## FLEX WALL

## Predia Flex Wall

The Predia Flex Wall is an electric lift solution for floor and wall mounting, allowing you to smoothly, quickly, and safely position your touchscreen or display at the ideal height. Perfect for fixed installations, with a secure anchor in any space.

### ✓ Safety First

The wide, double-column design provides exceptional stability, even for large displays. The dual anti-collision system ensures reliable performance in daily use. The Predia Flex Wall meets the highest safety standards: CE, TÜV/GS, and UL-EN-ICE 62368\*.

### ↕ Accessories

Fully compatible with accessories such as whiteboard frame, laptop tray, keyboard tray, and optional floor plate. Easily adaptable for classrooms, meeting rooms, and training spaces.

### ✚ Flexible

Suitable for displays up to 98" (16:9) or 105" (21:9) and up to 140 kg. The VESA range extends to 800x600, making the Flex Wall compatible with a variety of display sizes.

### ♻️ Durable

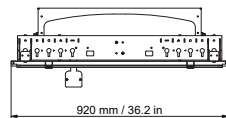

The modular design adapts to your evolving needs. High-quality materials ensure a long service life and reliable performance.

### ★ Easily Adjustable

With a height range of 980 mm and fast-acting motors, the display can be smoothly and precisely positioned at the desired height with the push of a button.
