

Participation

Deloitte believes that collaboration is crucial to minimise our environmental footprint and creating a more sustainable future. Therefore, we collaborate with other companies on a range of initiatives to decrease CO₂ emissions within our sector.

The Deloitte Impact Foundation

Through our own initiative, Deloitte is committed to performing pro bono work and give back to society via a large variety of societal initiatives for NGO's, non-profits and start-ups. We believe that we can make the most difference by sharing our core competences, knowledge and network in societal initiatives to make an impact in the fields of education & employment, sustainability and inclusive society. Through our international sustainability-related initiatives we protect our natural environment by addressing the root causes and effects of global warming and degradation of land, water and air. This focus area aims to support future generations on our planet to live in a healthy and sustainable environment. We have partnered up with among others The Ocean Cleanup and World Wildlife Fund. The budget for this initiative is €350,000 per year.

Anders Reizen

The "Anders Reizen" platform is comprised of Dutch businesses and (non-) governmental organisations. Its purpose is to exchange knowledge and best practices among participants in the realm of environmentally friendly travel, including by road, rail, and air. The platform aims to encourage a shift in behaviour within participating organisations and throughout Dutch society. The goal is to achieve a minimum 50% reduction in CO₂ emissions caused by mobility in 2030, with respect to 2016. Membership in this initiative requires an annual fee of €6,500.

Green Business Club Zuidas

Green Business Club Zuidas is a collaboration between companies and participants of the Zuidas with the ambition to become the most sustainable international business heart of the Netherlands. Businesses, government and knowledge institutions come together in the Energy, Mobility, People, Water & Green and Waste & Circularity teams to develop projects and exchange best practices. Every year, representatives from businesses, government, and other organisations present a sustainability report at the Zuidas to share their knowledge and inspire others.

EV100

EV100 is a global initiative bringing together companies committed to switching their fleet up to 7.5t to electric vehicles and installing charging infrastructure for employees and customers by 2030. Members commit to report on their progress annually and pay an annual fee of \$5,000. Through its European and global network, Deloitte is a member of this initiative and has committed to transition its fleet of 15,000 vehicles to EV by 2030.

Science Based Targets initiative (SBTi)

The Science Based Targets initiative (SBTi) provides a clearly-defined pathway for companies and financial institutions to reduce greenhouse gas (GHG) emissions, helping prevent the worst impacts of climate change and future-proof business growth. The Science Based Targets initiative (SBTi) is a partnership between CDP, World Resources Institute (WRI), the World Wide Fund for Nature (WWF), and the United Nations Global Compact (UN Global Compact).

Carbon Disclosure Project

CDP is a not-for-profit charity that runs the global disclosure system for investors, companies, cities, states and regions to manage their environmental impacts achieving the common goal: fighting climate change. CDP's comprehensive dataset both fuels and tracks global progress towards building a truly sustainable economy for people and planet. Deloitte is part of this initiative and by disclosing our carbon footprint we can provide transparency, track and benchmark our progress.
