Standard Colours in ABS Plastic

All our Thermobox® can be delivered in one of our three standard colours black, red and blue. Timeless colours that suit all environments and settings.

Standard

Timeless options that ensures both functionality and aesthetic appeal in any scenario. These colours enhance the visual coherence of your food transport solutions while reflecting enduring style and versatility.

BLUE

BLACK

RED

Stainless Steel Exterior

A stainless steel exterior on a Thermobox® provides a sleek, professional appearance, ideal for maintaining food safety standards.

Stainless steel's non-porous surface resists bacterial growth, making it an ideal material for food handling as it helps maintain hygiene standards by preventing contamination. Its durability allows for easy cleaning and sterilization, ensuring safe and sanitary food preparation environments.

Colour Collection

POWDER COATED STAINLESS STEEL

Create a colourful Thermobox® with one of the ten colours from our collection. The smooth stainless steel exteriors of our thermoboxes undergo powder coating at our own facilities, utilizing high-quality powders to ensure superior finish and durability.

WHAT IS POWDERCOATING?

The stainless steel is coated with an electro-statically applied, powder coat finish. The electro-static application method ensures 100% coverage of the metal's surface area and provides a consistent and tough finish that far exceeds other conventional paint finishes. The resulting finish is knock and scratch resistant, impervious to moisture, highly resistant to corrosion and easy to clean.

Neutrals

In their understated simplicity, neutral colors convey a sophisticated and calming atmosphere, making them the cornerstone of a timeless and adaptable design palette.

Pastels

Pastel colors, evoke a sense of softness and tranquility that effortlessly captivates the eye. They offer a subtle yet impactful way to infuse spaces with a touch of serenity and warmth.

Impact

The use of vibrant and impactful colors is not merely a design choice; it's a statement, a celebration of creativity that transforms environments into vivacious expressions of bold individuality and lively sophistication.

SDX THERMOBOX®

Logos & Patterns

PUT YOUR MARK ON THE THERMOBOX®

Adding a logo or pattern to a Thermobox® will personalize your food transport. Various designs can be created with vinyl material, and its durability ensures that logos and patterns remain vibrant and intact. In addition to increasing brand visibility, this customization creates a polished and professional appearance.

Window

The inclusion of an optional glass window in the door of your Thermobox® offers a convenient feature, allowing you to effortlessly inspect the contents without needing to open the box.

This practical addition enhances efficiency in food handling, enabling quick visual confirmation of the items inside, which is particularly valuable in busy catering or delivery settings. By providing a clear view of the contents, the glass window promotes better organization and helps maintain the optimal temperature within the Thermobox®, ensuring that your food stays fresh and ready for service. Additional LED-lights can be installed in the box.
