

CHEMTOGETHER

2022

10 YEARS

Welcome to Chemtogether 2022

We warmly welcome you to the 10th year of the Chemtogether fair, one of the largest recruiting and networking events with companies of the chemical and pharmaceutical industries in Switzerland and neighboring countries. Our goal is to give you, the academic talent in the fields of chemistry, chemical and process engineering, pharmaceutical and life sciences, an opportunity to connect with future employers and to widen your professional network.

This year's company portfolio again reflects the many institutes and research areas that constitute ETH Zürich's Department of Chemistry and Applied Biosciences. It includes the largest chemical producer in the world, market leaders in precision instruments for chemical analytics and sensors, leading pharma companies, an international IP law firm as well as highly specialized smaller players. We want to encourage you to take advantage of this unique opportunity of having 18 renowned companies right here on Hönggerberg campus and take a glance at the opportunities waiting outside of academia.

Finally, we want to thank the team behind Chemtogether for their effort and time given to the planning, organization, and coordination of the event. This fair is the product of their voluntary dedication and motivation to provide the best possible experience and would not have been possible without them.

If you'd like to join the team of Chemtogether 2023, do not hesitate to talk to us or contact us at contact@chemtogether.ethz.ch.

Gabriela Libort

Co-Heads of the Chemtogether Organizing Committee

Dominik Zürcher

Where and When

Chemtogether will take place on the 8th and 9th of November 2022 on the G floor of the HCI building on the ETH Science City Campus Höggerberg. Gold and Silver Partners will give 20 min long flash presentations including Q&A during lecture breaks in **HCI G2**.

The fair will begin at 9.30 and end around 17.00. Coffee and croissants will be distributed on both days.

Participating Companies

During the two days of the Chemtogether Career Fair, you will have the chance to talk to representatives of eighteen companies, which are presented in detail in the following fair guide.

BASF Schweiz AG, BASF Coating Services AG, BASF Intertrade AG, BASF Agro B.V., Chemetall GmbH Swiss Branch, Rolic Technologies Ltd.

We are

At BASF, we create chemistry for a sustainable future. We combine economic success with environmental protection and social responsibility. The approximately 110,000 employees in the BASF Group work on contributing to the success of our customers in nearly all sectors and almost every country in the world. Further information at www.basf.com.

We offer

BASF offers a variety of entry and career opportunities at various sites for natural scientists, engineers and digital talents:

- Direct entry: With a direct entry you will be assigned challenging tasks from day one.
- Trainee programs: Our TOP START, START IN and Inside trainee programs offer ambitious university graduates an exciting career start in various fields.
- Internships and thesis

We are looking for

BASF relies on committed people with different experiences and perspectives. In addition to specialist knowledge and practical skills, the company values personal skills: A high degree of team spirit, good communication skills and intercultural skills are just as important as a sense of responsibility, entrepreneurial spirit and innovative spirit.

3200

Tailored FPH program including internship at a Medical Center and financial support

Career Options
Thesis, Internship, Trainee, Direct entry

Company founded in
2001

We are

One team, 3200 colleagues, 62 medical centers, 50 pharmacies and 36 dental centers. Medical, pharmaceutical and therapeutic specialists work hand in hand to provide integrated care from prevention to rehabilitation. Become part of our success story!

We offer

Join us while you are still studying pharmacy, for example for your internship, your residency or a student job. After graduation, you start as a pharmacist at one of our pharmacies. In line with our commitment to promoting the next generation of pharmacists, we will help you develop individually - all the way to a management position.

We are looking for

You want to shift from silo thinking to integrated healthcare with more intensive communication between pharmacies, medical centers, therapy and dentistry. Be the first point of contact for almost all health matters, offer health consultations and services such as vaccinations, and thus become the hub to the other professionals in the Medbase network.

Move. Yourself and us.

At Medbase, pharmacists, doctors, therapists, and other healthcare professionals work hand in hand to provide coordinated care from prevention to rehabilitation.

Are you ready to become part of this success story?

Join us!

We are

HOFFMANN EITLE is one of Europe's leading firms specializing in the protection of intellectual property. With eight offices across Europe, the firm is one of the largest of its type. We advise our clients on all legal and technical issues regarding patent applications and patent prosecution and are well known for our expertise in opposition and litigation proceedings.

We offer

The only route to becoming a patent attorney is by taking a position as a trainee, and being trained by a qualified patent attorney. We offer our trainees top-quality training (our pass rates for the Qualifying Exams are well above average), good long-term career perspectives, and a dynamic and rewarding work environment.

We are looking for

Individuals with

- a technical qualification at university level (M.Sc. or Ph.D.)
- excellent English skills (written and spoken)
- first-rate technical comprehension
- ability to analyze complex facts and present these in precise technical terms

We are

Reaching out for more! The purpose of Idorsia is to discover, develop and bring more innovative medicines to patients. We have more ideas, we see more opportunities and we want to help more patients. In order to achieve this, we will develop Idorsia into one of Europe's leading biopharmaceutical companies, with a strong scientific core.

We offer

A state-of-the-art workplace in an inspiring environment, a competitive compensation package and a good balance between work and private life.

We are looking for

Simply put – our success depends on our people! This is why we want to recruit, engage and develop talented people who are passionate about working together and applying science to bring benefits to patients.

Additional Facts

Our employees come from over 40 nationalities.

We have more than 550 state-of-the-art laboratory workspaces.

We launched two new products in 2022.

Join the future of product innovation

The Chemtogether Team

Johanna Lueckel, Laura Völker, Gabriela Libort, Thea Ortner, Dominik Zürcher, Philip Blank, Vivian Kempf, Noemi Cerboni, Anne Lüscher, Alexandra Krestnikova, Thomas Schaer

Our Purpose

Chemtogether is an annual career fair established in 2013, covering local and international chemical and pharmaceutical industries. Our ambition is to foster the connection between academia and industry, facilitating the transition between studies and a subsequent profession for students and PhDs alike. This event invites its visitors to explore, with enthusiasm and curiosity, the great variety of possible disciplines and careers awaiting them in industry, while also encouraging them to expand their network.

Our Organisation

Chemtogether is organised jointly by ETH student associations and the scientific staff. The VCS (Union of Chemistry Students) and APV (Union of Students of Pharmaceutical Sciences) are the student associations responsible for the majority of students of the D-CHAB, which includes students of Chemistry, Chemical Engineering, and Interdisciplinary as well as Pharmaceutical Sciences. The VCS is in turn a part of the VSETH (Union of Students at the ETH Zürich), which represents the broader interests of all Bachelor and Master students of ETH. On the other hand, the VAC (Academic Association of Scientific Staff in Chemical Laboratories) represents all scientific staff, PhD students and Postdocs of the Department.

Philochem
innovating chemistry

70% of people will be living in cities by 2050
The world needs solutions
We need you

 **BASF**

We create chemistry

By 2050, the world's population will be consuming 50 % more energy. In an effort to curb the consumption of energy, BASF is working actively on innovative solutions to everyday demands, like creating washing detergents that are just as effective in low temperatures, lowering the requirement for additional electricity consumption. The world needs solutions. We need you.

Are you up for the challenge?
