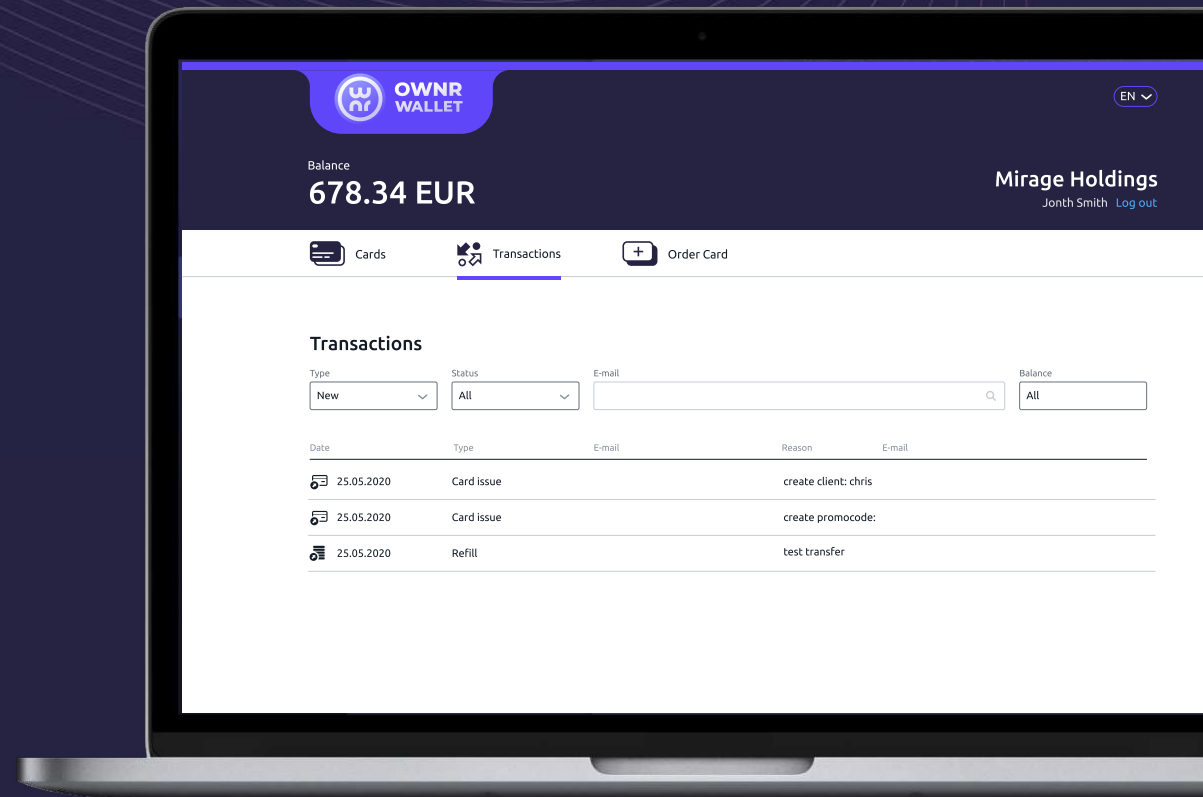

Order a card

Here you can initiate card issuance and monitor transaction statuses

The data in each section can be sorted and filtered for the Partner's convenience
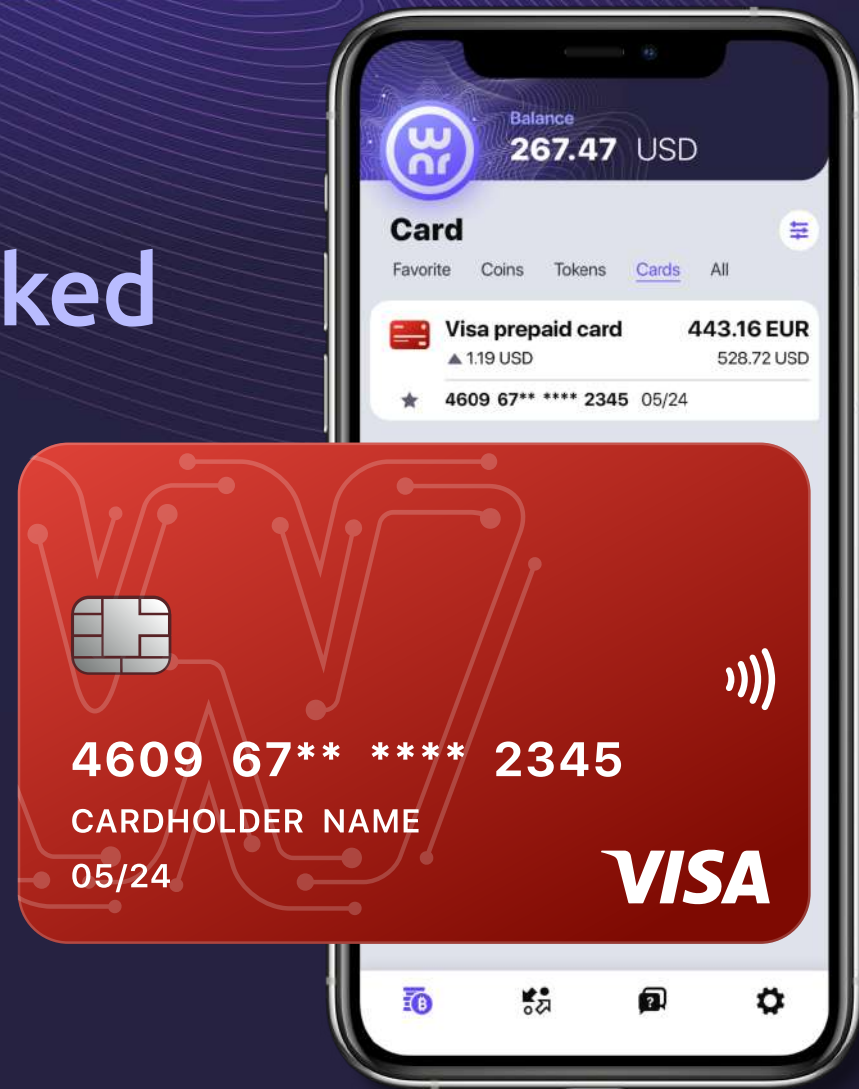

Account Balance Replenishment

- Partner's balance is replenished with a wire transfer sent to OWNR (the bank details will be provided) or cryptocurrency

- Cards can be topped up with internal transfers the Partner initiates in the Partner Portal. It is also possible to replenish the balances of multiple cards at once with the payment registry option

- All the internal transfers are instant. Clients will see the balance update right away

Visa Prepaid Card Linked To Cryptowallet

The Visa prepaid card is connected with OWNR Wallet so that clients can manage crypto and fiat assets in a single app. Card management is available in the mobile app and account in the web version

It is possible to top up the card with BTC, ETH and other assets. Exchange of crypto to fiat takes just a few clicks, with euro almost instantly available on the client's card balance. The card can be easily connected to Apple Pay for smoother purchases offline and online

White Label Solutions

- White Label means the ability to apply your own card design and brand name

- OWNR Wallet offers White Label solutions for you to issue cards in bulks starting from 5K cards

- For White Label, we may consider special fees and limits different from the standard ones

- There are minimal limits applied to initiate a white label project. To be discussed directly with OWNR

White Label Solutions

To start the process, you will have to apply for cobranding with Visa

OWNR Team will assist you with the application.
Visa normally reviews such applications for 3-6 months

One of the steps is fulfilling a special Visa form with the information on the card issuance purpose, your audience profile, use of the cards etc. You also will need to provide additional verification documents

It is highly recommended that you issue a party of ~5-7K cards and work for at least 2-3 months before moving to the cobranding solution, as some processing history will be required for your application to succeed

How Is Technical Support Provided?

Each partner has their own personal manager who will help resolve all operational and commercial issues. Such assistance is provided via email or messengers

Users may address their issues to 24/7 in-app support, email OWNR team

at support@ownrwallet.com

or submit a ticket at
