

# INSTRUCTIONS

## RECONSTRUCTION OF THE PLUH HOUSES, STATE CASTLE AND CHATEAU BEČOV NAD TEPLOU

Fold the basic structure of the castle, piece 1, into shape and glue the outline gradually onto the edges of piece 2.

The red lines beneath the gable of the building have to be pierced through before the next steps.

After cutting the red line in the upper left part of the gable, bend the round corner into shape.

Assemble the roof from pieces 3 and 4, add dormer window 5, and then fit one by one to piece 2.

Reinforce the shape with terrain pieces 8 and 9, and add corners 6 and 7.

Fix the edge of the terrain in place with pieces 10 and 11.

Attach the connecting wall from piece 12 to terrain pieces 8 and 9, assemble the roof from pieces 21 and 22 and fit it to wall 12.

Assemble the round tower from perimeter piece 13, bending the upper edge inwards to form the reverse side of the gallery before shaping it; after closing the perimeter wall, glue roof piece 14 to the shaped edge, but only after inserting the stairs, piece 17.

The last section is the rectangular defensive tower.

Its outer shell is assembled from pieces 15 and 16, with pieces 19 and 20 forming the roof.

Once it is dry, attach the entire tower to terrain pieces 8, 9 and 11 and to connecting wall 12 according to the marked points on the tower shell

# TIPS

Whether this is your first experience with paper models or you're an old hand, it doesn't hurt to refresh the basics. If you're an experienced modeller, please don't feel offended.

## WHAT WILL YOU NEED?

Scissors and glue, above all. Preferably one large pair of scissors and one smaller pair (such as straight manicure scissors). Plain dispersion adhesive (Hercules brand or similar) and a stick of office glue. If you come across a part that isn't made of paper, "super glue" is ideal.

A modelling knife or scalpel and a cutting mat (available at any hardware store or sewing supplies store) are useful for precision work with small parts and cutouts. A steel ruler will help you when you need to make straight cuts and etch folds.

A blunt knife or needle should be used to etch folds.

What is harder to find is a clean workspace with good lighting and, most importantly, peace and quiet.

## SO HOW SHOULD YOU GO ABOUT THE WORK?

Nice and slow, that's the main thing.

Cut out the pieces with scissors or a sharp knife on a mat. Before cutting out the pieces, take a close look and use a blunt knife or needle to groove the folds. Etch the folds on the reverse side of the piece and the folds in the face side from the reverse side (mark the line on the other side by piercing the end points with a needle). Cutout sections in a piece are usually marked with red diagonal lines.

Before gluing the parts together, make absolutely sure you've got everything in the right place. Follow the instructions, or work on the basis of the image of the finished model, and with a little patience the model will be finished in a few hours (some sooner, some later). Ordinary joins are glued with dispersion adhesive, which is water-based glue that usually becomes transparent when dry. When applying card backing to larger areas, stick glue is more suitable, as it doesn't contain as much water and the parts won't warp. It is also recommended to let flat parts dry with a weight on top of them. Parts that are not made of paper (wooden skewers, wires) should be affixed to the model with "super glue".

To make the model easier to handle, it is a good idea to glue the entire terrain onto a base of thicker cardboard when finished. This will stabilise it and prevent damage when you or anyone else handles it.

We recommend retouching the glossy white edges of the paper after gluing or even during gluing. You can use ordinary watercolours, tempera or coloured markers.

If you want the model (especially its coloured edges) to last a long time, you can spray it with clear varnish after assembly. The most affordable is matt acrylic spray varnish, which you can get at your nearest hobby shop.

We wish you a steady hand, plenty of time, lots of patience. And most of all, have fun!
