Participation sector and branch initiatives

The CO₂ Performance Ladder requires companies to participate in sector- or branch initiatives. The company should thus be aware of the initiatives within the industry.

Ongoing initiatives

Railforum

Railforum is an independent knowledge network that consists of 200 companies and organisations that are active in the rail sector. The aim of Railforum is to exchange knowledge and experiences in order to increase the social and economic efficiency of rail transport. The main focus is accelerating innovations. Railforum offers its services and ensures alignment with other sectors, politics and science.

The members look at Railforum as 'a safe haven' where one can share knowledge with each other openly. The association organizes regular meetings where important players from the rail sector meet, discuss and preferably show initiative and actions. By bringing parties together, Railforum stimulates cooperation within the rail sector.

With a membership of Railforum, SPENO International will have access to a network of more than 3000 professionals employed by all major players in the sector. SPENO can participate in knowledge circles about interesting topics, share knowledge and bring the sector a step further.

Nederland CO₂ Neutraal

Nederland CO₂ Neutraal is a Dutch initiative aimed at inspiring participants, increasing the knowledge on CO₂ reduction measures and amplifying a sustainable network. These goals are met through four events organized every year and the facilitation of different workshops. Cost that need to be made for the CO₂ performance ladder are accepted by the management.
